   Dr. Harold W. Baillie, Provost/Academic Vice President was the guest speaker. Dr. Baillie began by stating that communication enhances and preserves our community and that the staff senate plays an important part in achieving this goal. He thanked the senate for inviting him to speak today.

   Dr. Baillie reported that he has two charges: academics, which includes offering courses, staffing, and keeping faculty involved, etc., and planning and budgeting so that we can achieve our goals.

   Dr. Baillie began by talking about planning and development of the University.

   - Presidential Search – He stated that the search is a confidential closed search and that the search committee will be looking at the top candidates shortly. He reported that the Board of Trustees is committed to look for a Jesuit and that he believes that it is important for the University to have a Jesuit lead us. He said that if anyone has questions they should contact their search committee representatives.

   - Planning for the academic side of the institution: Dr. Baillie said that we are laying a strong foundation to reach our goal of becoming the best Masters I Institute in the country institution. He reviewed some of the areas he is working on:
     - Ensure that we are offering quality programs in all the colleges
     - Continue to develop quality programs
       - i.e. the Exercise Science Major was designed to be a feeder program for DPT, but it has gone beyond that. We are now looking to develop other programs within Exercise Science.
     - A strong focused Graduate school
       - focus on professional training,( i.e. MBO and Health Admin.)
       - continue to develop quality online courses
     - Campus Facilities growth is evident. The new science building and the Mulberry Street project will be completed this year. He said that we do need new facilities from Exercise Science, OT and PT.
**Questions & Answers:**

Q: How did you promote the online courses to faculty and how did you get them to buy in?
A: Faculty understand the market and what the possibilities are. When we proposed the MBO program we were prudent and had an agreement with the faculty that they would teach the courses until we knew that the program would be a success. We are now hiring faculty, to teach those courses, who will be paid out of the profits from the program. He added that we are looking to hire another faculty member for Health Administration. He said we also pay faculty to develop programs and courses during the summer.

Q: Could you comment on organizational change?
A: Dr. Baillie said that the change adjusts the number of direct reports to the President and it was done to assist Father better manage his calendar. He said that it is too early to know how it’s working. He said that membership of the committees has not changed, but that there are times when the new focused group meets. He said that there are some advantages and noted there is more cooperation between Student Affairs and Academic Affairs.

Q: Can you talk about your proposal to change the total number of credits required for graduation and the proposed GE changes?
A: Dr. Baillie said that the proposal has survived and has been embraced by the faculty, for the most part. He explained that part of the proposal is to reduce the number of credits required to graduate from 130 to 120. He said that, in order to do that we will be dropping the PHED requirements, as well as, public speaking, writing and the freshmen seminar requirements. He said that this will allow students to have free electives that are free and not required. Dr. Baillie said that he also proposed a new freshman seminar for 3 credits. They will be taught by full-time faculty and will have a cap of 18 students. We have six to eight week in the fall to get students excited about their education and being here and research shows that students that connect with faculty have a higher retention rate. We have been running pilots this semester and the general consensus has been positive.

Dr. Baillie said that the Faculty Senate has a sub-committee looking at the proposal. He said that he would like to have the seminars up and running in the Fall of 2011.

Q: How will the reductions of credits affect the budget?
A: Dr. Baillie said that because we have flat tuition it does not affect tuition revenue.

Q: What are the major challenges during the transition?
A: Dr. Baillie said that we need someone to keep up the enthusiasm we have had during Fr. Pilarz’s term. He said that:
- We will have to see what relationship the new President will have with senior administration
- What are the new President’s goals for the institution?
- How are they the same and how is it different?
- Getting a solid budget ready to give the new President time to get established.
- Will he trust the current leadership to carry on during the introduction of the new President?
- A big challenge for the new President will be contract negotiations.

Dr. Baillie thanked the Senate for the opportunity to address the senate.
