Recreation Center (Per term) 70.00
Student Health Services (per term)

Additional information related to this program and/or the information provided above

Supply chain management has been gaining popularity in recent years as companies recognize the strategic importance of efficiently managing the flow of raw materials, inventories, and finished goods from point-of-origin to point-of-consumption. This involves the study of a variety of topics such as managing suppliers and procurement, outsourcing, assuring product quality, and customer relationship management, among others. Since a chain is only as strong as its weakest link, integrating such activities across the supply chain is key to extracting synergies that lead to a win-win outcome for all partners. The graduate certificate in supply chain management will provide managers/supervisors with the skills they need to succeed in this rapidly growing business discipline.

Curriculum

The certificate program comprises the following four 3-credit courses.

OM 503 - Operations Management
OM 540 - Supply Chain Management
OM 545 - Quality Management
ERP 510 - Integrated Enterprise Management Systems

Prerequisites

Students lacking appropriate undergraduate coursework or background in the areas of statistics, management science, or operations management will be required to complete the corresponding 1-credit foundation module below:

MBA 501A - Statistics Module
MBA 501B - Management Science Module
MBA 504C - Operations Management Module
