**Academic Support Services**

**Tutoring**

**Writing Center**

**Disabilities**

**Reading Services**

**Technology**
The CTLE offers a number of programs to enrich your academic experience.

- **Peer Tutoring** provides small group or, in some cases, individual one-on-one tutoring sessions for students to become self-regulated learners.

- Alongside your course, **Supplemental Instruction** offers regularly-scheduled, informal review sessions, led by an experienced tutor, where students compare notes, discuss readings, solve problems and much more. The goal of Supplemental Instruction is to incorporate what to study with how to study.

- **Drop-in Tutoring Labs**, offered in a variety of subjects, provide immediate tutoring assistance without the need for an appointment.

- **Online Tutorials** outline study skills necessary for academic success. Contact Mary Ellen Pichiarello or Tom Leong, or visit our website for more info.

- **Writing well is an essential component to academic success.** In the Writing Center, our Consultants will work with students on all aspects of writing, such as:
  - Planning and drafting
  - Revising for clarity and coherence
  - Working with and integrating sources
  - Editing for correctness

  Students may meet with a Writing Consultant for one or for several sessions in order to accomplish their goals. Online consultants are also available. Contact Mary Burkhart or visit our website for more info.

- **Because students spend about 80% of their study time in reading**, they must develop efficient and purposeful reading and study skills. For this reason, the CTLE offers services such as:
  - Nelson-Denny Reading Test
  - Test-taking strategies
  - Reading evaluation
  - Academic coaching

  and much more. Contact James Muniz or visit our website for more info.

- **You cannot teach a man anything, you can only help him find it within himself.** – Galileo Galilei
