I can read. Why do I need reading services?

College reading is very different from the academic reading you've done in the past. In college, you will be spending about 80% of your study time reading texts, journal articles, and will be dealing with an increased study workload. Becoming an active, critical reader will help you to make the most of your study time and will help you to be successful!

We can help you to
• Improve reading comprehension
• Increase vocabulary
• Enhance memory and recall

How reading services can assist me?

We offer:
• Reading evaluations
• Active reading techniques

Make an appointment with the CTE Reading Specialist to discuss which services would increase your chances of success.

Often when I read a page of text, I have no idea what I have read when I finish. Does this indicate a problem with reading?

No! The brain is a powerful instrument that can process information much more quickly than we can read and decode words on a page. By using pre-reading and other active reading strategies, we can harness more of the brain's power and improve memory, recall, and critical thinking. The CTE Reading Specialist can show you how to personalize your reading so that you are making the most of everything you read.

I can study for hours, and it seems to have no effect.

Let's discuss your current study strategies to fully understand why you're struggling. Effective study requires planning, questioning, time management, and self-monitoring. The CTE Reading Specialist can show you how to maximize your study skills.

Can my reading skills

Yes! Reading is a skill, and all skills can be improved with practice. Visit the CTE Reading Specialist to get started.
