The University of Scranton

Physical Therapy – Doctor of Physical Therapy Program

Students are required to complete four full time internships as specified in the DPT plan of study. Internship sites are located throughout the United States, but are predominately in Pennsylvania, New York and New Jersey. The Physical Therapy program has fully executed contracts with approximately 425 clinical sites across the United States, allowing our students ample choices to satisfy program requirements. The clinical education experiences are provided in a variety of clinical practice settings designed to model clinical practice environments.
