Rights Reserved

The President and officers of The University of Scranton reserve the right to change the information, regulations, requirements and procedures announced in this catalog; to change the requirements for admission, graduation or degrees; to change the arrangement, scheduling, credit, or content of courses; and to change the fees listed in this catalog.

The University reserves the right to refuse to admit or readmit any student at any time should it be deemed necessary in the interest of the student or of the University to do so and to require the withdrawal of any student at any time who fails to give satisfactory evidence of academic ability, earnestness of purpose, or active cooperation in all requirements for acceptable scholarship.

Notice of Nondiscriminatory Policy as to Students

The University of Scranton admits students without regard to their race, color, religion, national origin, ancestry, sex or age to all the rights, privileges, programs, and activities generally accorded or made available to students at the school. The University does not discriminate on the basis of race, color, religion, national origin, ancestry, disability, sex or age in administration of its educational policies, admission policies, scholarship and loan programs, and athletic and other school-administered programs.

Otherwise qualified persons are not subject to discrimination on the basis of handicap or disability.

If you believe you have been discriminated against because of race, color, religion, national origin, ancestry, sex, age, or handicap or disability, please contact the Director of Equity and Diversity.

It is the personal responsibility of each student to acquire an active knowledge of all pertinent regulations set forth in the Undergraduate Catalog.

Within the various schools and colleges the only official interpretations or modifications of academic regulations are those which are made in writing by the dean of the school or college of which the student is a member, or such interpretations or modifications of academic regulations as are approved by the appropriate dean in writing.

The University of Scranton is a Catholic and Jesuit university animated by the spiritual vision and the tradition of excellence characteristic of the Society of Jesus and those who share its way of proceeding. The University is a community dedicated to the freedom of inquiry and personal development fundamental to the growth in wisdom and integrity of all who share its life.
The University of Scranton is a Catholic and Jesuit university animated by the spiritual vision and the tradition of excellence characteristic of the Society of Jesus and those who share its way of proceeding. The University is a community dedicated to the freedom of inquiry and personal development fundamental to the growth in wisdom and integrity of all who share its life.
The Mission Statement of The University of Scranton

The University of Scranton is a Catholic and Jesuit university animated by the spiritual vision and the tradition of excellence characteristic of the Society of Jesus and those who share its way of proceeding. The University is a community dedicated to the freedom of inquiry and personal development fundamental to the growth in wisdom and integrity of all who share its life.

Characteristics and Goals

As a Catholic and Jesuit University, The University of Scranton will:
1. Share with all the fullness of the Catholic intellectual tradition, the distinctive worldview of the Christian Gospels, and the Spirituality of St. Ignatius Loyola.
2. Educate men and women for others who are committed to the service of faith and promotion of justice.
3. Invite persons from other religious traditions and diverse backgrounds to share in our work and contribute to our missions.

As a Comprehensive University, The University of Scranton will:
4. Offer degree programs at the undergraduate and graduate levels in the traditional disciplines of the liberal arts as well as in pre-professional and professional areas.
5. Provide educational opportunities and support programs that promote the mission of the University, meet the needs and interests of traditional and non-traditional students, and serve the needs of the local region.
6. As a University in the Liberal Arts Tradition, The University of Scranton will:

   a. Offer undergraduate students a core curriculum in the Jesuit tradition based on the arts and sciences.
   b. Impart to students the importance of gathering, evaluating, disseminating, and applying information using traditional and contemporary methods.
   c. Provide learning experiences that reach beyond the fundamental acquisition of knowledge to include understanding interactions and syntheses through discussion, critical thinking, and application.
   d. Promote a respect for knowledge and a lifelong commitment to learning, discernment and ethical decision making.

As a Caring Community, The University of Scranton will:
7. Foster a spirit of caring, grounded in Jesuit tradition of cura personalis, that enables all members of our community to engage fully in our mission, according to their needs and interests.
8. Facilitate the personal growth and transformation of all members of the University community through a spirit of caring.
9. Extend this spirit of caring to the wider community through civic engagement and service.
10. Enhance our sense of community by demonstrating high standards and care for our physical environment.

As a Dynamic Institution, The University of Scranton will:
11. Develop goals and aspirations by systematically reflecting on opportunities for and challenges to fulfilling our mission.
12. Fulfill our mission through careful planning and management of resources in order to achieve our aspirations while remaining affordable to our students.
13. Engage the University community in purposefully monitoring progress toward the accomplishment of our mission.

History of the University

The University of Scranton was founded as Saint Thomas College by Bishop William G. O’Hara, the first Bishop of Scranton, who had always hoped to provide an opportunity for higher education in the Lackawanna Valley. In August of 1888, with few resources at hand, he blessed a single block of granite as a cornerstone for his new college, which would admit its first students four years later. (The cornerstone of Old Main is preserved in the wall of St. Thomas Hall located at the corner of Linden Street and Monroe Avenue.) The college was staffed by diocesan priests and seminarians until 1896 and then, for one year, by the Xavierian Brothers. From 1897 until 1942 the school, which was renamed The University of Scranton in 1938, was administered for the Diocese by the Christian Brothers. In the late summer of 1942, at the invitation of Bishop William Hafey, 18 Jesuits, led by Rev. Coleman Nevils, S.J., the newly appointed president, arrived on campus to administer the University.

The Jesuits restructured and strengthened Scranton’s traditional and pre-professional programs with an emphasis on the liberal arts, which are the foundation for every program at a Jesuit university. This emphasis is intended to give students an appreciation for all disciplines as they develop specific subject knowledge.

The University has flourished under the Jesuits, growing from a primarily commuter school with fewer than 1,000 students to a broadly regional, comprehensive university with a total enrollment of about 8,700 students and roughly 4,700 students in undergraduate, graduate, and non-traditional programs.

As it enters the 21st century, the University is building on its historical and educational heritage, guided by a 2000-2005 Strategic Plan entitled A Community of Scholars – A Culture of Excellence and a 20-year Facilities Master Plan also adopted in 2000.

The University remains committed to enriching the quality and variety of its academic offerings with recent additions in such fields as Electronic Commerce, Human Resources and Enterprise Management Technology. In addition, it continues to invest in its physical plant constructing 25 new buildings and renovating 24 others since 1984. New construction since 1998 has included McGuinn Hall, a four-story home for The Panuska College of Professional Studies; Mulberry Plaza and Madison Square townhouses; and Brennan Hall, a 71,000 sq. ft. building that provides technologically advanced classroom and office space for The Kania School of Management. (The fifth floor of Brennan Hall is home to the McShane Executive Center, an educational resource for Northeastern Pennsylvania.)

The University Seal

The principal colors of the shield are the traditional colors of the University, white and royal purple. On the purple field there is a horizontal silver bar, containing, in purple, a star taken from the seal of the Brothers of the Christian Schools and from the seal of Saint Thomas College, predecessor of the University, and two stacks of wheat from the obverse of the coat of arms of the Commonwealth of Pennsylvania.

The upper half of the shield contains, in gold, two wolves grasping a cauldron suspended from a chain; they are taken from the coat of arms of the family of Saint Ignatius Loyola, and they identify the University as a Jesuit institution. Below the silver bar is a golden rising sun, symbolic of Saint Thomas Aquinas, the shining light of the Church and the Patron of the University.

Indicating the Diocese of Scranton and William Penn, founder of the Commonwealth, the black border of the shield reproduces the border of the shield of the Diocese and the silver hemispheres are taken from William Penn’s coat of arms.

The crest is a golden cross of the particular style known as Ponnece. It symbolizes Christ, the goal and the norm of the University’s educational efforts, and it complements the motto, which the University has had since it was entrusted to the care of the Christian Brothers in 1899: Religio, Mores, Cultura.

The outer ring surrounding the seal includes the name and founding date of the University and reference to the Commonwealth of Pennsylvania.
The Mission Statement of The University of Scranton

The University of Scranton is a Catholic and Jesuit university animated by the spiritual vision and the tradition of excellence characteristic of the Society of Jesus and those who share its way of proceeding. The University is a community dedicated to the freedom of inquiry and personal development fundamental to the growth in wisdom and integrity of all who share its life.

Characteristics and Goals

As a Catholic and Jesuit University, The University of Scranton will:

1. Share with all the fullness of the Catholic intellectual tradition, the distinctive worldview of the Christian Gospels, and the Spirituality of St. Ignatius Loyola.
2. Educate men and women for others who are committed to the service of faith and promotion of justice.
3. Invite persons from other religious traditions and diverse backgrounds to share in our work and contribute to our missions.

As a Comprehensive University, The University of Scranton will:

4. Offer degree programs at the undergraduate and graduate levels in the traditional disciplines of the liberal arts as well as in pre-professional and professional areas.

14. Develop goals and aspirations by systematically reflecting on opportunities for and challenges to fulfilling our mission.
15. Fulfill our mission through careful planning and management of resources in order to achieve our aspirations while remaining affordable to our students.
16. Engage the University community in purposefully monitoring progress toward the accomplishment of our mission.

History of the University

The University of Scranton was founded as Saint Thomas College by Bishop William G. O’Hara, the first Bishop of Scranton, who had always hoped to provide an opportunity for higher education in the Lackawanna Valley. In August of 1888, with few resources at hand, he blessed a single block of granite as a cornerstone for his new college, which would admit its first students four years later. (The cornerstone of Old Main is preserved in the wall of St. Thomas Hall located at the corner of Linden Street and Monroe Avenue.)

The college was staffed by diocesan priests and seminarians until 1896 and then, for one year, by the Xavierian Brothers. From 1897 until 1942 the school, which was renamed The University of Scranton in 1938, was administered for the Diocese by the Christian Brothers. In the late summer of 1942, at the invitation of Bishop William Hafey, 18 Jesuits, led by Rev. Coleman Nevils, S.J., the newly appointed president, arrived on campus to administer the University.

The Jesuits restructured and strengthened Scranton’s traditional and pre-professional programs with an emphasis on the liberal arts, which are the foundation for every program at a Jesuit university. This emphasis is intended to give students an appreciation for all disciplines as they develop specific subject knowledge.

The University has flourished under the Jesuits, growing from a primarily commuter school with fewer than 1,000 students to a broadly regional, comprehensive university with a total enrollment of about 4,700 students in undergraduate, graduate, and non-traditional programs.

As it enters the 21st century, the University is building on its historical and educational heritage, guided by a 2000-2005 Strategic Plan entitled A Community of Scholars – A Culture of Excellence and a 20-year Facilities Master Plan also adopted in 2000.

The University remains committed to enriching the quality and variety of its academic offerings with recent additions in such fields as Electronic Commerce, Human Resources and Enterprise Management Technology. In addition, it continues to invest in its physical plant constructing 25 new buildings and renovating 24 others since 1984.

New construction since 1998 has included McGurrin Hall, a four-story home for The Panuska College of Professional Studies; Mulberry Plaza and Madison Square townhouses; and Brennan Hall, a 71,000 sq. ft. building that provides technologically advanced classroom and office space for The Kania School of Management. (The fifth floor of Brennan Hall is home to the McShane Executive Center, an educational resource for Northeastern Pennsylvania.)

The University Seal

The principal colors of the shield are the traditional colors of the University, white and royal purple. On the purple field there is a horizontal silver bar, containing, in purple, a star taken from the seal of the Brothers of the Christian Schools and from the seal of Saint Thomas College, predecessor of the University, and two stacks of wheat from the obverse of the coat of arms of the Commonwealth of Pennsylvania.

The upper half of the shield contains, in gold, two wolves grasping a cauldron suspended from a chain; they are taken from the coat of arms of the family of Saint Ignatius Loyola, and they identify the University as a Jesuit institution. Below the silver bar is a golden rising sun, symbolic of Saint Thomas Aquinas, the shining light of the Church and the Patron of the University.

Indicating the Diocese of Scranton and William Penn, founder of the Commonwealth, the black border of the shield reproduces the border of the shield of the Diocese and the silver hemispheres are taken from William Penn’s coat of arms.

The crest is a golden cross of the particular style known as Pance. It symbolizes Christ, the goal and the norm of the University’s educational efforts, and it complements the motto, which the University has had since it was entrusted to the care of the Christian Brothers in 1899: Religio, More, Cultura.

The outer ring surrounding the seal includes the name and founding date of the University and reference to the Commonwealth of Pennsylvania.
The Faculty

Over 250 faculty and administrators participate in the University's educational enterprise. They hold degrees from 135 different universities in 30 countries on five continents. Cambridge and the University of London in England; Louvain and the Gregorian in Europe; the University of Calcutta in India; Sophia University in Japan; Soochow University in China; Berkeley, Yale, MIT, Notre Dame, Harvard and Georgetown in America – all are represented among the faculty.

By its nature and function, a university faculty constitutes the most metropolitan element in a community. Hindu and Muslim, Christian and Jew, ministers and rabbis – scholars and teachers all – are found on the University's faculty.

The Jesuit tradition is carried on at the University not only by the 12 Jesuits engaged in teaching or administration, but by the fact that almost half of the faculty hold at least one degree from a Jesuit college or university. As indicated in the Mission Statement, excellent teaching and scholarship are regarded as complementary at this institution. In 2004 there were over 581 scholarly works, including books and book chapters, articles in prestigious peer-reviewed journals, patents and patent applications, presentations and proceedings, and other creative works. Subjects reflect a wide range of current topics, including white energy transfer at the molecular level, to applications, presentations and proceedings, peer-reviewed journals, patents and patent books and book chapters, articles in prestigious journals. Subjects work in the Public Relations and Admissions offices, computer center, as resident assistants in the dormitories, as research assistants and interns for departments and the registrar. Similarly, they participate in the University's decision-making. Seven students are elected by the student body to serve on the University Council. Others serve with departmental chairpersons and faculty on the conferences which recommend to the deans changes in academic programs. Students also serve with other members of the University community on the various search committees which recommend candidates for the principal administrative posts from president to dean.

Student Diversity and Participation

As our faculty come from around the world, so do our students. Twenty-seven states and twenty-two foreign countries are represented in the University’s student body of nearly 4,700. In turn, through the Fulbright and Study Abroad programs, University of Scranton students matriculate at such foreign universities as Oxford, Leuven, Madrid, Tubingen, Mainz, Oslo, Fribourg, Cologne, Salamanca, Lancaster, Berne, Strasbourg, the Sorbonne and University College, Dublin. This interchange of students contributes to the diversity and intellectual life of the University.

Much of the work in this university community is accomplished through student input. Considerable scientific research at the University is done by undergraduate students in the laboratories and in the field. With faculty assistance, the University newspaper and yearbook are edited and managed by students, and students publish articles and abstracts in national scholarly journals. Students work in the Public Relations and Admissions offices, computer center, as resident assistants in the dormitories, as research assistants and interns for departments and the registrar. Similarly, they participate in the University's decision-making. Seven students are elected by the student body to serve on the University Council. Others serve with departmental chairpersons and faculty on the conferences which recommend to the deans changes in academic programs. Students also serve with other members of the University community on the various search committees which recommend candidates for the principal administrative posts from president to dean.

Volunteer Activity

The University's Center for Social Action and Service Initiatives has a roster of 2,700 students who perform well over 162,000 service hours each year. Since 1983, a total of 347 Scranton students have chosen to spend a year or more in full-time volunteer service immediately after graduation. A total of 197 of these graduates have volunteered with the Jesuit Volunteer Corps. Additional information about the Center for Social Action and Service Initiatives can be found in the Student Life section of this catalog or at www_scranton.edu/volunteers.

Baccalaureate Source of Ph.D.s

Achievement is also recognized in a recent study of the Office of Institutional Research at Franklin and Marshall College which showed that over a 75-year period (1920-95), the University of Scranton ranked 22nd out of 254 four-year, private, master’s-degree-granting institutions as the baccalaureate source of Ph.D.s in all fields.

National Recognition

"Best 357," "331 Most Interesting," "America's Best Colleges," "Character Building," "Hidden Gem" – these are just a few of the ways that the nation's leading college rankings and guidebooks consistently refer to The University of Scranton.

For the 11th consecutive year, U.S. News & World Report named the University among the top 10 comprehensive universities in the North (the largest and most competitive region in its annual survey of “America's Best Colleges”). The University has consistently been included in the U.S. News rankings since they were first introduced in 1983. In the 2005 edition, Scranton ranked sixth. In the same region, the University ranked 12th in the category "Great Schools at a Great Price." The Princeton Review included Scranton among The Best 357 Colleges in the nation according to its 2005 edition. Kaplan Publishing profiled the University in the 2005 edition of The Unofficial, (Un)biased, Insider's Guide to the 331 Most Interesting Colleges. Intel Corporation has also included The University of Scranton in its ranking of the nation's top 100 Most Unwired College Campuses.

Scranton was counted among a national list of just “100 Colleges Worth Considering” by the Washington Post Magazine in April 2003.

An expanded version of the piece was repeated in book form under the title “Harvard Schooled,” which listed the nation’s “top 100 outstanding (and underappreciated) colleges.”

In recognition of its work as a values-centered institution, the University is one of 100 American schools named to the John Templeton Foundation’s Honor Roll of Colleges That Encourage Character Development.

Fulbrights and Other International Fellowships

Since 1972, 113 Scranton students have accepted grants in the competitions administered by the Institute of International Education (Fulbright) and International Rotary. In 2001 the University celebrated its 100th winner in the competition for prestigious Fulbright Fellowships – the U.S. government’s premier scholarship for foreign study and research.

Two Scranton students were awarded Fulbright Fellowships in 2005. Maria Hundersmark, who majored in English and philosophy, won a Fulbright Teaching Assistantship in English to South Korea. George Griffin, who majored in German, will spend the year in Germany on a Fulbright/Pädagogischer Austauschdienst Teaching Assistantship in English. Both will teach English as a second language while pursuing independent research projects.

Three Scranton students were awarded Fulbright Fellowships in 2003, and one was awarded an Austrian Government Teaching Assistantship. Jennifer Bradley, who completed her M.B.A. this year, and Nicole Maloney, who majored in psychology and minored in art history, won Fulbright Teaching Assistantships to South Korea, where they will teach English as a second language while researching aspects of Korean art. Elliott Gougeon, who majored in German, will spend the year in Germany on a Fulbright/Pädagogischer Austauschdienst Teaching Assistantship in English. He will explore the German reaction to increased school violence during his Fulbright year.

Finally, Kate Christiansen, who majored in international studies and minored in German, was awarded an Austrian Government Teaching Assistantship in English to Austria.

Dr. Susan Trusler of the Economics/Finance department is the University’s Fulbright Program Advisor. Additional information is available online at www_scranton.edu/fulbright.
The Faculty

Over 250 faculty and administrators participate in the University's educational enterprise. They hold degrees from 135 different universities in 30 countries on five continents. Cambridge and the University of London in England; Louvain and the Gregorian in Europe; the University of Calcutta in India; Sophia University in Japan; Soochow University in China; Berkeley, Yale, MIT, Notre Dame, Harvard and Georgetown in America—all are represented among the faculty.

By its nature and function, a university faculty constitutes the most metropolitan element in a community. Hindu and Muslim, Christian and Jew, ministers and rabbis—scholars and teachers all—are found on the University's faculty.

The Jesuit tradition is carried on at the University not only by the 12 Jesuits engaged in teaching or administration, but by the fact that almost half of the faculty hold at least one degree from a Jesuit college or university. As indicated in the Mission Statement, excellent teaching and scholarship are regarded as complementary at this institution. In 2004 there were over 581 scholarly works, including books and book chapters, articles in prestigious peer-reviewed journals, patents and patent applications, presentations and proceedings, and other creative works. Subjects reflect a wide range of current topics, including white collar crime, pollution prevention through green chemistry, HIV prevention counseling, and energy transfer at the molecular level, to name just a few.

Faculty interests are extensive and include research and projects funded by the National Institutes of Health, the U.S. Department of Fish and Wildlife, the U.S. Air Force, the Pennsylvania Department of Conservation and Natural Resources, The Pennsylvania Commission on Crime and Delinquency, the Pennsylvania Department of Education, The American Heart Association, and Pennsylvania Board of Higher Education, as well as numerous private foundations and corporations.

Many faculty participate in international projects and faculty exchange programs with universities and hospitals around the world, bringing this global perspective into the classroom. Among the countries involved are Slovakia, Republic of Georgia, Mexico, China, Kyrgyzstan, Ukraine, and Mozambique; funding has been received from the USAID and the Department of State, and includes six faculty Fulbright Scholars.

The University Directory near the end of the catalog presents more detailed information about the faculty.

Student Diversity and Participation

As our faculty come from around the world, so do our students. Twenty-seven states and twenty-two foreign countries are represented in the University’s student body of nearly 4,700. Truman and Other National Scholarships

University of Scranton students excel in several national fellowship competitions, compiling a superb record of achievement in many areas in addition to their exceptional record in the Fulbright competition.

During 2004-05, Tina Marie George, a biology and philosophy major, became The University of Scranton’s sixth Truman Scholar, one of only 75 students in the nation to be selected. She was also the first Scranton student to be awarded a Udall Scholarship. Two students, Timothy Sechler, a chemistry major; and Karen Mcguigan, a biochemistry major, were awarded Goldwater Scholarships. Han Li, named in the paragraph below, was named to the second team of the 2005 USA Today All-USA Academic Team.

In the 2003-04 academic year, Han Li, a biochemistry and biomathematics major, received a Goldwater Scholarship, one of 310 students so honored in the county. Sara Shoener and Christopher Corey were named to the first and third teams of the 2004 USA Today All-USA Academic Team, Vanessa Cortes, an elementary education major, was selected as a Hispanic Scholarship Fund/Lilly Endowment Inc. Scholar.

During the 2002-03 academic year, Sara Shoener, a biomathematics and philosophy major, became the fifth University of Scranton student to be named a Truman Scholar, one of only 76 students in the country to be so honored in 2003. Michael Venn, a political science and international studies major, was one of only 43 students in the country to be awarded a Jack Kent Cooke Graduate Scholarship. Christopher Corey, a biochemistry, biomathematics and biophysics major, received a Goldwater Scholarship, one of 300 students to be awarded this scholarship. Talia Argondezzi, an English and philosophy major, was one of three students in the country to receive a senior scholarship from Sigma Tau Delta, the International English Honor Society; Talia also received a Sigma Tau Delta essay award.

During the 2001-02 year, Stephanie Tessing was one of 77 students to be named a Truman Scholar. Stephanie was later named to the third team of the USA Today All-USA Academic Team in 2003. Michael Venn, named above, received one of 40 Jack Kent Cooke Undergraduate Scholar awards given to continuing undergraduate students; he also held an internship with the Department of State’s Bureau of European Affairs. Erin Brodie, a mathematics and philosophy major, was named a Junior Fellow in the Joint Program in Survey Methodology. Ryan Surace, an accounting major, was one of 50 students to receive the State Farm Companies Exceptional Student Fellowship. Rachel Henr, a junior English major, was one of three students to receive a Sigma Tau Delta Junior Award, while Heather Theis, a senior English and philosophy major, received one of three senior awards given by Sigma Tau Delta.

In the 2000-01 year, two senior athletes, Joseph Fent and Nicole Bayman, received NCAA Postgraduate Scholarships. Joe used his scholarship in his study of veterinary medicine at the University of Pennsylvania, and Nicole applied hers toward her studies at Fordham University School of Law. Sarah Gazdalski, an accounting major, received the State Farm Companies Exceptional Student Fellowship. Lex Carter, a mathematics and philosophy major, was selected as a Junior Fellow in the Joint Program in Survey Methodology.

Alumni Society

The University of Scranton Alumni Society provides a way for graduates to continue their participation in the life of the University after their student years. Its 20 alumni clubs and affiliates include more than 39,000 members. The Society, which is governed by elected officers and a 28-member Board of Governors, fosters communication among alumni and encourages continued dialogue between alumni and the University community. It hosts alumni functions, including reunions and homecomings, and promotes the interest of the University by identifying prospective students, assisting the placement of graduates, collecting and preserving materials for University history, encouraging networking among its membership, providing numerous services and benefits, performing community service projects, and honoring student, faculty and alumni accomplishments. These activities are coordinated through the Office of Alumni Relations on campus (www.scranton.edu/alumni).

These activities are coordinated through the Office of Alumni Relations on campus (www.scranton.edu/alumni).
The University of Scranton is a selective institution, offering a flexible, liberal arts education in the Jesuit tradition of *cura personalis* (care for each person and the whole person).
Admission

The Admissions Committee of The University of Scranton will make the final decision on applications for admission. In reaching this decision, the committee will consider a number of factors: demonstrated evidence of a student’s academic ability, intellectual curiosity, strength of character and motivation; the student’s high school record, class rank, extracurricular activities, and SAT and/or ACT scores.

University Information

The Office of Admissions offers prospective students a wide variety of information about The University of Scranton through various publications. Prospective students can request materials by contacting:
Director of Admissions
The University of Scranton
Scranton, PA 18510
Telephone: (570) 941-7540 or 1-888-SCRANTON
Fax: (570) 941-5928
E-mail: admissions@scranton.edu
Web: www.scranton.edu/admissions

Required High School Preparation

Students wishing to enroll in any of several undergraduate programs offered by the University must have completed a total of 16 or more high school academic units covering grades 9-12. The term “unit” refers to a high school course taught four or five hours weekly throughout an academic year of 36 weeks duration. Unit requirements and preferred distribution of secondary courses are given in the table below.

<table>
<thead>
<tr>
<th>High School Unit</th>

</tr>
</tbody>
</table>

Applicants without high school credit in modern languages may be accepted if they present 16 acceptable units. A single year of language in high school will not be counted as a unit to satisfy the requirements for admission.

Mathematics includes elementary, intermediate, and advanced algebra; plane and solid geometry; trigonometry, analysis, and any other college-preparatory course. Applicants for science and engineering programs must include trigonometry and must have earned a grade of 85 in each mathematics course. Applicants for the nursing programs should include chemistry and biology in their high school programs.

Science includes biology, chemistry, physics and other college-preparatory courses. Pre-engineering applicants are urged to include physics in their high school preparation.

Campus Visit Programs

The best way to experience The University of Scranton is to visit for yourself. Individuals can schedule a visit that includes a campus tour, a group information session or an appointment with an Admissions Counselor. Additional opportunities include two fall Open Houses, a Royal Nights overnight program and Freshman Preview Day in the spring for accepted high school seniors. Tours and group information sessions are available throughout the year, Monday through Friday and some Saturdays. To arrange a visit, please call 1-888-SCRANTON (choose option “1”) or (570) 941-6654.

Submitting an Application

Students should apply during the first semester of their senior year of high school. The early action deadline is November 15. For all applicants other than those in Physical Therapy, early action offers will be made on December 15. From that time on, all applications will be reviewed on a rolling basis with a four- to six-week turn around and a preferred final application deadline of March 1. All Physical Therapy applications must be completed and received by January 15 for a February 15 decision and a May 1 priority confirmation.

Students may apply using The University of Scranton’s paper or online application, or the Common Application’s paper or online application. Students should also submit an official high school transcript from their Guidance office, an essay and a letter of recommendation.

The SAT I: Reasoning Test (College Entrance Examination Board) or the ACT Test (American College Testing) is required of all applicants. These tests should be taken during the junior year and/or senior year of high school. The Admissions Committee will consider applicants’ best math and verbal scores on both the old and new SAT I test. The committee will not consider the scores of the SAT II writing test in the application process. During Summer Orientation, the University administers its own placement tests. Therefore, applicants are not required to take the SAT II, nor is the writing component of the ACT required.

Application Fees and Confirmation

A non-refundable fee of $40.00 should accompany the application. No fee is charged for online applications submitted via the University’s Web site at www.scranton.edu/apply. The application fee is also waived for those who visit campus or attend one of our fall Open Houses. Accepted students who wish to confirm their place in the freshman class should submit a non-refundable class reservation fee of $150.00 by May 1. Resident freshmen should also include a non-refundable room deposit fee of $150.00.

Advanced Placement

Applicants who have taken college-level courses in high school may be placed in advanced courses and may be given credits as well. Students who have been accepted for admission and desire to apply for such placement must take the Advanced Placement Examination offered in May by the College Entrance Examination Board, www.collegeboard.com. Students can have their results sent automatically to the University by providing the school code (2929). In most cases, a minimum score of “3” (non science) or “4” (math/science) may earn advanced placement with 3 to 6 credits. Biology and Biophysics majors cannot receive biology credits. Students pursuing a pre-medical program should be aware that many medical schools do not accept AP credit for required pre-medical courses.

College-Level Examination Program (CLEP)

Through the CLEP tests, taken before admission, applicants may gain college credit in most academic subjects for work done outside the classroom in jobs, military service, etc., or in non-accredited institutions. For further information, visit www.collegeboard.com. Students wishing to be considered for CLEP credits should take the CLEP examinations and have the results forwarded to the Director of Admissions.

International Students

The University of Scranton has been educating international students since 1946 and remains committed to that tradition. At present, approximately 50 different countries are represented by undergraduate and graduate students.

The University’s Office of International Programs and Services and the International Center provide international students with advice, support and resources to ensure a smooth transition to a new culture and educational system. Additional information about support programs and services for international students can be found later in this catalog in the section on the Office of International Programs and Services.
Admission

The Admissions Committee of The University of Scranton will make the final decision on applications for admission. In reaching this decision, the committee will consider a number of factors: demonstrated evidence of a student’s academic ability, intellectual curiosity, strength of character and motivation; the student’s high school record, class rank, extracurricular activities, and SAT and/or ACT scores.

Campus Visit Programs

The best way to experience The University of Scranton is to visit for yourself. Individuals can schedule a visit that includes a campus tour, a group information session or an appointment with an Admissions Counselor. Additional opportunities include two fall Open Houses, a Royal Nights overnight program and Freshman Preview Day in the spring for accepted high school seniors. Tours and group information sessions are available throughout the year, Monday through Friday and some Saturdays. To arrange a visit, please call 1-888-SCRANTON (choose option “1”) or (570) 941-6654.

Submitting an Application

Students should apply during the first semester of their senior year of high school. The early action deadline is November 15. For all applicants other than those in Physical Therapy, early action offers will be made on December 15. From that time on, all applications will be reviewed on a rolling basis with a four- to six-week turn around and a preferred final application deadline of March 1. All Physical Therapy applications must be completed and received by January 15 for a February 15 decision and a May 1 priority confirmation.

Students may apply using The University of Scranton’s paper or online application, or the Common Application’s paper or online application. Students should also submit an official high school transcript from their Guidance office, an essay and a letter of recommendation.

The SAT I: Reasoning Test (College Entrance Examination Board) or the ACT Test (American College Testing) is required of all applicants. These tests should be taken during the junior year and/or senior year of high school. The Admissions Committee will consider applicants’ best math and verbal scores on both the old and new SAT I test. The committee will not consider the scores of the SAT I writing test in the application process. During Summer Orientation, the University administers its own placement tests. Therefore, applicants are not required to take the SAT II, nor is the writing component of the ACT required.

Application Fees and Confirmation

A non-refundable fee of $40.00 should accompany the application. No fee is charged for online applications submitted via the University’s Web site at www.scranton.edu/apply. The application fee is also waived for those who visit campus or attend one of our fall Open Houses. Accepted students who wish to confirm their place in the freshman class should submit a non-refundable class reservation fee of $150.00 by May 1. Resident freshmen should also include a non-refundable room deposit fee of $150.00.

Advanced Placement

Students who have taken college-level courses in high school may be placed in advanced courses and may be given credits as well. Students who have been accepted for admission and desire to apply for such placement must take the Advanced Placement Examination offered in May by the College Entrance Examination Board, www.collegeboard.com. Students can have their results sent automatically to the University by providing the school code (2929). In most cases, a minimum score of “3” (non science) or “4” (math/science) may earn advanced placement with 3 to 6 credits. Biology and Biophysics majors cannot receive biology credits. Students pursuing a pre-medical program should be aware that many medical schools do not accept AP credit for required pre-medical courses.

College-Level Examination Program (CLEP)

Through the CLEP tests, taken before admission, applicants may gain college credit in most academic subjects for work done outside the classroom in jobs, military service, etc., or in non-accredited institutions. For further information, visit www.collegeboard.com. Students wishing to be considered for CLEP credits should take the CLEP examinations and have the results forwarded to the Director of Admissions.

International Students

The University of Scranton has been educating international students since 1946 and remains committed to that tradition. At present, approximately 50 different countries are represented by undergraduate and graduate students.

The University’s Office of International Programs and Services and the International Center provide international students with advice, support and resources to ensure a smooth transition to a new culture and educational system. Additional information about support programs and services for international students can be found later in this catalog in the section on the Office of International Programs and Services.

The University has a house on campus that serves as a mosque for the use of Muslim students. It is available for daily prayers as well as the Friday prayer.

**International Baccalaureate Policy**

The University of Scranton grants college credit for classes taken through a recognized International Baccalaureate (IB) program. Students can earn credit for up to three successfully completed higher-level classes in which a score of 4 or higher is achieved on the appropriate IB examination. For more information on IB credit, contact the Admissions Office.

**Students with Disabilities**

The University of Scranton complies with all applicable laws and regulations with respect to the accommodation of handicaps and disabilities as these terms are defined in law. The University will provide reasonable accommodations so students can fully participate in curricular and extracurricular activities. Students who need assistance should make timely contact with the Office of Equity and Diversity at (570) 941-6213.

**Special Admissions Programs**

**Academic Development Program**

When the Admissions Committee believes applicants may find the transition to college-level work especially challenging, the applicants may be considered for a special freshman-year Academic Development Program (ADP). The program concentrates on English, logical thinking, reading skills and study habits, as well as work in the student’s major field. Freshmen who complete all requirements of the ADP program have normal sophomore standing.

Students must successfully complete all of their ADP courses, Education 113, Writing 105 and Communication 100 during their initial fall semester in order to progress into the next semester. Successful completion requires a minimum grade of C. Those students who do not successfully complete all ADP courses will need the permission of their college dean, who will consult with the Director of ADP, in order to continue their studies at The University of Scranton. If permission to continue is granted, students will be on probation, and they must repeat as soon as possible any course not successfully completed.

**Summer Bridge Program**

The University is committed to helping students who have demonstrated achievement and a desire to attend college but who need to improve their verbal skills. The Summer Bridge program assists students in making the transition from high school to college and in the future development of reading and writing skills. The summer program and mentoring during the academic year are designed to help students achieve their potential and succeed in their degree program. Students are chosen on the basis of a careful examination of high school transcripts, standardized test scores, and extracurricular activities.

**Transfer Student Admission**

Students who wish to transfer to The University of Scranton must submit applications and the usual credentials: official high school records, SAT scores, a personal statement and transcript(s) from the college(s) attended. All official transcripts must be submitted regardless of whether or not credit was earned. At the discretion of the Admissions Committee, students from other accredited colleges may be admitted provided:

1. The courses to be transferred are equivalent or comparable to courses offered at The University of Scranton;
2. Students are required to follow all requirements prescribed for the degree program at The University of Scranton;
3. No credit will be given for courses with grades less than C.

Transfer credit is reviewed on an individual basis. Students transferring are required to earn a minimum of 30 credits for an associate’s degree or 63 credits for a baccalaureate degree at The University of Scranton. Special orientation sessions are held for transfer students. It should be noted that some departments require that at least half of the credits in the student’s major be taken here at the University.

**Validation of Business Transfer Courses**

Students may validate courses taken at a non-AACSB institution by successfully completing one or more advanced courses in the subject for which the course in transfer is a foundation course. Approval is granted by the Dean of The Kania School of Management. This applies to lower-division transfer courses which the University offers at the upper-division level.

**High School Scholars**

High school students who have completed their junior year with a minimum of a B+ grade average may take one University course each term until they graduate from high school. Courses may be taken for credit or for audit at a special tuition rate of $100 per credit. Students may enroll for a maximum of three credits per session. Individual exceptions may be made if GPA/SAT scores substantiate the request. Courses available are typical freshman-level courses that are accepted toward a degree at The University of Scranton. These courses generally transfer to other regionally accredited colleges and universities. The University of Scranton cannot, however, guarantee transferability. Registrations will be processed on a space-available basis. Students will be responsible for tuition and applicable fees. Further information is available from the Office of Admissions by phone at (570) 941-7540 or by e-mail to admissions@scranton.edu.

**Tuition Payments**

Each semester an invoice displaying your courses, your room assignments, and your semester charges will be mailed to your mailing address. The tuition and fees are payable by the due date listed on the invoice. You must return the Remittance Form attached to the bottom of the invoice with payment by the due date. Students paying their bills via Tuition Management System (TMS) or with financial aid must also return the Remittance Form with their form of funding.

Without exception, lab fees must be paid for all courses with a lab requirement. Also, the University Fee must be paid by all College of Arts and Sciences, Panuska College of Professional Studies and Kania School of Management students registered for credit.

No student shall be permitted to receive any degree, certificate or transcript of record until the student’s financial account with the University has been settled. For students who graduate or withdraw from the University, any financial account not settled with the University Bursar’s Office will be forwarded to an external collection agency. At the time an account is placed with an agency, collection costs become the responsibility of the student, and they will be added to the balance due to the University.

**Monthly Payments**

The University accepts monthly payment through participation with a professional agency, Tuition Management Services. For application information, please call 1-800-895-9061 or contact them on the Web at www.afford.com. Brochures inviting family participation in a 10-month payment plan are mailed to parents of all incoming students by May of each year. Also, an enrollment form inviting family participation in a four-month semester plan will be included with the fall billing in July and the spring billing in December.

**Tuition Insurance**

The University, through A.W.G. Dewar, Inc., provides the Tuition Refund Plan (TRP). The plan helps protect your educational investment. When combined with the University’s published refund policy, reimbursement totaling 100% of tuition and room and board charges billed by the University will be made if you must withdraw from a term because of a personal illness or accident. In case of withdrawal due to a mental or nervous disorder, 60% of the above charges are covered. Application information is available from the Bursar’s Office or you may call A.W.G. Dewar, Inc. at (617) 774-1555.

**Alumni Discount**

Individuals who have previously earned a baccalaureate degree from The University of Scranton and are taking undergraduate, credit-bearing courses are eligible for 50% tuition reduction.
The University of Scranton grants college credit for classes taken through a recognized International Baccalaureate (IB) program. Students can earn credit for up to three successfully completed higher-level classes in which a score of 4 or higher is achieved on the appropriate IB examination. For more information on IB credit, contact the Admissions Office.

Tuition and Fees 2005-06

The University of Scranton charges all full-time undergraduate students a comprehensive or flat tuition charge for the fall and spring semesters. Not included in the charge are expenses for books and supplies, telephone charges, special service fees and laboratory fees. Room and board charges are assessed based on the housing option and meal plan selected.

Tuition

Full-Time Student Tuition, per year.................................................................$23,750
Includes 12 to 18 credits taken in each of the fall or spring semesters only. Credits taken during intersession or summer sessions or those taken above 18 credits in one semester are charged at the rate of $660 per credit in the fall, intersession and spring and $541 in the summer. This tuition rate excludes students enrolled prior to fall 2005 in the Physical Therapy program.

Tuition for Special Programs: Special Jesuit Liberal Arts program students will be allowed to take up to 21 credits per semester (fall and spring) at no additional charge above the flat-tuition rate. During their junior and senior years, students in the Honors Program and Business Leadership Program will be allowed to take up to 21 credits per semester at no additional charge above the flat-tuition rate.

Room Charges

Room charges are assessed per semester. Room fees cover intersession housing but an additional fee is assessed for any meal plan. No fees include vacation periods.

Plan AA, per year .................................................................$6,730 (single), $6,118 (double)
Madison Square, Mulberry Plaza

Plan A, per year .................................................................$6,118
Gettys, Linden Plaza, Redington

Plan B, per year .................................................................$5,786
Blair, Cambria, Casey, Driscoll, Fayette, Finch, Gannon, Gonzaga, Hannan, Highlands, Kottka, Lashi, Leidy, Lisa, Luzerne, Lynett, Martin, McCormick, McGowan, McKenna, Nevils, Southwell, Tioga, Wayne

Plan C, per year ................................................................. $5,460
Denis Enohard, Hafey, Jerrett, McCourt

Other Room Charges

Room Damage Deposit.................................................................$200

Summer Session Housing

Summer room charges (sessions I and II) .............................................................$488
“G” session .................................................................$670
Summer Bridge Program.................................................................$852

Residency Requirement

The University requires all first- and second-year undergraduate students to live in campus housing. Exceptions to this policy are limited to students who reside with a parent, legal guardian or spouse; are 21 years of age or older; or present other documented extenuating circumstances. The Admissions Office will determine a student’s residency status upon admission to the University.

Board

Board charges are assessed per semester. No fees include vacation periods.

19 meals per week, per year ..............................................................................$4,118
$554 in Intersession. All freshmen living in University housing must participate in the 19-meal plan during the entire freshman year. Additional information about meal plans can be found in the Student Life section of the catalog or by contacting Dining Services at (570) 941-7456.

14 meals per week, per year ..............................................................................$3,788
$511 in Intersession

10 meals per week, per year ..............................................................................$3,230
$444 in Intersession

**Family Tuition Reduction**

The family tuition-reduction policies applies whenever two or more dependent children from the same family are in attendance during the same semester at the University as full-time undergraduate students. The reduction also applies whenever at least one dependent child in a family is in attendance at the University as a full-time undergraduate student and a parent is enrolled full-time as an undergraduate student. The tuition deduction is equivalent to each student’s semester tuition multiplied by 10%. A completed form must be filed in the Bursar’s Office each year to receive the reduction for that year. Forms and additional information may be obtained from the Bursar’s Office.

**Tuition Refunds**

The tuition refund calendar applies to all University students. The amount of tuition refund is dependent on the formal date of withdrawal. Both tuition and fees are refundable during the 100% refund period of a semester. During the partial refund periods, the refund percentage applies only to tuition; laboratory and special service fees are not refundable.

A student billed flat-rate tuition who drops a course(s) within a semester, yet remains enrolled for the semester, may be entitled to a refund following the calendar under two scenarios. If the total course load remaining is below the flat-rate tuition minimum credit load (12 credits), then an applicable refund will calculate. Or, if prior to dropping the course(s), the student’s course load was greater than the flat-tuition maximum credit load (18 credits), an applicable refund will calculate.

Recipients of Federal Title IV Financial Aid who completely withdraw are governed by the Federal Refund Policy detailed in the Financial Aid section of the catalog.

**Health Insurance**

Student Health Services can provide information about alternative health insurance plans for students who do not have insurance coverage or coverage that is inadequate to meet their needs while enrolled. All students must be covered by adequate health insurance because unexpected serious illness or injury can have a great impact on college financial plans. If students lack sufficient coverage, University fees cover on-campus health services. Care by community providers such as laboratory, x-ray, private physicians or specialists, hospital emergency department visits, or hospital admission are subject to insurance coverage or private payment.

**Student Identification Cards**

The University of Scranton provides students with a “one-card” photo-identification system – the Royal Card. Every student attending the University must have a current Royal Card. This card must be presented upon demand for student services, and use of athletic facilities and the library. The Royal Card is used for meals in the dining facilities, residence hall access, photocopying in the library, and may be used as a substitute for cash at many locations on campus. For more information about the Royal Card, contact the Royal Card Office at (570) 941-6181.
Family Tuition Reduction
The family tuition-reduction policies apply whenever two or more dependent children from the same family are in attendance during the same semester at the University as full-time undergraduate students. The reduction also applies whenever at least one dependent child in a family is in attendance at the University as a full-time undergraduate student and a parent is enrolled full-time as an undergraduate student. The tuition deduction is equivalent to each student’s semester tuition multiplied by 10%. A completed form must be filed in the Bursar’s Office each year to receive the reduction for that year. Forms and additional information may be obtained from the Bursar’s Office.

Tuition Refunds
The tuition refund calendar applies to all University students. The amount of tuition refund is dependent on the formal date of withdrawal. Both tuition and fees are refundable during the 100% refund period of a semester. During the partial refund periods, the refund percentage applies only to tuition; laboratory and special service fees are not refundable.

A student billed flat-rate tuition who drops a course(s) within a semester, yet remains enrolled for the semester, may be entitled to a refund following the calendar under two scenarios. If the total course load remaining is below the flat-rate tuition minimum credit load (12 credits), then an applicable refund will calculate. Or, if prior to dropping the course(s), the student’s course load was greater than the flat-tuition maximum credit load (18 credits), an applicable refund will calculate.

Recipients of Federal Title IV Financial Aid who completely withdraw are governed by the Federal Refund Policy detailed in the Financial Aid section of the catalog.

Health Insurance
Student Health Services can provide information about alternative health insurance plans for students who do not have insurance coverage or coverage that is inadequate to meet their needs while enrolled. All students must be covered by adequate health insurance because unexpected serious illness or injury can have a great impact on college financial plans. If students lack sufficient coverage, University fees cover on-campus health services. Care by community providers such as laboratory, x-ray, private physicians or specialists, hospital emergency department visits, or hospital admission are subject to insurance coverage or private payment.

Student Identification Cards
The University of Scranton provides students with a “one-card” photo-identification system – the Royal Card. Every student attending the University must have a current Royal Card. This card must be presented upon demand for student services, and use of athletic facilities and the library. The Royal Card is used for meals in the dining facilities, residence hall access, photocopying in the library, and may be used as a substitute for cash at many locations on campus. For more information about the Royal Card, contact the Royal Card Office at (570) 941-6181.
SCHOLARSHIPS AND FINANCIAL AID

The University will help as many qualified students as possible to complete a college education. For this purpose the University maintains an Office of Financial Aid, and all inquiries concerning such assistance should be made to: Director of Financial Aid, 401 St. Thomas Hall, telephone: (570) 941-7700, fax: (570) 941-4370. Assistance is also available via the Web at www.scranton.edu/financialaid or by e-mail to finaid@scranton.edu.
Procedures for Applying for Scholarships and Financial Aid

Complete the Free Application for Federal Student Aid (FAFSA). Priority filing date for incoming students is February 15; for returning students, April 15. FAFSA forms are available from high school guidance officers, from the University's Financial Aid Office and online at www.scranton.edu/financialaid.

In order to be eligible for financial aid, students are required to maintain satisfactory academic progress. Standards have been established for federal and University financial aid that measure a student's progress toward a declared educational objective. These guidelines include a maximum time frame for completing a degree, a minimum percentage of credits completed each academic year and a minimum cumulative grade point average. A brief explanation is provided below.

Credit Requirements

Full-time students are expected to complete their undergraduate degrees within six academic years. Part-time students are allotted a period of time that shall not exceed 12 academic years. Students enrolled in The College of Arts and Science, The Kania School of Management and The J.A. Panuska, S.J., College of Professional Studies are full-time students enrolled in Dexter Hanley College as of Arts and Science, The Kania School of Management and The J.A. Panuska, S.J., College of Professional Studies who are full-time students enrolled in Dexter Hanley College as full-time students must successfully complete a minimum of 24 credits per academic year. Students enrolled in Dexter Hanley College as full-time students must complete a minimum of 21 credits, three-quarter-time students a minimum of 15 credits, half-time students a minimum of 9 credits and less-than-half-time students a minimum of 6 credits per academic year. Full-time dependent students who drop below 12 credits per semester may lose coverage under their parents’ health insurance plan and may be required to begin repayment of student loans. Students receiving PHEAA grants are required to earn the minimum number of credits required by the State Agency.

Academic Requirements

All students must maintain a cumulative grade point average of 2.00 in order to demonstrate satisfactory academic standing. Academic scholarship recipients are required to maintain a cumulative grade point average of 2.50, 3.00 or 3.25 depending on the scholarship.

Students should consult the Comprehensive Guide to Financial Aid Programs for a full definition of Satisfactory Progress Standards and the appeals process. The guide is available at www.scranton.edu/financialaid.

Financial Aid Refund Policy

In accordance with federal regulations, those students who receive federal financial aid and who completely withdraw from the University during the first 60% of a semester will have their federal financial aid (Pell Grants, Supplemental Educational Opportunity Grants, Perkins Loans, Stafford Loans and PLUS Loans) adjusted based on the percent of the semester completed prior to the withdrawal. That is, students will be entitled to retain the same percent of the federal financial aid received as the percent of the semester completed. The date of withdrawal will be the date the student begins the withdrawal process in accordance with the official procedures outlined in the catalog. There will be no adjustment to federal financial aid after 60% of the semester is completed. Students who must totally withdraw from school should consult with the Financial Aid Office on the refund policy applies to their situation. Students should consult the Comprehensive Guide to Financial Aid Programs at www.scranton.edu/financialaid for specific information on both the state and University of Scranton aid adjustment policies due to complete withdrawals during a term.

Loan and Grant Programs

Federal Perkins Loan Program

The University administers this federal program, which provides 5% interest loans to needy students. A Free Application For Federal Student Aid (FAFSA) is required of all loan applicants.

Federal Stafford Loan Program

Available in cooperation with community banks, credit unions, and savings and loan associations. The University of Scranton’s preferred lender is PNC Bank. Freshmen may borrow a maximum of $2,625; sophomores, $3,500; and juniors and seniors, $5,500 per academic grade level. The aggregate maximum for undergraduate study is $23,000. Depending on their grade level, independent students may borrow $4,000-$5,000 in unsubsidized Stafford loans. The Financial Aid Office will pre-certify a loan up to the maximum grade level amount. A Free Application for Federal Student Aid (FAFSA) is required for all loan applicants. Answer “Yes” to the loan question.

Federal Plus Parent Loan

Available for parents of dependent students. Credit-worthy parents are able to borrow up to the difference between a student’s cost of attendance and the total financial aid received. Additional details and applications are available from The University of Scranton’s preferred lender, PNC Bank.

The Pennsylvania Higher Education Assistance Agency (PHEAA)

Designated by the General Assembly to administer the State Grant Program. Students may be awarded from $200 to $2,500 per year. A FAFSA must be filed by May 1.

Federal Supplemental Educational Opportunity Grant

A federal campus-based program administered by the University. Amounts may range from $200 to $2,500 per year to students who demonstrate exceptional need. Priority is given to Pell recipients. A FAFSA is required for this program.

Federal Pell Grant

Provides federal grants, ranging from $400 to $4,050 per academic year, based on financial need. A FAFSA is required.

Other Financial Aid Programs

University of Scranton Awards

The University offers a number of awards based on academic merit (see “Scholarships”) and financial need. All accepted freshmen are automatically evaluated academically for scholarship aid. In order to be considered for need-based aid, students must file a FAFSA.

Federal Work-Study Program

A federal campus-based program that provides employment during the academic year and in the summer for students demonstrating financial need. The majority of the jobs are on-campus positions in various departments and administrative offices. Some jobs, both on and off campus, involve community service. Students seeking campus employment must file a FAFSA, answer “Yes” to the work study question and complete an online work study application.

Veterans’ Benefits

Veterans and eligible dependents should consult their local Veterans Administration counselor in order to establish their eligibility for participation. The Registrar’s Office certifies enrollment for eligible veterans with the Veterans Administration (VA form 22-1999). U.S. Army ROTC Scholarships

Contact the Military Science department in Rock Hall at (570) 941-7457 or 941-6336.

U.S. Air Force ROTC Scholarships

Offers many two- to five-year full- and partial-tuition scholarships for which qualified students may compete if they enroll in U.S. Air Force ROTC. Certain qualified students may also be eligible for a tax-free stipend of $150 a month. All graduating students who successfully complete the AFROTC program receive commissions as second lieutenants and will serve on active duty in the United States Air Force. For more information, contact the Aerospace Studies Department at 1-800-945-5378, ext. 4860.

Office of Vocational Rehabilitation

Under the Pennsylvania Department of Labor and Industry, the OVR provides help to qualified students. Residents of other states should inquire about similar programs available in their states of residency.

Under the Pennsylvania Department of Labor and Industry, the OVR provides help to qualified students. Residents of other states should inquire about similar programs available in their states of residency.
Scholarships
Each year the University offers merit scholarships based on a student’s high school record of academic achievement. These scholarships include both Presidential (full-tuition) and Dean’s and Loyola (partial-tuition) scholarships. No separate application is necessary.

Scranton Preparatory School Scholarship
This four-year, full-tuition scholarship, initiated in 1947 by the President and Board of Trustees of the University, is given to a graduate of the Scranton Preparatory School. Selection of the recipient is on the basis of academic achievement, qualities of leadership, service to the Preparatory School, and recommendation of the president and the dean of studies of the Preparatory School.

Purple Club Scholarships
Noteworthy among gifts to University of Scranton students are the amounts contributed annually by the Purple Club of Scranton. Since its founding in 1933, the Purple Club has provided special financial support to deserving and qualified students.

Endowed Scholarships
The Eugene J. and Elizabeth J. Agnone Scholarship: This scholarship, established in 1997, aids needy students from the Scranton area who are interested in pursuing careers in medicine.

The Alperin Family Scholarship: Members of the Alperin Family (Irwin E. Alperin, Myer Alperin, Toni Alperin Goldberg, the late Joel M. Alperin and their families) established this scholarship in 1987. It is given to incoming students who have demonstrated excellence in the classroom and financial need. First preference is given to employees of the Alperin family companies and their families, but all worthy students from Lackawanna County and Northeastern Pennsylvania are considered.

The Joseph James and Mary Agnes Andraos Scholarship: These scholarships were established in 1988 according to the provisions in the will of the late Joseph J. Andraos. The scholarships benefit students who have financial need and who are enrolled in a premedical or allied health science program.

The Frank A. and Helen S. Baciewicz Scholarship: This scholarship was created in memory of Frank Baciewicz by his family and widow. The student must embody characteristics of generosity, thoughtfulness, humor, and mental and physical tenacity. First consideration is given to students from the Dickson City or Scranton area.

The Michael B. Bogdanski Memorial Scholarship: This scholarship was established by family, classmates and friends of Michael, a member of the Class of 1999 who passed away during his senior year. The scholarship is given to theatre students at the University.

The Edward F. Bartley Scholarship: Joseph Austin ’52 and his wife, Mary, established this scholarship in 1996 to honor Edward Bartley, University professor emeritus. The scholarship is awarded to students from Lackawanna County, with preference given to students from the Middle Valley area.

The Rev. John J. Begley, S.J., Scholarship: This scholarship, established by the Scranton Jesuit Community to honor one of its own, provides financial assistance based on academic excellence and demonstrated need.

The Rev. Paul R. Beining, S.J. Scholarship: This scholarship, established by the Scranton Jesuit Community to honor one of its own, is for a student born and raised in Northeastern Pennsylvania and who has demonstrated financial need. First consideration is given to a biology major who maintains an overall B average.

The Velia E. Berardis, M.D., Memorial Scholarship: In 1989 Mrs. Dorothy Berardis established a scholarship to honor the memory of her husband, Velio E. Berardis, M.D. This scholarship provides awards based on need, and, to senior premedical students. Special preference is given to those who plan to attend Jefferson Medical College.

The Michael J. Bevilacqua Scholarship: The Bevilacqua family established this scholarship in 1989 as a memorial to honor the late Michael J. Bevilacqua. The scholarship is available to students from families who have more than one student in college at the same time.

The Sarah Beth Beynon Memorial Scholarship of The Scranton Area Foundation: This scholarship was established in memory of Sarah Beth Beynon by her parents. Sarah would have graduated from Pittston Area High School in 2000. The scholarship, which is administered through the Scranton Area Foundation, benefits undergraduate students pursuing a degree in environmental science and graduate students pursuing studies in cancer research.

The Chester and Veronica Bochinski Memorial Scholarship: This scholarship was established by James C. Bochinski ’70 and his sister, Marie A. Ryan, in memory of their parents. The scholarship is given to students from Northeastern Pennsylvania who pursue courses of study in psychology, nursing or business administration.

The Brief Office Solutions Scholarship: This scholarship shall be awarded to any qualified students based on financial need as determined by the Financial Aid Office.

The Frances P. Boland, M.D., Memorial Scholarship: Family, friends and colleagues established this scholarship shortly after Dr. Boland’s death in 1987. Each year a grant is given to premedical students. The scholarship is based primarily on merit.

The Paul M. and Joan A. Borick Scholarship: Dr. Borick ’47 and his wife established this scholarship for students from Lackawanna and Wayne counties who intend to pursue courses of study in microbiology.

The Charles F. Brerley Memorial Scholarship: Diane Brerley, wife of Mr. Brerley, established this fund in his memory. The scholarship will be awarded yearly to students who meet the University’s financial aid guidelines and are pursuing a degree in Media and Information Technology.

The Margaret Briggs Foundation Scholarship: In 1995 the Margaret Briggs Foundation established this scholarship for an incoming freshman who demonstrates financial need. Students from Lackawanna County are given first consideration; thereafter qualified students from one of the surrounding counties are considered.

The William J. and Elizabeth F. Burkavage Scholarship: Established in 1998, this scholarship is awarded to deserving students in Northeastern Pennsylvania, with first preference to those who live in Lackawanna County.

The Burke Family Scholarship: Income from this scholarship benefits needy and deserving students. The Burke family was originally from the Hyde Park section of Scranton. Thomas F. Burke, Class of 1909, played a leadership role in establishing the scholarship.

The Alio J. Buselli Memorial Scholarship: Mrs. June Buselli established this scholarship in memory of her husband to assist incoming freshmen from Lackawanna County pursuing degrees in science.

The Rev. Henry J. Butler, S.J., Memorial Scholarship: The first scholarship, for students from Bishop Hannan High School in Scranton, was established in 1984 by James Summers in honor of the executive vice president of the University who died in office in 1981. A second Butler Scholarship, for students from Scranton High School, was established in 1985 by John A. McCraney, a classmate of Father Butler at Georgetown University.

The Private Frank J. Cali Scholarship: Mr. and Mrs. Samuel C. Cali created this scholarship in memory of Mr. Cali’s brother. It is available to any student who meets the University’s qualifications.

The Bridget Carney Scholarship: This scholarship was established in 1972 by a bequest of James I. Kearney, M.D. Income from the scholarship, which is named to honor the memory of Dr. Kearney’s mother, is awarded to students, one or both of whose parents were or are parishioners of St. Ignatius Parish, Kingston, Pennsylvania.

The Cinram Manufacturing Scholarship: This scholarship was established in 1999. Sons and daughters of Cinram Manufacturing employees are eligible for this scholarship. Employees must at least three years of service at Cinram.

The Class of 1952 50th Reunion Scholarship: In recognition of its Golden Anniversary Reunion, the Class of 1952 established this scholarship, which is based on financial need and academic merit.

The James J. Claus Scholarship: Established in 1973 by a local businessman and alumnus from the Class of 1947, this scholarship provides aid to students who require financial assistance but do not qualify for most aid programs based on financial need. First consideration is given to Northeastern Pennsylvania students.

The Jon A. Claus Scholarship: An endowed scholarship was established in 1986 to honor the memory of Jon A. Claus, son of Dr. and Mrs. Thomas F. Claus of Justus. Income from the scholarship is distributed to deserving young men and women.

The Condon Ambition and Achievement Scholarship: Established in 2000 by Christopher M. Condon ’70, this scholarship benefits incoming freshmen in The Kania School of Management who demonstrate exemplary ambition and self-achievement, particularly in non-

The scholarship, based equally on financial need and academic merit, is for residents of Scranton and Dunmore who are majoring in English, philosophy, or human resources.

The Betty Redington Scholarship: This scholarship was established through a bequest from Mrs. Redington, a former trustee and a long-time friend of the University and its students. The scholarship benefits students who are most in need of financial support to pursue their education.

The Francis E. and Elizabeth Brennan Redington Foundation Scholarship: This scholarship was established in 1984 according to provisions in the will of the late Francis E. Redington. It provides financial assistance to students on the basis of both ability and need. Some portion of the income each year supports scholarships for students from the Republic of Ireland.

The John Charles and Kathryn S. Redmond Foundation Scholarship: Mr. Redmond, a prominent businessman and honorary degree recipient, established this scholarship before his death in 1989. The scholarship is given to an outstanding student who is not eligible for any direct financial aid, as specified by state or federal regulations, but who shows financial need because of the student’s family situation (e.g., number of children in school needing parental support).

The Raymond M. Reed Scholarship: This scholarship, established by Mr. and Mrs. Raymond M. Reed, is awarded to students residing in Lackawanna County. Students are selected based on merit and financial need.

The Dr. Richard A. Rendich Educational Scholarship: This endowed scholarship was established by the family of Grace Rendich, a University alumna. Income from the fund is used to assist in the education of needy young men aspiring to the priesthood.

The John M. Robinson Scholarship: This scholarship was established by John M. Robinson, who attended the University and established LPS Industries, Inc. in Newark, New Jersey. The scholarship assists promising and deserving students in the Kania School of Management, with Scranton area residents receiving first consideration.

The Patrick and Marie C. Roche Scholarship: Out of their affection for the University and respect for the school’s mission, Scranton natives Patrick and Marie Roche created this scholarship for eligible Lackawanna County students.

The Mary Kay/Rochon Scholarship: This scholarship was set up by John Rochon and the Mary Kay Foundation. It is awarded to bright female students in economic need.

The Rev. Joseph A. Rock, S.J., Scholarship: Created in memory of Fr. Rock, who served the University as professor of history, academic vice president and, in 1979, as university president, this scholarship assists students in the Academic Development Program.

The Rev. Richard W. Rousseau, S.J., Scholarship: This scholarship, established by the Scranton Jesuit Community to honor one of its own, is based on academic merit and financial need.

The Robert Ryder Scholarship: Established in 1988 by John Diskin ’67 and Coopers and Lybrand as a tribute to Mr. Robert Ryder, long-time vice president for finance/treasurer, the scholarship assists local students from the city of Scranton or the borough of Dunmore.

The Charles V. Sabatino, Sr., Scholarship: This scholarship was established in 1990 by Frank C. Sabatino, Esq., ’76 as a memorial to his father. It is based on merit and is awarded to a sophomore who is studying history.

The Josephine Sarcellini Memorial Scholarship: Med Science Laboratory in Scranton established this scholarship in 1983 to honor the memory of Josephine Sarcellini, the office manager of the firm for many years. The scholarship is given to an incoming freshman from Lackawanna County who is in financial need and intends to major in medical technology.

The Steven Sawyer Memorial Research Award: This endowed award honors the memory of the son of Mary F. Engel, Ph.D., Associate Professor
The Marian R. Oates Memorial Scholarship: A bequest from Dr. Mullaney '38 established this scholarship for physics, mathematics and science students.

The Robert W. Munley Scholarship: This scholarship was established by Robert W. Munley, Esq., and Judge James M. Munley to honor their father, Robert W. Munley. It supports deserving students from Lackawanna County.

The Murphy Scholarship: This scholarship was established in 1957 through a bequest of Miss Margaret Murphy, a retired schoolteacher and lifelong resident of Scranton. Margaret and her sister, Katherine, made the award "in loving memory of our mother, father, and brothers" to assist needy and deserving students.

The Dr. Louis and Muriel Murphy Scholarship: Dr. and Mrs. Murphy, longtime friends of the University, established this scholarship to provide financial assistance to deserving and needy students.

The James Nasser Family Scholarship: This scholarship was established in 1986 by Mr. and Mrs. James R. Nasser. Preference is given to needy pre-med students from Lackawanna County.

The NEPA APICS Scholarship: This scholarship was established in 1987 by the Northeastern Pennsylvania Chapter of the American Production and Inventory Control Society for qualified junior or senior students enrolled in the Operations Management major of The Kania School of Management and/or active members of The University of Scranton Chapter of APICS.

The Newcombe Endowed Scholarship: A series of grants from the Charlotte W. Newcombe Foundation, along with matching funds from the University, established this scholarship, which provides financial assistance to mature, second-career female students.

The New York Metropolitan Chapter, The University of Scranton Alumni Society Scholarship: This scholarship assists undergraduate students on an annual basis.

The R. Barrett Noone, M.D., Scholarship: Dr. R. Barrett Noone, a graduate of the University, established this scholarship for University students residing in Bradford, Sullivan, Philadelphia, Montgomery or Delaware Counties. The scholarship recipient will be a pre-med major.

The Marian R. Oates Memorial Scholarship: This scholarship, established in memory of an alumna who died in an automobile accident shortly after her graduation in 1990, benefits middle-income students from New Jersey enrolled in The Kania School of Management.

The Frank O'Hara Scholarship: This scholarship was established in 1988 by friends and family of "Mr. University," Frank O'Hara. Mr. O'Hara served in many capacities over a long career with the University. This scholarship, established in his memory, provides assistance to deserving and needy students.

The Marian M. and Patrick F. O'Hara Scholarship: Income from an endowment provides unrestricted scholarships to deserving young men and women.

The Oppenheim Family Scholarship: This scholarship was established by the Oppenheim family, who for many years owned and operated Oppenheim's Department Store and its predecessor, the Scranton Dry Goods Co. Income from the scholarship is used primarily for part-time, non-traditional students who need financial assistance.

The Rev. G. Donald Pantle, S.J., Scholarship: This scholarship, established by the Scranton Alumni Society Scholarship: This scholarship assists undergraduate students.

The Rev. George C. Powell and Marye J. Powell Memorial Scholarship: The Powell family established this scholarship to provide financial assistance to deserving and needy students who also demonstrate good character and leadership qualities.

The Rev. Edward R. Powers, S.J., Scholarship: This scholarship provides financial assistance based on academic excellence as well as demonstrated need.

The Ernest D. Presta, Sr., Memorial Scholarship: The family of Ernest D. Presta, Sr., Esq., established this scholarship in 1982. First consideration is given to needy students who are residents of Lackawanna County.

The Rev. J. J. Quinn, S.J., Scholarship: This scholarship honors Rev. J. J. Quinn, S.J., professor emeritus of English. It was started by alumni and former students to honor Fr. Quinn’s many years of service to the University, his students and the community. Based on merit and need, the scholarship is available to students in all academic disciplines.

The Frank X. Ratchford Memorial Scholarship: Mrs. Patricia A. Ratchford and her family established this scholarship in memory of Mr. Ratchford '61. The scholarship, based equally on financial need and academic merit, is for residents of Scranton and Dunmore who are majoring in English, philosophy, or human resources.

The Betty Redington Scholarship: This scholarship was established through a bequest from Mrs. Redington, a former trustee and a long-time friend of the University and its students. The scholarship benefits students who are most in need of financial support to pursue their education.

The Francis E. and Elizabeth Brennan Redington Scholarship: This scholarship was established in 1984 according to provisions in the will of the late Francis E. Redington. It provides financial assistance to students on the basis of both ability and need. Some portion of the income each year supports scholarships for students from the Republic of Ireland.

The John Charles and Kathryn S. Redmond Foundation Scholarship: Mr. Redmond, a prominent businessman and honorary degree recipient, established this scholarship before his death in 1989. The scholarship is given to an outstanding student who is not eligible for any direct financial aid, as specified by state or federal regulations, but who shows financial need because of the student’s family situation (e.g., number of children in school needing parental support).

The Raymond M. Reed Scholarship: This scholarship, established by Mr. and Mrs. Raymond M. Reed, is awarded to students residing in Lackawanna County. Students are selected based on merit and financial need.

The Dr. Richard A. Rendich Educational Scholarship: This endowed scholarship was established by the family of Grace Rendich, a University alumna. Income from the fund is used to assist in the education of needy young men aspiring to the priesthood.

The John M. Robinson Scholarship: This scholarship was established by John M. Robinson, who attended the University and established LPS Industries, Inc. in Newark, New Jersey. The scholarship assists promising and deserving students in The Kania School of Management, with Scranton area residents receiving first consideration.

The Patrick and Marie C. Roche Scholarship: Out of their affection for the University and respect for the school’s mission, Scranton natives Patrick and Marie Roche created this scholarship for eligible Lackawanna County students.

The Mary Kay/Rochon Scholarship: This scholarship was set up by John Rochon and the Mary Kay Foundation. It is awarded to bright female students in economic need.

The Rev. Joseph A. Rock, S.J., Scholarship: Created in memory of Fr. Rock, who served the University as professor of history, academic vice president and, in 1979-80, president, this scholarship assists students in the Academic Development Program.

The Rev. Richard W. Rousseau, S.J., Scholarship: This scholarship, established by the Scranton Jesuit Community to honor one of its own, is based on academic merit and financial need.

The Robert Ryder Scholarship: Established in 1988 by John Diskin 67 and Coopers and Lybrand as a tribute to Mr. Robert Ryder, long-time vice president for finance/treasurer, the scholarship assists local students from the city of Scranton or the borough of Dunmore.

The Charles V. Sabatino, Sr., Scholarship: This scholarship was established in 1990 by Frank C. Sabatino, Esq., ’76 as a memorial to his father. It is based on merit and is awarded to a sophomore who is studying history.

The Josephine Sarcellini Memorial Scholarship: Med Science Laboratory in Scranton established this scholarship in 1983 to honor the memory of Josephine Sarcellini, the office manager of the firm for many years. The scholarship is given to an incoming freshman from Lackawanna County who is in financial need and intends to major in medical technology.

The Steven Sawyer Memorial Research Award: This endowed award honors the memory of the son of Mary F. Engel, Ph.D., Associate Professor
Scholarships and Financial Aid

The Frederick B. Smoot Scholarship: This scholarship was established in 2002 by Mr. and Mrs. John J. Scott, Sr., to assist any deserving undergraduate. Selection is based on overall GPA.

The Rev. George Schemel, S.J., Scholarship: This scholarship, established in 2000 by the University’s Jesuit community to honor the late Fr. Schemel, is available to children and grandchildren of University of Scranton alumni.

The Charles J. Volpe Scholarship and Lecture Fund: Established in 1988 in memory of Charles J. Volpe, a well-respected Scranton businessman and public servant, the scholarship provides assistance for a student entering his or her senior year and who is majoring in history or political science. The lecture fund provides for an annual lecture featuring a well-known public servant.

The Thomas P. White Scholarship: Mrs. Ilene White established this scholarship to honor the memory of her husband, Thomas. It is awarded to an education major who is a ‘non-traditional’ student, such as a transfer student or an individual returning to school after an absence.

The William Zahler Scholarship: In 1986, Mr. and Mrs. William P. Zahler of Mayfield Heights, Ohio, established a scholarship in memory of their son William Zahler, Jr., an associate professor of English at the University. Income from the scholarship is distributed to deserving young men and women.

Annual Scholarships

The Sanofi Pasteur Scholarship: Each year, two graduate students who have demonstrated excellence in the field of biology and who are pursuing biochemistry master’s degrees are selected for summer internships at Aventis Pasteur’s Swiftwater location.

The Rita and Bernard Bagley Memorial Scholarship: Established in 1990 by the children of Mr. and Mrs. Bagley, this scholarship is available to residents of Sullivan County, with preference to parishioners of St. Basil’s Church in Dushore.

The Dr. A.J. Cawley Scholarship: In memory of Dr. A.J. Cawley of Pittston, a scholarship was established by a legacy from his sister, Miss Ellen Cawley. A scholarship is given each year to a student majoring in electrical engineering.

The Len and Deborah Gougeon St. Ann’s Scholarship: Established in 1986 through a gift from Drs. Len and Deborah Gougeon, this scholarship, based on need, provides assistance to a graduate of St. Ann’s Elementary School or a member of St. Ann’s Monastery Parish in Scranton.

The Joseph P. Harper Scholarship: A scholarship was established in 1967 to honor the memory of Joseph P. Harper, professor of physics. An annual scholarship is given to a senior physics major upon the recommendation of the physics department and with the approval of the director of financial aid. The department of physics presents, with the scholarship, a citation reminding the recipient of the high scholarly ideals, exemplary life, and dedicated service of Professor Harper.

The Kathryn and Bernard Hyland Memorial Scholarship for Excellence in Biology: A gift from alumnus Bernard V. Hyland, M.D., made in loving memory of his parents, established an endowment in 1980 to perpetuate this annual scholarship. The scholarship is presented to a graduating senior from the biology department, who, in the opinion of the department’s faculty, has achieved distinction based on academic excellence in biology, personal integrity, and concern for others.

The Lackawanna County Lawyers’ Auxiliary Scholarship: Established in 1982, this scholarship is annually presented to an outstanding graduating senior from Lackawanna County to provide scholarship assistance in the first year of law school. The scholarship is given directly by the Lawyers’ Auxiliary, upon the recommendation of the University pre-law advisor.

The Making a Difference in Nursing Award: This award is sponsored by Dr. Sharon Hudacek and her husband, Steve Hudacek, to honor Pauline Milecki, RN. An annual award will be made to an LPN enrolled in the nursing program at the University.

The Murray Insurance Agency, Inc., Scholarship: This scholarship is for deserving local students with first consideration to residents of the city of Scranton.
The Charlotte W. Newcombe Foundation Scholarship: This scholarship provides aid for mature, second-career women students.

The O’Malley & Harris Pre-Law Scholarship: This scholarship, sponsored by the law firm, O’Malley & Harris, P.C., is based on the outcome of an annual competition among full-time undergraduates at both The University of Scranton and Marywood University. Entry information is available from either school’s pre-law advisor.

The Christopher Jason Perfilio Memorial Scholarship: Christopher Perfilio passed away the summer before his senior year. His parents and older brother established this scholarship in his honor to assist philosophy and theology/religious studies students, as well as students in the Special Jesuit Liberal Arts program, who have records of high academic achievement and demonstrate financial need.

The Steven Sawyer Memorial Research Award: This endowed award honors the memory of the son of Mary F. Engel, Ph.D., Associate Professor and Director of Fellowship Programs at the University. The awardee is selected by a committee of the biology and chemistry faculty. Students who apply for the award must be active in the Health Professions Organization and be involved in research.

The Bernard Shaie Memorial Scholarship: This scholarship, established by family, friends, and colleagues of Dr. Shaie through the Scranton Area Foundation, is presented annually to a graduating senior of The University of Scranton who has been enrolled in an accredited dental school.

The Armond and Betty Strutin Scholarship: This scholarship, created out of the generosity and commitment of Armond and Betty Strutin to The University of Scranton, is distributed each year to deserving students.

Biennial Scholarship

The Dr. John H. Corcoran Scholarship: Biennially, the Society of the Friendly Sons of St. Patrick of Lackawanna County provides funds for a University of Scranton student or students to enjoy the benefits of studying for one or two semesters at a university in Ireland.

Endowed Chairs

The Alperin Chair in Business Administration: Established by an endowment, this academic chair was set in place in 1980 through the gifts of three Scranton businessmen, Joel, Irwin and Myer Alperin, and their families. The late Joel Mitchell Alperin was the originator and the principal sponsor of the chair and its endowment. Income from the Alperin brothers’ gift is applied to the salary of a professor in The Kania School of Management.

The Kathryn and Bernard Hyland Chair in Biology: This endowed professorship was established by Bernard V. Hyland, M.D., ’47 in honor of his parents. The professorship supports teaching and scholarship of a distinguished member of the biology faculty at the University.

The Chair in Judaic Studies: Income from an endowment established by alumni and friends of the University makes it possible for the University to invite, for short visits to Scranton, Judaic scholars from Israel or other parts of the world, for public lectures and meetings with students and faculty.

The Joseph T. and Frank M. McDonald Chair: Income from an endowment established by George and Dr. Herbert McDonald is used primarily to support the pre-law program, including support of the pre-law advisor, internship program, and advisory team. Income is also used to provide scholarship assistance to deserving students in pre-law majors.

The Pius X Teaching Chair of Theology: Established in 1976 by an anonymous gift and the assignment of a matching grant from the University’s Commitment to Excellence capital campaign, this chair is occupied by a priest, or jointly by a set of priests, of the Diocese of Scranton. The chairholders are nominated by the faculty of St. Pius X Seminary and approved by the faculty of the Department of Theology/Religious Studies at the University.

Other Endowments

The NEH Endowment: This endowment was established through a challenge grant from the National Endowment for the Humanities. It supports the acquisition of materials for the humanities collection in the Weinberg Memorial Library.

The Rose I. Kelly Award: Alumnus Joseph Wineburgh, Ph.D., set in place an endowment to link the efforts of elementary and secondary school teachers to the achievements of college students. Each year, an outstanding student is selected by a committee appointed by the academic vice president. The Rose I. Kelly Award winner is asked to name a high school or elementary teacher who most influenced his or her pre-college academic preparation. Both the student and the teacher from pre-college days are honored at a campus ceremony. Dr. Wineburgh established the program to honor an elementary teacher, Rose I. Kelly, who greatly influenced his life.

The Rev. John J. Long, S.J., Fund: Contributions to this fund were made by friends of the Rev. John J. Long, S.J., president of the University, 1953 to 1963, on the occasion of his Golden Jubilee in the Society of Jesus and later as a memorial after his death in 1971. The fund is invested and the income therefrom is used for projects and programs concerned with the spiritual growth of students.

The Loyola Lecture: The Jesuit Community serving The University of Scranton has endowed a lecture program intended to bring distinguished Jesuit speakers to campus. Named in honor of St. Ignatius Loyola, founder of the Society of Jesus, this fund can also support visits by other scholars capable of assisting the University community to a better appreciation of its Jesuit heritage.

The Harry and Helen Mack Award Fund: This award was established through a unitrust by Mrs. Helen Mack and is restricted to The University of Scranton’s Judaic Studies Program. It assists students and the community in learning about Jewish heritage and culture.

The Harry and Helen Mack Award Fund: This
award was established through a unitrust by
Mrs. Helen Mack and is restricted to The Uni-
versity of Scranton’s Judaic Studies Program. It
assists students and the community in learning
about Jewish heritage and culture.
The University of Scranton is devoted to the Jesuit maxim of *cura personalis*, or care for each person and the whole person. The University recognizes the integral role that campus life plays in the overall education of a student. Because learning does not stop at the classroom door, the University provides a range of activities and support services for leadership development, for reflection, for spiritual and personal enrichment, and simply for fun and recreation.
Student Services
The University of Scranton recognizes that much of a student's education at The University of Scranton takes place outside the classroom. The Division of Student Affairs is committed to the integration of high-quality student learning with the development of the whole person. In addition, through resources, programs, and collaborative efforts with the academic community as well as with all University divisions, it strives to form "men and women for others" in the Jesuit tradition, persons who are distinguished by a reflective and faith-filled vision for living that includes a commitment to leadership and service in the world.

Efforts in the Division of Student Affairs are designed to help students fulfill their potential in the following areas: intellectual life, wellness, diversity, citizen-leadership, life planning, culture and commitment to growth.

Residence Life
The Residence Life system includes freshman- and upperclass residences that provide secure and comfortable living spaces for study and personal development. Residential freshmen are assigned with their classmates to residence halls where they are supported in their academic programs, personal development, and leadership opportunities by Residence Life Staff and Jesuit Counselors.

Upperclass students may select from a range of housing options that include traditional halls with single and double rooms, suite-style halls with semi-private baths, University houses and townhouse apartments. Upperclass students may also choose a Theme House that provides intense experiences in Spanish language and culture, the arts, technology, community service, wellness or spirituality. The University also provides limited apartment-style housing for graduate students.

The main goal of the residential experience is for each student to learn while living in this community environment. The process for this occurs through the active participation of the resident in his or her learning. Learning occurs best when students attempt to incorporate their in-class and extracurricular experiences. In turn, programs and services offered through the Office of Residence Life are aimed at involving students in their learning.

The individual residential communities are designed for active student participation in their community. A basic expectation is for each student to respect the rights of others. The privilege of living in a residence hall is accompanied by the responsibility of positive community building.

Residence Life stresses the importance of high achievement in the academic and community realm. In turn, it is expected that students make healthy decisions regarding substances, stress and time management, relationships, and the exploration of their faith.

(For additional information on room and board see "Tuition and Fees.")

The Office of Residence Life is located in Fr. Gallery House, 413 Quincy Ave., and is open Monday through Friday from 8:30 a.m. to 4:30 p.m. The phone number is (570) 941-6226. Additional information is available online at www.scranton.edu/residencelife.

Residence Life Policies and Guidelines
The University of Scranton requires all first- and second-year undergraduate students to live in campus housing. Exceptions to this policy are limited to students who reside with a parent, legal guardian or spouse; are 21 years of age or older; or present other documented extenuating circumstances. The Admissions Office will determine a student's residency status upon admission to the University.

The University provides in-room access to the campus communication network (television, computer and video, including instructional and commercial television) in all residence-hall rooms and telephone service to rooms in University houses at no additional charge. This service includes unlimited local calling and voice mail for each room, as well as discounted long-distance rates for those enrolled in the University's long-distance program. In addition, light in-room housekeeping, 24-hour maintenance and 24-hour security are provided.

Students residing in non-University, off-campus housing (within a one-mile aerial radius of campus) can also have access to campus communication services, including basic telephone service, voice mail/messaging service and long-distance service. For more information regarding these communication services, contact the Office of Network Resources, St. Thomas Hall, Room 102, or call (570) 941-6181.

Contractual Obligations
Once enrolled in an on-campus and/or board plan, the student is obligated to that plan for the remainder of the academic year including intersession.

Intersession
Resident students taking one or more classes during intersession must live in University housing and, if applicable, continue their meal-plan program if they were enrolled for room and/or board for the preceding fall semester. As noted above, additional fees do apply for meals. For reasons of safety and security, those not enrolled in classes during intersession are not permitted to reside in University housing. Student athletes, approved by the Office of Residence Life, may live in their rooms over intersession without taking classes.

Dining Services
Students have a choice of three cost-effective meal plans providing 19, 14 or 10 meals per week. The 19-meal plan provides three meals per day Monday through Friday, with brunch and dinner on Saturday and Sunday. The 14-meal plan provides any combination of 14 meals per week. The 10-meal plan offers students any combination of 10 meals per week. Meals are not served during vacation periods. All freshmen living in University housing must participate in the 19-meal plan during the entire freshman year. Upperclass residents living in Driscoll, Leahy, Redington and Gavigan Halls must participate in one of the three University meal plans. Meal plan participation is optional for upperclass residents of Mulberry Plaza, Madison Square and Linden Plaza and the University houses and for commuters and students living in private housing. Discounted meal tickets are available for guests and students wishing additional flexibility.

Commuter On-Campus Life Association
The University makes special efforts to ensure that commuting students and those who live off campus have access to its academic and co-curricular programs and services. For commuters, the Commuter On-Campus Life Association, or COLA, is a student-run organization in which students can become involved in various activities and programs. For additional information about COLA, call (570) 941-6335. For off-campus students, the Student Affairs office provides resources and programming. For more information, contact Student Affairs at (570) 941-7680.

The Student Government also has commuter and off-campus representatives in its student senate. These students represent commuter and off-campus issues and concerns to this governing body. For information about the Student Government, call (570) 941-7462.

Career Services
Career Services helps students focus on career decisions that are consistent with their unique talents, aspirations, and vision for living. Professional counselors can help students discover links between their personal traits and career options through individual counseling, workshops, and many other electronic and hard-copy resources available at the Office of Career Services.

Students who are looking for related work experience while they are attending the University can benefit from a variety of intern-ship-related services provided by the office. All students can receive training in resume and cover letter writing as well as interview and job search techniques, especially those nearing graduation. They are also able to participate in employer on-campus recruiting visits, employment fairs, and the annual Law School Fair. Students and alumni can access a wide range of employment opportunities through the office's online job posting system.

The Office of Career Services is located on the third floor of Elm Park Church and is open from 8:30 a.m. to 4:30 p.m. Monday through Friday. Evening hours are arranged on a semester basis. The phone number is (570) 941-7640. Additional information is available online at www.scranton.edu/careers.

Multicultural Affairs
The University of Scranton is increasingly a learning community that mirrors the diversity of the Kingdom of God. Each individual in this community is encouraged to embrace the richness of life associated with other cultures and people of diverse backgrounds. Growth in this area centers on personal understanding and a comfort with one’s own cultural identity and tolerance and support for those who are different. The Director of Multicultural

Multicultural Affairs

The University of Scranton is increasingly a learning community that mirrors the diversity of the Kingdom of God. Each individual in this community is encouraged to embrace the richness of life associated with other cultures and people of diverse backgrounds. Growth in this area centers on personal understanding and a comfort with one’s own cultural identity and tolerance and support for those who are different. The Director of Multicultural
In coordinating the review of student misconduct cases, the Office of Judicial Affairs aims to help students understand their behavioral responsibilities as members of the University community and ensure that the rights of accusing and accused students are upheld within a fair-minded judicial system.

The staff associated with the Office of Judicial Affairs also assists the Division of Student Affairs in the creation, implementation, and evaluation of a comprehensive assessment program. This assessment program addresses issues of student growth and development, departmental functioning and operation, and student perceptions of divisional effectiveness.

Counseling Center

The Counseling Center provides a safe, comfortable, caring and confidential place for students. Sometimes students have personal problems they may wish to discuss with one of our staff. These may be related to concerns about relationships, transition, coping, development, school, self-concept, family dynamics, etc. These concerns may be complicated by such things as alcohol and other drug use, abuse, anxiety or depression.

The Counseling Center is staffed by licensed psychologists, counselors and a social worker who are available to help students make the most they can out of their years at the University. Finding ways to identify and cope with the stressors of life can make a difference in a day of the life of a college student. Located on the second floor of McGurrin Hall, the Counseling Center is open from 8:30 a.m. to 4:30 p.m. Monday through Friday. Later evening sessions may be available by appointment. After-hours emergency crisis consultation is available on a 24-hour basis from September through May while classes are in session by contacting Public Safety at (570) 941-7777 to reach the counselor on call. For Counseling Center appointments, students may call (570) 941-7620 or stop by the Center.

Student Health Services

Good health is an essential part of success in college. Student Health Services is committed to assisting students in the acquisition of the knowledge, attitudes, skills and behaviors necessary to attain and maintain an optimum level of personal wellness.

Student Health Services is located in the Wellness Center and is open from 8:30 a.m. until 6:00 p.m. Monday through Thursday and 8:30 a.m. until 4:30 p.m. on Friday. All services are confidential and include unlimited visits for nursing assessment, treatment and/or referral for further evaluation and care. Physician and Nurse Practitioner appointments are available daily after initial evaluation by a nurse. Cooperative relationships with community health care providers such as laboratories, pharmacies, hospitals and medical specialists complement the care offered on campus.

University fees cover all medical services on campus. Student Health Services does not have third party billing. However, care by community providers such as laboratory, x-ray, specialists, emergency rooms and hospitals are subject to the student’s health insurance or private payment. Information about an optional alternative insurance plan for students who do not have insurance coverage through another plan is available through Student Health Services.

Center for Health Education and Wellness

The Center for Health Education and Wellness (CHEW) at The University of Scranton provides health information and programs to support academic, social and spiritual success of students now and well into the future. The CHEW staff of health education professionals, student workers and peer educators provide dynamic workshops, community awareness events and individualized guidance to help students make healthy decisions. CHEW staff and students – both at the Center and out on campus – also serve as a bridge to other student and community health services.

The Center’s acclaimed and specially trained peer educators produce campus health projects and lead active and informative sessions on alcohol and other drugs, sexual health, sexual assault and other vital health topics. Residence halls, classes, outdoor events, organization meetings, and trainings are frequent stops for COPE, CHEW’s Coalition of Peer Educators that includes ADAPT (Alcohol and Drug Awareness Peer Team), PEACE (Peer Education on AIDS and other STIs in a College Environment) and SART (Sexual Assault Response Team). In addition to programming efforts, these student volunteers help produce and/or promote such campus-wide activities as Smoking Cessation Workshops, Safe Spring Break, the annual President’s Breakfast and the Guest Speaker Series, as well as participate in CHEW’s traveling Health Hut Outreach efforts. Peer educators learn valuable leadership and wellness promotion skills, earn service learning credit and many go on to successful careers in health and community service.

The student source for Web, print and in-person resources on personal and professional wellness, CHEW is located in the Wellness Center at the corner of Mulberry Street and North Webster Avenue. Office hours are 8:30 a.m. to 4:30 p.m., Monday through Friday, and evenings by appointment. For more information or to become involved, stop by CHEW or call 941-4253.

Outside the Classroom

Student Activities and Orientation

The Office of Student Activities and Orientation complements the University’s overall educational experience by acting as a learning lab. Ideas and concepts discussed in class are practiced and mastered through participation in Student Activities programs. Experiential learning opportunities include leadership, orientation and event planning programs. Keeping the care of the whole person and the magis at the forefront, Student Activities and Orientation is a resource that emphasizes a welcoming environment that supports a free flow of ideas that empowers, challenges and supports students in their development towards their potential. It encourages such things as positive and realistic self-appraisal, intellectual development, making appropriate personal and occupational choices, clarification of values, the ability to relate meaningfully with others, the capacity to engage in a personally satisfying and effective style of living, the capacity to appreciate cultural and ethnic differences, and the capacity to work independently and interdependently.

The Office of Student Activities and Orientation is located on the second floor of the Gunster Student Center and is open Monday

Orientation

Orientation helps all new students, freshman and transfer, make their transition to life at the University in the most successful way possible. The program is the link between the admissions process and students’ arrival at the University for their first semester. The emphasis is on scheduling, academic and social integration and providing a natural connection to the strong sense of community at the University. All students attend one of the two day sessions offered.

Student Government

Student Government is an organization with the task of maintaining and improving all aspects of student life to provide a productive academic and social environment for the student body. Its familiar faces and widespread involvement give the campus life and energy. Its leadership consists of elected student officers.

Clubs and Organizations

The University of Scranton encourages students to participate in activities, clubs, and organizations supported by the Office of Student Affairs. These clubs and organizations encourage students to become immersed in the campus community. Such activities allow members to develop their leadership skills while meeting the goals of the organization and its members. The following are some of the clubs recognized by the University of Scranton.

American Chemical Society
American College of Healthcare Executives
American Psychological Society Student Caucus (APSSC)
Asian Club
Association for Childhood Education International (ACEI)
Association for Computing Machinery (ACMSC)
Biology Club
Business Club
Business Technology Club
College Democrats
College Republicans
Communications Club
Council for Exceptional Children (CEC)
Counseling and Human Services Club
Crew Club
Men’s and Women’s Criminal Justice Club
Environmentally Concerned Organization
Exercise Science Club
Finance Club
Gospel Choir
Habitat for Humanity
Health Administration Association (HADM)
Health Professionals Organization
Ice Hockey
Men’s Institute of Electrical and Electronics Engineers (IEEE)
International Business Club
International Students Club
Irish Society
Jesuit University Students Concerned with Empowerment (JUSTICE)

Intercollegiate Athletics

The University is a Division III member of the National Collegiate Athletic Association (NCAA), the Middle Atlantic States Collegiate Athletic Conferences (MAC), Freedom Conference, and Eastern Collegiate Athletic Conference (ECAC). The Athletics office is located in the John Long Center and is open Monday through Friday from 8:30 a.m. to 4:30 p.m. Additional information is available online at www.scranton.edu/athletics.

Men’s

Baseball
Basketball
Cross Country
Golf
Ice Hockey
Lacrosse
Soccer
Swimming
Tennis
Wrestling

Women’s

Basketball
Cross Country
Field Hockey
Lacrosse
Softball
Swimming
Tennis
Volleyball

The University is widely regarded for its tradition of excellence on both the national and regional level. Scranton has won three NCAA Division III national titles, two in men’s basketball (1976, 1983) and one in women’s basketball (1985), while the men’s soccer team has advanced to the Final Four four times – including championship match appearances in 1980 and 1981. The women’s soccer team has played in the NCAA tournament 10 times in its 22-year history, including quarterfinal berths in 2001 and 2003, while six other Royal teams – men’s cross country (1975), men’s golf (1974), field hockey (1997), softball (1982, 1983), women’s volleyball (1999, 2001, 2003) and women’s lacrosse (2003, 2004) – have competed in NCAA championships. As a member of the Middle Atlantic Conferences, Scranton has won 77 league titles. The men’s basketball team leads the way with 16, followed by women’s basketball (14), women’s soccer (13), men’s soccer (11), women’s tennis (10), softball (7), women’s volleyball (4), women’s swimming (3), field hockey (1) and baseball (1).

The University has also produced its share of all-Americans. Since 1959, 48 student-athlete students have earned this prestigious honor, including wrestler Darren Buseman and Liz Baumbach of the women’s lacrosse team during the 2002-2003 academic year. The women’s basketball program has produced 14 all-Americans, while men’s soccer is next with 10, followed by women’s soccer (7), women’s swimming (2), wrestling (2), baseball (1), field hockey (1), men’s golf (1), men’s cross country (1) and women’s lacrosse (1).

Excellence in all athletic venues has also translated to success in the classroom. In 2003, Bridget Lee of the women’s lacrosse team became the 20th student-athlete in University of Scranton history to garner Verizon Academic All-America honors. In addition, she became the 11th Royal student-athlete to earn a prestigious NCAA post-graduate scholarship. The other ten are Will Carey of the men’s golf team (1988); J.P. Andrejko (1988), Michael Banas (1984), Joseph Cantafio (1974), Matt Cuano (1993) and Daniel Polacheck (1985) of the men’s basketball team; Joseph Fent of the men’s cross country team (2001); Una Espenkotter of the women’s basketball team (1987); and Nicole Baymen (2001) and Lori Snyder (1987) of the women’s soccer team.

Recreational Sports

Housed in the Byron Recreational Complex, the Recreational Sports Department seeks to provide a comprehensive program of sports activities designed to appeal to the diverse needs and interests of the University community. Intramural leagues begin approximately the third week of each semester and include dodgeball, basketball, volleyball, wall-tennis, racquetball, tennis, soc-
through Friday from 8:30 a.m. to 4:30 p.m. The telephone number is (570) 941-6233.

The University is widely regarded for its tradition of excellence on both the national and regional level. Scranton has won three NCAA Division III national titles, two in men’s basketball (1976, 1983) and one in women’s basketball (1985), while the men’s soccer team has advanced to the Final Four four times, including championship match appearances in 1980 and 1981. The women’s soccer team has played in the NCAA tournament 10 times in its 22-year history, including quarterfinal berths in 2001 and 2003, while six other Royal teams — men’s cross country (1975), men’s golf (1974), field hockey (1997), softball (1982, 1983), women’s volleyball (1999, 2001, 2003) and women’s lacrosse (2003, 2004) — have competed in NCAA championships.

As a member of the Middle Atlantic Conferences, Scranton has won 77 league titles. The men’s basketball team leads the way with 16, followed by women’s basketball (14), women’s soccer (13), men’s soccer (11), women’s tennis (10), softball (7), women’s volleyball (4), women’s swimming (3), field hockey (1) and baseball (1).

The University has also produced its share of all-Americans. Since 1959, 48 student-athlete-athletes have earned this prestigious honor, including wrestler Darren Buseman and Liz Baumbach of the women’s lacrosse team during the 2002-2003 academic year. The women’s basketball program has produced 14 all-Americans, while men’s soccer is next with 10, followed by women’s soccer (7), women’s swimming (2), wrestling (2), baseball (1), field hockey (1), men’s golf (1), men’s cross country (1) and women’s lacrosse (1).

Excellence in all athletic venues has also translated to success in the classroom. In 2003, Bridget Lee of the women’s lacrosse team became the 20th student-athlete in University of Scranton history to garner Verizon Academic All-America honors. In addition, she became the 11th Royal student-athlete to earn a prestigious NCAA post-graduate scholarship. The other 10 are Wil Carey of the men’s golf team (1988); J.P. Andrejko (1988), Michael Banas (1984), Joseph Canfa (1974), Matt Cusano (1993) and Daniel Polacheck (1985) of the men’s basketball team; Joseph Fent of the men’s cross country team (2001); Una Espenkotter of the women’s basketball team (1987); and Nicole Baymen (2001) and Lori Snyder (1987) of the women’s soccer team.

**Recreational Sports**

Housed in the Byron Recreational Complex, the Recreational Sports Department seeks to provide a comprehensive program of sports activities designed to appeal to the diverse needs and interests of the University community. Intramural leagues begin approximately the third week of each semester and include dodgeball, basketball, volleyball, wallball, flag football, racquetball, tennis, soc-
cer, whiffleball, badminton, softball and ultimate frisbee. Special one-day events are held on weekends throughout the year and include skiing, snow tubing, golf, table tennis, beach volleyball and hiking.

In addition to structured programs, the Byron Complex also offers many opportunities for individual recreation. Cardiovascular training equipment (treadmills, cross-trainers, steppers, rowers, bikes and other equipment) is located on the second level in the Murray Royals Fitness Center. Aerobics classes are conducted on a weekly schedule and can be attended on a drop-in basis. The recreation complex also houses three multi-purpose courts, four racquetball courts, a six-lane swimming pool, a dance-aerobics room, weight room, saunas, and steam rooms. In addition to indoor facilities, there is an outdoor basketball court, turfed utility field, and sand volleyball court located directly behind the recreation complex. A variety of recreational equipment may be obtained in the recreation office with a valid Royal card.

The Recreational Sports Department offers all activities. Some retreats are directed to first-year students, from 6:30 a.m. to 9:00 p.m.; Saturday from 6:30 a.m. through mid-semester, and until 9:00 p.m. on weekends throughout the year and include skiing, snow tubing, golf, table tennis, beach volleyball and hiking.

In addition to structured programs, the Byron Complex also offers many opportunities for individual recreation. The Recreation center is open during regular semesters from 6:30 a.m. through midnight, Monday through Thursday; Friday from 6:30 a.m. to 9:00 p.m.; Saturday from 10:00 a.m. to 9:00 p.m. and Sunday from 10:00 a.m. to midnight. Please call the office with any questions at (570) 941-6203.

Student Publications

The University offers a wide choice of journalism opportunities. The Aquinas is the weekly, award-winning campus newspaper, and positions are available to all full-time undergraduate students. Exorbis is the award-winning campus literary journal. The yearbook, Windabor, is produced annually by students.

Performance Music

The University of Scranton Band, Choirs and String Ensembles offer high quality instrumental and choral performing ensemble opportunities in a variety of formats ranging from very large ensembles to small ensemble and solo performance opportunities. In the finest liberal arts tradition, participation is open to any and all interested University students (as well as faculty, staff and administrators) with no individual audition requirement or enrollment or membership fee.

The programs include an annual World Premiere Composition Series performance, the only series of its kind in the nation, which has received honor and acclaim from artists throughout the world. Currently in its 22nd year, the series has provided our students with opportunities to work and interact with internationally renowned composers and conductors, and has made significant contributions to the wind and choral repertoire.

Hundreds of students participate in the ensembles every year, and they are achieving their performance goals in the musical ensemble of their choice. For more information on any Performance Music offerings, please visit us online at www.scranton.edu/music, or contact the office at music@scranton.edu or (570) 941-7624.

The University of Scranton Performing Arts Series presents concert performances by outstanding and renowned musicians representing a variety of musical genres, and closely coordinates programming with the Bands, Choirs and String Ensembles to offer special masterclasses, workshops and lectures by our visiting artists.

All performances are free of charge and open to the public, and most take place in the magnificently restored concert hall of the Houlihan-McLean Center on campus.

Our tradition of guest artists and clinicians has brought to our student musicians, our campus and our community the joyful experience of performing with and hearing a long list of musical masters, among them Seneca Black; Wydiffe Gordon; Victor Goines; Bridgett Hooks; T. Terry James; Robert Kipilow; Wynton Marsalis; Sam Pilafian; Eric Reed; Joshua Rosenblum; Robert Staver; Melissa Thorburn; Lawrence Wolfe; Marcus Printup; members of the New York, Philadelphia, Boston, Minnesota and Dallas Symphony Orchestras and The Lincoln Center Jazz Orchestra; “Travelin’ Light”; members of the Empire Brass Quintet; and late composer-in-residence Valclay Nellybel, whose long and productive relationship with the University continues to be honored through close cooperation between University and the Nellybel Estate with the establishment of The Nellybel Collection.

Debate

The tradition of debate in Jesuit colleges and high schools is also strong at The University of Scranton. The Noel Chabanel Council of Debate gives interested students an opportunity to compete in debate and speech events on the intercollegiate level.

Radio

More than 60 students each year gain valuable experience while operating WUSR, 99.5 FM, which is broadcast at 300 watts with a coverage area of 700 square miles. The broadcast region of the Scranton/Wilkes-Barre metropolitan area has an audience of over 250,000. The format is eclectic with world, classical, jazz, urban and alternative music.

In keeping with the University’s mission the station produces public affairs programming and provides the community with an alternative to commercial radio. Students are encouraged to become involved with all aspects of the station, from on-air positions to management.

Television

The Royal College Television Network gives students the opportunity for hands-on experience in television production. Students take the initiative in producing, directing, writing, shooting and editing television programs to express their creativity. These programs range from comedy, sports and film reviews, to news and public affairs. Programs produced by students appear on the campus cable television system.

Theatre

Today, the University Players produce a main-stage season along with a festival of original one-act plays, and a workshop devoted to new student directors. Over 150 students, from virtually every academic major, participate on and off stage in the productions each year. The theatre program is housed in the McDade Center for Literary and Performing Arts, a state-of-the-art facility complete with a 300-seat thrust main stage, a flexible studio theatre, fully equipped scenery and costume shops and additional theatre support spaces.

The University Players have historically been host to many prominent guest artists. Oscar-winning actress Glenda Jackson conducted an acting workshop in 1984; the late Richard Harris, another Oscar recipient, directed Julius Caesar in 1988; and, also in 1988, Emmy Award–winning designer and University alumnus Dennis Size created scenic and lighting designs for Aristophanes’ Lysistrata.

Participation in the Players is open to all students, regardless of academic year or major. Interested students should contact the Director of Theatre in the McDade Center, Room 103.

Campus Ministry

As a Catholic University, The University of Scranton is dedicated to promoting the faith of its students, faculty and staff. Campus Ministry does this through a variety of programs offered to all members of the University community. Mass for Sunday is celebrated on Sunday at 11:00 a.m., 7:00 p.m. and 9:30 p.m. in Madonna della Strada Chapel. Weekday masses are at 12:05 p.m. and 4:40 p.m. in St. Ignatius Chapel, located in St. Thomas Hall at the heart of the campus. The University also gathers for special liturgical celebrations to mark the beginning of the academic year, graduation and other important events.

The Campus Ministry staff offers a variety of weekend retreats at the University’s beautiful lakeside Retreat Center, 20 minutes from campus. These include lively peer-led student retreats, silent retreats based on the Spiritual Exercises of St. Ignatius, and retreats designed for those who have never been on a retreat and who would like to try a variety of spiritual activities. Some retreats are directed to first-year students, others to upperclass students.
cer, whiffleball, badminton, softball and ultimate Frisbee. Special one-day events are held on weekends throughout the year and include skiing, snow tubing, golf, table tennis, beach volleyball and hiking.

In addition to structured programs, the Byron Complex also offers many opportunities for individual recreation. Cardiovascular training equipment (treadmills, cross-trainers, steppers, rowers, bikes and other equipment) is located on the second level in the Murray Royals Fitness Center. In addition to indoor facilities, there is an outdoor basketball court, turf utility field, and sand volleyball court located directly behind the recreation complex. A variety of recreational equipment may be obtained in the recreation office with a valid Royal card. Whether students are looking for a competitive game of basketball, a high-impact aerobic class, or just a leisurely swim in the pool, the Recreational Sports Department offers all of these opportunities.

The recreation center is open during regular semesters from 6:30 a.m. through midnight, Monday through Thursday; Friday from 6:30 a.m. to 9:00 p.m.; Saturday from 10:00 a.m. to 10:00 p.m. and Sunday from 10:00 a.m. to midnight. Please call the office with any questions at (570) 941-6203.

**Student Publications**

The University offers a wide choice of journalism opportunities.

*The Aquinas* is the weekly, award-winning campus newspaper, and positions are available to all full-time undergraduate students. *Esprit* is the award-winning campus literary journal. The yearbook, *Windbauer*, is produced annually by students.

Students take the initiative in producing, directing, writing, shooting and editing television programs to express their creativity. These programs range from comedy, sports and film reviews, to news and public affairs. Programs produced by students appear on the campus cable television system.

**Theatre**

The tradition of theatre and dramatics in Jesuit colleges goes back 400 years. The University of Scranton has a rich tradition in that regard, as evidenced by the many theatre professionals who were undergraduates of the University: Walter Bobbie (Broadway actor and Tony Award–winning director), Gene Terruso (director and chairman of Theatre Arts at The University of the Arts, Philadelphia), and the late Jason Miller ( Pulitzer Prize–winning playwright/Academy Award nominee).

Today, the University Players produce a main-stage season along with a festival of original one-act plays, and a workshop devoted to new student directors. Over 150 students, from virtually every academic major, participate on and off stage in the productions each year. The theatre program is housed in the McDade Center for Literary and Performing Arts, a state-of-the-art facility complete with a 300-seat thrust main stage, a flexible studio theatre, fully equipped scenery and costume shops and additional theatre support spaces.

The University Players have historically been host to many prominent guest artists. The University also gathers for special liturgical celebrations to mark the beginning of the academic year, graduation and other important events.

The Campus Ministry staff offers a variety of weekend retreats at the University’s beautiful lakeside Retreat Center, 20 minutes from campus. These include lively peer-led student retreats, silent retreats based on the Spiritual Exercises of St. Ignatius, and retreats designed for those who have never been on a retreat and would like to try a variety of spiritual activities. Some retreats are directed to first-year students, others to upperclass students.
On-campus programs address the spiritual needs of students through religious education, faith-sharing groups, retreat renewals and evening of recollection, and social justice presentations. Campus ministers are also available for spiritual direction and counseling. The Campus Ministry office, located in the first floor of the Gunster Student Center, has extensive information about all these programs.

The University maintains a Campus Mosque at 317 N. Webster Avenue. The facility is open to both the University community and to the public for prayer and reflection. The Friday service begins at 12:30 p.m. standard time and at 1:00 p.m. during Daylight Saving Time.

Center for Social Action and Service Initiatives

The Center for Social Action and Service Initiatives is committed to advancing the Jesuit tradition of forming men and women for others. The program enables students to express their faith in reflective service while responding to local, national and global needs. Through active involvement, our students will learn to understand the world in which they live and to be of service. They will recognize their abilities and limitations and, by reflection through activity, should learn about themselves and recognize God’s gifts and presence in all human beings.

The program combines service and education. Community service exposes students to many important but often hidden realities in the world (e.g., the enormity and complexity of needs and remedies, and the great gifts that the needy bestow on those who share their world). In addition, volunteers, both in activity and reflection upon activity, learn about themselves.

Above even these goals is the obligation, which the schools and the students share, to respond to needs according to resources and other responsibilities.

More information is available online at www.scranton.edu/volunteers.

The Campus

The University’s 58-acre campus is located in the heart of Scranton, a community of 80,000 within a greater metropolitan area of 750,000 people. Since 1984, the University has built 25 new buildings and renovated 24 others.

The 426,347-volume Harry and Jeanette Weinberg Memorial Library at the center of campus includes a large study area open 24 hours a day with Internet connectivity to the world. Loyola Hall of Science and St. Thomas Hall have highly specialized laboratories and equipment for the study of physics, electrical engineering, computing sciences, chemistry, biology and molecular biology. There is also a fully equipped television studio with editing facilities in the Communications Wing of St. Thomas Hall, along with the broadcast studios of WUSR-FM.

The John J. Long, S.J., Center and the adjoining William J. Byron, S.J., Recreation Complex house the departments of Athletics and Exercise Science and Sport. They also have facilities for intercollegiate and intramural basketball, wrestling, handball, tennis, racquetball, volleyball and swimming. Fitzpatrick Field is home to men’s and women’s soccer, lacrosse, and field-hockey teams. Offering lights and an artificial turf surface, it is also used for intramural and club sports.

Thirteen traditional residence halls, primarily for freshmen, are centered on terraced quadrangles at the core of the campus. Francis E. Redington Hall and John R. Gavigan Hall provide housing for upperclass students and the University also maintains a series of houses and apartment buildings in the vicinity of campus, some of which are organized around academic interests. In all, there are more than 30 housing options for students, who are guaranteed University housing for four years.

The most recent additions to University housing are Mulberry Plaza and Madison Square. Mulberry Plaza is a complex of four apartment buildings. Each unit contains three- and five-bedroom apartments, and a five-occupant, two-story townhouse unit. Madison Square is a three-building complex offering two-, three- and four-bedroom apartments. All units contain kitchens, combined living and dining areas, one or two bathrooms, and bedrooms.

Performance and rehearsal space for the University Bands and Choirs is in the Houlihan-McLean Center. The McDade Center for Literary and Performing Arts includes a “black box” studio theatre and a 300-seat main theater, classrooms, a writing laboratory, and offices for the English Department. The Eagen Auditorium in the Gunster Memorial Student Center is used for performances, lectures and formal and informal University events.

McGurrin Hall houses The Panuska College of Professional Studies, and contains classrooms, laboratories, an academic advising center, and offices for the departments of Counseling and Human Services, Education, Health Administration, Human Resources, and Nursing. Physical Therapy and Occupational Therapy classrooms and laboratories are in adjacent Leahy Hall.

Brennan Hall is our newest academic building. This 71,000-square-foot facility located in the center of campus provides offices, classrooms and support facilities for the Kania School of Management. Also in Brennan Hall is a 148-seat auditorium and seminar rooms. The McShane Executive Center on the fifth floor of Brennan includes conference and meeting rooms that are technologically equipped, as well as a dining and kitchen area.

The Retreat Center is located 15 miles north of the campus on Chapman Lake. It offers facilities for retreats and conferences, including overnight accommodations for 24.

Other notable campus buildings include The Estate, former residence of the Scranton family; Campion Hall, built by the Society of Jesus for its members in Scranton; Kathryn and Bernard Hyland Hall, which houses classrooms and the University Bookstore; and recently renovated O’Hara Hall, which is home to the Graduate School, Dexter Hanley College, the Center for Continuing Education, Institutional Advancement and academic departments.

### Academic Programs

- Bachelor’s Degree Programs.............. 57
- Master’s Degree Programs.............. 23
- Undergraduate Concentrations/Tracks.... 31
- Doctor of Physical Therapy............... 1
- Continuing and Professional Education Courses Offered Annually..... 325

### Faculty
Eighty-five percent of the University’s faculty hold doctoral or other terminal degrees in their fields. The student-to-faculty ratio of 13:1 allows for class sizes that average 23 students.

### Economic Impact
According to research compiled by the Association of Independent Colleges and Universities of Pennsylvania (AICUP) Research Center based on the 2003 fiscal year, the University’s economic impact is estimated at the following:

- Direct Employment .................. 1,057
- Est. Staff/Faculty Spending....... $ 33,259,489
- Est. Student Expenditures......... $ 19,470,960
- Est. Visitor/Tourist Spending... $ 6,234,319
- **Total Estimated Economic Impact** $247,736,503

### Job Creation
The Economic Impact study uses formulas that are consistent with those used by the Bureau of Economic Analysis, a division of the U.S. Department of Commerce. The study shows that for each full-time employee at the University, 1.4 additional jobs are created in the local economy.

- Full-time University Employees, January 2005 ......................... 855
- **Local Job Creation** x 1.4

- **Direct and Indirect Local Employment** ......................... 1,197

---

**ACADEMICS**

The University’s academic programs for undergraduates are offered through three day schools, The College of Arts and Sciences, The Kania School of Management, and The Panuska College of Professional Studies; and through its division for non-traditional students, Dexter Hanley College. The schools share a common General Education program and offer baccalaureate degrees in 56 fields.
The University at a Glance

Students
The student population, including adult, part-time and graduate students, is approximately 4,800. About 80% of full-time freshmen live on campus.

Academic Honor Societies

Those National Honor Societies which are represented in The University of Scranton are listed below in order of the foundation of the local chapters.

**Alpha Sigma Nu**
- The National Jesuit Honor Society was founded in 1915 with chapters in 28 Jesuit universities throughout the United States. The Scranton chapter was founded in 1967. Its admission standards are the most rigorous. The Greek letters signify *ad eundem solutum niskelphavor* – brotherhood of honor students. Juniors and seniors who have distinguished themselves in scholarship, loyalty and service are eligible for membership. Appointment is made by the president of the University on the recommendation of the moderator and nomination by chapter members of the Society. The Society annually presents the Alpha Sigma Nu University award for teaching.

**Phi Alpha Theta**
- International Honor Society in history founded in 1921. Membership limited to students and teachers. The University's chapter was founded in 1971.

**Pi Gamma Mu**
- International Honor Society in social science. Founded in 1924 to improve scholarship in the social sciences and to encourage interdisciplinary study. Basic requirements: at least 60 hours of academic work, an overall grade point average of at least 3.25, with at least 21 hours in the disciplines of economics, human services, psychology, sociology, political science or history with a grade point average of at least 3.3. The University's chapter was founded in 1971.

**Alpha Sigma Lambda**
- National Honor Society to encourage scholarship and leadership among adult students in continuing higher education. The University's chapter was installed at the University in 1972.

**Eta Sigma Phi**
- National Honor Society for students of classical languages. The University's Epsilon Gamma chapter was founded in November 1972.

**Pi Mu Epsilon**
- National Honor Society for mathematics majors in junior or senior year with a grade point average of 3.0 and a 3.0 average in mathematics. The University's Mu chapter was installed in February 1973.

**Psi Chi**
- National Honor Society in psychology founded in 1931. This organization has chapters in 1,002 colleges and universities in all 50 states. The University's chapter was installed in May 1969. Minimum qualifications include a major or minor in psychology, rank in the top 35th percentile in general scholarship, and superior scholarship in psychology.

**Phi Delta Kappa**
- International professional fraternity for men and women in education. Membership is limited to graduate students and teachers. The University's chapter was founded in 1970.

**Omega Delta Epsilon**
- National Honor Society in economics. Founded in 1931. The Greek letters signify *amphi mouse glowsen* for the muse of languages. The University's chapter of Theta Iota was installed in May 1973.

**Delta Sigma Rho–Tau Kappa Alpha**
- National Honor Society in forensics. Founded in 1963 through merger of societies founded in 1906 and 1908 respectively. The University's chapter was installed in 1975.

**Phi Lambda Upsilon**
- International Honorary Chemical Society established in 1899. The University's Beta Kappa chapter, one of 60 chapters nationwide, was installed in October 1975. For students with 24 credits in chemistry and a 3.0 grade point average.

**Alpha Mu Gamma**
- National Honor Society for students of foreign languages. Founded in 1931. The Greek letters signify *aleph mouse glossa* for the muse of languages. The University's chapter of Theta Iota was installed in May 1973.

**Alpha Epsilon Lambda**
- National Honor Society for students of foreign languages founded in 1924. This organization is for students who major or minor in English, Theatre or Secondary Education/English with a grade point average of 3.5 or better in English, Theatre and Writing courses and an overall grade point average of 3.9 or better. The University's Mu Omicron chapter first met on April 30, 1980.

**Alpha Epsilon Alpha**
- An honor society founded on April 30, 1980, at The University of Scranton to recognize students who excel in the field of communications. For communication majors with a 3.5 grade point average.

**Alpha Lambda Delta**
- International Honor Society for Sociology students founded in 1920. Requirements include 18 credits in sociology with a grade point average of 3.0 overall. The University’s Upsilon chapter was founded on May 8, 1980.

**Pi Sigma Alpha**
- National Honor Society in political science founded in 1920. The Kappa Iota chapter at the University was installed on May 9, 1980. Membership limited to students with at least 18 credits (six courses) in Political Science, a grade point average of at least 3.4 in these courses, and overall rank in the upper third of the class.

**Alpha Phi Sigma**
- The National Criminal Justice Honor Society was founded in 1942. The University’s chapter was installed in May 1982. Basic requirements: 18 credits in criminal justice; an overall grade point average of 3.2; a 3.2 grade point average in criminal justice.

**Theta Alpha Kappa**
- National Honor Society in philosophy founded in 1899. The University’s chapter was chartered in 1968 and has been authorized since 1979 to induct as associate members undergraduate or graduate students showing outstanding promise in original research.

**Theta Xi**
- International Honor Society in scientific research founded in 1886. The University’s chapter was installed in May 1975. Membership requires 12 credits in theology with an average of 3.5 and an overall grade point average of 3.0.

**Sigma Tau Delta**
- National Honor Society in English founded in 1924. This organization is for students who major or minor in English, Theatre or Secondary Education/English with a grade point average of 3.5 or better in English, Theatre and Writing courses and an overall grade point average of 3.9 or better. The University’s Mu Omicron chapter first met on April 30, 1980.

**Alpha Epsilon Delta**
- An honor society founded on April 30, 1980, at The University of Scranton to recognize students who excel in the field of communications. For communication majors with a 3.5 grade point average.

**Alpha Kappa Delta**
- National Honor Society in psychology founded in 1931. The Greek letters signify *aleph mu epsilon gamma* for the muse of languages. The University's chapter of Theta Iota was installed in May 1973.

**Phi Alpha Sigma**
- National Honor Society for students of foreign languages founded in 1924. This organization is for students who major or minor in English, Theatre or Secondary Education/English with a grade point average of 3.5 or better in English, Theatre and Writing courses and an overall grade point average of 3.9 or better. The University’s Mu Omicron chapter first met on April 30, 1980.

**Alpha Epsilon Alpha**
- An honor society founded on April 30, 1980, at The University of Scranton to recognize students who excel in the field of communications. For communication majors with a 3.5 grade point average.

**Alpha Kappa Delta**
- International Honor Society for Sociology students founded in 1920. Requirements include 18 credits in sociology with a grade point average of 3.0 overall. The University’s Upsilon chapter was founded on May 8, 1980.

**Pi Sigma Alpha**
- National Honor Society in political science founded in 1920. The Kappa Iota chapter at the University was installed on May 9, 1980. Membership limited to students with at least 18 credits (six courses) in Political Science, a grade point average of at least 3.4 in these courses, and overall rank in the upper third of the class.

**Alpha Phi Sigma**
- The National Criminal Justice Honor Society was founded in 1942. The University’s chapter was installed in May 1982. Basic requirements: 18 credits in criminal justice; an overall grade point average of 3.2; a 3.2 grade point average in criminal justice.

**Phi Sigma Tau**
- National Honor Society for students of philosophy. The University’s chapter was installed in May 1982. Membership requires a major or minor in philosophy as well as excellence in philosophy works and activities.

**Omega Beta Sigma**
- The Women’s Business Honor Society was founded at The University of Scranton in 1982. This organization is for students who major or minor in Business, have at least sophomore standing, and have a grade point average of 3.25.

Omicron Delta Epsilon*

National Honor Society in economics. Basic requirements: 12 credit hours in economics with an overall grade point average of 3.0 and a 3.0 average in economics. The University’s Xi chapter of Pennsylvania was founded in May 1969.

Psi Chi*

National Honor Society in psychology founded in 1931. This organization has chapters in 1,002 colleges and universities in all 50 states. The University’s chapter was installed in May 1969. Minimum qualifications include a major or minor in psychology, rank in the top 35th percentile in general scholarship, and superior scholarship in psychology.

Phi Delta Kappa

International professional fraternity for men and women in education. Membership is limited to graduate students and teachers. The University’s chapter was founded in 1970.

Pi Gamma Mu*

International Honor Society in social science. Founded in 1924 to improve scholarship in the social sciences and to encourage interdisciplinary study. Basic requirements: at least 60 hours of academic work, an overall grade point average of at least 3.25, with at least 21 hours in the disciplines of economics, human services, psychology, sociology, political science or history with a grade point average of at least 3.33. The University’s chapter was founded in 1971.

Alpha Sigma Lambda

National Honor Society to encourage scholarship and leadership among adult students in continuing higher education. The Alpha Upsilon chapter was installed at the University in 1972.

Eta Sigma Phi

National Honor Society for students of classical languages. The University’s Epsilon Gamma chapter was founded in November 1972.

Pi Mu Epsilon

National Honor Society for mathematics majors in junior or senior year with a grade point average of 3.0 and a 3.0 average in mathematics. The University’s Mu chapter was installed in February 1973.

Alpha Mu Gamma

National Honor Society for students of foreign languages. Founded in 1931. The Greek letters signify amphi mouse glosson: for the muse of languages. The University’s chapter of Theta Iota was installed in May 1973.

Delta Sigma Rho–Tau Kappa Alpha*

National Honor Society in forensics. Founded in 1963 through merger of societies founded in 1906 and 1908 respectively. The University’s chapter was installed in 1975.

Psi Chi*

National Honor Society in political science founded in 1931. The Greek letters signify adelphos politikon chiniperohon – brotherhood of students in government and politics. Membership is limited to graduate students and teachers. The University’s chapter was installed in October 1975. For students with 24 credits in chemistry and a 3.0 grade point average.

Alpha Epsilon Delta*

The National Premedical Honor Society founded in 1926. The University’s Iota chapter was installed in May 1976.

Sigma Xi

International Honor Society in scientific research founded in 1886. The University’s chapter was chartered in 1968 and has been authorized since 1979 to induct as associate members undergraduate or graduate students showing outstanding promise in original research.

Theta Alpha Kappa*

National Honor Society in theology and religious studies founded in 1976 at Manhattan College. The University’s Alpha Nu chapter was installed on April 4, 1980. Membership requires 12 credits in theology with an average of 3.5 and an overall grade point average of 3.0.

Sigma Tau Delta*

National Honor Society in English founded in 1924. This organization is for students who major or minor in English, Theatre or Secondary Education/English with a grade point average of 3.5 or better in English, Theatre and Writing courses and an overall grade point average of 3.4 or better. The University’s Mu Omicron chapter first met on April 30, 1980.

Alpha Epsilon Alpha

An honor society founded on April 30, 1980, at The University of Scranton to recognize students who excel in the field of communications. For communication majors with a 3.5 grade point average.

Alpha Kappa Delta*

International Honor Society for Sociology students founded in 1920. Requirements include 18 credits in sociology with a grade point average of 3.0 overall. The University’s Upsilon chapter was founded on May 8, 1980.

Pi Sigma Alpha*

National Honor Society in political science founded in 1920. The Kappa Iota chapter at the University was installed on May 9, 1980. Membership limited to students with at least 18 credits (six courses) in Political Science, a grade point average of at least 3.4; and overall rank in the upper third of the class.

Alpha Phi Sigma*

The National Criminal Justice Honor Society founded in 1942. The University’s Epsilon Zeta chapter was installed in May 1982. Basic requirements: 18 credits in criminal justice; an overall grade point average of 3.2; 3.2 grade point average in criminal justice.

Challenge to the University’s Alpha Nu chapter was installed on April 4, 1980. Membership requires 12 credits in theology with an average of 3.5 and an overall grade point average of 3.0.

Pi Mu Epsilon

National Honor Society for mathematics majors in junior or senior year with a grade point average of 3.0 and a 3.0 average in mathematics. The University’s Mu chapter was installed in February 1973.

Phi Delta Kappa

International Professional Fraternity for men and women in education. Membership is limited to graduate students and teachers. The University’s chapter was founded in 1970.

Sigma Xi

International Honor Society in scientific research founded in 1886. The University’s chapter was chartered in 1968 and has been authorized since 1979 to induct as associate members undergraduate or graduate students showing outstanding promise in original research.

Omega Beta Sigma

An honor society founded on April 30, 1980, at The University of Scranton to recognize students who excel in the field of communications. For communication majors with a 3.5 grade point average.

Phi Sigma Tau*

National Honor Society for students of philosophy. The University’s Tau chapter was installed in May 1982. Membership requires a major or minor in philosophy as well as excellence in philosophy works and activities.

Omicron Delta Epsilon*

National Honor Society in economics. Basic requirements: 12 credit hours in economics with an overall grade point average of 3.0 and a 3.0 average in economics. The University’s Xi chapter of Pennsylvania was founded in May 1969.

* Member of the Association of College Honor Societies.
Upsilon Pi Epsilon
International Honor Society for the Computing and Information Disciplines. The University’s Gamma chapter was chartered in the spring of 1985.

Sigma Theta Tau*
International Honor Society of Nursing was founded in 1922 and is a prestigious organization of nurse leaders, scholars and researchers. Requirements: completion of one half of the curriculum, demonstrated ability in nursing, a grade point average of 3.0 and rank in the upper one-third of the class. The University’s Iota Omega Chapter was chartered in April 1988.

Kappa Delta Pi
The International Honor Society for education established in 1911, the Sigma Chi chapter was installed here at The University of Scranton in 1992. It joins over 500 chapters from around the world in fidelity to four cherished ideals: Humanity, Science, Service and Toil.

Beta Beta Beta
National Honor Society for biology founded in 1922. The University’s chapter, established in 1994, is one of 372 chapters nationwide. The society encourages undergraduate biological research through presentations at conventions, publication in the journal BIOS, and research/travel grants. All undergraduate students interested in biology may join as associate members. A regular member must be a junior or senior with 3.0 grade point average in biology and having completed at least three biology courses (one upper level) and in good academic standing at the University.

Sigma Phi Omega
The National Honor Society in gerontology. Founded in 1980, its purpose is to recognize those students who excel in gerontology as well as professional aging-service personnel. The University’s Gamma Epsilon chapter was established in April 1997. Membership is open to students who have at least 18 credits completed in gerontology/aging studies with a grade point average of 3.2.

Beta Gamma Sigma*
Beta Gamma Sigma is the only business honor society recognized by AACSB International – The Association to Advance Collegiate Schools of Business. To be eligible for membership, the academic ranking of those being considered must place them in the upper 7% of the junior class, upper 10% of the senior class or upper 20% of the graduating master’s class. The University’s chapter of Beta Gamma Sigma was chartered in spring 1997.

Lambda Pi Eta*
The National Honor Society for communication majors founded in 1935 to honor and encourage high levels of scholarship and leadership in the field of communications. The University chapter was installed in 1999. Membership requires junior-level status, at least 12 credits and a grade point average of 3.25 in communication studies, and a cumulative grade point average of 3.0.

Alpha Lambda Delta
The National Honor Society of Freshmen, Alpha Lambda Delta was founded in 1924 to honor excellent academic achievement by students in the first year of study. The Richard H. Passon Chapter of the Society was installed at the University in 2001. Membership requires enrollment as a full-time student in a degree program, a grade point average of 3.5 or above at the end of the first semester of the freshman year, and a rank in the top 20% of the class.

Phi Epsilon Kappa
National Honor Society in Physical Education founded in 1913. The University’s chapter, Zeta Gamma, was charted in May 2004 and recognizes Exercise Science majors who have achieved an overall grade point average of 3.2.

Academic Support Services

Harry and Jeanette Weinberg Memorial Library
Opened in 1992, the holdings of this 80,000-square-foot, five-story building include 465,871 volumes, 1,714 print periodical subscriptions, over 15,050 full-text electronic journals, and 538,685 microform pieces. The Library conducts an extensive user-education program to orient and instruct students in resources and research techniques. A tour of the building and its services is available online at www.scranton.edu/librarytour. The facility includes the following special features:

- group-study rooms and quiet study areas;
- a 24-hour study room (Pro Deo Room) with computer lab and Java City coffee bar;
- fifth-floor reading room (Scranton Heritage Room) overlooking the campus and community;
- University Archives and Special Collections, which houses University historical records, rare books, faculty publications and other special collections; and
- a Media Resources Collection (first floor) that holds 13,640 non-print items, including videocassettes, records, films and filmstrips.

Library Hours
Library hours are posted on campus, on the Internet, and on a recording which can be heard at (570) 941-7525. It is open almost 100 hours per week, with extended hours during exam periods.

For information about the library, its services, and resources, see the Weinberg Memorial Library homepage on the World Wide Web (www.scranton.edu/library) or select the Library from the University’s homepage (www.scranton.edu).

Academic Advising Centers
The College of Arts and Sciences Academic Advising Center
The Academic Advising Center, located in St. Thomas Hall 309, serves all freshmen in The College of Arts and Sciences. Staffed by professional advisors and by faculty advisors from a wide variety of disciplines, the Academic Advising Center offers a comprehensive program of academic advising throughout the freshman year. Advisors are available to students from 8:30 a.m. to 4:30 p.m., Monday through Friday. They provide assistance with orientation, registration, drop-add, general education course selection, declaration and change of major, and assessment of academic performance and goals.

The Panuska College of Professional Studies Academic Advising Center
The Academic Advising Center, located on the first floor of McGurrin Hall, serves all students in The Panuska College. Staff are available during the academic year, Monday through Friday from 8:30 a.m. to 4:30 p.m., to provide individual assistance with academic advising, registration, assessment of academic performance and career goals. The Center also works closely with other campus resources to provide comprehensive advisement opportunities. Faculty mentors are available to students within their academic departments.

* Member of the Association of College Honor Societies.
Upsilon Pi Epsilon

International Honor Society for the Computing and Information Disciplines. The University’s Gamma chapter was chartered in the spring of 1985.

Sigma Theta Tau*

International Honor Society of Nursing was founded in 1922 and is a prestigious organization of nurse leaders, scholars and researchers. Requirements: completion of one half of the curriculum, demonstrated ability in nursing, a grade point average of 3.0 and rank in the upper one-third of the class. The University’s Iota Omega Chapter was chartered in April 1988.

Kappa Delta Pi

The International Honor Society for education established in 1911, the Sigma Chi chapter was installed here at The University of Scranton in 1994. It joins over 500 chapters from around the world in fidelity to four cherished ideals: Humanity, Science, Service and Toil.

Beta Beta Beta

National Honor Society for biology founded in 1922. The University’s chapter, established in 1994, is one of 372 chapters nationwide. The society encourages undergraduate biological research through presentations at conventions, publication in the journal BIOS, and research/travel grants. All undergraduate students interested in biology may join as associate members. A regular member must be a junior or senior with 3.0 grade point average in biology and have completed at least three biology courses (one upper level) and in good academic standing at the University.

Sigma Phi Omega

The National Honor Society in gerontology. Founded in 1980, it is one of 37 chapters nationwide. The society recognizes Exercise Science majors who have achieved an overall grade point average of 3.2.

Beta Gamma Sigma*

Beta Gamma Sigma is the only business honor society recognized by AACSB International – The Association to Advance Collegiate Schools of Business. To be eligible for membership, the academic ranking of those being considered must place them in the upper 7% of the junior class, upper 10% of the senior class or upper 20% of the graduating master’s class. The University’s chapter of Beta Gamma Sigma was chartered in spring 1997.

Lambda Pi Eta*

The National Honor Society for communication majors founded in 1985 to honor and encourage high levels of scholarship and leadership in the field of communications. The University chapter was installed in 1999. Membership requires junior-level status, at least 12 credits and a grade point average of 3.25 in communication studies, and a cumulative grade point average of 3.0.

Alpha Lambda Delta

The National Honor Society of Freshmen, Alpha Lambda Delta was founded in 1924 to honor excellent academic achievement by students in the first year of study. The Richard H. Passon Chapter of the Society was installed at the University in March 2001. Membership requires enrollment as a full-time student in a degree program, a grade point average of 3.5 or above at the end of the first semester of the freshman year, and a rank in the top 20% of the class.

Phi Epsilon Kappa

National Honor Society in Physical Education founded in 1913. The University’s chapter, Zeta Gamma, was charted in May 2004 and recognizes Exercise Science majors who have achieved an overall grade point average of 3.2.

Beta Gamma Sigma*

Beta Gamma Sigma is the only business honor society recognized by AACSB International – The Association to Advance Collegiate Schools of Business. To be eligible for membership, the academic ranking of those being considered must place them in the upper 7% of the junior class, upper 10% of the senior class or upper 20% of the graduating master’s class. The University’s chapter of Beta Gamma Sigma was chartered in spring 1997.

Lambda Pi Eta*

The National Honor Society for communication majors founded in 1985 to honor and encourage high levels of scholarship and leadership in the field of communications. The University chapter was installed in 1999. Membership requires junior-level status, at least 12 credits and a grade point average of 3.25 in communication studies, and a cumulative grade point average of 3.0.

Alpha Lambda Delta

The National Honor Society of Freshmen, Alpha Lambda Delta was founded in 1924 to honor excellent academic achievement by students in the first year of study. The Richard H. Passon Chapter of the Society was installed at the University in March 2001. Membership requires enrollment as a full-time student in a degree program, a grade point average of 3.5 or above at the end of the first semester of the freshman year, and a rank in the top 20% of the class.

Phi Epsilon Kappa

National Honor Society in Physical Education founded in 1913. The University’s chapter, Zeta Gamma, was charted in May 2004 and recognizes Exercise Science majors who have achieved an overall grade point average of 3.2.

Beta Gamma Sigma*  
Beta Gamma Sigma is the only business honor society recognized by AACSB International – The Association to Advance Collegiate Schools of Business. To be eligible for membership, the academic ranking of those being considered must place them in the upper 7% of the junior class, upper 10% of the senior class or upper 20% of the graduating master’s class. The University’s chapter of Beta Gamma Sigma was chartered in spring 1997.

Lambda Pi Eta*

The National Honor Society for communication majors founded in 1985 to honor and encourage high levels of scholarship and leadership in the field of communications. The University chapter was installed in 1999. Membership requires junior-level status, at least 12 credits and a grade point average of 3.25 in communication studies, and a cumulative grade point average of 3.0.

Alpha Lambda Delta

Academic Support Services

Harry and Jeanette Weinberg Memorial Library

Opened in 1992, the holdings of this 80,000-square-foot, five-story building include 465,871 volumes, 1,714 print periodical sub-

scriptions, over 15,650 full-text electronic journals, and 536,685 microform pieces. The Library conducts an extensive user-education program to orient and instruct students in resources and research techniques. A tour of the building and its services is available online at www.scranton.edu/librarytour. The facility includes the following special features:

- group-study rooms and quiet study areas;
- a 24-hour study room (Pro Deo Room) with computer lab and Java City coffee bar;
- fifth-floor reading room (Scranton Heritage Room) overlooking the campus and community;
- University Archives and Special Collections, which houses University historical records, rare books, faculty publications and other special collections;
- a Media Resources Collection (first floor) that holds 13,640 non-print items, including videocassettes, records, films and filmstrips.

Databases and Online Catalogs

The library offers over 110 databases via the World Wide Web. For a list of databases, go to “Databases by Title” from the library’s home page, or visit http://academic.scranton.edu/department/wml/databases.html. A proxy server gives users remote access to these databases. In addition to the library’s own Online Public Catalog, users can search the Northeast Pennsylvania Library Network (NPLN), a virtual catalog of local libraries, Jesuit libraries, and the Pennsylvania Academic Libraries Consortium Inc. (PALCI), a direct borrowing program. With PALCI members, the library also shares 1,900 full-text books that users can read or borrow online. Some required readings for courses are available through ERES, an electronic reserve reading database over the Internet.

Library Hours

Library hours are posted on campus, on the Internet, and on a recording which can be heard at (570) 941-7525. It is open almost 100 hours per week, with extended hours during exam periods.

For information about the library, its services, and resources, see the Weinberg Memorial Library homepage on the World Wide Web (www.scranton.edu/library) or select the Library from the University’s homepage (www.scranton.edu).

Academic Advising Centers

The College of Arts and Sciences Academic Advising Center  
The Academic Advising Center, located in St. Thomas Hall 309, serves all freshmen in The College of Arts and Sciences. Staffed by professional advisors and by faculty advisors from a wide variety of disciplines, the Academic Advising Center offers a comprehensive program of academic advising throughout the freshman year. Advisors are available to students from 8:30 a.m. to 4:30 p.m. Monday through Friday. They provide assistance with orientation, registration, drop-add, general education course selection, declaration and change of major, and assessment of academic performance and goals.

The Panuska College of Professional Studies Academic Advising Center  
The Academic Advising Center, located on the first floor of McGurrin Hall, serves all students in The Panuska College. Staff are available during the academic year, Monday through Friday from 8:30 a.m. to 4:30 p.m., to provide individual assistance with academic advising, registration, assessment of academic performance and career goals. The Center also works closely with other campus resources to provide comprehensive advisement opportunities. Faculty mentors are available to students within their academic departments.
The Kania School of Management
Academic Advising Center

The Academic Advising Center, located in Brennan Hall Suite 206, serves all students in The Kania School of Management. Staff advisors are available from 8:30 a.m. to 4:30 p.m., Monday through Friday, to provide assistance with registration, major and general education course selection, and assessment of academic performance and goals. The Advising Center works closely with other campus resources to provide comprehensive advising services.

Center for Teaching and Learning Excellence

The mission of the Center for Teaching and Learning Excellence (CTLE), located on the fifth floor of St. Thomas Hall in the Harper-McGuiness Wing, is to provide academic support services for students and opportunities for faculty to enhance teaching and learning. The CTLE offers services to assist students in achieving academic success. The CTLE provides programs and services to help students meet their academic and future professional goals by enhancing their reading, writing and learning skills. Services offered include a reading center, writing center and peer tutoring in all academic courses. Students may also work with the CTLE staff in learning how to use instructional technology to enhance learning. Workshops are offered in the area of time management, learning styles and other skills that students may need.

Students with disabilities who are registered with the Office of Equity and Diversity receive academic support services such as extended test-taking time, note-taking and other accommodations through the CTLE. The CTLE also offers opportunities for faculty in the area of mentoring programs, enhancement of pedagogy, and the use of technology to support teaching and learning on the campus. A variety of workshops, seminars and one-on-one consultations are available to University faculty.

The goal of the CTLE is to encourage and actively support a strong culture of scholarship for a diverse university community. To learn more about the CTLE’s programs and services for students and faculty, visit our Web site at www.scranton.edu/ctle or call (570) 941-4038.

Office of the Registrar

As part of the Academic Affairs Division, the Office of the Registrar supports the educational mission of the University by connecting students to the faculty, curriculum and classroom via the course scheduling and registration processes. The Registrar also documents and validates the product of this dynamic connection in the form of schedules, rosters, grades, degree audits, transcripts and diplomas.

The Registrar’s office serves students on a daily basis by answering questions, issuing transcripts, certifying enrollment status, and distributing forms and schedules. In addition, students may obtain information about academic policies and procedures, and important dates and deadlines.

The office promulgates the master schedule of courses twice each year in October and March, conducts registration, collects and records grades, certifies degree eligibility and manages several aspects of commencement.

Course registration for returning students is conducted in April for the summer and fall, and in November for spring and intersession via the University Information System (UIS) on the World Wide Web. Located at https://uis. uofs.edu, the system provides secure links to academic records, registration options, student class schedules, address information, tuition accounts and financial-aid information. Mid-term and final grades are also available on UIS.

Located in St. Thomas Hall 301, the Office of the Registrar is open Monday, Tuesday, Wednesday and Friday, 8:30 a.m. to 4:30 p.m.; Thursday, 10:00 a.m. to 4:30 p.m. For more information, please call (570) 941-7721 or e-mail registrar@scranton.edu. Additional information and resources (including the academic calendar, course schedules and student grade point average calculator) are available online at www.scranton.edu/registrar.

Academic Policies and Regulations

Academic Code of Honesty

Students have responsibility for governing their own conduct in compliance with the Academic Code of Honesty, which addresses behavioral integrity in the academic work of the University. Conduct that violates the Code includes plagiarism, duplicate submission of the same work, collusion, providing false information, unauthorized use of computers, theft and destruction of property, and unauthorized possession of tests and other materials. Steps taken in response to suspected violations may include a discussion with the instructor, an informal meeting with the dean of the college and a hearing before the Academic Dishonesty Hearing Board. Students who are found to have violated the Code will ordinarily be assigned the grade F by the instructor and may face other sanctions. The complete Academic Code of Honesty is available in the deans’ offices, in the Student Handbook and on the Web at www.scranton.edu/student_handbook.

General Regulations

Ordinarily, all entering students – both freshmen and transfer students – are held to the requirements in the catalog of the year in which they enter. The University reserves the right to change any of the policies, rules, and regulations in this catalog. All such changes are effective at such times as the proper authorities determine and may apply not only to prospective students but also to those who are already matriculated in the University. Curricular changes, however, shall not become effective until published in the catalog unless specifically approved. First-year students may obtain information about academic policies and procedures, and important dates and deadlines.

In order to earn a bachelor’s degree from The University of Scranton students must:
• complete all the courses prescribed in the catalog of the year in which they enter;
• complete all the courses prescribed in the year in which they entered.

In all cases, students must either meet the standard in the original major or change to a new major; or
• grant permission to change to a new major;
• place the student in an exploratory semester for students determined to raise the grade point average and remain in the major;
• place the student in a goal attainment semester for students determined to raise the grade point average and remain in the major;
• earn a minimum 2.00 overall grade point average; and
• remove all failures in required courses.

In cases where students do not maintain a 2.00 grade point average in required courses, their respective dean may take one of the following actions:
• place the student in a goal attainment semester for students determined to raise the grade point average and remain in the major;
• place the student in an exploratory semester for students wanting to explore possible new majors;
• place the student in a goal attainment semester for students determined to raise the grade point average and remain in the major;

This degree represents the successful completion of the entire undergraduate curriculum, including general education requirements, cognates, basic skills courses and electives, as well as major requirements. Students graduating with multiple majors receive a single degree.

The University reserves the right to change any of the policies, rules, and regulations in this catalog. All changes thereto, to the dean of their college.
• place the student in a goal attainment semester for students determined to raise the grade point average and remain in the major;
• place the student in a goal attainment semester for students determined to raise the grade point average and remain in the major;

In all cases, students must either meet the standard in the original major or change to a new major within two semesters in the case of Dexter Hanley College, within 30 credits. Students who remain in the “Goal Attainment” and/or “Exploratory” semester programs for more than two semesters will be subject to dismissal by their dean.
Academic Policies and Regulations

General Regulations

Ordinarily, all entering students – both freshmen and transfer students – are held to the requirements in the catalog of the year in which they enter.

The University reserves the right to change any of the policies, rules, and regulations in this catalog. All such changes are effective at the beginning of the semester for students determined to raise their grade point average and remain in the major; 

The University reserves the right to change any of the policies, rules, and regulations in this catalog. All such changes are effective at the beginning of the semester for students determined to raise their grade point average and remain in the major;
Number of Hours in a Semester and Special Terms

The University of Scranton constructs its academic calendar in compliance with the minimum standards for class meeting time established by the Commonwealth of Pennsylvania Department of Education. The current Commonwealth of Pennsylvania Department of Education guidelines establish that a credit hour shall consist of 14 hours of classroom instruction per semester or term, exclusive of registration, final examinations and holidays. For alternative instructional and delivery modes such as laboratory instruction, independent study, readers, thesis, clinical and practicum experience, telecommunication and Web instruction, and special off-campus initiatives, a credit hour shall represent an instructional unit equivalent to a minimum of 14 hours of classroom instruction, exclusive of registration, final examinations and holidays. A semester shall consist of 14 weeks of instruction excluding registration, final examinations and holidays. A special or compressed term shall meet a number of hours per credit equivalent to a semester but in a compressed or extended timeframe, as determined by the Registrar in consultation with the Provost.

Communication of Information: Statement on the Expected Student Use of The University of Scranton E-mail Account

When students are admitted to The University of Scranton, a University e-mail account is created for them. All electronic communication from the University is directed exclusively to the University's electronic mailbox. Students are expected to access their University e-mail account on a weekly basis; however, daily access is recommended to stay abreast of important, time-sensitive information. University departments and faculty routinely will use e-mail to communicate important campus, academic program and course information.

Information on how to access the network and e-mail is regularly distributed to new students by the Information Resources Department. For more information on how to access your University of Scranton e-mail account, visit the Information Resources Web site at http://matrix.scranton.edu/informationresources/policies.asp. If you encounter problems accessing your e-mail, contact the Help Desk at (570) 941-4357.

Course Numbering System

Courses appearing in this catalog are numbered according to the system described below. The first digit of any course number indicates the level of the course; the second and third digits specify categories of courses. Levels at which courses are offered include the following:

- 100-199 Introductory courses
- 200-299 Lower division courses
- 300-399 Upper division courses
- 400-499 Advanced undergraduate courses

500 and above Graduate courses

In cases where no specific prerequisite is listed in the course description, courses at the 300 or 400 level assume junior or senior standing and appropriate background in the discipline of the course.

Categories in which courses are offered are indicated according to the following system:

- 00 - 09 General education courses
- 10 - 39 Courses that may apply either to major or general education requirements
- 40 - 79 Courses available for major (also minor and required cognate) credit
- 80 - 81 Practicum, Internship or Co-op courses
- 82 - 83 Independent study
- 84 Special topics
- 85 - 89 Honors courses
- 90 - 91 Seminars
- 92 Service Learning
- 93 - 94 Research
- 95 - 96 Travel courses
- 498 - 499 Thesis

Labs are indicated by an (L) following the number of the corresponding lecture courses. Courses in the Special Jesuit Liberal Arts Program are indicated by a (J) following the course number; those in the Honors Program are indicated by an (H) following the course number.

Course Schedule Changes

Dropping and Adding Courses

Students may add courses anytime between the initial registration period and the fifth class-day from the start of a fall or spring semester or the second class day of intersession and summer terms. Students who wish to drop one or more courses, but who plan to continue attendance in at least one other course during the term, need to secure their dean’s permission. A dropped course is not reflected on a student’s transcript. The last day to drop a course is usually the thirty-first calendar day of a semester and the fourth calendar day of intersession and summer terms; specific dates are published in the official University academic calendar. A refund schedule for dropped courses applies to students paying on a per-credit basis or completely withdrawing from the University. Under this schedule, the last day for 100% tuition refund is usually the tenth calendar day from the first day of classes for a semester and the second calendar day from the first day of classes for shorter terms; the refund schedule dates are published in the University’s academic calendar.

Withdrawal from a Course

After the end of the period to drop a course without having it reflected on the transcript, students may still withdraw from a course until the published deadline and receive a W grade on their transcript. In all cases, students should first discuss the matter with the course instructor. Students who wish to withdraw from one or more courses but who plan to continue to attend at least one course for the term, need to have a Schedule Change Form signed by their instructor and dean. Students who wish to withdraw from their last course(s) must complete the Withdrawal/Leave of Absence Form. In either case, the forms are available through the Registrar’s Office, the academic advising centers, academic department chairpersons’ offices, and Dexter Hanley College. The completed forms must be submitted to the Registrar’s Office or, in the case of DHC students, to Dexter Hanley College by the withdrawal deadline as indicated in The University academic calendar. This deadline is approximately 30 days before the last class day for the semester and a proportionate period of time for a short session. Failure to withdraw officially from a course(s) may result in a failing grade(s).

Courses Taken as Readers and Independent Studies

The purpose of reader and independent study courses is to enable University of Scranton students in good academic and disciplinary standing to pursue a course of study that meets one of the following descriptions:

Readers are study experiences that replicate courses listed in the catalog and are offered to one or, less frequently, two students. These offerings are limited to meeting academic programmatic need, as identified and accepted by the dean, and are not meant to be offered routinely. These courses are designated with the actual course number appearing in the undergraduate catalog.

Independent Studies, experiences provided to academically successful students, are specially designed learning experiences and are not offered in the normal course listing. These experiences may be non-honors courses that, like honors tutorials, are based on a set of readings, discussions, and writing assignments; they may be based on experimental work; or they may involve intensive research activity. These specially designed courses are designated with numbers ending in .82 or .83.

Readers and independent studies may not ordinarily be used to fulfill general education requirements. Students may take no more than one reader or independent study per term and no more than one reader or independent study per year, on average, during the course of their degree programs. Readers and independent studies are to be taken for the same number of credits as are granted similar courses in the discipline in which the reader or independent study is offered. Readers and independent studies may not ordinarily be used to repeat failed courses. Readers and independent studies intended for the major, minor, and cognate are graded under the normal grading mode (A, A-, B+, etc.) unless excepted by the student’s dean; other readers and independent studies usually are graded under the Credit/No Credit grading mode (“CS: Credit Satisfactory” for grades
Number of Hours in a Semester and Special Terms

The University of Scranton constructs its academic calendar in compliance with the minimum standards for class meeting time established by the Commonwealth of Pennsylvania Department of Education. The current Commonwealth of Pennsylvania Department of Education guidelines establish that a credit hour shall consist of 14 hours of classroom instruction per semester or term, exclusive of registration, final examinations and holidays. For alternative instructional and delivery modes such as laboratory instruction, independent study, readers, thesis, clinical and practicum experience, telecommunication and Web instruction, and special off-campus initiatives, a credit hour shall represent an instructional unit equivalent to a minimum of 14 hours of classroom instruction, exclusive of registration, final examinations and holidays.

A semester shall consist of 14 weeks of instruction excluding registration, final examinations and holidays. A special or compressed term shall meet a number of hours per credit equivalent to a semester but in a compressed or extended timeframe, as determined by the Registrar in consultation with the Provost.

Communication of Information: Statement on the Expected Student Use of The University of Scranton E-mail Account

When students are admitted to The University of Scranton, a University e-mail account is established for each student. A claim for the University of Scranton, a University e-mail account is claimed from the University is directed exclusively through the Registrar's Office, the academic departments, and other university offices appointed by the Provost.

When a student is admitted to The University of Scranton, the student is enrolled in the University’s academic calendar. A refund schedule for dropped courses applies to students paying on a per-credit basis or completely withdrawing from the University. Under this schedule, the last day for 100% tuition refund is usually the tenth calendar day from the first day of classes for a semester and the second calendar day from the first day of classes for shorter terms; the refund schedule dates are published in the University’s academic calendar.

Withdrawal from a Course

After the end of the period to drop a course without having it reflected on the transcript, students may still withdraw from a course until the published deadline and receive a W grade on their transcript. In all cases, students should first discuss the matter with the course instructor. Students who wish to withdraw from one or more courses but who plan to continue to attend at least one course for the term, need to have a Schedule Change Form signed by their instructor and dean. Students who wish to withdraw from their last course(s) must complete the Withdrawal/Leave of Absence Form. In either case, the forms are available through the Registrar’s Office, the academic advising centers, academic department chairs, and academic program course information.

Information on how to access the network and e-mail is regularly distributed to new students by the Information Resources Department. For more information on how to access your University of Scranton e-mail account, visit the Information Resources Web site at http://matrix.scranton.edu/informationresources/polices.asp. If you encounter problems accessing your e-mail, contact the Help Desk at (570) 941-4357.

Course Schedule Changes

Dropping and Adding Courses

Students may add courses anytime between the initial registration period and the fifth class-day from the start of a fall or spring semester or the second class day of intersession and summer terms. Students who wish to drop one or more courses, but who plan to continue attendance in at least one other course during the term, need to secure their dean’s permission. A dropped course is not reflected on a student’s transcript. The last day to drop a course is usually the thirdirty-first calendar day of a semester and the fourth calendar day of intersession and summer terms; specific dates are published in the official University academic calendar. A refund schedule for dropped courses applies to students paying on a per-credit basis or completely withdrawing from the University. Under this schedule, the last day for 100% tuition refund is usually the tenth calendar day from the first day of classes for a semester and the second calendar day from the first day of classes for shorter terms; the refund schedule dates are published in the University’s academic calendar.

Courses Taken as Readers and Independent Studies

The purpose of reader and independent study courses is to enable University of Scranton students in good academic and disciplinary standing to pursue a course of study that meets one of the following descriptions:

Readers are study experiences that replicate courses listed in the catalog and are offered to one or, less frequently, two students. These offerings are limited to meeting acute student programmatic need, as identified and accepted by the dean, and are not meant to be offered routinely. These courses are designated with the actual course number appearing in the undergraduate catalog.

Independent Studies, experiences provided to academically successful students, are specially designed learning experiences and are not offered in the normal course listing. These experiences may be non-honors courses that, like honors tutorials, are based on a set of readings, discussions, and writing assignments; they may be based on experimental work; or they may involve intensive research activity. These specially designed courses are designated with numbers ending in _82 or _83.

Readers and independent studies may not ordinarily be used to fulfill general education requirements. Students may take no more than one reader or independent study per term and no more than one reader or independent study per year, on average, during the course of their degree programs. Readers and independent studies are to be taken for the same number of credits as are granted similar courses in the discipline in which the reader or independent study is offered. Readers and independent studies may not ordinarily be used to repeat failed courses. Readers and independent studies intended for the major, minor, and cognate are graded under the normal grading mode (A, A-, B+, etc.) unless excepted by the student’s dean; other readers and independent studies usually are graded under the Credit/No Credit grading mode (“CS: Credit Satisfactory” for grades approximately 30 days before the last class day for the same reason and a proportionate period of time for a short session. Failure to withdraw officially from a course(s) may result in a failing grade(s).
equivalent to C or higher; “CD: Credit Deficiency” for grades equivalent to C-, D+, and D; “NC: No Credit” for grades equivalent to F). Exceptions to these policies must be approved by the dean of the student’s college and by the dean of the school offering the course. The completed Reader and Independent Study forms should be submitted to the Registrar’s Office or Dexter Hanley College by the last day to add courses as published in the University academic calendar. A fee of $60 per credit in addition to the normal tuition will be charged.

Faculty conducting independent study courses will provide the dean’s office with a copy of the syllabus, reading lists, and examinations used in the independent study. Normally, faculty are limited to mentoring no more than two students per semester in any combination of readers, independent studies, and honors tutorials. Exceptions to this limitation can be made by the Dean for programmatically or in response to course cancellations.

**Enrollment Status and Attendance Policy**

To be considered a full-time student, undergraduate students must be registered for at least 12 credits in any given term or semester, regardless of the number of credits remaining to complete degree requirements. Students are expected to attend all scheduled meetings of courses in which they are enrolled. Students are responsible for all material presented and announcements made during any class. Attendance policies for individual courses are determined by the instructor and must be promulgated in writing in the course syllabi.

**Final Examination Conflicts**

When a student has three or more examinations scheduled on the same day, according to the examination schedule issued by the Registrar’s Office, the student can decide whether to take all three examinations on the same day or to have one rescheduled. If the student wishes to have one of the three examinations rescheduled, the examination with the lowest priority will be rescheduled. Order of priority: (1) major course, (2) cognate course, (3) elective course.

Where a conflict exists between two courses of the same kind (e.g., two cognates or two electives), the more senior professor – in terms of years of service at The University of Scranton – will have first priority.

If a student wishes to reschedule a conflict examination, he/she must advise the faculty member prior to the last week of class. If an appropriate resolution cannot be reached between the student and the faculty member, the student should contact his/her dean.

**Grading System**

Final grades are determined by faculty for all registered students at the completion of each fall and spring semester, as well as interim terms, according to the grading scheme defined in this section. Final grades are submitted by faculty through the authorized grading system designated by the Registrar’s Office and are recorded on the permanent transcript of academic record for each student. Grades are available to each student through their confidential account in the University Information System (UIS) at https://uis.uofs.edu after the grade submission deadline published in the academic calendar.

In addition, freshmen receive mid-semester grades at the mid-point of each fall and spring semester to provide feedback about their performance in their current courses to that point in time. Sophomores, juniors, and seniors receive mid-semester grades only if their performance is deficient (grade of C- or less) to that point in time. Mid-semester grades enable students to gauge if remedial or other actions, such as course withdrawal, are warranted. Mid-semester grades are temporary indications of performance and are not recorded on students’ academic transcripts.

**Primary Grades**

- **A, A+**: Excellent (outstanding and/or original work)
- **B+, B, B-**: Good
- **C+, C**: Satisfactory
- **C-, D+, D**: Passing but well below average
- **F**: Failure (below minimum acceptable standards)

**Additional Grading Codes**

- **W**: Withdrew officially; deadline is one month before the last day of classes for the semester
- **IP**: In Progress – must be removed by the last day of the following semester (normally for honors thesis courses only)
- **S**: Satisfactory – not calculated in grade point average (GPA)
- **U**: Unsatisfactory – equivalent to failure; not calculated in GPA
- **CR**: Audited course not taken for credit; does not count toward degree requirements or in the GPA
- **CS**: “Credit Satisfactory” – notes a course under the “credit/no credit” option in which a grade of “C” or higher is earned; counts in hours earned toward degree but not in GPA
- **CD**: “Credit Deficiency” – notes a course under the “credit/no credit” option in which a passing grade less than C (C-, D+, D) is earned; counts in hours earned toward degree but not in GPA
- **NC**: “No Credit” – notes a course taken under the “credit/no credit” option in which a grade of “C” or higher is earned; counts in hours earned toward degree but not in GPA
- **NG**: No grade assigned; converts to F if not resolved by midpoint of following semester
- **TC**: Transfer credit – counts in hours earned toward degree but not in GPA

**Audit**

Entry of the audit grade (AU) on a transcript assumes satisfactory attendance. The student should consult with the instructor as to what constitutes satisfactory attendance. A change to audit can be made only by passing students and before the end of the first half of a semester.

**Repeat of Course**

Special permission is not needed to repeat courses at The University of Scranton. Recording of grades for repeated courses shall be governed by the following conditions: (1) credit for a course will be granted only once; (2) credit for the course will be lost if the course is repeated and failed; (3) the most recent credit and grade will count toward the grade point average with the exceptions that a W, I or NG grade count in place of another grade; (4) each attempt to complete a course will be reported on the student’s transcript even though the credits of the earlier attempts do not count in the cumulative grade point average (e.g., a course with a grade of F will continue to appear on the transcript even after the course has been repeated with a passing grade, although the credits from the initial failed attempt will not be used in the calculation of the cumulative GPA).

The earlier attempt(s) (with the exception of W, I or NG) will be denoted on the transcript by an “E,” meaning that the course grade has been “Excluded” from the earned hours and GPA calculations. The latest attempt (with the exception of W, I or NG) will be denoted on the transcript by an “I,” meaning that the course grade has been “Included” in the earned hours and GPA requirements.

**Change of Grade**

A student who believes the grade received for a course is unreasonable should first appeal the matter to the professor, whose decision is normally final. The student has the right, however, to appeal to the faculty member’s chairperson, who will make a recommendation in writing to his or her dean. The student may request the dean to review the matter. The decision of the dean is final. Ordinarily, no grade change will be considered unless it has been reviewed by the dean’s office within one month from the time the original grade was available to the student.

**Grade Point Average (GPA)**

A standard used in judging a student’s performance is the grade point average (GPA). The value of each semester hour of credit earned is determined as follows: a grade of A is valued at 4 quality points; A- at 3.67 quality points; B+ at 3.33; B at 3.0; B- at 2.67; C+ at 2.33; C at 2.0; C- at 1.67; D+ at 1.33;
equivalent to C or higher; “CD; Credit Deficiency” for grades equivalent to C-, D+, and D; “NC: No Credit” for grades equivalent to F). Exceptions to these policies must be approved by the dean of the student’s college and by the dean of the school offering the course. The completed Reader and Independent Study forms should be submitted to the Registrar’s Office or Dexter Hanley College by the last day to add courses as published in the University academic calendar. A fee of $60 per credit in addition to the normal tuition will be charged.

Faculty conducting independent study courses will provide the dean’s office with a copy of the syllabus, reading lists, and examinations used in the independent study. Normally, faculty are limited to mentoring no more than two students per semester in any combination of readers, independent studies, and honors tutorials. Exceptions to this limitation can be made by the Dean for programmatic reasons or in response to course cancellations.

**Grade Conversion**

**Final Examination Conflicts**

A student who wishes to reschedule a conflict examination, he/she must advise the faculty member prior to the last week of class. If an appropriate resolution cannot be reached between the student and the faculty member, the student should contact his/her dean.

Where a conflict exists between two courses of the same kind (e.g., two cognates or two electives), the more senior professor – in terms of years of service at The University of Scranton – will have first priority.

Faculty conducting independent study courses will provide the dean’s office with a copy of the syllabus, reading lists, and examinations used in the independent study. Normally, faculty are limited to mentoring no more than two students per semester in any combination of readers, independent studies, and honors tutorials. Exceptions to this limitation can be made by the Dean for programmatic reasons or in response to course cancellations.

**Enrollment Status and Attendance Policy**

To be considered a full-time student, undergraduate students must be registered for at least 12 credits in any given term or semester, regardless of the number of credits remaining to complete degree requirements.

Students are expected to attend all scheduled meetings of courses in which they are enrolled. Students are responsible for all material presented and announcements made during any class. Attendance policies for individual courses are determined by the instructor and must be promulgated in writing in the course syllabi.

**Final Examination Conflicts**

**Grading System**

Final grades are determined by faculty for all registered students at the completion of each fall and spring semester, as well as interim terms, according to the grading scheme defined in this section. Final grades are submitted by faculty through the authorized grading system designated by the Registrar’s Office and are recorded on the permanent transcript of academic record for each student. Grades are available to each student through their confidential account in the University Information System (UIS) at https://uis.uofs.edu after the grade submission deadline published in the academic calendar.

In addition, freshmen receive mid-semester grades at the mid-point of each fall and spring semester to provide feedback about their performance in their current courses to that point in time. Sophomores, juniors, and seniors receive mid-semester grades only if their performance is deficient (grade of C- or less) to that point in time. Mid-semester grades enable students to gauge if remedial or other actions, such as course withdrawal, are warranted. Mid-semester grades are temporary indications of performance and are not recorded on students’ academic transcripts.

**Primary Grades**

A, A- Excellent (outstanding and/or original work)
B+, B- Good
B, C Good
C Satisfactory
C-, D+, D Passing but well below average
F Failure (below minimum acceptable standards)

**Additional Grading Codes**

W Withdrawn officially; deadline is one month before the last day of classes for the semester

I Incomplete – notes a course not completed due to illness or other serious reason; to remove this grade students must satisfy all course requirements by midpoint of the following semester or the grade will be converted to an F
IP In Progress – must be removed by the last day of the following semester (normally for honors thesis courses only)
S Satisfactory – not calculated in grade point average (GPA)
U Unsatisfactory – equivalent to F; not calculated in GPA
AU Audited course not taken for credit; does not count toward degree requirements or in the GPA
CR Credit by exam
CS “Credit Satisfactory” – notes a course taken under the “credit/no credit” option in which a grade of “C” or higher is earned; counts in hours earned toward degree but not in GPA
CD “Credit Deficiency” – notes a course taken under the “credit/no credit” option in which a passing grade less than C (C-, D+, D) is earned; counts in hours earned toward degree but not in GPA
NC “No Credit” – notes a course taken under the “credit/no credit” option in which a passing grade is not earned; does not count toward hours earned toward degree and does not count in GPA
NG No grade assigned; converts to F if not resolved by midpoint of following semester
TC Transfer credit – counts in hours earned toward degree but not in GPA

**Audit**

Entry of the audit grade (AU) on a transcript assumes satisfactory attendance. The student should consult with the instructor as to what constitutes satisfactory attendance. A change to audit can be made only by passing students and before the end of the first half of a semester.

**Repeat of Course**

Special permission is not needed to repeat courses at The University of Scranton. Recording of grades for repeated courses shall be governed by the following conditions:

1. credit for a course will be granted only once;
2. credit for the course will be lost if the course is repeated and failed;
3. the most recent credit and grade will count toward the grade point average with the exceptions that a W, I or NG grade cannot replace another grade;
4. each attempt to complete a course will be reported on the student’s transcript even though the credits of the earlier attempts do not count in the cumulative grade point average (e.g., a course with a grade of F will continue to appear on the transcript even after the course has been repeated with a passing grade, although the credits from the initial failed attempt will not be used in the calculation of the cumulative GPA)

The earlier attempt(s) (with the exception of W, I or NG) will be denoted on the transcript by an “E,” meaning that the course grade has been “Excluded” from the earned hours and GPA calculations. The latest attempt (with the exception of W, I or NG) will be denoted on the transcript by an “I,” meaning that the course grade has been “Included” in the earned hours and GPA requirements.

**Change of Grade**

A student who believes the grade received for a course is unreasonable should first appeal the matter to the professor, whose decision is normally final. The student has the right, however, to appeal to the faculty member’s chairperson, who will make a recommendation in writing to his or her dean. The student may request the dean to review the matter. The decision of the dean is final. Ordinarily, no grade change will be considered unless it has been reviewed by the dean’s office within one month from the time the original grade was available to the student.

**Grade Point Average (GPA)**

A standard used in judging a student’s performance is the grade point average (GPA). The value of each semester hour of credit earned is determined as follows: a grade of A is valued at 4 quality points; A- at 3.67; B+ at 3.33; B at 3.0; B- at 2.67; C+ at 2.33; C at 2.0; C- at 1.67; D+ at 1.33;
D at 1.0. An F yields no quality points. Thus, for example, a 3-credit course with a grade of A yields 12 quality points; a B yields 9; a C yields 6.

The GPA is computed by dividing the total number of quality points earned by the total of grade point average credit hours. For example, 15 credit hours, all at C grade, would earn 30 Quality Points or a 2.0 GPA (30/15).

The total number of grade point average credit hours includes those courses with final grades of F as well as A, A-, B+, B, B-, C+, C, C-, D+ and D. The grade designations of CD, CR, CS, I, IP, NC, NG, S, W, TC and U do not count toward the GPA. This grade point average applies only to courses taken at The University of Scranton. Grades from other institutions are not converted into students' grade point average with the exception of those earned at Marywood University through The University of Scranton/Marywood University cross-registration agreement.

A grade point average listing is made at the end of each semester. On the basis of his or her cumulative grade point average, a student's rank in class and eligibility for Latin honors at graduation are determined. See "Graduation Honors."

**Grades with Distinction**

**Dean's List**

To be eligible for the Dean’s List, College of Arts and Sciences, Kania School of Management, and Panuska College of Professional Arts and Sciences, Kania School of Management, Dexter Hanley College, no more than 12 credits toward their degree may elect to take some courses on a “credit/no credit” basis. Students may apply for the "credit/no credit" option by seeking approval from their dean’s office and filling the completed forms with the registrar by the end of the second week of the semester (or by the second day of summer sessions and intersession). The option cannot be reversed after the fourth week of class (or the fourth day of summer sessions and intersession). Courses used to fulfill general education requirements, courses in the major and concentration, as well as courses in a minor or concentration, and those used to fulfill requirements in the Honors, SJLA and Business Leadership programs may not be taken under the "credit/no credit" option. Students may take no more than a total of four courses under this option, and no more than one per semester (other than internships, practicums, or physical education courses). Students receive the following transcript notations under the "credit/no credit" option: A grade of C or higher yields a CS (credit satisfactory) notation; a passing grade less than C (C-, D, D+) yields a CD (credit deficiency) notation; a grade less than passing (F) yields an NC (no credit) notation.

**Presidential Honors**

To be eligible for the Presidential Honors, students must maintain a 3.5 GPA or higher for both the fall and spring semesters. Students who are selected for Presidential Honors are recognized each year.

**Grade Option: “Credit/No Credit”**

The “credit/no credit” option is designed to encourage students to take courses of interest but outside their concentrated areas of study. Courses used to fill free elective and free cognate requirements are eligible to be taken with this option. Courses taken under the “credit/no credit” option count toward the accumulated credit hours for the degree, but they are not included in the grade point average calculation.

Students with a cumulative GPA of 2.67 or greater who have accumulated at least 60 credits toward their degree may elect to take some courses on a “credit/no credit” basis. Students may apply for the “credit/no credit” option by seeking approval from their dean’s office and filling the completed forms with the registrar by the end of the second week of the semester (or by the second day of summer sessions and intersession). The option cannot be reversed after the fourth week of class (or the fourth day of summer sessions and intersession). Courses used to fulfill general education requirements, courses in the major and concentration, as well as courses in a minor or concentration, and those used to fulfill requirements in the Honors, SJLA and Business Leadership programs may not be taken under the “credit/no credit” option. Students may take no more than a total of four courses under this option, and no more than one per semester (other than internships, practicums, or physical education courses). Students receive the following transcript notations under the “credit/no credit” option: A grade of C or higher yields a CS (credit satisfactory) notation; a passing grade less than C (C-, D, D+) yields a CD (credit deficiency) notation; a grade less than passing (F) yields an NC (no credit) notation.

**Grade Difficulties: Probation and Dismissal**

One semester of probation is granted to students whose cumulative GPA falls below 2.0, or who otherwise are in danger of dismissal. A second semester of probation is not automatic; students who do not remedy themselves from probation after one semester are subject to dismissal, unless excepted by the appropriate dean. Students who receive an F while on probation are also subject to dismissal, as are students who incur two F’s in one semester, or who accumulate three F’s that have not been successfully retaken. Probationary status may be removed through adequate achievement in summer school or intersession at The University of Scranton. Students on academic probation are allowed to take no more than 14 credits (in Dexter Hanley College, no more than 12 credits) during the fall or spring semesters without explicit written approval of the appropriate dean. Students on academic probation are ineligible for participation in extra-curricular activities without the written approval of their moderator, academic advisor and dean.

Students placed on academic probation for a second semester may not participate in any extracurricular activity until such time as they are normally removed from academic probation. University policy prohibits students dismissed from another institution or a college of the University from registering for courses in any of the colleges of the University in the semester following dismissal.

**Graduation Procedures and Commencement**

The University of Scranton provides the opportunity for students who have completed degree requirements to graduate at one of four points throughout the academic year: summer graduation (graduation date: August 31), fall graduation (graduation date: December 31), intersession graduation (graduation date: January 31), or spring graduation (graduation date coincides with the annual Commencement exercise). Commencement exercises are held once each academic year at the conclusion of the spring semester; the date is published in the official University academic calendar. Normally students who are certified to graduate in the summer, fall, intersession or spring may participate in Commencement. Certification of graduation, receipt of a degree, and permission to participate in Commencement are not automatic. Seniors expecting to complete degree requirements in time for spring graduation must submit formal application through the Registrar’s Office or Dexter Hanley College by February 15. Students who are expecting to complete degree requirements for summer, fall or intersession graduation must make formal application a minimum of four weeks prior to the end of the appropriate term.

**Walker Policy**

Undergraduates who are within 6 academic credits of fulfilling all graduation requirements and are in good academic and disciplinary standing may request to “walk” at Commencement in the spring. They must present to their dean a plan to complete their remaining credits at The University of Scranton during the summer or fall sessions and receive the dean’s approval. Students may not participate in a second commencement upon completion of all degree requirements.

**Graduation Honors**

To be eligible for graduation and for Latin honors at commencement, a baccalaureate degree student must have completed a minimum of 63 credit hours of course work at The University of Scranton. Note: Latin honors are based upon a student’s final cumulative GPA at the completion of the baccalaureate degree program.

- Summa cum laude: 3.85 cumulative GPA with a minimum of 45 credits counting in the GPA
- Magna cum laude: 3.65 cumulative GPA with a minimum of 45 credits counting in the GPA
- Cum laude: 3.50 cumulative GPA with a minimum of 45 credits counting in the GPA

**Interruptions in Attendance: Leaves of Absence and Complete Withdrawal**

**Leave of Absence**

Students may request their dean’s approval for a leave of absence by completing and submitting the Withdrawal/Leave of Absence Form available from the Registrar’s Office, academic advising centers, academic department chairperson offices, and Dexter Hanley College. Graduation requirements in effect for
D at 1.0. An F yields no quality points. Thus, for example, a 3-credit course with a grade of A yields 12 quality points; a B yields 9; a C yields 6.

The GPA is computed by dividing the total number of quality points earned by the total of grade point average credit hours. For example, 15 credit hours, all at C grade, would earn 30 Quality Points or a 2.0 GPA (30/15).

The total number of grade point average credit hours includes those courses with final grades of F as well as A-, B-, B+, C-, C, D+ and D. The grade designations of CD, CR, CS, I, IP, NC, NG, S, W, TC and U do not count toward the GPA. This grade point average applies only to courses taken at The University of Scranton. Grades from other institutions are not computed into students' grade point average with the exception of those earned at Marywood University through the University of Scranton. Grades from other institutions are not computed into students' grade point average with the exception of those earned at Marywood University through the University of Scranton.

Grades with Distinction

**Dean's List**

To be eligible for the Dean’s List, College of Arts and Sciences, Kania School of Management, and Panuska College of Professional Studies students must earn 12 or more credit hours which count toward the semester GPA (credit hours of AU, CS, CD, I, IP, NG, S and W grades are not counted toward this requirement). Dexter Hanley College students need to complete 6 or more credit hours which count toward the semester GPA to be eligible for the Dean’s List. Of the eligible students, those who earn a 3.50 or higher semester GPA and no grade of D+, D, F, CD, NC, I, NG or U are named to the Dean’s List for that semester. (Note: Honors Program IP grades do not prevent eligibility for Dean’s List.) Students placed on the Dean’s List will have this distinction indicated on their transcripts. A student’s GPA will be recalculated when the last temporary grades are indicated on their transcripts. A student’s GPA must be recalculated when the last temporary grades are indicated on their transcripts. A student’s GPA must be recalculated when the last temporary grades are indicated on their transcripts.

**Grade Option: “Credit/No Credit”**

The “credit/no credit” option is designed to encourage students to take courses of interest but outside their concentrated areas of study. Courses used to fill elective and free cognate requirements are eligible to be taken with this option. Courses taken under the “credit/no credit” option count toward the accumulated credit hours for the degree, but they are not included in the grade point average calculation. Students with a cumulative GPA of 2.67 or greater who have accumulated at least 60 credits toward their degree may elect to take some courses on a “credit/no credit” basis. Students may apply for the “credit/no credit” option by seeking approval from their dean’s office and filing the completed forms with the registrar by the end of the second week of the semester (or by the second day of summer sessions and intersession). The option cannot be reversed after the fourth week of class (or the fourth day of summer sessions and intersession). Courses used to fulfill general education requirements, courses in the major and cognate, as well as courses in a minor or concentration, and those used to fulfill requirements in the Honors, SJLA and Business Leadership programs may not be taken under the “credit/no credit” option. Students may take no more than a total of four courses under this option, and no more than one per semester (other than internships, practicums, or physical education courses). Students receive the following transcript notations under the “credit/no credit” option: A grade of C or higher yields a CS (credit satisfactory) notation; a passing grade less than C (C-, D, D+) yields a CD (credit deficiency) notation; a grade lower than passing (F) yields an NC (no credit) notation.

**Grade Difficulties: Probation and Dismissal**

One semester of probation is granted to students whose cumulative GPA falls below 2.0, or who otherwise are in danger of dismissal. A second semester of probation is not automatic; students who do not remove themselves from probation after one semester are subject to dismissal, unless excepted by the appropriate dean. Students who receive an F while on probation are also subject to dismissal, as are students who incur two F’s in one semester, or who accumulate three F’s that have not been successfully retaken. Probationary status may be removed through adequate achievement in summer school or intersession at The University of Scranton.

**Students on academic probation are allowed to take no more than 14 credits (in Dexter Hanley College, no more than 12 credits) during the fall or spring semesters without explicit written approval of the appropriate dean. Students on academic probation are ineligible for participation in extracurricular activities without the written approval of their moderator, academic advisor and dean.**

Students placed on academic probation for a second semester may not participate in any extracurricular activity until such time as they are normally removed from academic probation.

University policy prohibits students dismissed from another institution or a college of the University from registering for courses in any of the colleges of the University in the semester following dismissal.

**Graduation Procedures and Commencement**

The University of Scranton provides the opportunity for students who have completed degree requirements to graduate at any of four points throughout the academic year: summer graduation (graduation date: August 31), fall graduation (graduation date: December 31), intersession graduation (graduation date: January 31), or spring graduation (graduation date coincides with the annual Commencement exercises). Commencement exercises are held once each academic year at the conclusion of the spring semester; the date is published in the official University academic calendar. Normally students who are certified to graduate in the summer, fall, intersession or spring may participate in Commencement.

Certification of graduation, receipt of a degree, and permission to participate in Commencement are not automatic. Seniors expecting to complete degree requirements in time for spring graduation must file formal application through the Registrar’s Office or Dexter Hanley College by February 15. Students who are expecting to complete degree requirements for summer, fall or intersession graduation must make formal application a minimum of four weeks prior to the end of the appropriate term.

**Walker Policy**

Undergraduates who are within 6 academic credits of fulfilling all graduation requirements and are in good academic and disciplinary standing may request to “walk” at Commencement in the spring. They must present to their dean a plan to complete their remaining credits at The University of Scranton during the summer or fall sessions and receive the dean’s approval. Students may not participate in a second commencement upon completion of all degree requirements.

**Graduation Honors**

To be eligible for graduation and for Latin honors at commencement, a bachelor degree student must have completed a minimum of 63 credit hours of course work at The University of Scranton. Note: Latin honors are based upon a student’s final cumulative GPA at the completion of the baccalaureate degree program. Students must earn a minimum of 45 credits counting toward the baccalaureate degree.

- **Summa cum laude:** 3.85 cumulative GPA with a minimum of 45 credits counting in the GPA
- **Magna cum laude:** 3.65 cumulative GPA with a minimum of 45 credits counting in the GPA
- **Cum laude:** 3.50 cumulative GPA with a minimum of 45 credits counting in the GPA

**Interruptions in Attendance: Leaves of Absence and Complete Withdrawal**

**Leave of Absence**

Students may request their dean’s approval for a leave of absence by completing and submitting the Withdrawal/Leave of Absence Form available from the Registrar’s Office, academic advising centers, academic department chairperson offices, and Dexter Hanley College. Graduation requirements in effect for
students at the time their approved leave begins will retain the same regulations they return from their leave under the following conditions:

- They are in good academic and disciplinary standing at The University when their leave begins.
- They may not take courses at another institution without first securing written approval from their dean.
- Their leave is limited to one semester but may be renewed for one additional semester with the written permission of their dean.
- They place their addresses and phone numbers on file in the Registrar’s Office (or Dexter Hanley College for DHC students) and promptly report any address/phone number changes to that office.
- They understand that this policy does not bind The University to offer their curricular or major programs, which may have been discontinued or substantially altered during their leave of absence.

Students who interrupt their education without an approved leave of absence must apply for readmission and will be subject to the catalog requirements in effect at the time of readmission. Students on an approved leave of absence must apply for readmission but retain the same requirements they had when they matriculated if their leaves do not extend beyond a year.

Military Leave Policy

If a student is called or volunteers for active military duty while attending The University of Scranton, the University will do its best to protect the academic and financial interest of the student within the norms of good academic judgment. The student must meet with the dean of his/her college and provide proof of being called to active duty. The dean, after conferring with the director of financial aid, the treasurer, the student’s current faculty, and the student, will decide the course of action. The dean will then process the necessary paperwork and place the student on military leave status. If the student does not concur with the dean’s decision, the student may appeal to the provost/vice president for academic affairs. The student is responsible for all room and board and related expenses incurred. Deans must confer with the Financial Aid and Treasurer’s Offices before making decisions regarding refunds.

Complete Withdrawal from the University

Students wishing to drop or withdraw from all of their courses, thereby discontinuing their enrollment, must secure their dean’s permission to withdraw from The University. Students should also discuss any questions with their advisor or department chairperson. The form for withdrawal may be obtained in the Registrar’s Office, Dexter Hanley College office, the academic advising centers, or in academic department chairpersons’ offices. University withdrawal is not official until all signatures required on the Withdrawal/Leave of Absence Form have been obtained and the form is submitted to the Registrar’s Office or, in the case of DHC students, to Dexter Hanley College.

Any tuition refund will be determined by the official date of University withdrawal. No grades for the term will be recorded on the student’s academic record if the official University withdrawal date is on or before the last day for 25% tuition refund or the last day to drop courses according to the official University academic calendar. Grades of W will be recorded for course work if the official University withdrawal date coincides with the course withdrawal period. Final grades will be recorded for course work if the official withdrawal date is after the course withdrawal period for the term.

Readmission to the University

A student who fails to enroll for a semester without an approved leave of absence must apply for readmission to The University and, if accepted, will need to satisfy the catalog requirements in effect at the time of readmission. Students on an approved leave of absence must apply for readmission but retain the same requirements they had when they matriculated if their leaves do not extend beyond a year.

University policy prohibits students dismissed from another institution or a college of the University from registering for courses in any of the colleges of the University in the semester following dismissal. A student must apply for readmission to the University through the college in which the intended program of study is housed. The dean of the college (GPA) and the readmitting dean) will confer with the student’s dean of last attendance at the University, if different from the readmitting dean, to review the student’s eligibility status for readmission to the University, and/or review a transcript and the student’s file in the Registrar’s Office, Dexter Hanley College or the Graduate School. The readmitting dean may confer with Student Affairs about any disciplinary or mental health issues that might preclude readmission, and if the student was on medical leave, may also require documentation from the health-care provider that the student may now resume their studies.

If the student is requesting readmission into a program other than the one of her/his last attendance, the readmitting dean will confer with the department chair or director of the program to which the student is requesting readmission, when there are program-specific admission requirements. If the student attended another college or university subsequent to her/his last attendance at The University, she/he must submit an official transcript from that institution to the readmitting dean before that dean will render a decision on readmission.

The dean will render a decision and inform the student and Registrar’s Office. If the dean renders a decision to readmit the student, that official transcript will then be forwarded to the Registrar’s Office (for undergraduate programs) or Graduate School (for graduate programs) for analysis/determination of transfer credit acceptable toward the intended program of study. Pre-permission to take courses elsewhere is valid only if the student continues in the same program, and if there have been no significant curricular changes mandated by relevant certification bodies in the interim that would affect the transfer credit. Transfer courses would need to be reevaluated upon readmission if the student switches programs.

Academic Renewal Policy Upon Readmission

Students who have not attended the University for at least five calendar years may request academic renewal. At the time of readmission, students seeking academic renewal must complete an academic renewal form and may petition their Dean to have up to 16 credit hours of deficient grades removed from their grade point average. The deficient courses and their grades will remain on the transcript; they will, however, be excluded from the GPA and earned hours and will not count toward graduation requirements. The courses with excluded grades on the transcript will be designated with an E, and the transcript key will explain that E means the course grade has been excluded from the GPA and earned hours, yielding an amended GPA. A comment also will be added to the transcript indicating that the student received academic renewal and the date.

Transferring Credits from Other Institutions Once Matriculating at The University of Scranton

Matriculating students in good academic and disciplinary standing at The University of Scranton can transfer in a maximum of 10% of the total credits in their program. Transfer students from another institution will be limited to a maximum of 10% of the total credits remaining in their program from the initial point of University of Scranton matriculation. All students must complete at least 63 credits at The University of Scranton, including the last 30 credits.

University of Scranton students who have completed their sophomore year (60 credits) are permitted to take courses at other four-year, regionally accredited institutions. Those who have not completed their sophomore year may be approved for courses at two-year or four-year regionally accredited institutions. Grades below C received elsewhere are not transferable to The University; no grades from other institutions are computed into the student’s grade point average.

Students must secure the permission of their dean to take courses at another institution. Students may not ordinarily take a course at another institution if they have failed the same course at The University of Scranton; however, exceptions to this policy can be made by the student’s dean.

Student Rights and Confidentiality of Information

The University of Scranton recognizes the privacy rights of individuals who are or who have been students, as guaranteed by the
students at the time their approved leave begins will retain eligibility when they return from their leave under the following conditions:

- They are in good academic and disciplinary standing at The University when their leave begins.
- They may not take courses at another institution without first securing written approval from their dean.
- Their leave is limited to one semester but may be renewed for one additional semester with the written permission of their dean.
- They place their addresses and phone numbers on file in the Registrar’s Office (or Hanley College for DHC students) and promptly report any address/phone number changes to that office.
- They understand that this policy does not bind The University to offer their curricula or major programs, which may have been discontinued or substantially altered during their leave of absence.

Students who interrupt their education without an approved leave of absence must apply for readmission and will be subject to the catalog requirements in effect at the time of readmission. Students on an approved leave of absence must apply for readmission but retain the same requirements they had when they matriculated if their leaves do not extend beyond a year.

Military Leave Policy
If a student is called or volunteers for active military duty while attending The University of Scranton, the University will do its best to protect the academic and financial interest of the student within the norms of good academic judgment. The student must meet with the dean of his/her college and provide proof of being called to active duty. The dean, after conferring with the director of financial aid, the treasurer, the student’s current faculty, and the student, will decide the course of action. The dean will then process the necessary paperwork and place the student on military leave status. If the student does not concur with the dean’s decision, the student may appeal to the provost/vice president for academic affairs. The student is responsible for all room and board and related expenses incurred. Deans must confer with the Financial Aid and Treasurer’s Offices before making decisions regarding refunds.

Complete Withdrawal from the University
Students wishing to drop or withdraw from all of their courses, thereby discontinuing their enrollment, must secure their dean’s permission to withdraw from The University. Students should also discuss any questions with their advisor or department chairperson. The form for withdrawal may be obtained in the Registrar’s Office, Hanley College office, the academic advising centers, or in academic department chairpersons’ offices. University withdrawal is not official until all signatures required on the Withdrawal/Leave of Absence Form have been obtained and the form is submitted to the Registrar’s Office or, in the case of DHC students, to Hanley College.

Any tuition refund will be determined by the official date of University withdrawal. No grades for the term will be recorded on the student’s academic record if the official University withdrawal date is on or before the last day for 25% tuition refund or the last day to drop courses according to the official University academic calendar. Grades of W will be recorded for course work if the official University withdrawal date coincides with the course withdrawal period. Final grades will be recorded for course work if the official withdrawal date is after the course withdrawal period for the term.

Readmission to the University
A student who fails to enroll for a semester without an approved leave of absence must apply for readmission to The University and, if accepted, will need to satisfy the catalog requirements in effect at the time of readmission. Students on an approved leave of absence must apply for readmission but retain the same requirements they had when they matriculated if their leaves do not extend beyond a year.

University policy prohibits students dismissed from another institution or a college of the University from registering for courses in any of the colleges of the University in the semester following dismissal. A student must apply for readmission to the University through the college in which the intended program of study is housed. The dean of the college (or the readmitting dean) will confer with the student’s dean of last attendance at the University, if different from the readmitting dean, to review the student’s eligibility status for readmission to the University, and review a transcript and the student’s file in the Registrar’s Office, Hanley College or the Graduate School. The readmitting dean may confer with Student Affairs about any disciplinary or mental health issues that might preclude readmission, and if the student was on medical leave, may also require documentation from the healthcare provider that the student may now resume their studies.

If the student is requesting readmission into a program other than the one of her/his last attendance, the readmitting dean will confer with the department chair or director of the program to which the student is requesting readmission, when there are program-specific admission requirements. If the student attended another college or university subsequent to her/his last attendance at the University the student must submit an official transcript from that institution to the readmitting dean before that dean will render a decision on readmission.

The dean will render a decision and inform the student and Registrar’s Office. If the dean renders a decision to readmit the student, that official transcript will then be forwarded to the Registrar’s Office (for undergraduate programs) or Graduate School (for graduate programs) for analysis/determination of transfer credit acceptable toward the intended program of study. Pre-approval to take courses elsewhere is valid only if the student continues in the same program, and if there have been no significant curricular changes mandated by relevant certification bodies in the interim that would affect the transfer credit. Transfer courses would need to be reevaluated upon readmission if the student switches programs.

Academic Renewal Policy Upon Readmission
Students who have not attended the University for at least five calendar years may request academic renewal. At the time of readmission, students seeking academic renewal must complete an academic renewal form and may petition their Dean to have up to 16 credit hours of deficient grades removed from their grade point average (GPA). The deficient courses and their grades will remain on the transcript; they will, however, be excluded from the GPA and earned hours and will not count toward graduation requirements. The courses with excluded grades on the transcript will be designated with an E, and the transcript key will explain that E means the course grade has been excluded from the GPA and earned hours, yielding an amended GPA. A comment also will be added to the transcript indicating that the student received academic renewal and the date.

Transferring Credits from Other Institutions Once Matriculating at The University of Scranton
Matriculating students in good academic and disciplinary standing at The University of Scranton can transfer in a maximum of 10% of the total credits in their program. Transfer students from another institution will be limited to a maximum of 10% of the total credits remaining in their program from the initial point of University of Scranton matriculation. All students must complete at least 63 credits at The University of Scranton, including the last 30 credits.

University of Scranton students who have completed their sophomore year (60 credits) are permitted to take courses at other four-year, regionally accredited institutions. Those who have not completed their sophomore year may be approved for courses at two-year or four-year regionally accredited institutions. Grades below C received elsewhere are not transferable to The University; no grades from other institutions are computed into the student’s grade point average.

Students must secure the permission of their dean to take courses at another institution. Students may not ordinarily take a course at another institution if they have failed the same course at The University of Scranton; however, exceptions to this policy can be made by the student’s dean.

Student Rights and Confidentiality of Information
The University of Scranton recognizes the privacy rights of individuals who are or who have been students, as guaranteed by the
Students who wish to prevent the public disclosure of any or all the above information may complete and submit a request to the Office of Student Affairs, Registrar’s Office, Dexter Hanley College (DHC students) or the Graduate School (graduate students). Request forms are available from any of the preceding offices.

A directory of names, addresses and telephone numbers of students is promulgated by The University at the beginning of the fall semester. Students who do not wish to be listed in the campus directory must notify the University by the end of the first week of classes in the fall semester.

FERPA affords students the right to inspect and review their educational records within 45 days of the day The University receives such requests. Students should submit to the Registrar or other appropriate official written requests that identify the record(s) they wish to inspect. University officials will make arrangements for access and notify requesting students of the time and place where their records may be inspected.

Students have the right to request the amendment of any educational records that they believe are inaccurate or misleading. They should write to the University official responsible for the record, clearly identify the part of the record that they want changed, and specify why they believe it is inaccurate or misleading. If The University decides not to amend the record as requested, the University will notify students of the decision and their right to appeal to the appropriate University official or third party to whom they write.

For more information regarding FERPA, please contact the Office of the Registrar, Room 301, St. Thomas Hall. Students who do not wish to be listed in the campus directory must notify the University by the end of the first week of classes in the fall semester.

The University considers the following to be public information that may be made available, at its discretion, without prior consent of the student:

- Name
- Former name(s)
- Address (local and permanent)
- Telephone number (campus/local and permanent)
- Date and place of birth

* Available through Dexter Hanley College only.

† Students entering the Occupational Therapy Program will earn a B.S. in Health Sciences after completing the first four years of a five-year program and a Master of Science degree in Occupational Therapy after completion of the fifth year.
Family Educational Rights and Privacy Act (FERPA) of 1974. No information from educational records, files, or other data directly related to a student shall be disclosed to individuals or agencies outside The University without the express written consent of the student. Except where prescribed by law, information regarding a student’s education record may not be disclosed to a parent, guardian or spouse without the student’s written authorization on file in the Office of the Registrar, Dexter Hanley College (DHC students), or Graduate School (graduate students).

FERPA does authorize The University to disclose information without consent to school officials with legitimate educational interests who need to review an education record in order to fulfill their professional responsibilities. The following people or agencies are also allowed access to records without consent: persons or companies with whom The University has contracted (such as attorneys, auditors or collection agents); students serving on official committees (such as disciplinary or grievance committees) or assisting school officials in performing their tasks; persons or organizations to whom students have applied for financial aid; persons in compliance with a lawful subpoena or court order; and persons in an emergency in order to protect the health or safety of students or other persons.

The University considers the following to be public information that may be made available, at its discretion, without prior consent of the student:

- Name
- Former name(s)
- Address (local and permanent)
- Telephone number (campus/local and permanent)
- Date and place of birth
- Photograph

- Weight and height of members of athletic teams

Students who wish to prevent the public disclosure of any or all the above information may complete and submit a request to the Office of Student Affairs, Registrar’s Office, Dexter Hanley College (DHC students) or the Graduate School (graduate students). Request forms are available from any of the preceding offices. A directory of names, addresses and telephone numbers of students is promulgated by The University at the beginning of the fall semester. Students who do not wish to be listed in the campus directory must notify the University by the end of the first week of classes in the fall semester.

FERPA affords students the right to inspect and review their educational records within 45 days of the day The University receives such requests. Students should submit to the Registrar or other appropriate official written requests that identify the record(s) they wish to inspect. University officials will make arrangements for access and notify requesting students of the time and place where their records may be inspected.

Students have the right to request the amendment of any educational records that they believe are inaccurate or misleading. They should write to the University official responsible for the record, clearly identify the part of the record that they want changed, and specify why they believe it is inaccurate or misleading. If The University decides not to amend the records, it will notify the student of the decision and advise them of their right to appeal the decision and the process that must be undertaken to do so.

For more information regarding FERPA, please contact the Office of the Registrar, Room 301, St. Thomas Hall. Students have the right to file a complaint with the U.S. Department of Education concerning alleged failures by The University of Scranton to comply with the requirements of FERPA. The name and address of the office that administers FERPA is: Family Policy Compliance Office, U.S. Department of Education, 400 Maryland Avenue SW, Washington, DC 20202-4605.

In addition, The University of Scranton complies with the Student Right-to-Know Act by providing graduation rate information to current and prospective students upon request. Graduation rate information may be obtained by contacting the Registrar’s Office or the Office of Admissions.

Special Programs

Combined Baccalaureate/Master’s Degree
Undergraduate students of the University with outstanding undergraduate records may be eligible to be accepted and dually enrolled in a master’s degree program prior to graduation. A student who has achieved an overall grade point average of 3.5 after 64 semester hours, 3.4 after 80 semester hours, 3.3 after 96 semester hours, or 3.2 after 112 semester hours (with at least 32 graded hours at the University) may apply for early admission to a master’s degree program through the Combined Baccalaureate/Master’s Degree Program. Master’s degree programs that accept Combined Baccalaureate/Master’s Degree students and details of those programs are found in the section on The Graduate School.

Fellowship Programs
The Office of Fellowship Programs, located in St. Thomas 312, assists students preparing to make application for national and international awards, including, among others, the Truman, Mellon, James Madison, National Science Foundation, Goldwater, Soros, Churchill, Marshall, and Rhodes Scholarships. The University Director of Fellowship Programs advises students with outstanding academic records in the identification of appropriate fellowships and scholarships. Members of the Matteo Ricci Society, including the directors of the Undergraduate Honors Program, the Special Jesuit Liberal Arts Program, and the Business Leadership Program, as well as the faculty advisors for the Truman, Goldwater, Fulbright, and National Science Foundation, provide guidance to the Fellowship Program.

International Education
In fulfillment of our mission as a Catholic and Jesuit institution, the University of Scranton is committed to building a diverse international institution that serves the needs of an increasingly interdependent global community. We strive to create a welcoming and richly diverse campus with a strong commitment to international education and fellowship of the human family. The University of Scranton has a solid international education record. To date, nearly 1,300 University students from nearly every major have studied in 51 countries and on every continent but Antarctica. Our faculty, administrators and staff hold degrees from 135 different universities in 30 countries on five continents. International students have been attending the University since 1946. At present, students from 30 different countries are enrolled in either the undergraduate or graduate schools.

International Programs and Services Mission Statement
The International Programs and Services Office promotes the University's mission by facilitating the integration and acculturation of international students and scholars, as well as by promoting initiatives such as study abroad, scholarships, internships, global partnerships and service learning programs. Reaching out to the entire campus community, our services are designed to encourage and foster understanding and appreciation of diverse cultures, as well as to help prepare our students for successful participation and leadership in a global society. We invite you to visit us to learn more about how we are building bridges to promote intercultural understanding, global competency and fellowship in our interconnected world.

Special Programs

Combined Baccalaureate/Master’s Degree

Undergraduate students of the University with outstanding undergraduate records may be eligible to be accepted and dually enrolled in a master’s degree program prior to graduation. A student who has achieved an overall grade point average of 3.5 after 64 semester hours, 3.4 after 80 semester hours, 3.3 after 96 semester hours, or 3.2 after 112 semester hours (with at least 32 graded hours at the University) may apply for early admission to a master’s degree program through the Combined Baccalaureate/Master’s Degree Program. Master’s degree programs that accept Combined Baccalaureate/Master’s Degree students and details of those programs are found in the section on The Graduate School.

Doctoral Program

Commencing fall 2004, the University will offer a transitional Doctor of Physical Therapy. This degree program will be an online program and offered to all master’s-educated physical therapists. Further information about the transitional Doctor of Physical Therapy program is available in the Graduate School Catalog.

Double Major

Students at the end of the first semester of freshman year or thereafter may elect to pursue a second field of concentration in addition to their first major. Students must secure written permission from the appropriate dean and the two pertinent departmental chairs. Students pursuing a second major are required to complete all major and required cognate courses and any general education courses that are explicitly required as part of the second major. The remainder of the credits in the General Education area need not be repeated. Except for double majors involving education and a content area, a second major will not be awarded for fewer than 18 credits in the second field that are not counted as part of the first major. Students completing double majors receive only one degree and diploma.

Faculty/Student Research Program

The Faculty/Student Research Program (FSRP) gives students an opportunity to be involved in faculty research. Students in all fields can participate. They engage in a variety of activities ranging from relatively routine tasks to more sophisticated research.

There is no cost for the FSRP; the program is open to all students in good academic standing including incoming freshmen. While students do not receive academic credit, they do receive transcript recognition.

To participate in the program, students must identify a faculty sponsor with whom they want to work. This can be done either by talking to individual faculty members directly about their research interests or by consulting the FSRP Directory. The Directory includes information on research projects and any student prerequisites. When a student and faculty member agree to work together, they complete a learning contract that outlines the nature of the research, the tasks involved and the hours to be worked.

For further information about this program, contact the Office of Research Services, O’Hara Hall, (570) 941-6190.

Fellowship Programs

The Office of Fellowship Programs, located in St. Thomas 312, assists students preparing to make application for national and international awards, including, among others, the Truman, Mellon, James Madison, National Science Foundation, Goldwater, Soros, Churchill, Marshall, and Rhodes Scholarships. The University Director of Fellowship Programs advises students with outstanding academic records in the identification of appropriate fellowships and scholarships.

Members of the Matteo Ricci Society, including the directors of the Undergraduate Honors Program, the Special Jesuit Liberal Arts Program, and the Business Leadership Program, as well as the faculty advisors for the Truman, Goldwater, Fulbright, and National Science Foundation, provide guidance to the Fellowship Program.

International Education

In fulfillment of our mission as a Catholic and Jesuit institution, The University of Scranton is committed to building a diverse international institution that serves the needs of an increasingly interdependent global community. We strive to create a welcoming and richly diverse campus with a strong commitment to international education and fellowship of the human family.

The University of Scranton has a solid international education record. To date, nearly 1,300 University students from nearly every major have studied in 51 countries and on every continent but Antarctica. Our faculty, administrators and staff hold degrees from 135 different universities in 30 countries on five continents. International students have been attending the University since 1946. At present, students from 30 different countries are enrolled in either the undergraduate or graduate schools.

International Programs and Services Mission Statement

The International Programs and Services (IPS) office promotes the University’s mission by facilitating the integration and acculturation of international students and scholars, as well as by promoting initiatives such as study abroad, scholar exchanges, international internships, global partnerships and service learning programs. Reaching out to the entire campus community, our services are designed to encourage and foster understanding and appreciation of diverse cultures, as well as to help prepare our students for successful participation and leadership in a global society. We invite you to visit us to learn more about how we are building bridges to promote intercultural understanding, global competency and fellowship in our interconnected world.

Studying Abroad

The University of Scranton provides opportunities for students to continue their studies at other universities around the world. IPS provides on-campus shopping for students interested in studying abroad. The office encourages students who have an interest in gaining global experiences to stop by early and often in their academic career. Experts will help students identify study abroad options, provide academic advising, process applications, and provide comprehensive pre-departure services.

The University works closely with institutions around the world and is committed to working with the individual student to identify the study abroad site that is best for them. In many cases, adjusted financial aid packages and University of Scranton scholarships may be used while studying abroad.

International Students and Scholars

IPS ensures the smooth integration and acculturation of international students and scholars into the University community; ensures compliance with immigration regulations for the University; facilitates relocation of international students and scholars to the Scranton area; provides guidance, counseling and mentoring; and creates opportunities for international students and scholars to become valued and productive members of the community.

International Programming

IPS sponsors a variety of internationally focused activities and programs during the academic year such as International Education Week and International Women’s Week. Bi-weekly faculty and student discussion groups that focus on pressing global issues and events are held in the IPS International Center. Additionally, IPS hosts weekly language and culture sessions designed to give students and faculty the opportunity to develop new lin-
guistic skills or hone the language they have. IPS also sponsors a Family Friendship Pro-
gram that connects international students with families in the local community. Through the Global Ambassador Program, American students who have studied abroad and international students visit classrooms in local schools and the University to discuss aspects of their experiences and culture. Finally, IPS brings a variety of speakers to campus to discuss issues of international importance. Past speakers have included the National Security Advisor to former Vice President Gore, the Director of Social and Humanitarian Affairs at the United States State Department and internationally recog-
nized faculty members from universities worldwide.

**Internship Programs**

The University’s commitment to intern-
ships as an integral part of the educational process is strong. Internships give students opportunity to reflect upon, analyze and crit-
ique their experiences in ways that demon-
strate their ability to integrate what they have learned in the classroom with what they are learning in the field.

Credit-bearing internships are available to students in many majors. For specific inform-
ation on such internships, students should contact their academic advisors. These intern-
ships require students to develop a set of clearly defined objectives, internship responsi-
bilities and an assessment plan. They are co-
supervised by a faculty member and an on-
site supervisor.

Non-credit-bearing internships are also available. They are less structured and do not necessarily relate to specific course work. Students wishing to participate in the non-credit-bearing Career Experience Program should contact Career Services at (570) 941-7640 to schedule an appointment with a counselor.

**Second Degrees**

Persons with good scholastic records and baccalaureate degrees from regionally accred-
ited institutions, who wish to earn second baccalaureate degrees, must apply to Dexter Hanley College.

**Service Learning**

The Panuska College of Professional Studies, in keeping with the mission of this University, is committed to a program of service-learning, which provides a link between community service and academic study. Students learn and develop by participating in thoughtfully organized service that is conducted in and meets the needs of the community. Service-
learning is integrated into and enhances stu-
dents’ academic curriculum by providing structured time for students to reflect on the service experience. The service experience is an effective strategy for achieving enrollment and introducing the student to the academic, social and civic needs of diverse groups of people. Through this program, students in The Panuska College of Professional Studies complete service-learning experiences as a requirement for graduation.

Several courses in The College of Arts and Sciences also include a service-learning requirement.

**Special Sessions**

The University of Scranton annually offers Intersession in January and two summer ses-
sions to allow students to accelerate their degree programs or to make up courses that may not have been completed during the reg-
ular semesters.

**Student/Faculty Teaching Mentorship Program**

The Student/Faculty Teaching Mentorship Program offers advanced students the oppor-
tunity to assist and be mentored by faculty in the teaching of selected courses. Together, they will craft the mentoring experiences that best fit the pedagogical requirements of the relevant course.

There is no fee assessed for this non-credit experience. While students do not receive academic credit or a grade, they do receive trans-
script recognition. The program is open to all undergraduate and graduate students in good academic standing.

For more information about the program, please contact the Center for Teaching and Learning Excellence, 5th Floor, Harper-
McGinnis Wing, St. Thomas Hall, (570) 941-4038.

**Three-Year Bachelor’s Degree**

The University of Scranton’s curriculum and academic calendar allow qualified stu-
dents to attain their bachelor’s degrees within three years – thus considerably reducing the overall cost of their undergraduate education and allowing the student to enter the market-
place or begin graduate and professional stud-
ies a year earlier. While Advanced Placement credits are very useful for this, a student who does not bring these from high school may still complete the degree program in most majors within three years through the use of January intersession courses and/or summer-
school sessions. The presumption is that nor-
mal academic progress is being made. Typi-
cally, two summer schools (12 credits each) and two or three January intersessions will suffice. Especially qualified students may be allowed overloads from the appropriate dean to further reduce this – as will Advanced Placement credits. The dean should be con-
tacted as early as possible in a student’s career in order to facilitate the needed scheduling. Entering freshman students may want to use the summer school immediately following their high school graduation to further this three-year program; the Director of Admis-
sions should be consulted with respect to this. Details on the special Scranton Preparatory/ University Seven Year (4-3) High School-
College Degree Program are available from the Dean of Studies at Scranton Preparatory.

**University of Scranton/Marywood University Cross-Registration**

This program is available to second-, third-
and fourth-year students in good academic standing. Transfer students are eligible after completing their first year at The University of Scranton. Students may take two such courses (equivalent to 6 credits) during the calendar year (January to December), with the approval of their advisor and dean, and on a space-available basis.

**Programs of Excellence**

**Special Jesuit Liberal Arts Program (SJLA)**

Rev. Ronald McKinney, S.J., Director

Available by invitation to incoming fresh-
men, the Special Jesuit Liberal Arts Program provides an alternate way of fulfilling General Education requirements. Students not selected initially may apply for admission as second semester freshmen or as sophomores. Courses for SJLA program participants, who are drawn from all different majors, attempt to foster the following skills that University graduates have found particularly useful in law, medicine, business and graduate school:

1. An understanding of key achievements in the literature, history, philosophy, the-
ology and science of the Western classi-
cal and Christian heritage;
2. An ability to apply logical, systematic, and critical reflection to any given intel-
lectual problem;
3. An understanding of and sensitivity toward the contemporary problems of our day;
4. An outstanding ability to communicate clearly and persuasively one’s ideas through both the spoken and written word (what Jesuits have historically referred to as eloquencia perfecta).

Students are expected to become involved in extracurricular and service activities on campus if they wish to remain in SJLA. Many participants also study abroad, earn a double major in philosophy, and join the Honors Program if they apply and are accepted during their sophomore year. Above all, participants are expected to seek out and interact with their professors and other students in this community of learning, which is under the direction of Rev. Ronald H. McKinney, S.J.

SJLA students are eligible to apply for the Christopher Jason Perfilio Memorial Scholar-
ships, awarded each year since 1995.

**Course Descriptions**

**PHIL 120J**

Introduction to Philosophy

The aim of this course is to awaken in the student an appreciation of the nature and method of phil-
osophical inquiry through an examination of key
guistic skills or hone the language they have. IPS also sponsors a Family Friendship Pro-
gram that connects international students with families in the local community. Through the Global Ambassador Program, American students who have studied abroad and international students visit classrooms in local schools and the University to discuss aspects of their experiences and culture. Finally, IPS brings a variety of speakers to campus to discuss issues of international importance. Past speakers have included the National Security Advisor to former Vice President Gore, the Director of Social and Humanitarian Affairs at the United States State Department and internationally recognized faculty members from universities worldwide.

**Internship Programs**

The University’s commitment to internships as an integral part of the educational process is strong. Internships give students opportunity to reflect upon, analyze and critique their experiences in ways that demonstrate their ability to integrate what they have learned in the classroom with what they are learning in the field.

Credit-bearing internships are available to students in many majors. For specific information on such internships, students should contact their academic advisors. These internships require students to develop a set of clearly defined objectives, internship responsibilities and an assessment plan. They are supervised by a faculty member and an on-site supervisor.

Non-credit-bearing internships are also available. They are less structured and do not necessarily relate to specific course work. Students wishing to participate in the non-credit-bearing Career Experience Program should contact Career Services at (570) 941-7640 to schedule an appointment with a counselor.

**Second Degrees**

Persons with good scholastic records and baccalaureate degrees from regionally accredited institutions, who wish to earn second baccalaureate degrees, must apply to Dexter Hanley College.

**Service Learning**

The Panuska College of Professional Studies, in keeping with the mission of this University, is committed to a program of service-learning, which provides a link between community service and academic study. Students learn and develop by participating in thoughtfully organized service that is conducted in and meets the needs of the community. Service-learning is integrated into and enhances students’ academic curriculum by providing structured time for students to reflect on the service experience. The service experience is an effective strategy for achieving enrollment and introducing the student to the academic, social and civic needs of diverse groups of people. Through this program, students in The Panuska College of Professional Studies complete service-learning experiences as a requirement for graduation.

Several courses in The College of Arts and Sciences also include a service-learning requirement.

**Special Sessions**

The University of Scranton annually offers Intersession in January and two summer sessions to allow students to accelerate their degree programs or to make up courses that may not have been completed during the regular semesters.

**Student/Faculty Teaching Mentorship Program**

The Student/Faculty Teaching Mentorship Program offers advanced students the opportunity to assist and be mentored by faculty in the teaching of selected courses. Together, they will craft the mentoring experiences that best fit the pedagogical requirements of the relevant course.

There is no fee assessed for this non-credit experience. While students do not receive academic credit or a grade, they do receive transcript recognition. The program is open to all undergraduate and graduate students in good academic standing.

For more information about the program, please contact the Center for Teaching and Learning Excellence, 5th Floor, Harper-McCinnis Wing, Sr. Thomas Hall, (570) 941-4038.

**Three-Year Bachelor’s Degree**

The University of Scranton’s curriculum and academic calendar allow qualified students to attain their bachelor’s degrees within three years – thus considerably reducing the overall cost of their undergraduate education and allowing the student to enter the marketplace or begin graduate and professional studies a year earlier. While Advanced Placement credits are very useful for this, a student who does not bring these from high school may still complete the degree program in most majors within three years through the use of January intersession courses and/or summer-school sessions. The presumption is that normal academic progress is being made. Typically, two summer schools (12 credits each) and two or three January intersessions will suffice. Especially qualified students may be allowed overrides from the appropriate dean to further reduce this – as will Advanced Placement credits. The dean should be contacted as early as possible in a student’s career in order to facilitate the needed scheduling. Entering freshman students may want to use the summer school immediately following their high school graduation to further this three-year program; the Director of Admissions should be consulted with respect to this. Details on the special Scranton Preparatory/University Seven Year (4-3) High School-College Degree Program are available from the Dean of Studies at Scranton Preparatory.

**University of Scranton/Marywood University Cross-Registration**

This program is available to second-, third- and fourth-year students in good academic standing. Transfer students are eligible after completing their first year at The University of Scranton. Students may take two such courses (equivalent to 6 credits) during the calendar year (January to December), with the approval of their advisor and dean, and on a space-available basis.

**Programs of Excellence**

**Special Jesuit Liberal Arts Program (SJLA)**

Rev. Ronald McKinney, S.J., Director

Available by invitation to incoming freshmen, the Special Jesuit Liberal Arts Program provides an alternate way of fulfilling General Education requirements. Students not selected initially may apply for admission as second semester freshmen or as sophomores. Courses for SJLA program participants, who are drawn from all different majors, attempt to foster the following skills that University graduates have found particularly useful in law, medicine, business and graduate school:

1. An understanding of key achievements in the literature, history, philosophy, theology and science of the Western classical and Christian heritage;
2. An ability to apply logical, systemic, and critical reflection to any given intellectual problem;
3. An understanding of and sensitivity toward the contemporary problems of our day;
4. An outstanding ability to communicate clearly and persuasively one’s ideas through both the spoken and written word (what Jesuits have historically referred to as eloquien\*tia perfecta).

Students are expected to become involved in extracurricular and service activities on campus if they wish to remain in SJLA. Many participants also study abroad, earn a double major in philosophy, and join the Honors Program if they apply and are accepted during their sophomore year. Above all, participants are expected to seek out and interact with their professors and other students in this community of learning, which is under the direction of Rev. Ronald H. McKinney, S.J.

SJLA students are eligible to apply for the Christopher Jason Perfilio Memorial Scholarships, awarded each year since 1995.

**Course Descriptions**

**PHIL 120J**

3 cr.

*Introduction to Philosophy*

The aim of this course is to awaken in the student an appreciation of the nature and method of philosophical inquiry through an examination of key
texts, which grapple with the central questions that have arisen in the history of philosophy.

**PHIL 210J**  
**Ethics**  
Through the presentation of a select history of moral philosophy, students are introduced to the philosophical discipline of ethics. Original texts of such thinkers as Plato, Aristotle, Epicurus, Epictetus, St. Augustine, Hobbes, Kant, Mill, and Nietzsche are enlisted to explore the most fundamental question in ethics, “What is the good life?”

**PHIL 311J**  
**Metaphysics**  
A textual inquiry into the adequacy of philosophical responses to the fundamental question, “What is?” Special attention will be given to Aristotle, Hume, Kant, and Nietzsche.

**PHIL 217J**  
**The Trivium**  
Via numerous writing projects and speeches and the analysis of select philosophical texts, this practicum in grammar, logic, and rhetoric will encourage the student to connect the basic elements of reason, discourse, and persuasion.

**PHIL 322J**  
**Philosophy of Conscience**  
Studies the role of conscience in moral judgment and considers its metaphorical and narrative elements. Explores the difference between clarity and community, truth and wisdom, principle and prudence as we study possible links between conscience, reason, eros, imagination and education in some of the works of Plato, Kant and Marx.

**PHIL 412J**  
**(PD) Art and Metaphysics**  
The course utilizes the work of Martin Heidegger as well as several contemporary American novels to explore the philosophical problem of nihilism as it manifests itself today in the relationship between modern technology and art. Special attention is given to modern architecture.

**PHIL 413J**  
**The End of Philosophy**  
The title of this SJLA capstone course refers to its three objectives. These are: (1) to complete and unify SJLA coursework in philosophy, (2) to clarify philosophy’s purpose or goal, and (3) to interpret contemporary anxiety about the end of the philosophical tradition.
texts, which grapple with the central questions that have arisen in the history of philosophy.

PHIL 419J 3 cr.
(D) Philosophy East and West
This course brings non-Western philosophy and philosophers into a dialogue with Western philosophy and philosophers on major philosophical topics.

T/RS 121J 3 cr.
(P) Theology I: Introduction to the Bible
A survey of central texts and themes of the Bible. Its purpose is to develop biblical literacy as well as skills in interpreting various literary forms and key theological concepts.

T/RS 122J 3 cr.
(P) Theology II: Introduction to Christian Theology
(Prerequisite: T/RS 121J) A survey of key Christian themes: creation, Christ’s incarnation and redemption, the Church and sacraments, Christian personhood, and the practice of prayer, virtue, and hope for the future.

HUM 311J-312J 6 cr.
Masterworks I-II
In this team-taught, year-long seminar, students will read some of the great classics of world literature, learn how to facilitate their own discussions, write a comparative analytic paper, and be orally examined by a host of volunteer professors.

Electives and Exemptions
SJLA’s five or six elective (beyond the two-semester language requirement) credits are intended to be used toward courses in math, computer literacy, and the natural and social sciences. These tutorials count toward major, minor, cognate, or general education requirements.

In the Honors seminars, a small group of Honors students meets weekly with the director and assistant director for student-led discussions. The junior seminar is based on an interdisciplinary reading list; the senior seminar is based on the senior Honors projects. There is no tuition charge for these seminars, since they are the only Honors requirements that do not satisfy ordinary graduation requirements.

Senior Honors students do a yearlong, 6-credit project in their majors, working under the guidance of a professor to explore a specialized topic, either academic or professional in nature. Upon completion, the project is defended before a board of three faculty members who judge whether it is of Honors caliber. There is no extra charge for Honors work.

In addition, Honors students may take between 12 and 21 credits in their third and fourth years at the flat rate.

Admission to the Honors Program
Applications are accepted every fall from those students who have at least 18 hours of college credit and who expect to graduate after three more years of work at the University.

Business Leadership Program

Robert L. McKeage, Ph.D., Director

Leadership, the process of persuasion or example by which the members of a group are persuaded to pursue the group’s objectives, is the focus of many new programs in education. The Business Leadership Program in the University’s Kania School of Management provides selected students with an opportunity to perfect their talents for business leadership. The program includes special sections of key business courses taught from the leadership perspective, leadership seminars, a mentor/internship program, and an independent leadership project.

Course Descriptions

No Honors Program courses may be taken on a Pass/Fail basis.

HUM 286H 3 cr.
(C.W.) Victorian Studies
This course uses literature to explore 19th-century British social and intellectual history. Focusing on the period from 1832 to 1901, it examines Victorian attitudes toward industrialization, religion, art and gender.

(S.W.D.) SOC 217H 3 cr.
Family Issues and Social Policy
This course examines the conditions, problems and policies associated with work-family issues, divorce, family violence and elder care. Students will use service-learning experience to evaluate these policies from a multicultural perspective, to determine who really benefits from them, and to assess any unintended consequences (positive and negative).

HONR 387H 2 cr.
Junior Honors Seminar
Student-led discussions of contemporary non-fictional works chosen for their variety and their importance.

HONR 489H 1 cr.
Senior Honors Seminar
Student-led discussions of the content, rationale, and methodology of Senior Honors Projects.

DEPT 385H-389H 3 cr. each
Honors Tutorial
An exploration of a topic on an individually directed basis.

DEPT 487H-489H 6 cr. total
Honors Project
An independent project of academic or professional nature culminating in an oral defense before a board of three faculty members.

Business Leadership Program Schedule

Third Year
Fall: BLDR 351: Principles of Management
Spring: BLDR 355: Business Ethics
BLDR 386: Business Leadership Seminar #2

Fourth Year
Fall: BLDR 455: Policy & Planning,
BLDR 485: Business Leadership Seminar #3
Spring: BLDR 484: Management by Subjectives:
Leadership in Literature, BLDR 486: Business Leadership Seminar #4, Senior Project

• 3.3 grade-point average (ordinarily); a minimum of a 3.5 grade-point average will be needed for graduation with honors in the program

Course Descriptions

Although three of the first four courses are required of all business students, sections designated by BLDR are restricted to students in the Business Leadership Program.

BLDR 351 3 cr.
Principles of Management
This course covers the key aspects of the management process for decision-making. The focus is the organizational setting in which business leadership is exercised.

BLDR 355 3 cr.
Business Ethics
The individual and social ethics of the major areas of decision-making in business from a leadership perspective.

BLDR 385 1 cr.
Self-Assessment Business Leadership Seminar #1
Focus is on identifying the characteristics of leadership, self-assessment of personal strengths and weaknesses, and preparation of plan for self-development.

BLDR 386 1 cr.
Empowerment Business Leadership Seminar #2
Focus is on identifying the tasks of the leader and "enabling or empowering" people to achieve the organization’s goals

BLDR 455 3 cr.
Policy and Planning
This is the capstone course for all business majors. Concepts and skills developed in the functional areas of accounting, finance, management, marketing and production/operations are integrated and applied to the top-level management of an organization. Topics include analyzing organizational environment, setting missions and objectives, developing strategies and plans, allocating resources, and designing organizational structures, reward, and control systems. Special emphasis will be given to the role and executive leadership and values in the articulation of a corporate vision and culture, and in the choice of growth and competitive strategies. Intended as a case- and project-oriented course.

BLDR 484 3 cr.
Management by Subjectives: Leadership in Literature
This final course approaches the question of leadership from a humanistic perspective. It considers models of literature as they are presented in well-established pieces of literature, including poems, plays and novels, from a range of historical periods. Emphases are on the personal relationships between leaders and those they lead, and on fundamental ethical questions relating to leadership.

BLDR 485 1 cr.
Mentorship Business Leadership Seminar #3
Student is placed in an organizational setting as a leadership intern to study the leadership of the organization.

BLDR 486 1 cr.
Senior Project Business Leadership Seminar #4
Student proposes, develops and executes a project evidencing a high degree of leadership skills and activity.

Pre-Law Program

The University is justly proud of its tradition in providing students seeking careers in the law with a solid preparation for the demands of legal study and practice. Scranton graduates in all regions of the nation have achieved distinction in virtually every area of the law, including a member of the Class of 1999 who is currently serving as a clerk to the Chief Justice of the U.S. Supreme Court.

The clearest measure of the strength of the University’s Pre-Law Program is the remarkable success its graduates have had in winning admittance to law schools throughout the country. Recent graduates have been admitted to many prestigious law schools, including Cornell, Georgetown, Penn, American Uni-

Business Leadership Program

Robert L. McKeage, Ph.D., Director

Leadership, the process of persuasion or example by which the members of a group are persuaded to pursue the group’s objectives, is the focus of many new programs in education. The Business Leadership Program in the University’s Kania School of Management provides selected students with an opportunity to perfect their talents for business leadership. The program includes special sections of key business courses taught from the leadership perspective, leadership seminars, a mentor/internship program, and an independent leadership project.

The key courses are taught with a special emphasis on business leadership by faculty chosen for their exceptional teaching and their interest in the leadership concept. The leadership seminars will help the students assess and perfect their talents for leadership and will put them into contact with many business leaders. Noteworthy among the opportunities are the mentorships (where the students are placed with business leaders who serve as mentors) and the projects developed and executed by the students to demonstrate their leadership skills.

This highly selective program accepts 15 sophomores each spring to begin the two-year curriculum the following fall. Applicants are selected on the basis of the following criteria:
- Leadership experience and/or potential; drawing from the student’s record in high school, college, work history, clubs and activities.
- Student’s self-assessment and motivation in applying – how and why this program relates to the student’s long-term goals.
- Interests and hobbies.
- Recommendations of teachers, others.

Pre-Law Program

The University is justly proud of its tradition in providing students seeking careers in the law with a solid preparation for the demands of legal study and practice. Scranton graduates in all regions of the nation have achieved distinction in virtually every area of the law, including a member of the Class of 1999 who is currently serving as a clerk to the Chief Justice of the U.S. Supreme Court.

The clearest measure of the strength of the University’s Pre-Law Program is the remarkable success its graduates have had in winning admittance to law schools throughout the country. Recent graduates have been admitted to many prestigious law schools, including Cornell, Georgetown, Penn, American Uni-
The best preparation for law school comes from the study and practice of law. Ultimately, the natural sciences, have enjoyed success in management, any of the social sciences, as well as areas, including philosophy, languages, management, any of the social sciences, as well as faculty representatives from both The Panuska College of Professional Studies and The Kania School of Management.

The University of Scranton offers its pre-Law Undergraduate Program. In this program, students accompany physicians at Scranton Mercy and Moses Taylor Hospitals to gain exposure to clinical settings in primary-care medicine. Students gain transcript recognition for participation in this externship, as well as a clear view of the profession they seek to enter. A special opportunity is offered to eight students each year through the Medical Scholars Program, a cooperative program at The University of Scranton and Temple University School of Medicine. Through this program, highly qualified high school seniors are offered early assurance, contingency admission to Temple University School of Medicine.

Moreover, The University of Scranton is one of only six undergraduate institutions participating in the Jefferson Medical College Physician Shortage Area Program (PSAP). This program is designed to recruit and educate medical students who intend to enter family medicine and practice in physician-shortage areas in Pennsylvania. Finally, University of Scranton students are encouraged to participate in programs at the Center for Primary Care at the Penn State College of Medicine, Hershey.

The Pre-Medical Program is supported by a network of hundreds of medical alumni and by an active Medical Alumni Council. The Medical Alumni Council has compiled a directory of physicians who have agreed to mentor University of Scranton students. Medical Alumni Council has compiled a directory of physicians who have agreed to mentor University of Scranton students. University of Scranton students are encouraged to participate in a network of hundreds of medical alumni and by an active Medical Alumni Council. The Medical Alumni Council has compiled a directory of physicians who have agreed to mentor University of Scranton students. Pre-Law Undergraduate Curricula

Many undergraduate students who intend to apply to health-professions schools choose Biology or Chemistry as their major. However, students may choose any major, provided that they meet the requirements for entrance to medical, dental, or other health-professions schools. For students at The University of Scranton, the minimum requirements are listed below. All courses must be taken with their corresponding labs.

- BIOL 141-142 General Biology
- CHEM 112-113 General and Analytical Chemistry
- CHEM 232-233 Organic Chemistry
- PHYS 120-121 General Physics
Pre-Law Program

The natural sciences, have enjoyed success in
agement, any of the social sciences, as well as
areas, including philosophy, languages, man
lish, history or political science. At the same
pline that involves intensive reading and

Research and Time Management Skills

Writing Skills

Analytic and Problem Solving skills,

In addition to the courses listed above
involving critical thinking and the ability
to structure and evaluate arguments for
and against propositions;

Critical Reading Abilities, derived from
substantial experience in the close read-
ing and critical analysis of complex texts;

Writing Skills, developed through rigor-
ous practice in preparing and revising
original pieces of substantial length;

Oral Communication and Listening
Abilities, based on experience in giving
and evaluating formal presentations;

Research and Time Management Skills,
involving the ability to plan a research
strategy, to undertake substantial library
work, and to organize large amounts of
information within a fixed period of

time; and, not least of all,

A Commitment to Serving Others and
Promoting Justice, based on significant
experience in service projects while an
undergraduate.

The skills noted above can be acquired by
students majoring or minoring in any disci-
pline that involves intensive reading and
extensive writing such as, for example, Eng-
lisht, history or political science. At the same
time, students who have majored in other
areas, including philosophy, languages, man-
agement, any of the social sciences, as well as
the natural sciences, have enjoyed success in
the study and practice of law. Ultimately, the
best preparation for law school comes from
taking challenging courses from demanding
professors.

In addition to these skills and values, the
ABA has identified several more specific areas
of knowledge that pre-law students should
acquire as undergraduates. The University's
Curriculum 2000 provides a framework
whereby all may be acquired through the
General Education requirements applicable to
all majors.

- a broad understanding of American
  history (HIST 110-111)
- a fundamental understanding of political
  thought and the American political
  system (PS 130-131)
- a basic understanding of ethical theory
  (PHIL 210)
- a grounding in economics, especially
  microeconomic theory (ECON 153)
- an understanding of basic pre-calculus
  mathematics (MATH 106 or equivalent)
- a basic understanding of human behavior
  and social interaction (PSYC 110 or SOC
  110)
- an understanding of diverse cultures
  within and beyond the United States (the
  6-credit cultural-diversity GE requirement)

In addition to the courses listed above
which satisfy general education requirements,
certain departments offer courses that can be
of particular value to pre-law students and
which, depending upon their major, can be
taken as electives within either the major or
cognate. Such courses include HIST 336
(History of American Law), HIST 357 (Brit-
ish Constitutional and Legal History), PS
311-312 (American Constitutional Law), and
WRTG 212 (Writing for the Law).

Pre-Law Internships

Interested students with a grade point aver-
age above 3.00 at the time of application may,
with the approval of the appropriate dean,
receive academic credit for internships served
in the offices of either private law firms or
various legal agencies such as the district
attorney, public defender, or district magis-
trate. Prior approval of the planned internship
is necessary. A minimum of 150 hours work
is required for internship credit in PS 280.
Application forms for these internships are
available from the Registrar’s Office.

Pre-Law Advisory Council

The pre-law advisory council headed by Dr.
Frank X.J. Homer, Director of Law School
Placement, provides continuing advice on
course selection, career planning and the law
school application process. He is assisted by
Ms. Constance E. McDonnell, Associate
Director of Career Services, and Dr. Robert F.
Huston, moderator of the student Pre-Law
Society, along with faculty members from the
departments of Criminal Justice, English,
History, Philosophy and Political Science as
well as faculty representatives from both The
Panuska College of Professional Studies and
The Kania School of Management.

Law School Admission Test

Along with a student’s undergraduate aca-
demic record, the LSAT score is a critical
factor in the law-school-admission process.
Ordinarily, pre-law students take the LSAT at
the end of the junior year or early in the
senior year. As a means of assisting University
students to score up to their fullest potential
on the LSAT, on-campus LSAT workshops are
offered at least twice each year. These provide
University students with an alternative to
costly commercial test-preparation services.

Pre-Medical Program

The success of the University’s Pre-Medical
Program has been outstanding. Since 1980,
the University has placed an average of more
than 50 students per year into American
schools of medicine, dentistry, optometry,
podiatry and veterinary medicine, often in the
most prestigious schools in the country. Since
1999, the acceptance rate of University of
Scranton applicants to medical, dental and
other health professions schools has ranged
between 80% and 100%.

The University of Scranton offers its pre-
medical students unique opportunities in
anticipation of changes in healthcare delivery
for the 21st century. They include a special
exposure to primary-care medicine (the prac-
tice of family physicians, general internists,
and general pediatricians), predicted to be the
area of greatest growth in medicine. Students
have an opportunity to participate in an
undergraduate primary-care externship
through the Scranton-Temple Residency
Externship Program. In this program, stu-
dents accompany physicians at Scranton
Mercy and Moses Taylor Hospitals to gain
exposure to clinical settings in primary-care
medicine. Students gain transcript recognition
for participation in this externship, as well as
a clear view of the profession they seek to enter.
A special opportunity is offered to eight
students each year through the Medical Schol-
ars Program, a cooperative program at The
University of Scranton and Temple University
School of Medicine. Through this program,
highly qualified high school seniors are
offered early assurance, contingency admission
to Temple University School of Medicine.

Moreover, The University of Scranton is
one of only six undergraduate institutions
participating in the Jefferson Medical College
Physician Shortage Area Program (PSAP).
This program is designed to recruit and edu-
cate medical students who intend to enter
family medicine and practice in physician-
shortage areas in Pennsylvania. Finally, Uni-
versity of Scranton students are encouraged
to participate in programs at the Center for
Primary Care at the Penn State College of
Medicine, Hershey.

The Pre-Medical Program is supported by
a network of hundreds of medical alumni
and by an active Medical Alumni Council. The
Medical Alumni Council has compiled a
directory of physicians who have agreed to
serve as resources for information or intern-
ship opportunities for University of Scranton
students. It also sponsors on-campus programs
to which undergraduate students are invited.

Pre-Medical Undergraduate Curricula

Many undergraduate students who intend
to apply to health-professions schools choose
Biology or Chemistry as their major. How-
ever, students may choose any major, pro-
voked that they meet the requirements for
entrance to medical, dental, or other health-
professions schools.

For students at The University of Scranton,
the minimum requirements are listed below.
All courses must be taken with their corre-
spending labs.

- BIOL 141-142 General Biology
- CHEM 112-113 General and Analytical
Chemistry
- CHEM 232-233 Organic Chemistry
- PHYS 120-121 General Physics
Virtually all medical schools require a year of English literature, and many require a semester or a year of mathematics, including calculus.

Many medical schools recommend that students demonstrate a wide range of interests in their choice both of courses and of extracurricular activities. Volunteer work is strongly recommended by the admissions committees of most health-professions schools, as is course work in ethics, particularly in PHIL 212: Medical Ethics, PHIL 316: American Perspectives on Health Care Ethics, and/or T/R/S 330: Biomedical Ethics.

Some medical and dental schools also have specific prerequisites for English, mathematics, or other courses, as listed in Medical School Admission Requirements, or Admission Requirements of U.S. and Canadian Dental Schools.

The Association of American Medical Colleges recommends that undergraduate students planning to apply to medical school acquire a strong background in the natural sciences, so students should consider courses in biology, chemistry, physics and mathematics beyond the minimum requirements. Students should develop strong oral and written communication skills, and they should complete rigorous courses in the humanities and social sciences. Honors courses and programs, independent study, and/or undergraduate research are also encouraged.

The University offers all applicants to health-professions schools the option of a formal applicant evaluation by the Health Professions Evaluation Committee (HPEC). This committee consists of 19 faculty and administrators representing a wide range of academic disciplines. All applicants who seek to apply to doctoral-level health professions schools are evaluated on academic record, volunteer and community service activities, extracurricular activities, and demonstrated motivation toward their chosen careers. Students submit documents and request faculty letters of evaluation and are interviewed by two members of HPEC. Through the HPEC interview, students have an opportunity to develop their interviewing skills and receive feedback on their application materials and interviewing performance. The HPEC evaluation package sent to health professions schools provides a comprehensive narrative which describes in depth an applicant’s qualifications for advanced study and a career in the health professions.

The University also makes available to students a wide variety of resources in the Health Professions Lending Library; information about materials which students may borrow is available from the Director of Medical School Placement.

**Additional Information**

Information and copies of publications are also available from the Director of Medical School Placement. In addition, the student-supported Health Professions Organization Web site at www.scranton.edu/premed provides extensive helpful information for interested students.

### Interdisciplinary Programs and Concentrations

#### Interdisciplinary Courses

Interdisciplinary courses are team-taught courses that vary from semester to semester. They may be used to fulfill appropriate General Education requirements as specified in the course schedule bulletin.

**INTD 100** 1 cr.
**Freshman Seminar**

Freshman seminars are designed to foster students’ successful integration into academic and community life at The University of Scranton. Topics common to all freshman seminars include: the purpose of higher education; time management; the mission of a Jesuit university; academic development strategies; the role of faculty; University resources; and personal values.

**INTD 103** 3 cr.
**(D) The Vietnam Experience**

The historical origins of the Vietnam War, including the period of French colonialism and the American intervention; the politics, economics, and military strategy in Vietnam during the war years and today; present relations with China and the USSR. Why were we there and why did we fail?

**INTD 104** 3 cr.
**(D,E) Men’s Health**

The course will examine the historic, physiologic, social, cultural, emotional and economic issues affecting men’s health. The course explores strategies to assist students to gain information regarding men’s health issues, adopt healthier lifestyles, and use health care services appropriately. Health issues related to culture and diversity will also be addressed. Class members will be expected to actively participate in all discussions.

**INTD 105** 3 cr.
**Great Lives: Images on Stage**

An examination of the often contrasting impressions of historical personalities, as they are portrayed in plays and films and as they appear to historians. Historical figures to be considered include Caesar, Richard III, Thomas More, Lincoln and Churchill.

**INTD 108** 3 cr.
**Health and Legal Implications of Chemical/Drug Abuse**

A team-taught course that deals with the neurophysiological, health, and legal implications of alcohol/drug abuse, viz: its biochemical effects and aspects, its legal and social consequences, and its health and lifestyle implications.

**INTD 209** 3 cr.
**(D) The Holocaust**

An exploration of the catalytic event in Jewish history known as the Holocaust. The course will examine the subject from the perspective of various academic disciplines – historical, sociological, philosophical, artistic, and literary, among others – and will include a field trip to the Holocaust Museum in Washington, D.C.

**INTD 211** 3 cr.
**(D,E) HIV/AIDS: Biological, Social and Cultural Issues**

(Preq: C/JIL 102 or equivalent) Study of the biology of HIV and AIDS, impact of the epidemic on various social groups and countries. The epidemiology of the disease and the response of health-care systems and governments. Opportunity for American Red Cross certification in basic HIV facts and eligibility for HIV Instructor certification will be included as part of the course. Open to all majors.

**INTD 333** 3 cr.
**(CA,P,W) The Bible in Image and Text**

This team-taught course is a study of the interpretation of major biblical stories and figures in the Christian theological tradition and in art history. The marriage of Christian text and image is an exciting way to integrate knowledge of various major themes such as creation and last judgment, and of many great biblical figures, such as Moses and Christ.

**NSCI 102** 3 cr.
**Science and Society**

This course attempts to show how the sciences, particularly the behavioral sciences, impact both positively and negatively on society. Issues dealt with include the nature of science, similarities and differences between the scientific disciplines, the impact of science on the concept of free will, and the philosophical and moral implications of psychological testing, socio-biology, and Skinnerian radical behaviorism.

**NSCI 103** 3 cr.
**(E,W) The Ascent of Man**

Science and technology from the ancient Greeks to the present will be discussed from the personal viewpoint of the scientists and inventors. Lectures will be supplemented by films, demonstrations, and field trips. Three hours lecture.

**NSCI 201** 3 cr.
**(E) Science and the Human Environment**

A brief study of the effects of technological, scientific and industrial progress on the air, land, and water resources of the human environment. Problems in each of the resource areas will be discussed in detail.

### Catholic Studies Program

Susan F. Mathews, Ph.D., Director

The Catholic Studies Program seeks to provide every student with the opportunity to engage the Catholic tradition in a deeper and broader way than the typical program of studies can provide. Accordingly, this program casts a wide net over what the Catholic tradition and heritage are and how they interface with the contemporary world. The Catholic Studies Program specialization built around a multi-disciplinary core that provides a systematic way of integrating the many facets of Catholic tradition with various academic disciplines. Because Catholic tradition is integrally linked to virtually every subject, it can provide a natural integrative coherence for nearly all majors and areas of studies. Thus the CSP provides a good means of organizing many general education requirements into a unified concentration; it is an attractive academic program for rounding out a student’s Catholic higher education.

The Catholic Studies Program consists of both inter- and uni-disciplinary courses that provide opportunities to study the Catholic heritage in the ancient and the contemporary
Academics • Interdisciplinary Programs and Concentrations

Virtually all medical schools require a year of English literature, and many require a semester or a year of mathematics, including calculus. Many medical schools recommend that students demonstrate a wide range of interests in their choice both of courses and of extra-curricular activities. Volunteer work is strongly recommended by the admissions committees of most health-professions schools, as is course work in ethics, particularly in PHIL 212: Medical Ethics, PHIL 316: American Perspectives on Health Care Ethics, and/or T/R/S 330: Biomedical Ethics.

Some medical and dental schools also have specific prerequisites for English, mathematics, or other courses, as listed in Medical School Admission Requirements, or Admission Requirements of U.S. and Canadian Dental Schools.

The Association of American Medical Colleges recommends that undergraduate students planning to apply to medical school acquire a strong background in the natural sciences, so students should consider courses in biology, chemistry, physics, and mathematic beyond the minimum requirements. Students should develop strong oral and written communication skills, and they should complete rigorous courses in the humanities and social sciences. Honors courses and programs, independent study, and/or undergraduate research are also encouraged.

The University offers all applicants to health-professions schools the option of a formal application evaluation by the Health Professions Evaluation Committee (HPEC). This committee consists of 19 faculty and administrators representing a wide range of academic disciplines.

All applicants who seek to apply to doctoral-level health professions schools are evaluated on academic record, volunteer and community service activities, extra-curricular activities, and demonstrated motivation toward their chosen careers. Students submit documents and request faculty letters of evaluation and are interviewed by two members of HPEC. Through the HPEC interview, students have an opportunity to develop their interviewing skills and receive feedback on their application materials and interviewing performance. The HPEC evaluation package sent to health professions schools provides a comprehensive narrative which describes in depth an applicant’s qualifications for advanced study and a career in the health professions.

The University also makes available to students a wide variety of resources in the Health Professions Lending Library; information about materials which students may borrow is available from the Director of Medical School Placement.

Additional Information

Information and copies of publications are also available from the Director of Medical School Placement. In addition, the student-supported Health Professions Organization Web site at www.scranton.edu/premed provides extensive helpful information for interested students.

Interdisciplinary Programs and Concentrations

Interdisciplinary Courses

Interdisciplinary courses are team-taught courses that vary from semester to semester. They may be used to fulfill appropriate General Education requirements as specified in the course schedule bulletin.

INTD 100 1 cr.
Freshman Seminar

Freshman seminars are designed to foster students’ successful integration into academic and community life at The University of Scranton. Topics common to all freshman seminars include: the purpose of higher education; time management; the mission of a Jesuit university; academic development strategies; the role of faculty; University resources; and personal values.

INTD 103 3 cr.
(D) The Vietnam Experience

The historical origins of the Vietnam War, including the period of French colonialism and the American intervention: the politics, economics, and military strategy in Vietnam during the war years and today: present relations with China and the USSR. Why were we there and why did we fail?

INTD 104 3 cr.
(D,E) Men’s Health

The course will examine the historic, physiologic, social, cultural, emotional, and economic issues affecting men’s health. The course explores strategies to assist students to gain information regarding men’s health issues, adopt healthier lifestyles, and use health care services appropriately. Health issues related to culture and diversity will also be addressed. Class members will be expected to actively participate in all discussions.

INTD 105 Great Lives: Images on Stage

An examination of the often contrasting impressions of historical personalities, as they are portrayed in plays and films and as they appear to historians. Historical figures to be considered include Caesar, Richard III, Thomas More, Lincoln and Churchill.

INTD 108 3 cr.
Health and Legal Implications of Chemical/Drug Abuse

A team-taught course that deals with the neuro-physical, health, and legal implications of alcohol/drug abuse, viz: its biochemical effects and aspects, its legal and social consequences, and its health and lifestyle implications.

INTD 209 3 cr.
(D) The Holocaust

An exploration of the cataclysmic event in Jewish history known as the Holocaust. The course will examine the subject from the perspective of various academic disciplines – historical, sociological, philosophical, artistic, and literary, among others – and will include a field trip to the Holocaust Museum in Washington, D.C.

INTD 211 3 cr.
(D,E) HIV/AIDS: Biological, Social and Cultural Issues

(Preqquisite: C/JL 102 or equivalent) Study of the biology of HIV and AIDS, impact of the epidemic on various social groups and countries. The epidemiology of the disease and the response of health-care systems and governments. Opportunity for American Red Cross certification in basic HIV facts and eligibility for HIV Instructor certification will be included as part of the course. Open to all majors.

INTD 333 3 cr.
(CA,P,W) The Bible in Image and Text

This team-taught course is a study of the interpretation of major biblical stories and figures in the Christian theological tradition and in art history. The marriage of Christian text and image is a natural and long-lived one; it provides an exciting way to integrate knowledge of various major themes such as creation and last judgment, and of many great biblical figures, such as Moses and Christ.

Academics • Interdisciplinary Programs and Concentrations 81

Science and Society

This course attempts to show how the sciences, particularly the behavioral sciences, impact both positively and negatively on society. Issues dealt with include the nature of science, similarities and differences between the scientific disciplines, the impact of science on the concept of free will, and the philosophical and moral implications of psychological testing, socio-biology, and Skinnerian radical behaviorism.

NSCI 103 3 cr.
(E,W) The Ascent of Man

Science and technology from the ancient Greeks to the present will be discussed from the personal viewpoint of the scientists and inventors. Lectures will be supplemented by films, demonstrations, and field trips. Three hours lecture.

NSCI 201 3 cr.
(E) Science and the Human Environment

A brief study of the effects of technological, scientific and industrial progress on the air, land, and water resources of the human environment. Problems in each of the resource areas will be discussed in detail.

Catholic Studies Program

Susan F. Mathews, Ph.D., Director

The Catholic Studies Program seeks to provide every student with the opportunity to engage the Catholic tradition in a deeper and broader way than the typical program of studies can provide. Accordingly, this program casts a wide net over what the Catholic tradition and heritage are and how they interface with the contemporary world. The Catholic Studies Program is a specialization built around a multi-disciplinary core that provides a systematic way of integrating the many facets of Catholic tradition with various academic disciplines. Because Catholic tradition is integrally linked to virtually every subject, it can provide a natural integrative coherence for nearly all majors and areas of studies. Thus the CSP provides a good means of organizing many general education requirements into a unified concentration; it is an attractive academic program for rounding out a student’s Catholic higher education.

The Catholic Studies Program consists of both inter- and uni-disciplinary courses that provide opportunities to study the Catholic heritage in the ancient and the contemporary
Church alike, and give access to the rich
forms in which it has been expressed in litera-
ture, art, architecture, music, history, philo-
osophy, science, etc. Catholic Studies welcomes
each interested students whether or not they are
Catholic. It is compatible with all majors. Ide-
ally, students will enter in their freshman year,
but it is possible for students to enter in their
sophomore year. Courses in the program will
meet either general education, major, minor or
cognate requirements. All non-CSP stu-
dents are welcome in any course(s) in the pro-
gram, but CSP students are given enrollment
preference. Honors tutorials are encouraged.
SJLA students are welcome.
All courses taught in the Catholic Studies
Program will seek to promote appreciation of
the Catholic tradition by being faithful to the
Church’s apostolic teaching. Courses will also
encourage students (1) to integrate faith and
academics; (2) to study the Catholic Tradition
in an intellectually rigorous way; (3) to assess
human intellectual activity and experience in the
light of the Catholic faith; and (4) to examine the experience of Catholics in his-
tory, politics, various social groups, philo-
osophical and religious movements, and/or sci-
ence and technology.
The concentration consists of 18 credits: 6
are required; the other 12 are electives. T/RS
104C must be taken; one semester of Chris-
tian Classics is also required. Students may
build their studies on their majors and inter-
est. Students are invited to petition for read-
ers that meet program standards. Students
may likewise seek permission for courses not
cross-listed to count for credit, provided they
are eligible to do significant Catholic Studies
work in them.
Catholic Studies Electives
Students will choose five courses from a list
that may be obtained from the director or the
Registrar’s Office.
Required Courses
T/RS 214C 3 cr.
(PW) Inside the Catholic Tradition
This introduction to Catholic Tradition will
study its scope, depth, and on-going develop-
ment, reception, and characteristics. Topics cov-
ered include Faith and Revelation, the intercom-
munion of Scripture and Tradition, the role of
Magisterium, and the development of doctrine.
Selected readings are taken from important con-
ciliar texts and theologians.
INTD 201C-202C 3 cr. each
(PW) Christian Classics I-II
Each semester of this CSP core course provides a
structured opportunity for reading in common
some of the major Christian works of literature
and spirituality with which every educated Catho-
lic should be familiar. Important Catholic
books and significant works of some great men
and women who have shaped Christian thought
and life will be read and discussed.
Environmental Studies Concentration
Leonard W. Champney, Ph.D., Political
Science; John R. Kalafut, M.S., Physics and
Electrical Engineering; Edward M. Scahill,
Ph.D., Economics/Finance; Program
Co-Directors
The Environmental Studies Concentration
introduces students to the scientific, eco-
omic, legal, political and philosophical
dimensions of environmental issues, both
within the United States and globally. The
concentration is open to students from any
major and may be of particular interest to stu-
dents planning careers in government, law or
business.
Courses for the Environmental Studies
Concentration are drawn from eight depart-
ments in The College of Arts and Sciences
and The Kania School of Management. Many
of these courses may also be used for general
education requirements. To enroll, students
should consult one of the co-directors of the
concentration. The concentration consists of
eight courses:
CHEM 202 (E) Global Change
ECO 103 (S) Economics of Environ-
mental Issues
MGT 210 Business and the Environment
NSCI 201 (E) Science and the Human
Environment
PHL 213 (P) Environmental Ethics
PHYS 106 (E) Energy and the Environment
PS 230 (S) Environmental Policy
T/RS 331Z (P,W) God and the Earth
In addition, MATH 201, Algebra and
Environmental Issues, is recommended. This
course fulfills the quantitative reasoning
requirement in the general education curricu-
num, and is also a writing intensive course.
Natural Science majors who wish to pursue
the Environmental Studies Concentration
may complete the three natural science
courses using any combination of the natural
science courses listed above and/or the follow-
ning courses:
BIOL 273 Marine Biology
BIOI 371 Ecology
BIOL 471 Applied Ecology
BIOL 473 Estuarine Ecology
CHEM 340 Environmental Chemistry
CHEM 342 Environmental Toxicology
CHEM 344 Environmental Geochemistry
Forensic Health Concentration
Mary Muscari, Ph.D., Director
Open to all undergraduate students, the Forensic Health Concentration is designed by the
Departments of Nursing and Criminal Justice to advance students' interest in the
field of forensic health. Forensic Health is the
application of the health-related sciences to public or legal proceedings and the scientific
investigation and treatment of trauma and/or
death of victims and perpetrators of abuse,
violence, criminal activity, and traumatic acci-
dents. Forensic health care professionals work
with a variety of clients, including victims
intrafamilial violence and sexual assault, crim-
inal offenders, and juvenile delinquents. Career
settings include emergency departments, psy-
chiatric facilities, correctional facilities, coro-
ner's offices, schools, community health, and
legal consulting in the court system.
Students interested in this concentration are
required to complete four 3-credit courses
and one 3-credit elective course for a total of
15 credits.
Required Courses
PSYC 110 is a prerequisite to NURS 344
and 345.
CJ 110 Introduction to Criminal Justice
NURS 344 Forensic Health Care of Victims
NURS 345 Forensic Health Care of Perpetrators
PSYC 110 Fundamentals of Psychology
Elective Courses (choose one)
Students are required to consult the Forensic
Health Concentration Director before choos-
ing their elective so that they choose the course
that best fits their career and/or interests.
CJ 213 Criminology
S/CJ 214 Juvenile Delinquency
S/CJ 218 The American Court System
S/CJ 220 Penology: The American
Correctional System
CJ 230 Crime Prevention
CJ 237 The Investigative Process
S/CJ 324 Victimology
Human Development Program
James P. Buchanan, Ph.D., Director
This program offers all students, especially
those majoring in the behavioral and social
sciences, the opportunity to develop a multi-
disciplinary focus in human development.
The academic aims of the concentration are
to provide an understanding of:
1. Both normal and exceptional develop-
ment of humans as biological and psy-
chological organisms;
2. The relationship between individuals
and family/social environment; and
3. The meaning of human develop-
ment, including a field experience in a
human-development agency.
The 30-credit Human Development con-
centration is administered by an interdisci-
plinary board of faculty from the Psychology,
Sociology, and Counseling and Human Ser-
dices departments. Students interested in careers and graduate programs in human
development should contact the director for
more information on course choice and on
integrating the concentration with various
majors. Students who complete this concen-
tration will have it noted on their transcripts.
The Human Development concentration
requires the following:
1. PSYC 221: Child/Adolescent
2. PSYC 222: Adult/AGING
3. GERI 110: Introduction to Gerontology
4. PSYC 225: Abnormal Psychology
5. CHS 241: Case Management and
Interviewing
6. PSYC 360: Clinical Psychology or
7. PSYC 242: Counseling Theories or SOC 115:
Introduction to Social Work
6. BIO 201: Anatomy and Physiology
7. BIO 202: ABC's of Genetics or PSYC
   231: Behavioral Neuroscience
Selected readings are taken from important conciliar texts and theologians.

INTD 201C-202C 3 cr. each

(PW) Christian Classics I-II

Each semester of this CSP core course provides a structured opportunity for reading in common some of the major Catholic works of literature and spirituality with which every educated Catholic should be familiar. Important Catholic books and significant works of some great men and women who have shaped Christian thought and life will be read and discussed.

Environmental Studies Concentration

Leonard W. Champney, Ph.D., Political Science; John R. Kalalut, M.S., Physics and Electrical Engineering; Edward M. Scahill, Ph.D., Economics/Finance; Program Co-Directors

The Environmental Studies Concentration introduces students to the scientific, economic, legal, political and philosophical dimensions of environmental issues, both within the United States and globally. The concentration is open to students from any major and may be of particular interest to students planning careers in government, law, or business.

Courses for the Environmental Studies Concentration are drawn from eight departments in The College of Arts and Sciences and The Kania School of Management. Many of these courses may also be used for general education requirements. To enroll, students should consult one of the co-directors of the concentration. The concentration consists of eight courses:

CHEM 202 (E) Global Change
ECO 103 (S) Economics of Environmental Issues
MGT 210 Business and the Environment
NSCI 201 (E) Science and the Human Environment
PHIL 213 (P) Environmental Ethics
PHYS 106 (E) Energy and the Environment
PS 230 (S) Environmental Policy
T/RS 331Z (P, W) God and the Earth

In addition, MATH 201, Algebra and Environmental Issues, is recommended. This course fulfills the quantitative reasoning requirement in the general education curriculum and is also a writing intensive course.

Natural Science majors who wish to pursue the Environmental Studies Concentration may complete the three natural science courses using any combination of the natural science courses listed above and/or the following courses:

BIOL 273 Marine Biology
BIOI 371 Ecology
BIOI 471 Applied Ecology
BIOI 473 Eustarine Ecology
CHEM 340 Environmental Chemistry
CHEM 342 Environmental Toxicology
CHEM 344 Environmental Geochemistry

Forensic Health Concentration

Mary Muscari, Ph.D., Director

Open to all undergraduate students, the Forensic Health Concentration is designed by the Departments of Nursing and Criminal Justice to advance students’ interest in the field of forensic health. Forensic Health is the application of the health-related sciences to public or legal proceedings and the scientific investigation and treatment of trauma and/or death of victims and perpetrators of abuse, violence, criminal activity, and traumatic accidents. Forensic health care professionals work with a variety of clients, including victims intrafamilial violence and sexual assault, criminal offenders, and juvenile delinquents. Career settings include emergency departments, psychiatric facilities, correctional facilities, correctional institutions, legal consulting in the court system.

Students interested in this concentration are required to complete four 3-credit courses and one 3-credit elective course for a total of 15 credits.

Required Courses

PSYC 110 is a prerequisite to NURS 344 and 345.

CJ 110 Introduction to Criminal Justice
NURS 344 Forensic Health Care of Victims
NURS 345 Forensic Health Care of Perpetrators

Elective Courses (choose one)

Students are required to consult the Forensic Health Concentration Director before choosing their elective so that they choose the course that best fits their career goals or interests.

Academics • Interdisciplinary Programs and Concentrations

Human Development Program

James P. Buchanan, Ph.D., Director

This program offers all students, especially those majoring in the behavioral and social sciences, the opportunity to develop a multidisciplinary focus in human development. The academic aims of the concentration are to provide an understanding of:

1. Both normal and exceptional development of humans as biological and psychological organisms;
2. The relationship between individuals and family/social environment; and
3. The means to enhance human development, including a field experience in a human-development agency.

The 30-credit Human Development Concentration is administered by an interdisciplinary board of faculty from the Psychology, Sociology, and Counseling and Human Services departments. Students interested in careers and graduate programs in human development should consult the director for more information on course choice and on integrating the concentration with various majors. Students who complete this concentration will have it noted on their transcripts. The Human Development concentration requires the following:

1. PSYC 221: Child Development
2. PSYC 222: Adolescence
3. PSYC 115: Interviewing
4. CHEM 242: Counseling Theories or SOC 115: Behavioral Neuroscience

8. PSYC 480: Field Experience in Clinical Psychology or CHS 380: Internship in Human Services or SOC 480: Internship in Social Work.

Course Descriptions

HD 224 3 cr.
Family Development
(Prerequisite: PSYC 110) This course will explore the reciprocal interactions among children and parents as related to the development of all individuals in the family. Topics covered include the roles of family members, parenthood and marriage, parenting at specific developmental stages, families with single parents, families with exceptional children, and child abuse.

HD 234 3 cr.
Marital and Family Therapy
(Prerequisite: PSYC 110; recommended: PSYC 225) An introduction to the theory, research, and practice of couples-counseling and family therapy. Topics include family dysfunctions, assessment methods, treatment approaches, innovative techniques, and research findings. (Also listed as CHS 334.)

HD 335 3 cr.
Exceptional Child
(Prerequisites: PSYC 110, PSYC 225) This course will consider atypical social, emotional, and mental development during childhood and adolescence. Topics include mental retardation, intellectual giftedness, learning disabilities, psychopathology of childhood and adolescence, and conduct disorders.

Italian Studies Concentration
Virginia A. Picciotti, Ph.D., Director
Josephine M. Dunn, Ph.D., Co-Director
The Italian Studies Concentration is designed to advance students’ understanding of diverse aspects of Italian culture and society. The concentration is open to all majors and consists of both interdisciplinary and single-discipline courses drawn from various academic disciplines at the University. It encourages both breadth and depth in the study of Italian culture and society; its goal is to cultivate a broadly based knowledge of Italian civilization and its contributions to the specific fields comprising the concentration. At the same time, courses in the concentration will fulfill general education requirements with an emphasis on cultural diversity and on a writing-intensive curriculum.

The curriculum is designed to accomplish the following: provide a focused study of Italian culture and society; develop oral and written skills; and develop practical skills applicable to trips to Italy and in career fields. The concentration requires the successful completion of seven courses, three of which are required courses and four of which are to be chosen from an approved list of electives. Students will be required to complete successfully two courses of Italian language as well as the Italian Studies Seminar. Students will enter the language level they can master (determined in consultation with the director and the language department), and will fulfill the language requirement by successfully completing two of the approved language courses.

Required Courses
Students will choose two language courses (at appropriate level) and seminar.
ITAL 101-102 Elementary Italian
ITAL 211-212 Intermediate Italian
ITAL 311-312 Advanced Italian Composition and Conversation
Italian Studies Seminar (a specific topics course whose content varies according to the interests of students and faculty. Offered every two years.)

Elective Courses (choose four)
ARTH 214 Renaissance Art and Architecture: 1250-1500
ARTH 216 Michelangelo and His World
ARTH 217 Leonardo Da Vinci

Latin American Studies Concentration
Lee M. Penyak, Ph.D., Director
The Latin American Studies Concentration is designed to advance students’ awareness and understanding of Latin America. It seeks to provide both broad, general knowledge of the entire Latin American region, and in-depth knowledge of specific countries, regional groupings of countries, and cultures both dominant and marginal. The concentration is open to all majors and it consists of courses from a variety of disciplines with a primary focus on Latin America. These courses fulfill general education requirements in the Humanities area (Foreign Languages and History), the Social Sciences area (Political Science), and some of them also carry cultural diversity and writing intensive credit. Supporting courses may fulfill general education requirements in other areas as well. The Latin American Studies Concentration is an attractive complement to many existing majors. Related fields include foreign languages, international business, international language/business, international studies, history, political science, theology, philosophy and sociology. Some related professions or careers include law, government, non-governmental organizations, non-profit organizations, banking and teaching.

Course Descriptions

ARTH 218 The Age of Rembrandt
ARTH 384 Special Topics in Art History (if applicable)
ENLT 366 Dante’s Divine Comedy
HIST 240 Modern Italy
HIST 323 The Renaissance
ITAL 207 Italian Women Writers
ITAL 208 Envisioning Italy from Novel to Film: The Case of Neorealism
ITAL 209 Italian Cinema: From Origins to Present
MUS 217 Opera
MUS 284 Special Topics in Music History (if applicable)
NSCI 103 The Ascent of Man
PHIL 221 Medieval Philosophy
PHIL 222 Modern Philosophy

Language (4.5-6 credits)
SPAN 295 and/or SPAN 310 or higher

History (3 credits)
HIST 125 Colonial Latin America
HIST 126 Modern Latin America

Political Science (3 credits)
PS 219 Survey of Latin American Politics

Supporting Courses (12 credits)
HIST 213 Gender and Family in Latin America
HIST 215 Church and Society in Latin America
HIST 327 African Experience in Latin America
HIST 491 Seminar in American (Mexican) History*
PHIL 284 Latin American Thought
PS 295 Contemporary Mexican Culture & Language†
PS 384 Topics in Country-Specific Courses in Latin America
SPAN 314 Topics in Latin American Culture & Civilization
SPAN 319 Business Spanish
SPAN 320 Introduction to Literature

* Restricted to senior history majors and four-year B.A./M.A. History students.
† A 6-credit immersion travel course to Guadalajara, Mexico, for 3 credits in Foreign Languages (during immersion) and 3 credits in Political Science (during spring semester).

8. PSYC 480: Field Experience in Clinical Psychology or CHS 380: Internship in Human Services or SOC 480: Internship in Social Work.

Course Descriptions

HD 224 3 cr.
Family Development
(Prerequisite: PSYC 110) This course will explore the reciprocal interactions among children and parents as related to the development of all individuals in the family. Topics covered include the roles of family members, parenthood and marriage, parenting at specific developmental stages, families with single parents, families with exceptional children, and child abuse.

HD 234 3 cr.
Marital and Family Therapy
(Prerequisite: PSYC 110; recommended: PSYC 225) An introduction to the theory, research, and practice of couples-counseling and family therapy. Topics include family dysfunctions, assessment methods, treatment approaches, innovative techniques, and research findings. (Also listed as CHS 334.)

HD 335 3 cr.
Exceptional Child
(Prerequisites: PSYC 110, PSYC 225) This course will consider atypical social, emotional, and mental development during childhood and adolescence. Topics include mental retardation, intellectual giftedness, learning disabilities, psychopathology of childhood and adolescence, and conduct disorders.

Italian Studies Concentration

Virginia A. Picchietti, Ph.D., Director
Josephine M. Dunn, Ph.D., Co-Director

The Italian Studies Concentration is designed to advance students’ understanding of diverse aspects of Italian culture and society. The concentration is open to all majors and consists of both interdisciplinary and single-discipline courses drawn from various academic disciplines at the University. It encourages both breadth and depth in the study of Italian culture and society; its goal is to cultivate a broadly based knowledge of Italian civilization and its contributions to the specific fields comprising the concentration. At the same time, courses in the concentration will fulfill general education requirements with an emphasis on cultural diversity and on a writing-intensive curriculum.

The curriculum is designed to accomplish the following: provide a focused study of Italian culture and society; develop oral and written skills; and develop practical skills applicable to trips to Italy and in career fields. The concentration requires the successful completion of seven courses, three of which are required courses and four of which are to be chosen from an approved list of electives. Students will be required to complete successfully two courses of Italian language as well as the Italian Studies Seminar. Students will enter the language level they can master (determined in consultation with the director and the language department), and will fulfill the language requirement by successfully completing two of the approved language courses.

Required Courses
Students will choose two language courses (at appropriate level) and seminar.
ITAL 101-102 Elementary Italian
ITAL 211-212 Intermediate Italian
ITAL 311-312 Advanced Italian Composition and Conversation
Italian Studies Seminar (a specific topics course whose content varies according to the interests of students and faculty. Offered every two years.)

Elective Courses (choose four)
ARTH 214 Renaissance Art and Architecture: 1250-1500
ARTH 216 Michelangelo and His World
ARTH 217 Leonardo Da Vinci

Latin American Studies Concentration

Lee M. Penyak, Ph.D., Director

The Latin American Studies Concentration is designed to advance students’ awareness and understanding of Latin America. It seeks to provide both broad, general knowledge of the entire Latin American region, and in-depth knowledge of specific countries, regional groupings of countries, and cultures both dominant and marginal. The concentration is open to all majors and it consists of courses from a variety of disciplines with a primary focus on Latin America. These courses fulfill general education requirements in the Humanities area (Foreign Languages and History), the Social Sciences area (Political Science), and some of them also carry cultural diversity and writing intensive credit. Supporting courses may fulfill general education requirements in other areas as well.

The Latin American Studies Concentration is an attractive complement to many existing majors. Related fields include foreign languages, international business, international language/business, international studies, history, political science, theology, philosophy and sociology. Some related professions or careers include law, government, non-governmental organizations, non-profit organizations, banking and teaching.

Credit Totals

Spanish language and other core/supporting courses: 24 credits
OR
Portuguese language and other core/supporting courses: 22.5 credits

Language (4.5-6 credits)
SPAN 295 and/or SPAN 310 or higher (6 credits)
Native or near-native speakers who begin Spanish above the 311-312 level may be exempt from the Spanish-language requirement (with approval of the chair of the Department of Foreign Languages and Literatures) but will need to take additional content courses to fulfill concentration credit requirements.
OR
PORT 210 (4.5 credits)
Portuguese is taught intensively, only 4.5 credits are required.

History (3 credits)
HIST 125 Colonial Latin America
HIST 126 Modern Latin America
Students who take both core history courses may reduce their supporting course load to 9 credits.

Political Science (3 credits)
PS 219 Survey of Latin American Politics
Supporting Courses (12 credits)
HIST 213 Gender and Family in Latin America
HIST 215 Church and Society in Latin America
HIST 327 African Experience in Latin America
HIST 491 Seminar in American (Mexican) History* 
PHIL 284 Latin American Thought
PS 295 Contemporary Mexican Culture & Language
PS 384 Topics in Country-Specific Courses in Latin America
SPAN 314 Topics in Latin American Culture & Civilization
SPAN 319 Business Spanish
SPAN 320 Introduction to Literature

* Restricted to senior history majors and four-year B.A./M.A. History students.
† A 6-credit intersession travel course to Guadalajara, Mexico, for 3 credits in Foreign Languages (during intersession) and 3 credits in Political Science (during spring semester).
The following courses will provide students with the opportunities to reflect critically on the social, economic, psychological, political and structural issues impeding the establishment of a just and peaceful society.

A. Requirements in Theology (any two of the following):

- T/RS 226Z Faith and Justice in the Prophetic Tradition
- T/RS 231 Social Ethics
- T/RS 232 John Paul II and Catholic Social Thought
- T/RS 234 Twentieth-Century Peacemakers
- T/RS 236 Prophets and Profits
- T/RS 237 Politics: A Christian Perspective
- T/RS 239Z Money and Power in the Biblical Tradition
- T/RS 331Z God and the Earth
- T/RS 332Z Jesus and the Moral Life
- T/RS 334Z The Church and Contemporary Social Issues

B. Electives (any five courses listed below can be counted; others may be included with approval from the program coordinator):

- CHEM 104 Science and Society
- CHS 333 Multiculturalism in Human Services
- CHS 338 Poverty, Homelessness and Social Justice
- COMM 220 Responsibility in Communication
- COMM 311 Political Communication
- ECO 462 Urban and Regional Economics
- ECO 465 Development Economics
- ENLT 226 Novels by Women
- ENLT 228 Race in Anglo-American Culture 1600-1860
- ENLT 348 Colonial and Post-Colonial Fiction
- GEOG 217 Cultural Geography
- HIST 211 The Third World
- HIST 216 Race in American History
- HIST 224 Ethnic and Racial Minorities in NEPA
- INTD 209 The Holocaust
- LIT 207 Literature of American Minorities
- MGT 473 Organizational Social Responsibility

The Women's Studies Concentration consists of courses that examine women's experiences and the ways gender-related issues affect human lives and cultures. Faculty and students analyze the ways gender roles and images, and assumptions about gender, are reflected in art, business, literature, law, philosophy, public policy, religion, language, history, the sciences, and their own lives. At the same time, many Women's Studies courses will address issues of race, class, ethnicity, and age that intersect with gender-related issues.

Women's Studies courses focus on women's experiences in history, society, and culture, and examine their reactions to such experiences; examine institutional structure/modes of authority/analysis of power, especially considering their implications for women; and incorporate one or more feminist analyses/scholarly works (recognizing that there are multiple, and even conflicting, feminist perspectives).

Women's Studies seek to promote critical thinking, intellectual growth, and a self-awareness useful to all students. It is an attractive academic supplement to the programs of students planning careers in government, law, business, human services, ministry, and teaching – to name but a few.

Courses for the Women's Studies Concentration are drawn from all the colleges at the University and are open to students in all majors. (To enroll, students must see the Director of Women's Studies.) The concentration consists of six courses including one required core course. The student may take PHIL 218 or SOC 215 as the required core course. The remaining five courses are chosen across several departments by the student from cross-listed courses approved by the Women's Studies Committee. Many of the cross-listed Women's Studies courses also fulfill major, minor, cognate, and/or general education requirements.

Students may seek permission from the Women's Studies Committee to take no more than one reader for Women's Studies credit, subject to the student's rules governing readers. Students may also petition to substitute no more than one course not cross-listed with Women's Studies, if the course has sufficient Women's Studies content and the student is able to do a significant project/assignment on a Women's Studies topic.

Women's Studies Courses

Arts

- ARTH 210 (CA,D) Women in the Visual Arts
- ARTH 311 (W,D,CA) Medieval and Renaissance Women
- CHS 337 (D,W) Counseling Girls and Women

Communication

- COMM 229 (D) Gender and Communication
- ENLT 225 (CL,D,W) Writing Women
- ENLT 227 (CL,D,W) Frankenstein's Forebears
- ENLT 226 (CL,D) Novels by Women
- ENLT 228 (CL,D,W) Race in Anglo-American Culture 1600-1860
- FREN 430 Foreign Women Writers
- HIST 213 (CH,D) Gender and Family in Latin America
SPAN 331 Spanish American Literature
SPAN 335 Student and the Hispanic Community
SPAN 422 Spanish American Drama
SPAN 430 Hispanic Women Writers
SPAN 433 Hispanic Lyric Poetry
T/RS 384 Latin American Theologies

Students who study abroad or take other appropriate classes with an emphasis on Latin American culture may petition to substitute classes and are encouraged to speak to the director of the program. Students who plan to pursue graduate work in Latin American Studies should become especially adept in Spanish and/or Portuguese, and should possess appropriate knowledge of history and political science.

**Peace and Justice Studies Program**

Stephen J. Casey, Director

The Synod of Bishops of the Roman Catholic Church (1971) reported that "actions on behalf of justice and participation in the transformation of the world fully appear to us as a constitutive dimension of the preaching of the Gospel..." The 32nd General Congregation of the Society of Jesus (1974-75) established a pedagogical norm for its own institutions of higher education when it determined that the practice of faith was inextricably linked to the promotion of justice. In this vein the University’s Peace and Justice Studies program was instituted to bring academic studies, including classes, community service and interdisciplinary research, into the process of building a more just and thus more peaceful society.

The Peace and Justice concentration will be an attractive complement to the academic programs of students planning careers in law, international relations, human services, ministry and teaching – to name but a few. Students planning careers in government, law, business, human services, ministry, and teaching – to name but a few.

Courses may be taken as part of the cognate Concentration" added to their transcripts. Eight courses (24 credits) must be taken by the undergraduate schools of the University. Justice, regardless of their career goals, can try and teaching – to name but a few.

**A. Requirements in Theology (any two of the following):**
- T/RS 226Z Faith and Justice in the Prophetic Tradition
- T/RS 231 Social Ethics
- T/RS 232 John Paul II and Catholic Social Thought
- T/RS 234 Twentieth-Century Peacemakers
- T/RS 236 Prophets and Profits
- T/RS 237 Politics: A Christian Perspective
- T/RS 239Z Money and Power in the Biblical Tradition
- T/RS 331Z God and the Earth
- T/RS 332Z Jesus and the Moral Life
- T/RS 334Z The Church and Contemporary Social Issues

**B. Electives (any five courses listed below can be counted; others may be included with approval from the program coordinator):**
- CHEM 104 Science and Society
- CHS 333 Multiculturalism in Human Services
- CHS 338 Poverty, Homelessness and Social Justice
- COMM 220 Responsibility in Communication
- COMM 311 Political Communication
- ECO 462 Urban and Regional Economics
- ECO 465 Development Economics
- ENLT 226 Novels by Women
- ENLT 228 Race in Anglo-American Culture 1600-1860
- ENLT 348 Colonial and Post-Colonial Fiction
- GEOG 217 Cultural Geography
- HIST 211 The Third World
- HIST 216 Race in American History
- HIST 224 Ethnic and Racial Minorities in NEPA
- INTD 209 The Holocaust
- LIT 207 Literature of American Minorities
- MGT 473 Organizational Social Responsibility

The following courses will provide students with the opportunities to reflect critically on the social, economic, psychological, political and structural issues impeding the establishing of a just and peaceful society.

**C. Integrative Capstone Course (required in junior/senior year):**
T/JF 310 Toward a Just and Peaceful World

This course consists of an assessment done by each student of the courses that have constituted the individual’s concentration core. It asks students to consider the relationships of religious, philosophical and social/ethical concerns as perceived during their undergraduate studies. In a seminar setting, participants will prepare and present papers that assess how their courses have met the goals of the concentration and the University’s mission.

**Women's Studies Concentration**

Sharon M. Meagher, Ph.D., Director

The Women's Studies Concentration consists of courses that examine women’s experiences and the ways gender-related issues affect human lives and cultures. Faculty and students analyze the ways gender roles and images, and assumptions about gender, are reflected in art, business, literature, law, philosophy, public policy, religion, language, history, the sciences, and their own lives. At the same time many Women’s Studies courses will address issues of race, class, ethnicity, and age that intersect with gender-related issues.

Women’s Studies courses focus on women’s experiences in history, society, and culture, and examine their reactions to such experiences; examine institutional structure/modes of authority/analysis of power, especially considering their implications for women; and incorporate one or more feminist analyses/scholarly works (recognizing that there are multiple, and even conflicting, feminist perspectives).

**Women’s Studies Courses**

Some of the listed courses have prerequisites; please consult departmental description.

- ARTH 210 (CA,D) Women in the Visual Arts
- ARTH 311 (W,D,CA) Medieval and Renaissance Women
- CHS 337 (D,W) Counseling Girls and Women
- COMM 229 (D) Gender and Communication
- ENLT 225 (CL,D,W) Writing Women
- ENLT 227 (CL,D,W) Frankenstein’s Forebears
- ENLT 226 (CL,D) Novels by Women
- ENLT 228 (CL,D,W) Race in Anglo-American Culture 1600-1860
- FREN 430 French Women Writers*
- HIST 213 (CH,D) Gender and Family in Latin America

* Taught in the original language.
The four-year program permits students to enter the AFROTC program in the freshman or sophomore year. (Students with three years remaining until graduation may enroll concurrently in the freshman and sophomore Air and Space Studies courses and complete the four-year program in three years.)

The two-year program is available for students (including graduate students) who have at least two years remaining until graduation. Students interested in enrolling in the two-year program must apply as early as possible in their sophomore or junior year. Students should call 1-800-945-5378, ext. 4680, for more information.

**General Military Course (Four-Year Program)**

The first two years of the four-year program constitute the General Military Course (GMC). GMC courses are open to all University student and students enrolling in these courses do not incur any military service obligation. (Exception: Students who completed and were selected to receive AFROTC scholarships will incur a commitment at the beginning of their sophomore year.) The GMC curriculum consists of four 1-credit Air and Space Studies courses; a non-credit leadership laboratory each semester (introduces students to US Air Force history and environment, customs, courtesies, drill and ceremonies, and leadership skills); and physical training (PT) twice per week.

**Professional Officer Course**

The final two years of the four-year program comprise the Professional Officer Course (POC). It consists of four 3-credit Air and Space Studies courses; a non-credit leadership laboratory each semester; and PT twice per week. To be accepted into the POC, students must pass a physical examination and an officer-qualification test, meet academic standards, and pass a physical fitness test.

Four-year cadets must also successfully complete Field Training, a four-week program normally attended during the summer between sophomore and junior years. Those cadets in a two-year program must complete a six-week Field Training Program. Once a cadet meets all of the requirements and is contract with AFROTC, the cadet will incur a military obligation.

**Uniforms**

The U.S. Air Force supplies all uniforms, equipment, and textbooks required for AFROTC. The cadet will return all uniform items in satisfactory condition at the completion of (or withdrawal from) the AFROTC program.

**Scholarships**

The U.S. Air Force offers many one- to five-year full and partial scholarships for which qualified students may compete, if they enroll in AFROTC. All scholarship awards are based on academic merit, regardless of financial need, with most scholarship recipients determined by central selection boards. Scholarship-selection boards for students already in college are held each year. Since scholarship applicants must meet certain academic, physical fitness, and medical requirements to be considered by the scholarship boards, they should contact the Air and Space Studies Department early to apply. All AFROTC scholarship recipients entering (or transferring to) The University of Scranton receive free room. Additionally, contracted cadets earn a monthly $250-$400 tax-free stipend during the academic year and a $600 allowance for books per academic year.

**Commissioning**

All students who satisfactorily complete the POC curriculum requirements are commissioned as second lieutenants in the US Air Force and will serve on active duty in a career specialty they have chosen, consistent with U.S. Air Force needs. Most cadets incur a four-year active duty and a four-year inactive reserve commitment to the U.S. Air Force.

For additional information or if you have specific questions about AFROTC, contact the Air and Space Studies Department at 1-800-945-5378, ext. 4860, or at http://wilkes1.wilkes.edu/~afrotc.

**General Education Curriculum**

All students at The University of Scranton have the opportunity to become liberally educated in the Ignatian tradition. This liberal education will include the development of general skills and skills in the major. It will also include opportunity to develop both depth and breadth in the major, the cognate, and in the areas of natural science, social/behavioral science, humanities, philosophy, and theology. Within the disciplines listed above, students will also take at least two courses that are writing intensive and two courses with a strong cultural diversity component.

Courses that fulfill general education requirements as described in the outline below can be identified in catalog and course bulletin listings by a letter code in parentheses preceding the course title:

- Q Quantitative Reasoning
- CH Humanities/Culture: History
- CL Humanities/Culture: Literature
- CA Humanities/Culture: Arts
- CF Humanities/Culture: Foreign Languages
- P Philosophy or Theology/Religious Studies
- E Natural Science
- S Social/Behavioral Science
- W Writing-Intensive
- D Cultural Diversity

Courses having more than one letter code indicates that the course satisfies multiple general education requirements; e.g., (CH,W) satisfies both a Humanities/Culture: History and a Writing-Intensive requirement.

**Outline of General Education Requirements**

**Skills Acquisition**

Because of its recognition that utilizing information technology, writing and speaking effectively are skills necessary for success in college and one’s later professional life, The University of Scranton requires that students demonstrate basic competencies in written, oral and digital communication before their junior year. These competencies may be demonstrated by students in one of the following ways:

1. An examination supervised by Communication Department faculty (for COMM 100), by English Department faculty (for WRTG 107) and by the Computer Information Literacy Advisory Board (for C/JL 10x/10xL). These examinations may be taken only once by freshmen and sophomores who have not taken the course in the skill area.
2. Successful completion (a grade of C or higher) of each course set up to facilitate mastery of these skills: COMM 100 for...

Courses having more than one letter code indicate that the course satisfies multiple general education requirements: e.g., (CH, W) satisfies both a Humanities/Culture: History and a Writing-Intensive requirement.

Outline of General Education Requirements

Skills Acquisition

Because of its recognition that utilizing information technology, writing and speaking effectively are skills necessary for success in college and in one’s later professional life, The University of Scranton requires that students demonstrate basic competencies in written, oral and digital communication before their junior year. These competencies may be demonstrated by students in one of the following ways:

1. An examination supervised by Communication Department faculty (for COMM 100), by English Department faculty (for WRTG 107) and by the Computer Information Literacy Advisory Board (for C/IL 10X/10XL). These examinations may be taken only once by freshmen and sophomores who have not taken the course in the skill area.
2. Successful completion (a grade of C or higher) of each course set up to facilitate mastery of these skills: COMM 100 for
oral communication; WRTG 107 (or appropriate advanced standing course) for writing skills; and each component of C/IL 102/102L (or 104) for ability to use digital technology.

Public Speaking: One course, 3 credits; minimum grade of C required
COMM 100 Public Speaking
PHIL 217J The Trivium

Basic Composition: One or two courses, 3-6 credits; minimum grade of C required
WRTG 105 & 106 College Writing I & II
WRTG 107 Composition

Computing/Information Literacy: One course and laboratory, 3 credits; minimum grade of C required
C/IL 102/102L. Computing and Information Literacy
C/IL 104 Computing and Information Literacy

Subject Matter Mastery

Writing-Intensive Requirement (W): Two courses, variable credit*

One of these courses should be in the major program of study. Writing-intensive courses may also fulfill other major, cognate and/or general education requirements.

Quantitative Reasoning (Q): One course, 3 credits*

A mathematically based course as recommended by the major or chosen by the student in consultation with an advisor.

The Human Person and God

• Philosophy/Religious Studies: Two courses, 6 credits
  T/RS 121 Theology I
  T/RS 122 Theology II
  • Philosophy: Two courses, 6 credits
  PHIL 120 Introduction to Philosophy
  PHIL 210 Ethics
  • Philosophy/Theology Elective (P): One course, 3 credits*
  Nature
  • Natural Science (E): Two courses, 6-8 credits
  Two courses in natural or physical sciences as recommended by the major or selected by the student after consultation with the advisor.
  • Social or Behavioral Science (S): Two courses, 6 credits
  Two courses in social or behavioral sciences as recommended by the major or selected by students after consultation with an advisor.
  • Cultural Diversity (D): Two courses, 6 credits
  Two courses with strong cultural diversity content are required. These courses may also fulfill other major, cognate and/or general education requirements.

Electives

Four courses, 12 credits. Students are encouraged to use their general education electives to add minors or second majors where possible. For some majors, specific courses have been recommended in the GE elective area by the home departments. Where no specific recommendations have been made by the home department, any course (other than PHED activity courses) may be used as a free elective. Please refer to the department course listings in the catalog for complete course descriptions. If you have a question about how a specific course satisfies a requirement, please contact your advisor, academic advising center, dean’s office or registrar’s office.

* A list of eligible courses to fulfill general education requirements is available through the academic advising centers, the deans’ offices, the Office of the Registrar and online at www.scranton.edu/academics/gelist.shtml. Not all courses are offered every registration cycle.

Second and Third Year

Electives: Students should begin the 12 credits of free electives that are required.

Philosophy or Theology elective (designated with P): Most students will not have had the opportunity to complete all of the GE requirements listed under First and Second Year and, therefore, will attend to these requirements in the third and even the fourth years. Students are advised to have fulfilled some of their cultural diversity and writing-intensive course requirements during this time.*

Fourth Year

Finish GE requirements that have not been completed by the end of the third year, including the writing-intensive and cultural diversity requirements.

* Requirement may be satisfied by exemption exam.
* Writing-intensive and cultural diversity courses may also satisfy other requirements in the general education curriculum reducing the total number of credits required.

---

### Recommended General Education Course Sequence

#### First Year

| Speeches | 1 | INTD 100 |
| Writing | 3-6 | WRTG 107 or PHIL 217J |
| Computer Literacy | 3-4 | Courses designated with (Q) |

#### First and Second Year

| Philosophy | PHIL 120-PHIL 210 |
| Theology/Religious Studies | T/RS 121-122 |
| Humanities | 6-8 |
| Natural Science | 6-8 |

#### Second and Third Year

| Electives | 12 | Any subject except PHED activity classes |

#### Fourth Year

| Philosophy or Theology elective | 6-8 |
| Cultural Diversity | 6-8 |

---

* A list of eligible courses to fulfill general education requirements is available through the academic advising centers, the deans’ offices, the Office of the Registrar and online at www.scranton.edu/academics/gelist.shtml. Not all courses are offered every registration cycle.
A list of eligible courses to fulfill general education requirements is available through the academic advising centers, the deans' offices, the Office of the Registrar and online at www.scranton.edu/academics/gelist.shtml. Not all courses are offered every registration cycle.

Subject Matter Mastery

Writing-Intensive Requirement (W): Two courses, variable credit*
One of these courses should be in the major program of study. Writing-intensive courses may also fulfill other major, cognate and/or general education requirements.

Quantitative Reasoning (Q): One course, 3 credits*
A mathematically based course as recommended by the major or chosen by the student in consultation with an advisor.

The Human Person and God
• Theology/Religious Studies: Two courses, 6 credits
  T/RS 121 Theology I
  T/RS 122 Theology II
• Philosophy: Two courses, 6 credits
  PHIL 120 Introduction to Philosophy
  PHIL 210 Ethics
• Theology/Philosophy Elective (P): One course, 3 credits*

Nature
• Natural Science (E): Two courses, 6-8 credits*
Two courses in natural or physical sciences as recommended by the major or selected by the student after consultation with the advisor.

Culture
• Humanities (CA, CF, CH, CL): Four courses, 12 credits*
Courses in the humanities as recommended by the major or selected by the student after consultation with the advisor. Students must earn 6 credits in one humanities field: foreign language (CF), history (CH) or literature (CL). The remaining 6 credits must come from the other humanities fields, with no more than 3 credits coming from the fine arts (CA).

Integration of Individual and Community

Personal
• First Year Experience: One course, 1 credit
  INTD 100: Freshman Seminar

Physical Education: Three or more courses totaling 3 credits*

Social
• Social or Behavioral Science (S): Two courses, 6 credits*
  Two courses in social or behavioral sciences as recommended by the major or selected by students after consultation with an advisor.
• Cultural Diversity (D): Two courses, 6 credits*
  Two courses with strong cultural diversity content are required. These courses may also fulfill other major, cognate and/or general education requirements.

Electives
Four courses, 12 credits. Students are encouraged to use their general education electives to add minors or second majors where possible. For some majors, specific courses have been recommended in the GE elective area by the home departments. Where no specific recommendations have been made by the home department, any course (other than PHED activity classes) may be used as a free elective. Please refer to the department course listings in the catalog for complete course descriptions. If you have a question about how a specific course satisfies a requirement, please contact your advisor, academic advising center, dean's office or registrar's office.

Recommended General Education Course Sequence

First Year
Speech: COMM 100
Writing: WRTG 107 or PHIL 217 or WRTG 105 and 106
Computer Literacy: C/IL 102/102L or C/IL 104
Quantitative Reasoning (designated with Q)
Freshman Seminar: INTD 100

First and Second Year
Philosophy: PHIL 120-PHIL 210
Theology/Religious Studies: T/RS 121-122
Humanities (designated with CH, CL, CF or CA)
Natural Science (designated with E)
Social/Behavioral Science (designated with S)
Physical Education

Second and Third Year
Electives: Students should begin the 12 credits of free electives that are required.
Philosophy or Theology elective (designated with P): Most students will not have had the opportunity to complete all of the GE requirements listed under First and Second Year and, therefore, will attend to these requirements in the third and even the fourth years. Students are advised to have fulfilled some of their cultural diversity and writing-intensive course requirements during this time.*

Fourth Year
Finish GE requirements that have not been completed by the end of the third year, including the writing-intensive and cultural diversity requirements.

* A list of eligible courses to fulfill general education requirements is available through the academic advising centers, the deans' offices, the Office of the Registrar and online at www.scranton.edu/academics/gelist.shtml. Not all courses are offered every registration cycle.
Options for Undeclared Freshmen

Students who are not yet ready to declare a major have the option of selecting one of three general areas of study – CAS Common Curriculum, KSOM Business Area and CPS Common Curriculum – with the particular major to be determined by the end of the freshman year.

CAS Common Curriculum – First Year

Undecided students who are interested in exploring one or more of the majors offered in The College of Arts and Sciences may enroll in the CAS Common Curriculum program. Students in this program take a combination of freshman-level General Education courses and courses in potential majors. Specific courses are chosen in consultation with an academic advisor. In addition, CAS Common Curriculum students take a Freshman Seminar designed to help them make informed decisions about their majors. All CAS Common Curriculum students should take at least two potential major courses each semester of their freshman year.

THE COLLEGE OF ARTS AND SCIENCES

With more than 35 areas of study, The College of Arts and Sciences (CAS) is the largest academic division of the University. Its liberal arts programs serve students well in many different careers. CAS programs also lay the foundation for professional study in law, medicine and dentistry, as well as for graduate study in various fields.
ART AND MUSIC

Michael DeMichele, Ph.D., Chair
Josephine M. Dunn, Ph.D., Director,
Art and Music Program
See History for faculty listing.

Overview

The Art and Music program offers two minors: Art History and Music History. Foundation courses in studio art are also offered (e.g., drawing, design and painting). Each discipline aims to develop a student’s creative expression, to prompt aesthetic appreciation and judgment, to develop critical thinking, and to deepen understanding of the impulse to create with sound and image. Designated courses in Art History and Music History satisfy General Education requirements in the following areas: Humanities, Cultural Diversity, and Writing-Intensive.

Minor in Art History

A minor in Art History requires 18 credits, including ARTH 111 and 112. Four additional courses in Art History are required; PHIL 320 may be used as one of these four courses. Internships at the Lackawanna Historical Society and Anthracite Museum are available to Art History minors upon completing 12 credits in Art History.

Students with minors in Art History have recently enrolled in graduate degree programs in art history, decorative arts, library science and museum education. Others have accepted employment with the Metropolitan Museum of Art, Sotheby’s New York, and the Franklin Institute, Philadelphia. Students with music literature minors have pursued careers in recording, musical composition and performance.

Studio artists have continued their studies at the Moore College of Art, Maryland Institute of Art, and the Art Students’ League, New York City.

Minor in Music History

A minor in Music History requires 18 credits, including MUS 111, 112, 235, 236, and two additional music courses numbered 110 or above.

Course Descriptions

Art

ARTH 111 3 cr.
Color and Design
A foundation course introducing the elements and principles of two-dimensional design. Various materials are used to explore the organization of space and basic color theory.

ARTH 114 3 cr.
Three-Dimensional Design
A foundation course investigating basic materials and approaches in the creation of three-dimensional form. Hands-on involvement with diverse media, techniques and tools of the sculptor’s craft is emphasized.

ARTH 116 3 cr.
Basic Drawing
A foundation course designed to develop skills in basic drawing and perception. Various media are employed in exercises involving the use of line and shading, shape and space, and design and composition.

ARTH 120 3 cr.
Painting I
(Prerequisite: ART 112, 116 or equivalent) A first-level painting course concerned with fundamentals such as composition, observation, basic color theory and basic techniques. The class includes one museum trip and regular group critiques.

ARTH 182, 183 3 cr.
Independent Study Courses
These courses are designed to address the career objectives of students who intend to pursue studies in studio art, or in disciplines for which background in studio art is necessary. Arranged with permission of the director.

ARTH 184 3 cr.
Special Topics
Selected topics in studio art vary on the basis of student/faculty interest and available resources. Topics may include, but are not limited to: Printmaking, Painting II, Advanced Drawing, Pastel and Watercolor.

ARTH History

ARTH 111 3 cr.
(CA) History of World Art I
A survey of the history of painting, sculpture, and architecture from prehistoric times through the dawn of the Renaissance in 1400. The art of ancient Eastern and Western civilizations is studied in historical contexts of idea, style and technique.

ARTH 112 3 cr.
(CA) History of World Art II
The course opens with the history of painting, sculpture, and architecture in Renaissance, Baroque, and 18th-century Europe. Introduced by Impressionism, Expressionism, and Cubism, the study of the art of the modern world concludes with a survey of idea, style and technique in 20th-century art. (ARTH 111 not a prerequisite.)

ARTH 113 3 cr.
(CAD) Native American Art
Students will study the history, society, religious beliefs and craft traditions of the precolonial peoples of the United States, as well as contemporary Native American artists. The course entails group work, a collaborative final project, and a trip to the Mashantucket Pequot Museum in Connecticut.

ARTH 114 3 cr.
(CA) History of Architecture
A general survey of architectural history from the prehistoric through the modern era, focusing on architectural style, the built environment, and the rituals which condition the use and design of structures and urban spaces. The course features walking tours of Philadelphia and the city of Scranton as well as guest lectures by area architects.

ARTH 115 3 cr.
Art of the Ancient World
(Formerly ARTH 201) A survey of the art and architecture produced between 3000 and 1250 B.C. The course opens in the painted caves of Prehistoric Europe, and continues through the contemporaneous civilizations of the Ancient Near East (Sumer, Babylon, Assyria, Persia) and Egypt.

ARTH 116 3 cr.
Art of Greece and Rome
(Formerly ARTH 202) The course begins in the Aegean with the Minoan and Mycenaean cultures celebrated by Homer; surveys the art of classical Greece; and continues with the art of the Etruscans in ancient Italy. The course concludes with Roman art and architecture (3rd c. B.C. to 5th c. A.D.).

ARTH 117 3 cr.
Early Christian and Byzantine Art
(Formerly ARTH 203) The art and architecture produced by the first Christians borrowed much from the forms and ideas of Roman art. The course surveys art produced in Rome, Ravenna, Milan, Greece, Constantinople, 200-1400. A.D. Emphasis will be placed on the origin and symbolism of Christian imagery and architecture.

ARTH 118 3 cr.
(W) Medieval Art: Romanesque and Gothic
(Formerly ARTH 204) A survey of art and architecture in western Europe, 1100-1400. Medieval architecture, manuscripts, paintings, and decorative arts will be presented as mirrors of medieval thought and spirituality.

ARTH 205 3 cr.
The Icon in Russian and East European Art
This course focuses on theology, image and artistic style in the making of the icon in Russia and East Europe. The icon will be studied from medieval through modern times.

ARTH 210 3 cr.
(CAD.W) Women in the Visual Arts
This cross-disciplinary course presents selected topics on women in the visual arts, including varied ways of thinking and writing about women, art and culture. Topics include a survey of women in art, being female in the Renaissance, contemporary women artists, female artists in Latin America, and 19th-century women artists.

ARTH 212 3 cr.
(CAD.W) African American Art
This course considers African Americans in the visual arts, including varied ways of thinking and writing about African American art and culture. Topics include slavery and emancipation, the Harlem renaissance, the Civil Rights movement, African American women artists, and collecting African American art.

ARTH 213 3 cr.
(CAD.W) American Art
A survey of American architecture, painting and sculpture from the earliest exploration days. The course will cover art of Native America, the colonial period, the Civil War era and the 20th century.

ARTH 214 3 cr.
Renaissance Art in Italy, 1200-1480
As a survey of art produced in Italy, 1200-1480, the course examines the production of art as it relates to society and culture. From St.

The course features walking tours of Philadelphia and the city of Scranton as well as guest lectures by area architects.

ARTH 115 Art of the Ancient World 3 cr.
(Fomerly ARTH 201) A survey of the art and architecture produced between 3000 and 1250 B.C. The course begins in the painted caves of the Cro-Magnon and opens in the world of ancient Egypt.

ARTH 116 (CA,D) Art of Greece and Rome 3 cr.
(Fomerly ARTH 202) The course begins in the Aegean with the Minoan and Mycenaean cultures celebrated by Homer; surveys the art of classical Greece; and continues with the art of the Etruscans in ancient Italy. The course concludes with Roman art and architecture (3rd c. B.C. to 5th c. A.D.).

ARTH 117 Early Christian and Byzantine Art 3 cr.
(Fomerly ARTH 203) The art and architecture produced by the first Christians borrowed much from the forms and ideas of Roman art. The course surveys art produced in Rome, Ravenna, Milan, Greece and Constantinople, 200-1400. A.D. Emphasis will be placed on the origin and symbolism of Christian imagery and architecture.

ARTH 118 (W) Medieval Art: Romanesque and Gothic 3 cr.
(Fomerly ARTH 204) A survey of art and architecture in western Europe, 1100-1400. Medieval architecture, manuscripts, paintings, and decorative arts will be presented as mirrors of medieval thought and spirituality.

ARTH 205 The Icon in Russian and East European 3 cr.
This course focuses on theology, image and artistic style in the making of the icon in Russia and East Europe. The icon will be studied from medieval through modern times.

ARTH 210 (CA,D,W) Women in the Visual Arts 3 cr.
This cross-disciplinary course presents topics on women in the visual arts, including varied ways of thinking and writing about women, art and culture. Topics include a survey of women in art, being female in the Renaissance, contemporary women artists, female artists in Latin America, and 19th-century women artists.

ARTH 212 (CA,D,W) African American Art 3 cr.
This course considers African Americans in the visual arts, including varied ways of thinking and writing about African American art and culture. Topics include slavery and emancipation, the Harlem renaissance, the Civil Rights movement, African American women artists, and collecting African American art.

ARTH 213 (CA,D,W) American Art 3 cr.
A survey of American architecture, painting and sculpture from the earliest exploration days. The course will cover art of Native America, the colonial period, the Civil War era and the 20th century.

ARTH 214 Renaissance Art in Italy. 3 cr.
As a survey of the art produced in Italy, 1200-1480, the course examines the production of art as it relates to society and culture. From St.
This course surveys painting north of the Alps by artists produced in Italy by Botticelli and Michelangelo. The art of the Netherlands differs remarkably from the art of Northern Europe (France, Germany, Belgium, and the Netherlands) during the 15th century, bringing Michelangelo to Rome, which remains a cultural capital for artists through the 17th century. Artists working in 16th century Florence, in the wake of Michelangelo, introduce a style that flourishes brightly, but briefly: Mannerism.

(Formerly ARTH 410) This course investigates the painting, sculpture, and architecture of Michelangelo. By considering the artistic traditions to which he fell heir as a Florentine artist, the traditional and innovative aspects of Michelangelo’s work will be assessed. Readings from his letters and poetry and from 16th-century biographies will furnish a rich context for the appreciation of his work and for understanding the society to which he belonged.

(Formerly ARTH 411) Artist, scientist, author and free-thinker, Leonardo left few paintings, many drawings, and copious notes attesting the wide range of his intellectual curiosity. This course focuses both on the 15th-century world to which he fell heir as a Florentine artist, the traditional and innovative aspects of Michelangelo’s work will be assessed. Readings from his letters and poetry and from 16th-century biographies will furnish a rich context for the appreciation of his work and for understanding the society to which he belonged.

(W) Leonardo Da Vinci
(Formerly ARTH 411) Artist, scientist, author and free-thinker, Leonardo left few paintings, many drawings, and copious notes attesting the wide range of his intellectual curiosity. This course focuses both on the 15th-century world to which he fell heir as a Florentine artist, the traditional and innovative aspects of Michelangelo’s work will be assessed. Readings from his letters and poetry and from 16th-century biographies will furnish a rich context for the appreciation of his work and for understanding the society to which he belonged.

(W) The Age of Rembrandt
(Formerly ARTH 405) Beginning with pre-World War I works by Matisse and Picasso, this course surveys the painting, sculpture, architecture and photography of the period known as modernism, ending with an exploration of the contemporary phenomenon of postmodernism. Through examination of both works and texts by artists and critics, considerations of style and technique will be integrated with an analysis of historical context.

The Renaissance in Northern Europe
(Formerly ARTH 311) Art produced in northern Europe (France, Germany, Belgium, and the Netherlands) differs remarkably from the art produced in Italy by Botticelli and Michelangelo. This course surveys painting north of the Alps by such artists as Jan van Eyck, Rogier van der Weyden, Hieronymus Bosch, and Albrecht Dürer.

(W) History of Photography
The course explores the historical development of photography and considers the medium’s aesthetic components as well as the theoretical and representational issues it raises.

(W) Impressionism and Post-Impressionism
(Formerly ARTH 312) Impressionism, an artistic movement linked today with leisure and pleasure, developed out of conflict and challenged many standard European art practices. The course investigates the artistic goals and strategies of Manet, Monet, Degas, Renoir, Morisot, Cassatt and Pissarro and considers how their works respond to important social issues of the day. Paintings by the Postimpressionists Cézanne, Seurat, Van Gogh and Gauguin will be examined as reactions to the aims of Impressionism.

Art of the Twentieth Century
(Formerly ARTH 305) This course surveys the painting, sculpture, architecture and photography of the period known as modernism, ending with an exploration of the contemporary phenomenon of postmodernism. Through examination of both works and texts by artists and critics, considerations of style and technique will be integrated with an analysis of historical context.

Special Topics
(Prerequisites: ARTH 111, 112 and two additional ARTH courses) Selected topics will vary from year to year on the basis of student/faculty interest and available media resources. Topics may include Art of the Far East, History of Printmaking, etc. Discrete styles and individual artists may also be the focus of a selected topics course.

Travel Seminar
Short study trips to provide students with the opportunity to study works of painting, architecture, and sculpture on site. Trips will be designed as themes: the art Museums of London and Paris, The Bible in Text and Image (Italy), Renaissance Villas and Palaces, Michelangelo, etc.

Medieval and Renaissance Women
This topics course explores various ways of looking at Italian medieval and Renaissance women in text and image. Primary texts by Hildegard von Bingen, Giovanni Boccaccio, Christine de Pisan, Leon Battista Alberti and Baldassare Castiglione will be studied for the light they shed on the notion and nature of woman. Great emphasis will be placed on in-class analysis of images, and a field trip to the Italian Renaissance collection of the Metropolitan Museum, NYC, will enable students to apply skills of visual analysis.

Painted Chambers of the Renaissance
Renaissance images were made, commissioned and viewed by particular audiences to whom the work of art communicated and reinforced contemporary beliefs and values. This course explores the meaning and purpose of murals produced for public and private use in private homes, churches and civic structures. Contemporary literature of the period will also be studied.

Museum Methods (Internship)
(Prerequisites: ARTH 111, 112 and two additional ARTH courses) Offered in cooperation with the local art venues, this course introduces students to ideologies of arts administration and careers in the art service industry. On-site study is supervised by Art History faculty.

Music
MUS 111 3 cr.
(W) Music History I
The history and literature of Western classical music from the medieval period to the 18th century, including Gregorian chant, the growth of polyphony, the rise of instrumental music, and the birth and growth of opera.

MUS 112 3 cr.
(W) Music History II
The history and literature of Western classical music from the 18th century to the present, including the increasing importance of instrumental music and opera, the development of atonality and serial music, and the recent avant-garde. MUS 111 is not a prerequisite.

MUS 211 3 cr.
Keyboard Music
Music written for the piano, organ, harpsichord and clavichord from the Renaissance to the 20th century. The course focuses on the development of keyboard instruments and the forms and composers that dominate the literature.

MUS 213 3 cr.
Symphony
Development of the symphony as an independent musical genre, from its origins in the mid-18th century to the present day. Works by Haydn, Mozart, Beethoven, Brahms, Tchaikovsky, Mahler, Shostakovich and Stravinsky will be among those considered.

MUS 217 3 cr.
Opera
The history of opera from its beginnings at the turn of the 17th century to the present with an emphasis on the 19th and 20th centuries. Representative operas by Mozart, Verdi, Wagner and Puccini, among others, will be examined.

MUS 218 3 cr.
American Musical Theatre
The development of musical theatre in America from the 19th century to the present, emphasizing works composed since the 1940s. Musicals by Jerome Kern, Rodgers and Hammerstein, Lerner and Loewe, Leonard Bernstein, and Stephen Sondheim will be considered.

MUS 219 3 cr.
History of Jazz
A detailed examination of a “truly American musical form.” Included will be discussions of major stylistic periods, compositions, and per-
Francis’ Assist to Pope Sixtus IV’s Rome, and from Giotto to Botticelli, painting, sculpture, and architecture will be studied in contexts of history, gender, technology, intellectual life, theology and philosophy.

ARTH 215 3 cr. Renaissance Art in Italy, 1480-1620 This course continues with a survey of art and society in Italy, 1480-1620. The papacy, during the 15th century, brings Michelangelo and Raphael to Rome, which remains a cultural capital for artists through the 17th century. Artists working in 16th century Florence, in the wake of Michelangelo, introduce a style that flourishes brightly, but briefly: Manierism.

ARTH 216 3 cr. (CA,W) Michelangelo and His World (Formerly ARTH 410) This course investigates the painting, sculpture, and architecture of Michelangelo. By considering the artistic traditions to which he fell heir as a Florentine artist, the traditional and the innovative aspects of Michelangelo’s work will be assessed. Readings from his letters and poetry and from 16th-century biographies will furnish a rich context for the appreciation of his work and for understanding the society to which he belonged.

ARTH 217 3 cr. (W) Leonardo Da Vinci (Formerly ARTH 411) Artist, scientist, author and free-thinker, Leonardo left few paintings, many drawings, and copious notes attesting the wide range of his intellectual curiosity. This course focuses both on the 15th-century world to which the artist belonged and on his many writings in order to measure Leonardo’s greatness as prodigy and visionary.

ARTH 218 3 cr. (W) The Age of Rembrandt (Formerly ARTH 303) A survey of the painting, sculpture, and architecture produced in Europe between 1600 and 1750. The course opens in Bernini’s Rome of the Counter-Reformation and concludes in France at the royal courts of Louis XIV and XV.

ARTH 219 3 cr. The Renaissance in Northern Europe (Formerly ARTH 311) Art produced in northern Europe (France, Germany, Belgium, and the Netherlands) differs remarkably from the art produced in Italy by Botticelli and Michelangelo. This course surveys painting north of the Alps by such artists as Jan van Eyck, Rogier van der Weyden, Hieronymus Bosch, and Albrecht Dürer.

ARTH 220 3 cr. (W) History of Photography The course explores the historical development of photography and considers the medium’s aesthetic components as well as the theoretical and representational issues it raises.

ARTH 221 3 cr. (CA,D,W) Nineteenth-Century Art (Formerly ARTH 304) An exploration of painting and sculpture from Neoclassicism to Symbolism. Special emphasis will be given to works by J.L. David, Goya, Delacroix, Courbet, Manet, Monet, Rodin, and Van Gogh. In addition to developing skills of visual analysis, the course will focus on the interaction between artist and society.

ARTH 222 3 cr. (W) Impressionism and Post-Impressionism (Formerly ARTH 312) Impressionism, an artistic movement linked today with leisure and pleasure, developed out of conflict and challenged many standard European art practices. The course investigates the artistic goals and strategies of Manet, Monet, Degas, Renoir, Morisot, Cassatt and Pissarro and considers how their works respond to important social issues of the day. Paintings by the Postimpressionists Cézanne, Seurat, Van Gogh and Gauguin will be examined as reactions to the aims of Impressionism.

ARTH 225 3 cr. (CA,D,W) Art of the Twentieth Century (Formerly ARTH 305) Beginning with pre-World War I works by Matisse and Picasso, this course surveys the painting, sculpture, architecture and photography of the period known as modernism, ending with an exploration of the contemporary phenomenon of postmodernism. Through examination of both artworks and texts by artists and critics, considerations of style and technique will be integrated with an analysis of historical context.

ARTH 227 3 cr. (CA,D,W) Matisse and Picasso (Formerly ARTH 315) This course examines the works of these two influential modern artists by considering the aesthetic and historical context of their paintings, sculptures, prints, and writings on art.

ARTH 295-296 3 cr. (W,D) Travel Seminar Short study trips to provide students with the opportunity to study works of painting, sculpture, and sculpture on site. Trips will be designed as themes: the Art Museums of London and Paris, The Bible in Text and Image (Italy), Renaissance Villas and Palaces, Michelangelo, etc.

ARTH 311 3 cr. (W,D,CA) Medieval and Renaissance Women This topics course explores various ways of looking at Italian medieval and Renaissance women in text and image. Primary texts by Hildegard von Bingen, Giovanni Boccaccio, Christine de Pisan, Leon Battista Alberti and Baldassare Castiglione will be studied for the light they shed on the notion and nature of woman. Great emphasis will be placed on in-class analysis of images, and a field trip to the Italian Renaissance collection of the Metropolitan Museum, NYC, will enable students to apply skills of visual analysis.

ARTH 316 3 cr. Painted Chambers of the Renaissance Renaissance images were made, commissioned and viewed by particular audiences to whom the work of art communicated and reinforced contemporary beliefs and values. This course explores the meaning and purpose of murals produced for public and private use in private homes, churches and civic structures. Contemporary literature of the period will also be studied.

ARTH 380 1-3 cr. Museum Methods (Internship) (Prerequisites: ARTH 111, 112 and two additional ARTH courses) Offered in cooperation with the local art venues, this course introduces students to ideologies of arts administration and enables students to apply skills of visual analysis.

ARTH 384, 484 3 cr. Special Topics (Prerequisites: ARTH 111, 112 and two additional ARTH courses) Selected topics will vary from year to year on the basis of student/faculty interest and available media resources. Topics may include Art of the Far East, History of Printmaking, etc. Discrete styles and individual artists may also be the focus of a selected topics course.

Music

MUS 111 3 cr. (CA) Music History I The history and literature of Western classical music from the medieval period to the 18th century, including Gregorian chant, the growth of polyphony, the rise of instrumental music, and the birth and growth of opera.

MUS 112 3 cr. (CA) Music History II The history and literature of Western classical music from the 18th century to the present, including the increasing importance of instrumental music and opera, the development of atonality and serial music, and the recent avant-garde. MUS 111 is not a prerequisite.

MUS 211 3 cr. Keyboard Music Music written for the piano, organ, harpsichord and clavichord from the Renaissance to the 20th century. The course focuses on the development of keyboard instruments and the forms and composers that dominate the literature.

MUS 213 3 cr. Symphony Development of the symphony as an independent genre, from its origins in the mid-18th century to the present day. Works by Haydn, Mozart, Beethoven, Brahms, Tchaikovsky, Mahler, Shostakovitch and Stravinsky will be among those considered.

MUS 217 3 cr. Opera The history of opera from its beginnings at the turn of the 17th century to the present with an emphasis on the 19th and 20th centuries. Representative operas by Mozart, Verdi, Wagner and Puccini, among others, will be examined.

MUS 218 3 cr. American Musical Theatre The development of musical theatre in America from the 19th century to the present, emphasizing works composed since the 1940s. Musicals by Jerome Kern, Rodgers and Hammerstein, Lerner and Loewe, Leonard Bernstein, and Stephen Sondheim will be considered.

MUS 219 3 cr. History of Jazz A detailed examination of a “truly American musical form.” Included will be discussions of major stylistic periods, compositions, and per-
MUS 222 3 cr.
Bach
(Formerly MUS 323) The music of Johann Sebastian Bach in the context of the musical forms, styles, and genres current in the first half of the 18th century. A survey of Bach’s life and works is followed by detailed study of selected vocal and instrumental compositions.

MUS 223 3 cr.
Mozart
(Formerly MUS 324) An examination of Mozart’s major works in the genres of symphony, concerto, chamber music, church music, and opera, together with a brief biographical survey. The influence of late 18th-century culture and musical conventions on Mozart’s work is considered.

MUS 225 3 cr.
Beethoven
(Formerly MUS 325) Study of a composer whose fiery personality drove him to express through music universal concepts in an age of revolution, i.e., freedom and the dignity of the person. Course traces the evolution of Beethoven’s major works – sonatas and concertos, symphonies and string quartets as well as Fidelio and the Missa Solemnis – and the effect of his deafness on his view of life and on his later works.

MUS 226 3 cr.
Romantic Music of the Nineteenth Century
A study of the major musical developments in the 19th century, the Romantic Period: the rise of piano literature, the art song, chamber and program music, and opera. Attention to nationalism.

MUS 228 3 cr.
Music of the Twentieth Century
(MUS 112 recommended as prerequisite) A study of the history and literature of Western classical music in the 20th century. The various “isms” of the period, including impressionism, expressionism, neo-classicism, serialism, and minimalism, will be examined.

MUS 233 3 cr.
Music in America
An overview of music in the United States from colonial times to the present, with an emphasis on the 20th century. Classical, popular, and traditional musical styles are considered, including the symphony, the opera, the Broadway show, jazz, rock, hymnody and folk music.

MUS 235 3 cr.
Music Theory I
The fundamental materials of tonal music: notes and rests, rhythm and meter, scales and modes, intervals, triads and seventh chords, melodic and harmonic organization, and an introduction to voice leading and part writing. Some knowledge of music notation helpful.

MUS 236 3 cr.
Music Theory II
(Prerequisite: MUS 235) Extension of the tonal vocabulary to include chromatic harmony, modulatory techniques, and the use of extended chords, as well as an overview of selected post-tonal procedures.

MUS 280 3 cr.
Liturgical Music
The role of music in the Roman Catholic Church. Emphasis on the practical rather than the historical. Recommended for any lay person or member of the clergy involved in developing church liturgy. No musical background required.

MUS 284 3 cr.
Special Topics
Selected topics in music history will vary from year to year in accord with student/faculty interest.

BIOL 100 3 cr.
(E) Modern Concepts of Human Biology
Exploration of the practical impact that modern biological concepts have on our lives. Topics include cell function, genetics, plant and human biology, genetic engineering, cancer, AIDS and dying. Provides a framework for making informed ethical decisions regarding pertinent biological issues. Three hours lecture. Fall only.

BIOL 101 3 cr.
(E) Introduction to Biological Science
Introduction to fundamental concepts, principles and theories of modern biology. Discussion and application of the scientific method in discovery and learning, discussion of experimental and statistical techniques, examination of the historical and cultural fabric of biological science, and discussion of the impact of biological
formers. Listening examples, as well as live performances, will contribute to an understanding of jazz from its origins to the present day.

MUS 222  
Bach  
(Formerly MUS 323) The music of Johann Sebastian Bach in the context of the musical forms, styles, and genres current in the first half of the 18th century. A survey of Bach’s life and works is followed by detailed study of selected vocal and instrumental compositions.

MUS 223  
Mozart  
(Formerly MUS 324) An examination of Mozart’s major works in the genres of symphony, concerto, chamber music, church music, and opera, together with a brief biographical survey. The influence of late 18th-century culture and musical conventions on Mozart’s work is considered.

MUS 225  
Beethoven  
(Formerly MUS 325) Study of a composer whose fiery personality drove him to express through music universal concepts in an age of revolution, i.e., freedom and the dignity of the person. Course traces the evolution of Beethoven’s major works – sonatas and concertos, symphonies and string quartets as well as Fidelio and the Missa Solemnis – and the effect of his deafness on his view of life and on his later works.

MUS 226  
Romantic Music of the Nineteenth Century  
A study of the major musical developments in the 19th century, the Romantic Period: the rise of piano literature, the art song, chamber and program music, and opera. Attention to nationalism.

MUS 228  
Music of the Twentieth Century  
(MUS 112 recommended as prerequisite) A study of the history and literature of Western classical music in the 20th century. The various “isms” of the period, including impressionism, expressionism, neo-classicism, serialism, and minimalism, will be examined.

MUS 233  
Music in America  
An overview of music in the United States from colonial times to the present, with an emphasis on the 20th century. Classical, popular, and traditional musical styles are considered, including the symphony, the opera, the Broadway show, jazz, rock, hymnody and folk music.

MUS 235  
Music Theory I  
The fundamental materials of tonal music: notes and rests, rhythm and meter, scales and modes, intervals, triads and seventh chords, melodic and harmonic organization, and an introduction to voice leading and part writing. Some knowledge of music notation helpful.

MUS 236  
Music Theory II  
(Prerequisite: MUS 235) Extension of the tonal vocabulary to include chromatic harmony, modulatory techniques, and the use of extended chords, as well as an overview of selected post-tonal procedures.

MUS 280  
Liturgical Music  
The role of music in the Roman Catholic Church. Emphasis on the practical rather than the historical. Recommended for any lay person or member of the clergy involved in developing church liturgy. No musical background required.

MUS 284  
Special Topics  
Selected topics in music history will vary from year to year in accord with student/faculty interest.

Research and development on modern society. Three hours lecture.

**BIOL 105** 3 cr. (E) **Biodiversity**

An examination of the variety of animal and plant species, especially in the two most diverse ecosystems: the coral reef and the tropical rain forest. The foundations of biological diversity will be studied: ecology, systematics, evolution and biogeography. Current topics will be discussed, such as deforestation, human population growth, endangered species and global warming. Three hours lecture.

**BIOL 108** 3 cr. (E) **History of Life on Earth**

Sequence of appearance of life on earth based on the geological record. Topics include the origin of life on earth, patterns and processes of the fossil record, and an introduction to the diversity of life, past and present. Three hours lecture.

**BIOL 110-111** 8 cr. (E) **Structure and Function of the Human Body** (Requires concurrent enrollment in lecture and lab) A general study of the anatomy and physiology of the human organism, emphasizing the body’s various coordinated functions from the cellular level to integrated organ systems. Three hours lecture, two hours lab each semester.

**BIOL 141-142** 9 cr. (E) **General Biology** (Requires concurrent enrollment in lecture and lab) A comprehensive study of the nature of living organisms, both plant and animal, their structure, function, development and relationships, including the problems of development, heredity and evolution. Three hours lecture, three hours lab each semester.

**BIOL 195** 3 cr. (E) **Tropical Biology (O,P)** Study of tropical communities with emphasis on the coral reef. Introduction to a variety of other tropical areas, such as sandy beaches, turtle grass beds, mangrove swamps, tide pools, rocky shores, and rain forests. Approximately two weeks will be spent at a biological station in the American tropics. Swimming proficiency required. Interession only.

**BIOL 196** 3 cr. (E) **African Photo Safari (O,P)** Natural history of Eastern Equatorial Africa with special emphasis on the delicate ecological balance between plant and animal communities. The savannah plains, tropical mountain forests, northern frontier and Great Rift Valley will be visited for first-hand study of the tremendous diversity of fauna and flora. Interession only.

**BIOL 201** 3 cr. (E) **Anatomy and Physiology** (Prerequisite: BIOL 101) An introduction to the biochemical, cellular, tissue and organismal organization of selected body functions; structure in relation to function is emphasized. Three hours lecture.

**BIOL 202** 3 cr. (E) **The ABCs of Genetics** Heredity for the non-science major, with emphasis on the human. Provides the background necessary for the non-scientist to understand his/her own hereditary background and to have informed opinions about societal issues related to genetics. Includes Mendelian, molecular, and population genetics, evolution, genetic diseases, genetic engineering, etc. Three hours lecture.

**BIOL 210** 3 cr. (E) **Introductory Medical Microbiology** (Pre- or co-requisites: BIOL 110-111, CHEM 110-111; requires concurrent enrollment in lecture and lab) Fundamentals of microbiology, including structure, function, identification, pathogenesis, epidemiology and control of microorganisms with emphasis on human pathogens. Two hours lecture, two hours lab. Fall only.

**BIOL 241** 5 cr. (E) **Comparative Vertebrate Anatomy (O)** (Prerequisites: BIOL 141-142; requires concurrent enrollment in lecture and lab) Structure and phylogeny of vertebrate organ-systems, emphasizing and comparing vertebrate structures in relation to their functions. Amphioxus, shark, necturus, and the fetal pig are subjected to detailed laboratory study. Three hours lecture, four hours lab. Fall only.

**BIOL 243** 5 cr. (E) **The Human Body (O)** (Prerequisites: BIOL 141-142; requires concurrent enrollment in lecture and lab) Structure and function of the principal organ systems in mammals, emphasizing the human condition. The cat is subjected to detailed study in the laboratory. Three hours lecture, four hours lab. Spring only.

**BIOL 245** 4.5 cr. (W: lab only) (E) **General Physiology (O)** (Prerequisites: BIOL 141-142, CHEM 112-113; requires concurrent enrollment in lecture and lab) Physiological processes underlying functioning of the animal organism. Study of irritability, excitation, conduction, contractility, cellular physiology, and functions of mammalian organ-systems. Three hours lecture, three hours lab.

**BIOL 250** 5 cr. (E) **Microbiology (C-O,M)** (Prerequisites: BIOL 141-142, CHEM 112-113; requires concurrent enrollment in lecture and lab) Structure, function, growth, reproduction, heredity and relationships of bacteria, yeasts, molds, viruses; a brief survey of pathogens, life cycles of parasitic microzoa; introduction to disease and immunology. Three hours lecture, four hours lab; not open to Nursing majors.

**BIOL 255** 3 cr. (E) **Animal Nutrition and Metabolism (C-O)** (Prerequisites: BIOL 141-142, concurrently) A survey of concepts and disciplines within the nutritional sciences. Lectures and discussions address basic sciences, biological factors, and current controversies including physiological systems directly and indirectly influencing nutrition and metabolism, nutrients and their metabolism, energy balance, food technology, and agribusiness. Spring semester.

**BIOL 260** 4.5 cr. (E) **Genetics (G)** (Prerequisites: BIOL 141-142) Mendelian, cytology, population and evolutionary, and basic molecular genetics; emphasis on eucaryotes. Three hours lecture, three hours lab.
BIOL 105 3 cr.
(E) Biodiversity
An examination of the variety of animal and plant species, especially in the two most diverse ecosystems: the coral reef and the tropical rain forest. The foundations of biological diversity will be studied: ecology, systematics, evolution and biogeography. Current topics will be discussed, such as deforestation, human population growth, endangered species and global warming. Three hours lecture.

BIOL 108 3 cr.
(E) History of Life on Earth
Sequence of appearance of life on earth based on the geological record. Topics include the origin of life on earth, patterns and processes of the fossil record, and an introduction to the diversity of life, past and present. Three hours lecture.

BIOL 110-111 8 cr.
(E) Structure and Function of the Human Body
(Requires concurrent enrollment in lecture and lab) A general study of the anatomy and physiology of the human organism, emphasizing the body’s various coordinated functions from the cellular level to integrated organ systems. Three hours lecture, two hours lab each semester.

BIOL 141-142 9 cr.
(E) General Biology
(Requires concurrent enrollment in lecture and lab) A comprehensive study of the nature of living organisms, both plant and animal, their structure, function, development and relationship of life on earth, patterns and processes of the fossil record, and an introduction to the diversity of life, past and present. Three hours lecture.

BIOL 195 3 cr.
(E) Tropical Biology (O,P)
Study of tropical communities with emphasis on the coral reef. Introduction to a variety of other tropical areas, such as sandy beaches, turtle grass beds, mangrove swamps, tide pools, rocky shores, and rain forests. Approximately two weeks will be spent at a biological station in the American tropics. Swimming proficiency required. Intercession only.

BIOL 196 3 cr.
(African Photo Safari (O,P)
Natural history of Eastern Equatorial Africa with special emphasis on the delicate ecological balance between plant and animal communities. The savannah plains, tropical mountain forests, northern frontier and Great Rift Valley will be visited for first-hand study of the tremendous diversity of fauna and flora. Intercession only.

BIOL 201 3 cr.
(E) Anatomy and Physiology
(Prerequisite: BIOL 101) An introduction to the biochemical, cellular, tissue and organ systems. Introduction of selected body functions; structure in relation to function is emphasized. Three hours lecture.

BIOL 202 3 cr.
(E) The ABC’s of Genetics
Heredity for the non-science major, with emphasis on the human. Provides the background necessary for the non-scientist to understand his/her own hereditary background and to have informed opinions about societal issues related to genetics. Includes Mendelian, molecular, and population genetics, evolution, genetic diseases, genetic engineering, etc. Three hours lecture.

BIOL 210 3 cr.
Introductory Medical Microbiology
(Prec- or co-requisites: BIOL 110-111, CHEM 110-111; requires concurrent enrollment in lecture and lab) Fundamentals of microbiology, including structure, function, identification, pathogenesis, epidemiology and control of microorganisms with emphasis on human pathogens. Two hours lecture, two hours lab. Fall only.

BIOL 241 5 cr.
Comparative Vertebrate Anatomy (O)
(Prerequisites: BIOL 141-142; requires concurrent enrollment in lecture and lab) Structure and phylogeny of vertebrate organ-systems, emphasizing and comparing vertebrate structures in relation to their functions. Amphioxus, shark, nectarus, and the fetal pig are subjected to detailed laboratory study. Three hours lecture, four hours lab. Fall only.

BIOL 243 5 cr.
The Human Body (O)
(Prerequisites: BIOL 141-142; requires concurrent enrollment in lecture and lab) Structure and function of the principal organ systems in mammals, emphasizing the human condition. The cat is subjected to detailed study in the laboratory. Three hours lecture, four hours lab. Spring only.

BIOL 250 5 cr.
Microbiology (C,O,M)
(Prerequisites: BIOL 141-142, CHEM 112-113; requires concurrent enrollment in lecture and lab) Physiological processes underlying functioning of the animal organism. Study of irritability, excitation, conduction, contractility, cellular physiology, and functions of mammalian organ-systems. Three hours lecture, three hours lab.

BIOL 255 3 cr.
Animal Nutrition and Metabolism (C-O)
(Prerequisites: BIOL 141-142, concurrent enrollment in CHEM 233, if not already successfully completed) A survey of concepts and disciplines within the nutritional sciences. Lectures and discussion address basic sciences, biological factors, and current controversies including physiological systems directly and indirectly influencing nutrition and metabolism, nutrients and their metabolism, energy balance, food technology, and agribusiness. Spring semester.

BIOL 260 4.5 cr.
Genetics (G)
(Prerequisites: BIOL 141-142) Mendelian, cyto-, population and evolutionary, and basic molecular genetics; emphasis on eucaryotes. Three hours lecture, three hours lab.
BIOL 263 5 cr.
Genetic Engineering (G)
(Prerequisites: BIOL 141-142; requires concurrent enrollment in lecture and lab) Study of the nature and function of the gene with emphasis on the experimental evidence which gave rise to the present concepts of genetic engineering. Strong emphasis is placed on recombinant DNA techniques in both lecture and laboratory. Three hours lecture, three hours lab.

BIOL 272 5 cr.
Invertebrate Biology (O,P)
(Prerequisites: BIOL 141-142; requires concurrent enrollment in lecture and lab) Structure and function of the major groups of invertebrates with emphasis on their evolutionary relationships. Labs focus on the diversity of invertebrate forms and include field trips. Three hours lecture, three hours lab. Fall, odd years.

BIOL 273 3 cr.
Marine Ecology (P)
(Prerequisites: BIOL 141-142) Diversity of marine habitats and of the organisms that inhabit them. Lectures and discussion address the physical and biological factors that influence the distribution and ecology of organisms in the various marine environments, including intertidal, estuarine, benthic, coral reef, and open ocean communities. The effects of humans on the sea will be assessed. Three hours lecture.

BIOL 344 4.5 cr.
Principles of Immunology (C,O,M)
(Prerequisites: BIOL 250 strongly recommended for 344 lecture, required for C44 lab) The basic molecular, cellular and organismal aspects of the immune response, emphasizing chemical and functional bases of antigens and immunoglobulins, cellular and humoral response, tolerance, immune deficiency, hypersensitivity, autoimmunity, blood groups, transplantation. Three hours lecture, three hours lab. Spring only.

BIOL 345 3 cr.
Comparative Animal Physiology (RO)
(Prerequisite: BIOL 245) The physiological principles involved in adaptations of animals to their environment from a comparative viewpoint; osmotic control, temperature regulation, nerve and muscle physiology, sensory perception, etc. Three hours lecture.

BIOL 346 3 cr.
Endocrinology and Reproduction (C,O)
(Prerequisite: BIOL 245) The mammalian endocrine system; emphasis on molecular mechanisms of hormone action, feedback control of hormone production, integration with other physiological systems, and reproductive endocrinology. Three hours lecture. Spring only.

BIOL 347 3 cr.
Exercise Physiology (O)
(Prerequisite: BIOL 245) Study of anatomical and physiological effects of exercise, centring around control of physical performance by capacity to generate energy through aerobic and anaerobic pathways; includes effects of heredity, age, nutrition, training and environment on performance. Emphasizes the multidimensional role of exercise in weight control, cardiovascular fitness, stress management, fatigue, strength, etc. Three hours lecture/demonstration. Spring, odd years.

BIOL 348 4.5 cr.
Functional Neuroanatomy (C,O)
(Prerequisite: BIOL 245, or, for neuroscience majors, PSYC 231) Study of the organization and function of the neuron, neural circuits, and the major sensory and motor components of the central nervous system; bioelectric phenomena, synaptic transmission; the neural basis for higher functions such as cognition, memory, and learning. Three hours lecture; three hours lab. (Also listed as NEUR 348.)

BIOL 349 5 cr.
Plant Physiology (C,O,P)
(Prerequisite: BIOL 141 or 101 or permission of instructor) Functional anatomy and physiology of plants, including structure, photosynthesis, respiration, mineral nutrition, water relations, productivity, growth and differentiation, transport, stress physiology, and energy flow. Three hours lecture. Three hours lab. Lab is writing-intensive (W). Spring, odd years.

BIOL 350 5 cr.
(W) Cellular Biology (C,M)
(Prerequisites: BIOL 141-142; requires concurrent enrollment in lecture and lab) Study of structure and function in eukaryotic cells. Emphasis on biomolecules, cell organelles, cell motility, signaling, and cell physiology. The cellular basis of human physiology and disease will also be discussed. Labs focus on experimental studies of cellular structure and function using techniques of modern cell biology. Three hours lecture, three hours lab. Lab fulfills a writing-intensive (W) requirement.

BIOL 351 5 cr.
Developmental Biology (C,O,M)
(Prerequisites: BIOL 141-142; requires concurrent enrollment in lecture and lab) Development of vertebrates and invertebrates from gametogenesis through organogenesis. Emphasis on cellular and molecular mechanisms involved in differentiation, morphogenesis, and determination of the body plan. Labs focus on experimentation with living, developing organisms. Three hours lecture, three hours lab. Spring only.

BIOL 352 5 cr.
Histology (C)
(Prerequisites: BIOL 141-142; BIOL 241 strongly recommended; requires concurrent enrollment in lecture and lab) Microscopic structure and function of the four basic vertebrate tissues. Emphasis will be placed on mammalian tissues. Lectures include historical, theoretical and practical perspectives. Laboratories include examination of tissues through the use of low set of slides as well as demonstrations and exercises in basic preparation of tissues for microscopic examination. Three hours lecture, four hours lab. Fall only.

BIOL 354 5 cr.
Special Histology (C)
(Prerequisite: CHEM 232-233, BIOL 352) Microscopic recognition and functional correlations of the major vertebrate organ systems. Enrollment is limited to preserve informal and flexible working conditions appropriate to advanced histological work. This course is customized to the participants’ needs. Options include in-depth training in techniques or in-depth analysis of a particular organ system. Two hours lecture, five hours lab. Spring only.

BIOL 358 3 cr.
Cellular and Molecular Neurobiology (C,M)
(Prerequisites: BIOL 141-142) Introduces Biology and Neuroscience majors to the cellular and molecular biology of the vertebrate nervous system. Includes ion channel structure and function, synthesis, packaging and release of neurotransmitters, receptor and transduction mechanisms, intracellular signalling, cell-to-cell communication, glial cell function, and neural growth and development. Three hours lecture. (Also listed as NEUR 358.)

BIOL 361 5 cr.
Molecular Biology I (M,G)
(Prerequisites: BIOL 141-142, CHEM 232; co-requisite: CHEM 233) requires concurrent enrollment in lecture and lab) Structure and function of prokaryotic cells from a molecular viewpoint. Study of biomacromolecule structure and function; bacterial DNA replication, transcription, translation and how these processes are regulated. Three hours lecture, three hours lab. Spring only.

BIOL 362 5 cr.
(W) Molecular Biology II (M,G)
(Prerequisite: BIOL 361 or CHEM 350) Structure and function of eukaryotic cells and organisms from a molecular viewpoint. Study of eukaryotic genome and gene organization, DNA packaging and replication, RNA transcription and splicing, translation into proteins and how these processes are regulated. Discussion of HIV, cancer, and evolution on the molecular level. Three hours lecture, three hours lab optional. Fall only. Lab fulfills a writing-intensive (W) requirement.

BIOL 364 5 cr.
Virology (M)
(Prerequisites: BIOL 141-142, CHEM 232-233) A detailed survey of viruses important to animals and plants, including structure, replication, pathogenicity and diagnostic techniques. Strong emphasis is placed on the molecular biology of viruses in both lecture and lab. Three hours lecture, three hours lab. Fall only.

BIOL 370 4.5 cr.
(W) Animal Behavior (P,O)
(Prerequisites: BIOL 141-142; Classification of behavior types, development, functional advantages and evolution of behavior, and social and physiological aspects studied in lower and higher organisms. Three hours lecture, two hours lab. Spring only. Lab fulfills a writing-intensive (W) requirement.

BIOL 371 5 cr.
Ecology (P)
(Prerequisites: BIOL 141-142) Study of physical, chemical, and biological factors that influence the distribution and abundance of organisms and determine the relationships among organisms from the population to the ecosystem level. Three hours lecture, three hours lab. Fall only.

BIOL 374 5 cr.
(W) Vertebrate Biology (RO)
(Prerequisites: BIOL 141-142) This course presents an overview of the vertebrates, placing vertebrate form and function within an ecological and evolutionary context. Much of the course is concerned with vertebrate systematics, factors governing distribution, vertebrate inter-
BIOL 263 5 cr.
Genetic Engineering (G)
(Prerequisites: BIOL 141-142; requires concurrent enrollment in lecture and lab) Study of the nature and function of the gene with emphasis on the experimental evidence which gave rise to the present concepts of genetic engineering. Strong emphasis is placed on recombinant DNA techniques in both lecture and laboratory. Three hours lecture, three hours lab.

BIOL 272 5 cr.
Invertebrate Biology (O,P)
(Prerequisites: BIOL 141-142; requires concurrent enrollment in lecture and lab) Structure and function of the major groups of invertebrates with emphasis on their evolutionary relationships. Labs focus on the diversity of invertebrate forms and include field trips. Three hours lecture, three hours lab. Fall, odd years.

BIOL 273 3 cr.
Marine Ecology (P)
(Prerequisites: BIOL 141-142) Diversity of marine habitats and of the organisms that inhabit them. Lectures and discussion address the physical and biological factors that influence the distribution and ecology of organisms in the various marine environments, including intertidal, estuarine, benthic, coral reef, and open ocean communities. The effects of humans on the sea will be assessed. Three hours lecture.

BIOL 291 3 cr.
Cell Biology (P)
(Prerequisites: BIOL 141-142; BIOL 241 strongly recommended) The fundamental experimental and theoretical aspects of the cellular basis of human physiology and disease will be studied. Three hours lecture, five hours lab. Spring only.

BIOL 292 3 cr.
Developmental Biology (C,O,M)
(Prerequisites: BIOL 141-142; requires concurrent enrollment in lecture and lab) Development of vertebrates and invertebrates from gametogenesis through organogenesis. Emphasis on cellular and molecular mechanisms involved in differentiation, morphogenesis, and determination of the body plan. Labs focus on experimentation with living, developing organisms. Three hours lecture, three hours lab. Spring only.

BIOL 299 1-3 cr.
Independent Study Course (R)
(Prerequisites: BIOL 141-142; BIOL 241 recommended) This course permits a student to work with a faculty mentor in a specialized area of study. Three hours lecture; three lecture hours per credit. Fall, Spring, and Summer. Prerequisite: Consent of the Biologically oriented faculty member and the department chairperson.

BIOL 344 4.5 cr.
Principles of Immunology (C,O,M)
(Prerequisites: BIOL 141 or 101 or permission of instructor) Introduction to the immune system and the basic mechanisms involved in the normal immune response, as well as in the responses to cancer, infection, and autoimmunity. Three hours lecture, three hours lab. (Also listed as NEUR 348.) Fall only.

BIOL 348 4.5 cr.
Functional Neuroanatomy (C,O)
(Prerequisites: BIOL 245, or, for neuroscience majors, PSYC 231) Study of the organization and function of the neurons, neural circuits, and the major sensory and motor components of the central nervous system; behavioral phenomena, synaptic transmission; the neural basis for higher functions such as cognition, memory, and learning. Three hours lecture; three hours lab. Fall only.

BIOL 349 5 cr.
Plant Physiology (C,O,P)
(Prerequisites: BIOL 141; requires concurrent enrollment in lecture and lab) Study of the structure and function of the plant. Three hours lecture, three hours lab. Fall only.

BIOL 350 5 cr.
Cellular and Molecular Neurobiology (C,M)
(Prerequisites: BIOL 141-142) Introduces Biology and Neuroscience majors to the cellular and molecular biology of the vertebrate nervous system. Includes ion channel structure and function, synaptic transmission, and release of neurotransmitters, receptor interaction, and treatment of neuromuscular and neural growth and development. Three hours lecture. Spring only.

BIOL 351 5 cr.
Developmental Biology (C,O,M)
(Prerequisites: BIOL 141-142; requires concurrent enrollment in lecture and lab) Development of vertebrates and invertebrates from gametogenesis through organogenesis. Emphasis on cellular and molecular mechanisms involved in differentiation, morphogenesis, and determination of the body plan. Labs focus on experimentation with living, developing organisms. Three hours lecture, three hours lab. Spring only.

BIOL 352 5 cr.
Histology (C)
(Prerequisites: BIOL 141-142; BIOL 241 strongly recommended) The structure and function of the four basic vertebrate tissues. Emphasis will be placed on mammalian tissues. Lectures include historical, theoretical and practical perspectives. Labs include examination of tissues through the use of loan sets of slides as well as demonstrations and exercises in basic preparation of tissues for microscopic examination. Three hours lecture, four hours lab. Fall only.

BIOL 354 5 cr.
Special Histology (C)
(Prerequisites: CHEM 232-233, BIOL 352) Microscopic recognition and functional correlations of the major vertebrate organ systems. Enrollment is limited to preserve informal and flexible working conditions appropriate to advanced histological work. This course is customized to the participants’ needs. Options include in-depth training in techniques or in-depth analysis of a particular organ system. Three hours lecture, five hours lab. Spring only.

BIOL 355 3 cr.
Cellular and Molecular Neurobiology (C,M)
(Prerequisites: BIOL 141-142) The physiological principles involved in adaptations of animals to their environment from a comparative viewpoint: osmotic control, temperature regulation, nerve and muscle physiology, sensory perception, etc. Three hours lecture.

BIOL 362 5 cr.
Virology (M)
(Prerequisites: BIOL 141-142, CHEM 232-233) A detailed survey of viruses important to animals and plants, including structure, replication, pathogenicity and diagnostic techniques. Strong emphasis is placed on the molecular biology of viruses in both lecture and lab. Three hours lecture, three hours lab. Fall only.

BIOL 370 4.5 cr.
(W) Animal Behavior (P,O)
(Prerequisites: BIOL 141-142; Classification of behavior types, development, functional advantages and evolution of behavior, and social and physiological aspects studied in lower and higher organisms. Three hours lecture, two hours lab. Spring only. Lab fulfills a writing-intensive (W) requirement.

BIOL 371 5 cr.
Ecology (P)
(Prerequisites: BIOL 141-142) Study of physical, chemical, and biological factors that influence the distribution and abundance of organisms and determine the relationships among organisms from the population to the ecosystem level. Three hours lecture, three hours lab. Fall only.

BIOL 374 5 cr.
(W) Vertebrate Biology (R)
(Prerequisites: BIOL 141-142) This course presents an overview of the vertebrates, placing vertebrate form and function within an ecological and evolutionary context. Much of the course is concerned with vertebrate systematics, factors governing distribution, vertebrate inter-
actions with both biotic and abiotic components of their environment as well as conservation and management issues. Three hours lecture, three hours lab. Spring only. Lab fulfills a writing-intensive (W) requirement.

BIOL 375 3 cr.
Evolution (G,P)
(Prerequisites: BIOL 141-142) A consideration of the theories of evolution and evidences for them in plants and animals. Population genetics and the adaptiveness of various organic traits will be discussed. Three hours lecture. Fall only.

BIOL 379 3 cr.
Biostatistics
(Prerequisites: MATH 103) Data analysis and statistical techniques in biology and medicine; probability and frequency distributions, descriptive statistics, hypothesis testing, and various parametric and nonparametric statistical tests. Use of one or more computerized statistical programs. Three hours lecture. Spring only.

BIOL 384 2-4 cr.
Special Topics in Biology
Study of selected topics in biology, varying from year to year in accord with student/faculty interest and current research advances. May include such topics as sensory reception, membrane biology, population genetics, etc.

BIOL 393-394 Variable Credit
Undergraduate Research
(Prerequisites: 12 credits in Biology) Individual problems for advanced students with sufficient background in biological and physical sciences.

BIOL 444 3 cr.
Sensory Biology (C,O)
(Prerequisites: BIOL 245 and completion of or concurrent enrollment in PHYS 121/141) The course applies multidisciplinary approaches to the study of senses: physics of stimuli, anatomy of receptor organs, neurophysiology of receptor cells, anatomy and central processing, animal behavior, and artificial sensor design. The course focuses on terrestrial vertebrates with occasional discussions on aquatic sensory systems. Three hours lecture.

BIOL 445 3 cr.
Mammalian Physiology (C,O)
(Prerequisites: BIOL 245, CHEM 252-253) Molecular, cellular, and tissue aspects of selected organ systems not normally covered in General Physiology, including calcium and skeletal homeostatic systems, integumentary system, gastrointestinal system, and aspects of nervous, endocrine, reproductive, and lymphatic systems. Three hours lecture.

BIOL 446 3 cr.
Cardiovascular Physiology (O)
(Prerequisites: BIOL 245, PHYS 120 or 140) The physiological and biophysical bases of cardiovascular function, including cardiac electrophysiology and mechanics; regulation of the heart and the peripheral circulation; hemodynamics; solute and fluid exchange; and cell-cell interactions governing white blood cell transit. Special circulations will highlight the role of cardiovascular regulation in overall physiological function. Three hours lecture.

BIOL 450 5 cr.
Electron Microscopy (C)
(Prerequisites: BIOL 141-142; requires concurrent enrollment in lecture and lab) Introduction to the mechanics of the electron microscope with emphasis on standard laboratory techniques, including preparation of materials, sectioning, viewing and photographic analysis. One hour lecture, six hours lab.

BIOL 471 3 cr.
Applied Ecology (P)
(Prerequisites: BIOL 371) The application of ecological principles and concepts to environmental problems, including consideration of their origins, effects on living systems, and potential solutions. Consideration of such issues as biodiversity, habitat degradation and loss, conservation biology, ecosystem management, wildlife ecology, agroecology, pollution, and global climate change. Three hours lecture.

BIOL 472 3 cr.
Systems Ecology (P)
(Prerequisites: BIOL 371) The study of ecosystem dynamics and their relationship to the functioning of the biosphere. A quantitative approach to ecosystem structure and function, emphasizing the use of simulation and conceptual models. The course will involve opportunities to construct and test simulation models. Three hours lecture. Spring, even years.

BIOL 473 5 cr.
Estuarine Ecology (O,P)
(Prerequisites: BIOL 141 or 101 or permission of instructor) The ecology of marine and estuarine systems, including soil chemistry, halophyte physiology, tidal marsh ontogeny, ecosystem function and the consequences of human alteration of the coastal zone. Lab includes a week-long field trip during Spring Break to Sapelo Island, Georgia, and Cocodrie, Louisiana. Three hours lecture, three hours lab. Spring, even years.

Overview
The department offers five majors: Chemistry, Biochemistry, Chemistry-Business, Chemistry-Computers, and Medical Technology. The program in Chemistry is approved by the American Chemical Society, which means that graduates may be certified by the American Chemical Society if they meet the requirements. In addition, outstanding students in the Chemistry and Biochemistry majors are eligible for consideration in the combined, five-year baccalaureate/master's degree program (please refer to the section on the Graduate School and to the Graduate School Catalog for specifics of the program). The strength of the department is indicated by the fact that the University of Scranton has been one of the leading schools in the country in the number of master's degrees awarded in chemistry. The prestige of the department is also demonstrated by a study of the Office of Institutional Research at Franklin and Marshall College which ranked the University of Scranton 34th out of 91 private, four-year, primarily undergraduate colleges as the baccalaureate source of those earning Ph.D.s in Chemistry between 1981 and 1990.

Recent graduates of the department have been admitted to doctoral programs at a number of major universities including Harvard, Cornell, Johns Hopkins and the University of Pennsylvania. In addition, some graduates have attended medical and dental schools, and some have gone on to law school.

Minor in Chemistry
The minor in Chemistry includes Organic Chemistry (6 credits), Physical Chemistry (6 credits), and a chemistry laboratory course (3 credits).

Biochemistry
The department offers two tracks of study for biochemistry majors. The tracks are similar for the first three semesters, allowing students the option to change between the two tracks within that time frame, should their career goals change. The research track prepares students for graduate study in biochemistry or for a career in which independent research experience would be beneficial. The pre-professional track provides a strong background for students pursuing further studies in law or medicine or career paths not emphasizing research.

Minor in Biochemistry
The minor in Biochemistry includes Organic Chemistry (6 credits), Biochemistry I (3 credits), Biochemistry II (3 credits) or Biophysical Chemistry (3 credits), and Chemistry laboratory (3 credits).

Chemistry-Business
The Chemistry-Business major combines theoretical and technical instruction in chemistry with management training in business. Graduates of this program will be concerned not only with chemical research and technological development but also with management problems in science-related industries. Most Chemistry majors tend to be research-oriented although almost half of the approximately 100,000 chemists employed in American private industry are engaged in work other than research and development: management, marketing and sales. This combined degree was formulated to prepare chemists to assume these latter responsibilities.

From the point of view of the business student, almost one-third of all business graduates can expect to be employed in a chemistry-related field: pharmaceuticals, plastics, petroleum, etc. Most Business majors employed in such industries must develop,
actions with both biotic and abiotic components of their environment as well as conservation and management issues. Three hours lecture, three hours lab. Spring only. Lab fulfills a writing-intensive (W) requirement.

BIOL 375 Evolution (G,P) 3 cr. (Prerequisites: BIOL 141-142) A consideration of the theories of evolution and evidences for them in plants and animals. Population genetics and the adaptiveness of various organic traits will be discussed. Three hours lecture. Fall only.

BIOL 379 Biostatistics (Prerequisites: MATH 103) Data analysis and statistical techniques in biology and medicine; probability and frequency distributions, descriptive statistics, hypothesis testing, and various parametric and nonparametric statistical tests. Use of one or more computerized statistical programs. Three hours lecture. Spring only.

BIOL 384 Special Topics in Biology 2-4 cr. Study of selected topics in biology, varying from year to year in accord with student/faculty interest and current research advances. May include such topics as sensory reception, membrane biology, population genetics, etc.

BIOL 393-394 Variable Credit Undergraduate Research (Prerequisite: 12 credits in Biology) Individual problems for advanced students with sufficient background in biological and physical sciences.

BIOL 444 Sensory Biology (C,O) 3 cr. (Prerequisites: BIOL 245 and completion of or concurrent enrollment in PHYS 120 or 140) The course applies multidisciplinary approaches to the study of senses: physics of stimuli, anatomy of receptor organs, neurophysiology of receptor cells, anatomy and central processing, animal behavior, and artificial sensor design. The course focuses on terrestrial vertebrates with occasional discussions on aquatic sensory systems. Three hours lecture.

BIOL 445 Mammalian Physiology (C,O) 3 cr. (Prerequisites: BIOL 245, CHEM 252-253) Molecular, cellular, and tissue aspects of selected organ systems not normally covered in General Physiology, including calcium and skeletal homeostatic systems, integumentary system, gastrointestinal system, and aspects of nervous, endocrine, reproductive, and lymphatic systems. Three hours lecture.

BIOL 446 Cardiovascular Physiology (O) 3 cr. (Prerequisites: BIOL 245, PHYS 120 or 140) The physiological and biophysical bases of cardiovascular function, including cardiac electrophysiology and mechanics; regulation of the heart and the peripheral circulation; hemodynamics; solute and fluid exchange; and cell-cell interactions governing white blood cell transit. Special circulations will highlight the role of cardiovascular regulation in overall physiological function. Three hours lecture.

BIOL 450 Electron Microscopy (C) 5 cr. (Prerequisites: BIOL 141-142; requires concurrent enrollment in lecture and lab) Introduction to the mechanics of the electron microscope with emphasis on standard laboratory techniques, including preparation of materials, sectioning, viewing and photographic analysis. One hour lecture, six hours lab.

BIOL 471 Applied Ecology (P) 3 cr. (Prerequisite: BIOL 371) The application of ecological principles and concepts to environmental problems, including consideration of their origins, effects on living systems, and potential solutions. Consideration of such issues as biodiversity, habitat degradation and loss, conservation biology, ecosystem management, wildlife ecology, agroecology, pollution, and global climate change. Three hours lecture.

BIOL 472 Systems Ecology (P) 3 cr. (Prerequisite: BIOL 371) The study of ecosystem dynamics and their relationship to the functioning of the biosphere. A quantitative approach to ecosystem structure and function, emphasizing the use of simulation and conceptual models. The course will involve opportunities to construct and test simulation models. Three hours lecture. Spring, even years.

BIOL 473 Estuarine Ecology (O,P) 5 cr. (Prerequisites: BIOL 141 or 101 or permission of instructor) The ecology of marine and estuarine systems, including soil chemistry, halophyte physiology, tidal marsh ontogeny, ecosystem function and the consequences of human alteration of the coastal zone. Lab includes a week-long field trip during Spring Break to Sapelo Island, Georgia, and Cocodrie, Louisiana. Three hours lecture, three hours lab. Spring, even years.

Overview
The department offers five majors: Chemistry, Biochemistry, Chemistry-Business, Chemistry-Computers, and Medical Technology. The program in Chemistry is approved by the American Chemical Society, which means that graduates may be certified by the American Chemical Society if they meet the requirements. In addition, outstanding students in the Chemistry and Biochemistry majors are eligible for consideration in the combined, five-year baccalaureate/master’s degree program (please refer to the section on the Graduate School and to the Graduate School Catalog for specifics of the program). The strength of the department is indicated by the fact that the University of Scranton has been one of the leading schools in the country in the number of master’s degrees awarded in chemistry. The prestige of the department is also demonstrated by a study of the Office of Institutional Research at Franklin and Marshall College which ranked the University of Scranton 34th out of 91 private, four-year, primarily undergraduate colleges as the baccalaureate source of those earning Ph.D.s in Chemistry between 1981 and 1990.
Recent graduates of the department have been admitted to doctoral programs at a number of major universities including Harvard, Cornell, Johns Hopkins and the University of Pennsylvania. In addition, some graduates have attended medical and dental schools, and some have gone on to law school.

Minor in Chemistry
The minor in Chemistry includes Organic Chemistry (6 credits), Physical Chemistry (6 credits), and a chemistry laboratory course (3 credits).

Biochemistry
The department offers two tracks of study for biochemistry majors. The tracks are similar for the first three semesters, allowing students the option to change between the two tracks within that time frame, should their career goals change. The research track prepares students for graduate study in biochemistry or for a career in which independent research experience would be beneficial. The pre-professional track is more flexible and allows students a greater selection of elective courses in chemistry and biology in order to tailor their course of study to meet their individual career goals. The pre-professional track provides a strong background for students pursuing further studies in law or medicine or career paths not emphasizing research.

Minor in Biochemistry
The minor in Biochemistry includes Organic Chemistry (6 credits), Biochemistry I (3 credits), Biochemistry II (3 credits) or Physical Chemistry (3 credits), and Chemistry laboratory (3 credits).

Chemistry-Business
The Chemistry-Business major combines theoretical and technical instruction in chemistry with management training in business. Graduates of this program will be concerned not only with chemical research and technological development but also with management problems in science-related industries. Most Chemistry majors tend to be research-oriented although almost half of the approximately 100,000 chemists employed in American private industry are engaged in work other than research and development: management, marketing and sales. This combined degree was formulated to prepare chemists to assume these latter responsibilities.

From the point of view of the business student, almost one-third of all business graduates can expect to be employed in a chemistry-related field: pharmaceuticals, plastics, petroleum, etc. Most Business majors employed in such industries must develop,
often on their own, the technical knowledge needed to understand their company’s operations and products. A fundamental background in chemistry as provided in this concentration is a distinct advantage to individuals planning such careers.

Chemistry-Computers

The Chemistry-Computers program is designed to provide a vehicle for preparing students in the area of intensive computer use in the field of chemistry. The use of computers has long been important in chemistry, but in recent years areas such as molecular modeling and design have become increasingly important. Drug companies use these techniques for the design of drugs for particular medical problems. In addition, most of the modern analytical instruments are highly enhanced by on-line computer processing of data. This program is designed to enable students to enter industry or graduate programs in areas such as computational chemistry, chemical information retrieval, or molecular design.

B.S. in Medical Technology

The Bachelor of Science in Medical Technology degree program, under the direction of Dr. Trudy Dickneider, is designed to train and qualify students as medical technologists or clinical laboratory scientists serving hospitals, clinical laboratories, industrial or research institutions. The program meets and exceeds the requirements of the National Accrediting Agency for Clinical Laboratory Sciences (NAACLS). The program involves the satisfactory completion of the first three years of a curriculum of study (indicated below) at the University of Scranton and the fourth year of clinical education at a hospital having a School of Medical Technology approved by NAACLS. After completing the program, students take a national certification examination. To date the University has arranged affiliation with hospitals in the cities of Abington, Williamsport and Wilkes-Barre. See affiliations at the end of this catalog.

The curriculum for the B.S. in Medical Technology closely parallels the B.S. in Biochemistry program so that students have the option to change to the latter after two years, should their career goals change.

Course Descriptions

In cases where a student withdraws from a chemistry lecture course, the student must also withdraw from the corresponding laboratory course unless a written waiver is provided by the department.

C/CJ 200

Forensic Science

Designed for law-enforcement majors as well as science majors, this is a study of the rules of evidence and the position of the expert scientific witness in law, followed by a review of the uses of scientific, and particularly chemical, evidence in various phases of the investigation and trial of criminal actions.

CHEM 100

(E) Elements of Chemistry

An elementary study of the field of chemistry for the non-science major; concepts of structure, states of matter, modern developments, implications of the field for modern society. Three hours lecture.

CHEM 104

(E) Science and Society

A study of some current problems of a scientific and technological nature from the point of view of the non-science major. Scientific background will be provided to lead to greater understanding and possible solutions. Possible topics: genetic engineering, narcotics, pesticides, etc. Three hours lecture.

CHEM 110-111

(E) Introductory Chemistry

A study of the fundamental concepts of general chemistry, organic chemistry, and biochemistry. Three hours lecture each semester.

CHEM 110L-111L

Introductory Chemistry Laboratory

(Lecture is required as pre- or co-requisite; CHEM 110L is prerequisite for CHEM 111L) Experiments dealing with principles of general, organic and biological chemistry are performed. Two hours laboratory each semester.

CHEM 112-113

(E) General and Analytical Chemistry

A study of the laws, theories and principles of general chemistry together with qualitative and quantitative analysis. Three hours lecture each semester.

1. For ACS certification, Chemistry majors must complete MATH 222, MATH 341, CHEM 350 or 450, and one upper-division chemistry elective.

Chemistry 112L-113L

General and Analytical Chemistry Laboratory

(Lecture is required as pre- or co-requisite; CHEM 112L is prerequisite for CHEM 113L) Experiments involve semi-micro techniques for qualitative and quantitative analysis (gravimetric and volumetric analysis). Three hours laboratory each semester.

CHEM 114L

General Analytical Chemistry Laboratory

A special laboratory course for those students who are advanced in chemistry. Semi-micro techniques of gravimetric and volumetric quantitative analysis. Admission will be on the basis of a placement exam and the professor’s permission. Note: For students with majors in the Chemistry and Biology departments, this course will satisfy the requirements for the CHEM 112-113 laboratory courses.

CHEM 202

Global Change

Earth-system sciences and global environmental change, examining the records of past changes in climate, land-mass distribution, and atmospheric and oceanic composition, evaluating fossils, tree-ring data, and geological indicators.

CHEM 232-233

(E) Organic Chemistry

(Prerequisites: CHEM 112-113) An introduction to the chemistry of the principal aliphatic and aromatic compounds of carbon and their derivatives. Three hours lecture each semester.
often on their own, the technical knowledge needed to understand their company’s operations and products. A fundamental background in chemistry as provided in this concentration is a distinct advantage to individuals planning such careers.

Chemistry-Computers

The Chemistry-Computers program is designed to provide a vehicle for preparing students in the area of intensive computer use in the field of chemistry. The use of computers has long been important in chemistry, but in recent years areas such as molecular modeling and design have become increasingly important. Drug companies use these techniques for the design of drugs for particular medical problems. In addition, most of the modern analytical instruments are highly enhanced by on-line computer processing of data. This program is designed to enable students to enter industry or graduate programs in areas such as computational chemistry, chemical information retrieval, or molecular design.

B.S. in Medical Technology

The Bachelor of Science in Medical Technology degree program, under the direction of Dr. Trudy Dickneider, is designed to train and qualify students as medical technologists or clinical laboratory scientists serving hospitals, industrial or research laboratories, or manufacturers of clinical laboratories, clinical laboratories, industrial or research laboratories. The program meets and exceeds the requirements of the National Accrediting Agency for Clinical Laboratory Sciences (NAACLS). The program involves the satisfactory completion of the first three years of a curriculum of study (indicated below) at the University of Scranton and the fourth year of clinical education at a hospital having a School of Medical Technology approved by NAACLS. After completing the program, students take a national certification examination. To date the University has arranged affiliations with hospitals in the cities of Abington, Williamsport and Wilkes-Barre. See affiliations at the end of this catalog.

The curriculum for the B.S. in Medical Technology closely parallels the B.S. in Biochemistry program so that students have the option to change to the latter after two years, should their career goals change.

Course Descriptions

In cases where a student withdraws from a chemistry lecture course, the student must also withdraw from the corresponding laboratory course unless a written waiver is provided by the department.

C/CF 200 3 cr.

Forensic Science
Design for law-enforcement majors as well as science majors, this is a study of the rules of evidence and the position of the expert scientific witness in law, followed by a review of the uses of scientific, and particularly chemical, evidence in various phases of the investigation and trial of criminal actions.

CHEM 100 3 cr.

(E) Elements of Chemistry
An elementary study of the field of chemistry for the non-science major; concepts of structure, states of matter, modern developments, implications of the field for modern society. Three hours lecture.

CHEM 104 3 cr.

(E) Science and Society
A study of some current problems of a scientific and technological nature from the point of view of the non-science major. Scientific background will be provided to lead to greater understanding and possible solutions. Possible topics: energy, nuclear physics, genetic engineering, narcotics, pesticides, etc. Three hours lecture.

CHEM 110-111 6 cr.

(E) Introductory Chemistry
A study of the fundamental concepts of general chemistry, organic chemistry, and biochemistry. Three hours lecture each semester.

1. Cognate electives for the Biochemistry major may be taken in any of the following disciplines: Biology, Chemistry, Computer Science, Environmental Science, Mathematics or Physics and certain Psychology courses (PSYC 210, 231 and PSYC 384: Psychopharmacology).

2. For ACS certification, Biochemistry majors must take MATH 114, 221, 222, 341; PHYS 120-121; and CHEM 440 and 440L, and one course from the following: BIOL 250, 260, 263, 350, 361, or another Biology course approved by the Chemistry Department.

---

**CHEM 223L-233L: Organismal Behavior**

(Lecture is required as pre- or co-requisite; CHEM 232L is prerequisite for CHEM 233L)

Investigation of the chemical preparations and their compounds correlated with the periodic table, physical properties, atomic and molecular structure.

**CHEM 230: Organic Chemistry III**

(Prerequisites: CHEM 232–233) A continuation of Chemistry 232–233, emphasizing the study of the major types of organic mechanisms. Two hours lecture.

**CHEM 330L: Organic Chemistry III**

(Lecture is required as pre- or co-requisite) Experiments involve advanced techniques in synthesis and characterization of organic compounds. Six hours laboratory for Chemistry majors and three hours laboratory for Biochemistry majors.

</table>

1. Cognate electives for the Biochemistry major may be taken in any of the following disciplines: Biological Chemistry, Computer Science, Environmental Science, Mathematics or Physics and certain Psychology courses (PSYC 210, 231 and PSYC 384: Psychopharmacology).
2. For ACS certification, Biochemistry majors must take MATH 114, 221, 222, 341; PHYS 140–141 in place of PHYS 120–121; and CHEM 440 and 440L, and one course from the following: BIOL 250, 260, 263, 350, 361, or another Biology course approved by the Chemistry Department.

1. Senior year must contain at least 2 credits of laboratory or research.
2. Advanced biology courses are those courses which the Biology Department designates in the cellular, molecular or genetics areas.

## CHEM 320 Industrial Chemistry

A review of chemical operations and unit or batch processes common to industry. Econometric analysis involving supply-demand, productivity, commodity prices and costing is an important area covered, as are measures of productivity and patent activity. Three hours lecture.

## CHEM 330L Organic Chemistry III

(Lecture is required as pre- or co-requisite) Experiments involve advanced techniques in synthesis and characterization of organic compounds. Six hours laboratory for Chemistry majors and three hours laboratory for Biochemistry majors.

## CHEM 340 Environmental Chemistry

(Prerequisites: CHEM 232-233) A study of chemicals in the environment including their origin, transport, reactions, and toxicity in soil, water, air and living systems.

CHEM 342 3 cr.

**Environmental Toxicology**

(Prerequisites: CHEM 232-233, BIOL 141-142)

This course will encompass several realms of environmental toxicology, including general toxicological theory, effects of contaminants on various biological systems, and discussion of environmental toxicological issues (i.e., specific case studies as well as the types of analyses used in these types of studies).

CHEM 344 3 cr.

**Environmental Geochemistry**

(Prerequisites: CHEM 232-233) Consideration of natural cycles (carbon, sulfur, oxygen, water, etc.) that govern the chemistry of our planet. The origins of the elements, paleohistory, and composition of the planet. Effects of man’s activities with attention to their effects on the state of the oceans and the atmosphere.

CHEM 350 3 cr.

**General Biochemistry I**

(Prerequisite: CHEM 233) An introduction to the study of the metabolism of carbohydrates, lipids, amino acids, and proteins, including energy transformations and the role of enzyme systems in the above processes. Three hours lecture. Successful completion of CHEM 350 precludes credit for CHEM 451.

CHEM 352 3 cr.

**Chemical Toxicology**

(Prerequisite: CHEM 233) The nature, mode of action and methods of counteracting substances which have an adverse effect on biological systems, especially human. Medical, industrial and environmental forensic aspects will be discussed. Three hours lecture.

CHEM 360 3 cr.

**Biophysical Chemistry I**

(Prerequisites: CHEM 232-233) An introduction to the application of physical-chemical principles to biological problems. This involves aqueous solutions, colloidal chemistry, thermodynamics, electro-chemistry, chemical kinetics and nuclear chemistry. Three hours lecture.

CHEM 361 3 cr.

**Biophysical Chemistry II**

(Prerequisite CHEM 360) A continuation of Biophysical Chemistry I involving a study of atomic and molecular structure, spectroscopy, photo-chemistry, and surface chemistry with applications to biological and biochemical phenomena. Three hours lecture.

---

### Biophysical Chemistry Laboratory

- **CHEM 360L-361L**: 3 cr.
  - Biophysical Chemistry Laboratory
    - Lecture is required as pre- or co-requisite;
    - CHEM 360L is prerequisite for CHEM 361L
    - Experiments involve applications of physical-chemical techniques to biological problems.
  - Three hours laboratory each semester.

- **CHEM 362L-361L**: 3 cr.
  - Instrumental Analysis
    - (Prerequisite: CHEM 360 or 362)
    - (W) Physical Chemistry Laboratory
      - (Lecture is pre- or co-requisite; CHEM 362L is prerequisite for CHEM 363L)
      - Experiments demonstrate physical-chemical properties of matter and reactions.
      - Three hours laboratory each semester.

- **CHEM 370**: 2 cr.
  - (Prerequisite: CHEM 360 or 362)
  - Instrumental Analysis
    - (Prerequisite: CHEM 360 or 362)
    - Two hours lecture.

- **CHEM 370L**: 3 cr.
  - Instrumental Analysis Laboratory
    - (Lecture is required as pre- or co-requisite)
    - Experiments involve application of modern chemical instrumentation and techniques to quantitative analysis.
    - Six hours laboratory.

- **CHEM 384**: 2-4 cr.
  - Special Topics in Chemistry
    - Study of selected topics in chemistry and biochemistry, depending on student and faculty interest and the current state of the science.
    - May include topics from inorganic chemistry, organic chemistry, physical chemistry, analytical chemistry, polymer chemistry and interdisciplin- ary topics.

- **CHEM 390**: 1 cr.
  - Chemical Literature and Writing
    - A study of the published source material of chemical science and industry.
    - Course includes practical instruction in library technique and in the written reporting of results.
    - One hour lecture.

- **CHEM 391**: 1 cr.
  - Seminar
    - Current topics in chemistry, biochemistry, and industrial chemistry are prepared and presented by the students.

- **CHEM 440**: 3 cr.
  - Advanced Inorganic Chemistry
    - (Prerequisites: CHEM 362-363 or 360-361)
    - Theoretical concepts and their application to the reactions and structure of inorganic compounds.
    - Coordination chemistry and related topics, physical methods and reaction mechanisms.
    - Three hours lecture.

- **CHEM 440L**: 3 cr.
  - Advanced Inorganic Chemistry Laboratory
    - (Lecture is required as pre- or co-requisite)
    - Laboratory methods involving synthesis and characterization of inorganic compounds.
    - Three hours laboratory.

- **CHEM 450L**: 3 cr.
  - Biochemistry I
    - (Pre- or co-requisites: CHEM 233 and 360 or 362)
    - Structure-function relationships with emphasis on the organic and biophysical characteristics of proteins, lipids and carbohydrates are described.
    - Enzyme mechanisms and kinetics and the thermodynamic basis of intermediary metabolism are major themes.
    - Three hours lecture.
    - CHEM 450L Lab is required of Biochemistry majors.
    - Successful completion of CHEM 450 precludes credit for CHEM 350.

- **CHEM 451L**: 3 cr.
  - Biochemistry Laboratory
    - (Lecture is required as pre- or co-requisite)
    - Experiments involve techniques used in characterization of biopolymers and study of enzyme kinetics.

- **CHEM 452**: 3 cr.
  - Enzymology
    - A course in the chemical nature of enzymes with relation to mechanism of enzyme action and kinetics, purification and identification of enzymes and enzymes, biochemical and physiological aspects of enzymes in living systems.
    - Three hours lecture.

- **CHEM 460**: 3 cr.
  - Physical Chemistry III
    - (Prerequisite: CHEM 363)
    - Quantum mechanics and quantum chemistry, including classical problems, perturbational theory, variational theory and specific applications of molecular orbital theory to organic molecules and spectroscopic applications.

- **CHEM 464**: 3 cr.
  - Polymer Chemistry
    - (Co-requisites: CHEM 330, CHEM 361 or 363)
    - Survey of preparative methods for polymers; characterization of polymers using physico-chemical methods, spectroscopy, and thermal analysis; structure-property relationships; and applications of polymers.
    - Three hours lecture.

- **CHEM 464L**: 1.5 cr.
  - Polymer Chemistry Laboratory
    - (Pre- or co-requisites: CHEM 330, CHEM 464)
    - Laboratory experiments investigate synthesis and characterization methods for polymers, structure-property effects, and thermal analysis of polymers.
    - Three hours laboratory.

- **CHEM 470**: 5 cr.
  - Forensic Chemistry
    - (Prerequisite: CHEM 360 or 362)
    - Acquisition of forensic evidence through use of analytical techniques.
    - Statistical and multivariate analysis of

CHEM 360L-361L
Biophysical Chemistry Laboratory
(Lecture is required as pre- or co-requisite; CHEM 360L is prerequisite for CHEM 361L)

Experiments involve applications of physical-chemical techniques to biological problems.

Three hours laboratory each semester.

CHEM 362-363
Physical Chemistry I-II
(Prerequisites: CHEM 113, MATH 222) A study of the physical-chemical properties of matter and the dynamics of chemical reactions. Three hours lecture each semester.

CHEM 362L-363L
Instrumental Analysis Laboratory
(Lecture is required as pre- or co-requisite; CHEM 362L is prerequisite for CHEM 363L) Experiments demonstrate fundamental properties of matter and reactions. Three hours laboratory each semester.

CHEM 370
Instrumental Analysis
(Prerequisite: CHEM 360 or 362) Instrumental methods of analysis consisting of theory and application of such instrumental techniques as spectroscopy, polarography, and instrumental titrimetry. Two hours lecture.
data, and presentation of forensic evidence in a legal environment. Three hours lecture; four hours lab.

CHEM 493-494 3 cr. (W) Undergraduate Research
(Prequrequisites: CHEM 233, 360 or 362, 390)
Individual study and research in connection with a specific chemistry or biochemistry problem. Results must be written as a thesis and defended before the department. 1.5 credits each semester.

COMMUNICATION

Faculty
Edward F. Warner, Chair
William B. Anderson, Ph.D.
Jan W. Kelly, Ph.D.
Rebecca Lea Mikesell, Ph.D.
Matthew M. Reavy, Ph.D.
Robert P. Sadowski, Ph.D.
Roger D. Wallace, Ph.D.

Overview
The Department of Communication embraces the fields of advertising, broadcasting (radio and television), cable, film, journalism, public relations and speech. The Communication degree program prepares students for professional careers as well as advanced studies. Students who major in Communication become knowledgeable about the subject matter from both humanistic and scientific perspectives. They also have opportunities to acquire on-the-job experiences through internships. In addition, courses are designed to serve students in other departments of the University by developing their oral and written communication skills.

Degree Program Requirements
A student wishing to earn a Bachelor of Arts degree in Communication must satisfactorily complete a minimum of 36 credits from the department’s course offerings. Included among these 36 credits are five core courses required for all Communication majors:

COMM 115 Writing for Communication
COMM 210 Logical and Rhetorical Analysis
COMM 215 Introduction to Communication Theory
COMM 315 Communication Ethics
COMM 415 Senior Seminar

Department Track Requirements
Although the media are interrelated, students should develop an in-depth knowledge of at least one specific field. To that end, students majoring in Communication must select a track, or area of study, within the department. Although the department expects students to enroll in several courses within their chosen track, each track has two required courses:

Advertising
COMM 225 Advertising
COMM 330 Advertising Decision Making

Broadcasting
COMM 334 Broadcast Programming
COMM 426 International Broadcasting

Communication Studies
COMM 110 Interpersonal Communication
COMM 214 Small Group Communication

Film Studies
COMM 232 Film History
COMM 432 Film Theory and Criticism

Journalism
COMM 224 Newswriting
COMM 328 News Editing

Media Studies
COMM 140 Media and Society
COMM 221 Radio Production or COMM 222 Television Production

Public Relations
COMM 227 Contemporary Public Relations
COMM 327 Cases in Strategic Public Relations

Minor in Communication
A student wishing to minor in Communication must satisfactorily complete 18 hours to be selected with the approval of the department chair. Nine of these hours must come from the following three options:
1. COMM 115: Writing for Communication
2. Either COMM 210: Logical and Rhetorical Analysis or COMM 215: Introduction to Communication Theory
3. COMM 316 Communication Ethics

Note: COMM 100 and COMM 484 do not count toward the minor.

Course Descriptions

COMM 100 Public Speaking
3 cr.
This is a performance class which emphasizes the theory, composition, delivery, and criticism of speeches. Successful completion of COMM 100 (with a grade of C or better) fulfills the speech skills requirement of the University.

COMM 110 Interpersonal Communication
3 cr.
An investigation and analysis of the process and nature of human communication and its interpersonal and intercultural attributes.

COMM 115 (W) Writing for Communication
3 cr.
(Prequrequisite: WRTG 107 or fulfillment of Writing Skills requirement) An introduction to the major forms of writing for communication professions: corporate, print, radio/television production, public relations and advertising. Students will focus on the development and improvement of writing, research and critical thinking skills.

COMM 130 History of Electronic Media
3 cr.
The content of the course will address many humanities-based topics as they are related to mass media. Such topics include media history, media technologies and their effects on cultural practices, economic structures of mass communication, media programming, and the role of media in society.

COMM 140 Media and Society
3 cr.
The content of the course will address many humanities-based topics as they are related to mass media. Such topics include media history, media technologies, media research, audience reception, economies of mass communication, textual analysis, and the role of media in society.

COMM 210 (W) Logical and Rhetorical Analysis
3 cr.
A study of the principles of logic and persuasion, analysis of fallacies, and critical examination of the principles of structure in written and oral communication. Practice in briefs and abstracts with an emphasis on precision and clarity.

COMM 211 Argumentation and Debate
3 cr.
This course concentrates on the techniques of argumentation, persuasion, debate, and forensics. Focuses heavily on research, case construction and formal analysis.

COMM 214 Small Group Communication
3 cr.
An examination of research, techniques, and principles of small-group communication. Topics include problem solving, decision making, conflict resolution, leadership theories, interaction strategies and participant roles.

COMM 215 Introduction to Communication Theory
3 cr.
This course introduces the communication major to the rich body of theory and research in human communication. Students will examine theories from the traditional contexts of the field: interpersonal, small group, public, organizational, mass media, intercultural and gender. An emphasis is on applying the various theories to students’ communicative lives.

COMM 221 Radio Production
3 cr.
An examination of the dynamic industry roles of the radio producer/director. Areas to be studied include production theory and techniques which apply to station and program promotions, advertising, news, and music formats.

COMM 222 Television Production
3 cr.
Designed to provide both theoretical background and practical application of television production in and outside the studio. Various format types, production techniques, and artistic styles are studied. Opportunity for producing and directing television programs.

COMM 223 Radio Journalism
3 cr.
(Prequrequisite: COMM 221 or COMM 224 or COMM 528) With a focus on gathering and preparing news for broadcast (concentrating especially on interviewing techniques), this class will investigate various news formats and styles. At the mid-semester point, the class will begin operating as a news team.

COMM 224 (W) Newswriting
3 cr.
data, and presentation of forensic evidence in a legal environment. Three hours lecture; four hours lab.

CHEM 493-494 3 cr.
(W) Undergraduate Research
(Prerequisites: CHEM 233, 360 or 362, 390)
Individual study and research in connection with a specific chemistry or biochemistry problem. Results must be written as a thesis and defended before the department. 1.5 credits each semester.

**TOTAL: 130 CREDITS**

---

**COMM 225**  
**Advertising**  
This course explores advertising as an institution in society, utilizing research, media planning, and creative strategies. Students will participate in the formulation of an advertising campaign plan for local businesses.

**COMM 226**  
**Strategic Writing for Public Relations**  
Writing and editing of public relations and marketing communication materials such as press releases, speeches, direct mail, brochures, newsletter and Web sites. Writing and editing for electronic media and video news. Emphasis on integrated communications.

**COMM 227**  
**Contemporary Public Relations**  
Principles of the professional practice of modern public relations. Concepts of planning and executing effective communication strategies including message design and distribution for any organization.

**COMM 228**  
**(D) Intercultural Communication**  
Designed to provide a framework for understanding diversity in communication patterns among cultures and co-cultures. Topics include high- and low-context patterns, verbal and nonverbal communication across cultures and co-cultures, persuasion, dialects, organization of verbal codes, and the structure of conversations.

**COMM 229**  
**(D) Gender and Communication**  
This course focuses on interactive relationships between gender and communication in contemporary American society by examining the multiples ways communication in families, schools, media and society in general creates and perpetuates gender roles. The course considers not only what is in terms of gender roles, but also what might be and how students, as change agents, may act to improve their individual and collective lives.

**COMM 232**  
**Film History**  
This course traces the evolution of filmmaking from its earliest experimental stages to the feature film of today. The course concentrates on the American film industry, its audience impact as a mass medium, and the genres of films that have evolved. Selected screenings will reveal transitions and refinements that characterize this medium.

**COMM 310**  
**Mass Communication Law**  
(Formerly Responsibility in Communication)  
Analysis and examination of statutory laws, congressional legislation, and federal rules and regulations governing the mass media in the United States. Focus on the First Amendment, libel and slander, privacy, copyright, free press/fair trial, obscenity, advertising, antitrust and monopoly, taxation, and licensing.

**COMM 311**  
**Political Communication**  
The study of rhetorical strategies used by the modern politician. Examination of American political rhetoric as well as rhetorical styles operative in foreign-policy activities.

**COMM 312**  
**Organizational Communication**  
The study of communication behaviors, patterns, and strategies in organizations. Topics include power and politics, organizational cultures, human resources, conflict management, and negotiation. Historical and contemporary theories of organizing are examined and critiqued from a communication perspective.

**COMM 313**  
**Nonverbal Communication**  
A study of the nonverbal aspects of human interaction. Topics include impression management, social influence, form and function in design, proxemics, kinesics, and the symbolic environment.

**COMM 314**  
**Legal Communication**  
An examination of specific skills needed to promote effective and meaningful communication by the legal professional and the interface with clients, juries, judges, and the non-legal public.

**COMM 315**  
**Alternative Media**  
Alternative media take many forms, from slave quilts and graffiti to community radio and Internet fanzines. A wide range of alternative media are examined in this course, along with theoretical approaches to help us understand how alternative media promote solidarity, challenge mainstream culture, and provide diverse perspectives.

**COMM 316**  
**Communication Ethics**  
(Formerly Responsibility in Communication)  
This course will consider the need for and applications of proper standards by those in today’s media. It will also focus on the media responsibility to be aware of the public they serve. Different faculty may approach this course from various ethical/humanistic perspectives.

**COMM 317**  
**Digital Audio and Video Production**  
This course will provide an introduction to producing audio and video content for new technologies such as the Web and digital publication formats. Students will use digital recording and editing equipment to produce projects suitable for new technologies.

**COMM 318**  
**Multi-Media Presentations**  
(Prerequisite: COMM 317) This course focuses on the principles and practices of speaker delivery style when using multimedia to present a message. Message construction and audience analysis will also be emphasized.

**COMM 319**  
**Sports Writing**  
This course is designed to provide students with an overview of sport journalism including the history of sports journalism, how to conduct sports interviews, sports reporting techniques and how to write game stories, features and columns.

**COMM 320**  
**News Reporting**  
This course is designed to introduce students to reporting for electronic and print media. Students learn how to obtain and analyze documents used in criminal/civil investigations, as well as how to develop and maintain contacts in news investigations.

**COMM 322**  
**Advanced Television Production**  
(Prerequisite: COMM 222) Building upon the foundation acquired in COMM 222, students

COMM 226 3 cr.
Strategic Writing for Public Relations
Writing and editing of public relations and marketing communication materials such as press releases, speeches, direct mail, brochures, newsletter and Web sites. Writing and editing for electronic media and video news. Emphasis on integrated communications.

COMM 227 3 cr.
Contemporary Public Relations
Principles of the professional practice of modern public relations. Concepts of planning and executing effective communication strategies including message design and distribution for any organization.

COMM 228 3 cr.
(D) Intercultural Communication
Designed to provide a framework for understanding diversity in communication patterns among cultures and co-cultures. Topics include high- and low-context patterns, verbal and non-verbal communication across cultures and co-cultures, persuasion, dialects, organization of verbal codes, and the structure of conversations.

COMM 229 3 cr.
(D) Gender and Communication
This course focuses on interactive relationships between gender and communication in contemporary American society by examining the multiple ways communication in families, schools, media and society in general creates and perpetuates gender roles. The course considers not only what is in terms of gender roles, but also what might be and how students, as change agents, may act to improve their individual and collective lives.

COMM 232 3 cr.
Film History
This course traces the evolution of filmmaking from its earliest experimental stages to the feature film of today. The course concentrates on the American film industry, its audience impact as a mass medium, and the genres of films that have evolved. Selected screenings will reveal transitions and refinements that characterize this medium.

COMM 310 3 cr.
Mass Communication Law
(Junior or senior standing) Analysis and examination of statutory laws, congressional legislation, and federal rules and regulations governing the mass media in the United States. Focus on the First Amendment, libel and slander, privacy, copyright, free press/fair trial, obscenity, advertising, antitrust and monopoly, taxation, and licensing.

COMM 311 3 cr.
Political Communication
The study of rhetorical strategies used by the modern politician. Examination of American political rhetoric as well as rhetorical styles operative in foreign policy activities.

COMM 312 3 cr.
Organizational Communication
The study of communication behaviors, patterns, and strategies in organizations. Topics include power and politics, organizational cultures, human resources, conflict management, and negotiation. Historical and contemporary theories of organizing are examined and critiqued from a communication perspective.

COMM 313 3 cr.
Nonverbal Communication
A study of the nonverbal aspects of human interaction. Topics include impression management, social influence, form and function in design, proxemics, kinesics, and the symbolic environment.

COMM 314 3 cr.
Legal Communication
An examination of specific skills needed to promote effective and meaningful communication by the legal professional and the interface with clients, juries, judges, and the non-legal public.

COMM 315 3 cr.
Alternative Media
Alternative media take many forms, from slave quilts and graffiti to community radio and Internet fanzines. A wide range of alternative media are examined in this course, along with theoretical approaches to help understand how alternative media promote solidarity, challenge mainstream culture, and provide diverse perspectives.

COMM 316 3 cr.
Communication Ethics
(Formerly Responsibility in Communication)
This course will consider the need for and applications of proper standards by those in today’s media. It will also focus on the media responsibility to be aware of the public they serve. Different faculty may approach this course from various ethical/humanistic perspectives.

COMM 317 3 cr.
Digital Audio and Video Production
This course will provide an introduction to producing audio and video content for new technologies such as the Web and digital publication formats. Students will use digital recording and editing equipment to produce projects suitable for new technologies.

COMM 318 3 cr.
Multi-Media Presentations
(Prerequisite: COMM 317) This course focuses on the principles and practices of speaker delivery style when using multimedia to present a message. Message construction and audience analysis will also be emphasized.

COMM 319 3 cr.
Sports Writing
This course is designed to provide students with an overview of sport journalism including the history of sports journalism, how to conduct sports interviews, sports reporting techniques and how to write game stories, features and columns.

COMM 320 3 cr.
News Reporting
This course is designed to introduce students to reporting for electronic and print media. Students learn how to obtain and analyze documents used in criminal/civil investigations, as well as how to develop and maintain contacts in news investigations.

COMM 322 3 cr.
Advanced Television Production
(Prerequisite: COMM 222) Building upon the foundation acquired in COMM 222, students...
pursue specialized projects in producing and directing programs for broadcast or cable distribution.

COMM 323 3 cr.
Television Journalism
(Prerequisite: COMM 224 or COMM 328)
Broadcast-journalism skills are refined through classroom and outside assignments. Production techniques, including tape editing, are explored. Television news formats are produced.

COMM 324 3 cr.
(W) Computer-Assisted Reporting
(Prerequisite: COMM 224) Intensive training and practice in techniques of reporting and writing news stories and in covering public affairs. Familiarity with journalistic basics, style, and computer-terminal operations required.

COMM 325 3 cr.
Advertising Copywriting
Students develop two separate creative campaign strategies for hypothetical clients of their own choosing. For these large-budget accounts, students must create copy for newspapers, magazines, broadcast, and direct mail, all with a consistent campaign theme.

COMM 326 3 cr.
Political Advertising
Critical examination of rhetorical strategies used in 20th-century political campaigning. Case studies and student projects focus on the special uses of broadcast and print media in political advertising.

COMM 327 3 cr.
Cases in Strategic Public Relations
(Prerequisite: COMM 227) Case studies focusing on the problems and challenges faced by a variety of organizations. Practical application of creative problem-solving, theory and research in actual organizations.

COMM 328 3 cr.
News Editing
(Prerequisite: COMM 224) Preparing copy for publication. Correcting, improving and trimming stories. Headline writing, layout, graphics, wire services, printing process.

COMM 329 3 cr.
Graphics
Visual aspects of print media. Typography, printing presses, handling photos and other art layout and design, introduction to desktop publishing. Familiarity with journalistic basics, style, and computer-terminal operations required.

COMM 330 3 cr.
Advertising Decision Making
(Prerequisite: COMM 225) This course will cover the managerial and decision-making processes of advertising and related marketing communications functions. Students will learn the various problems and opportunities faced by advertising decision makers, and the alternative solutions available to handle these situations.

COMM 331 3 cr.
Mass Media Management
The multi-faceted roles of managers in the various communication industries are examined. Special attention is given to technical, conceptual and humanistic concerns. Specific areas of study include management of self and personal relations, unions and contracts, community relations, audience analysis and measurement.

COMM 332 3 cr.
Documentary Film
This course traces the growth, development, and influence of American and foreign nonfiction films, particularly their various functions as propaganda, public service and promotion, education, entertainment, and art.

COMM 334 3 cr.
Broadcast Programming
Study of programming strategies, practices, and operations of commercial radio and television stations. Topics include audience research, program scheduling, formats, syndication, promotion, and network-affiliate relationships.

COMM 380 3 cr.
Advertising Practicum
(Prerequisite: COMM 225 or COMM 325) Students function as a full-service advertising agency which provides clients with a complete array of services ranging from campaign creation to implementation and evaluation.

COMM 411 3 cr.
Persuasion and Propaganda
An in-depth examination of the theoretical foundations and practical applications of those factors which influence the persuasiveness of target audiences. Topics include attitudes, beliefs, values, behaviors, appeals and reference groups.

COMM 415 3 cr.
Senior Seminar
(Prerequisite: Senior standing) This capstone course will synthesize course work to prepare students for entry into the profession of communication. Emphasis will be placed on the application of Jesuit ideals to the identification and approaches that concerns today’s communication industry.

COMM 416 3 cr.
Philosophy of Communication
A general study of the forces and dynamics that articulate the phenomenon of human communication by an examination of the human capacity to comprehend and realize fulfillment or wholeness through communication.

COMM 425 3 cr.
Cable Television
A study of cable television and its development and current place in the telecommunications industry. Topics include programming strategies, formats, multiple-system operators, independents, syndication, sales, satellite services, pay-per-view, audience ratings, management and the franchising process. Students develop their own research proposals for establishing new cable channels, networks and services.

COMM 426 3 cr.
International Broadcasting
Comparative analysis of national and international media systems throughout the world. Emphasis on their origin, development, and operation.

COMM 427 3 cr.
International Film
An investigation of the major contributions and movements of various nations in the development and evolution of film as a multi-national and global industry.

COMM 432 3 cr.
Film Theory and Criticism
Critical examination of the major theoretical and analytical explanations of film’s effectiveness as an artistic form of communication. The work of classical, contemporary and experimental film scholars will be studied, and selected films depicting their observations will be screened. Film analysis and criticism projects will be designed by students.

COMM 433 3 cr.
Television Criticism
Analysis of radio and television programs and promotional strategies, including formats, scripts, talent, commercials, public-service announcements, positioning, ratings, and network-affiliate relationships.

COMM 480 3 cr.
Television Practicum
(Prerequisites: COMM 222, COMM 322) Communication seniors undertake significant areas of study resulting in a broadcast-quality videotape or audiotape suitable for airing by commercial or non-commercial television stations, radio stations or cable systems.

COMM 481 3–6 cr.
Internship
(Prerequisites: Junior or senior standing, plus appropriate course work, and faculty approval) Highly recommended for every major, this on-the-job experience is guided by practitioners in the communication field and supervised individually by a faculty member in consultation with the student’s advisor and the department chair. (Internship credits can only be used in the free elective area.)

COMM 482 3 cr.
Directed Independent Study
(Prerequisite: Senior standing) In consultation with the student’s advisor and department chair, Communication Seniors undertake a significant area of study resulting in a major research paper. Students select a Communication professor whom they wish to direct the study. Provided to augment an area of the student’s interest not substantially covered in available departmental courses.

COMM 484 3 cr.
Special Topics
In-depth departmental seminars on selected communication topics meeting the needs and interests of students. Topics vary from semester to semester.

COMM 499 3 cr.
Senior Thesis
(Prerequisites: COMM 215 and 316) An optional research-based written project in which Communication seniors (in consultation with their advisor and department chair) select an issue or problem for scholarly study, undertakes significant and meaningful research, and produces a major paper of publishable quality. Students select a Communication professor whom they wish to direct their thesis. Strongly recommended for students planning for graduate school.

Jesuit ideals to the identification and approaches that concerns today’s communication industry. The work of classical, contemporary and experimental film scholars will be studied, and selected films depicting their observations will be screened. Film analysis and criticism projects will be designed by students.

COMM 433 3 cr.
Television Criticism
Analysis of radio and television programs and promotional strategies, including formats, scripts, talent, commercials, public-service announcements, positioning, ratings, and network-affiliate relationships.

COMM 480 3 cr.
Television Practicum
(Prerequisites: COMM 222, COMM 322) Communication seniors undertake significant areas of study resulting in a broadcast-quality videotape or audiotape suitable for airing by commercial or non-commercial television stations, radio stations or cable systems.

COMM 481 3–6 cr.
Internship
(Prerequisites: Junior or senior standing, plus appropriate course work, and faculty approval) Highly recommended for every major, this on-the-job experience is guided by practitioners in the communication field and supervised individually by a faculty member in consultation with the student’s advisor and the department chair. COMM 484 3 cr.
Special Topics
In-depth departmental seminars on selected communication topics meeting the needs and interests of students. Topics vary from semester to semester.

COMM 499 3 cr.
Senior Thesis
(Prerequisites: COMM 215 and 316) An optional research-based written project in which Communication seniors (in consultation with their advisor and department chair) select an issue or problem for scholarly study, undertakes significant and meaningful research, and produces a major paper of publishable quality. Students select a Communication professor whom they wish to direct their thesis. Strongly recommended for students planning for graduate school.
pursue specialized projects in producing and directing programs for broadcast or cable distribution.

COMM 323  
Television Journalism  
(Prerequisite: COMM 224 or COMM 328)  
Broadcast-journalism skills are refined through classroom and outside assignments. Production techniques, including tape editing, are explored. Television news formats are produced.

COMM 324  
(W) Computer-Assisted Reporting  
(Prerequisite: COMM 224) Intensive training and practice in techniques of reporting and writing news stories and in covering public affairs. Familiarity with journalistic basics, style, and computer terminal operations required.

COMM 325  
Advertising Copywriting  
Students develop two separate creative campaign strategies for hypothetical clients of their own choosing. For these large-budget accounts, students must create copy for newspapers, magazines, broadcast, and direct mail, all with a consistent campaign theme.

COMM 326  
Political Advertising  
Critical examination of rhetorical strategies used in 20th-century political campaigning. Case studies and student projects focus on the special uses of broadcast and print media in political advertising.

COMM 327  
Cases in Strategic Public Relations  
(Prerequisite: COMM 227) Case studies focusing on the problems and challenges faced by a variety of organizations. Practical application of creative problem-solving, theory and research in actual organizations.

COMM 328  
News Editing  

COMM 329  
Graphics  
Visual aspects of print media. Typography, printing presses, handling photos and other art layout and design, introduction to desktop publishing. Familiarity with journalistic basics, style, and computer-terminal operations required.

COMM 330  
Advertising Decision Making  
(Prerequisite: COMM 225) This course will cover the managerial and decision-making processes of advertising and related marketing communications functions. Students will learn the various problems and opportunities faced by advertising decision makers, and the alternative solutions available to handle these situations.

COMM 331  
Mass Media Management  
The multi-faceted roles of managers in the various communication industries are examined. Special attention is given to technical, conceptual and humanistic concerns. Specific areas of study include management of self and personal relations, unions and contracts, community relations, audience analysis and measurement.

COMM 332  
Documentary Film  
This course traces the growth, development, and influence of American and foreign nonfiction films, particularly their various functions as propaganda, public service and promotion, education, entertainment, and art.

COMM 334  
Broadcast Programming  
Study of programming strategies, practices, and operations of commercial radio and television stations. Topics include audience research, program acquisitions, scheduling, formats, syndication, promotion, and network-affiliate relationships.

COMM 380  
Advertising Practicum  
(Prerequisite: COMM 225 or COMM 325) Students function as a full-service advertising agency which provides clients with a complete array of services ranging from campaign creation to implementation and evaluation.

COMM 411  
Persuasion and Propaganda  
An in-depth examination of the theoretical foundations and practical applications of those factors which influence the persuasibility of target audiences. Topics include attitudes, beliefs, values, behaviors, appeals and reference groups.

COMM 415  
Senior Seminar  
(Prerequisite: Senior standing) This capstone course will synthesize course work to prepare students for entry into the profession of communication. Emphasis will be placed on the application of Jesuit ideals to the identification and approaches that concerns today’s communication industry.

COMM 416  
Philosophy of Communication  
A general study of the forces and dynamics that articulate the phenomenon of human communication by an examination of the human capacity to comprehend and realize fulfillment or wholeness through communication.

COMM 422  
Educational Television  
Instructional uses of the television medium by public television stations, schools, closed-circuit and cable systems. Types of educational programs are evaluated. Students work on preparing projects which may reflect their own pedagogical interests.

COMM 425  
Cable Television  
A study of cable television and its development and current place in the telecommunications industry. Topics include programming strategies, formats, multiple-system operators, independents, syndication, sales, satellite services, pay-per-view, audience ratings, management and the franchising process. Students develop their own research proposals for establishing new cable channels, networks and services.

COMM 426  
International Broadcasting  
Comparative analysis of national and international media systems throughout the world. Emphasis on their origin, development, and operation.

COMM 427  
International Film  
An investigation of the major contributions and movements of various nations in the development and evolution of film as a multi-national and global industry.

COMM 432  
Film Theory and Criticism  
Critical examination of the major theoretical and analytical explanations of film’s effectiveness as an artistic form of communication. The work of classical, contemporary and experimental film scholars will be studied, and selected films depicting their observations will be screened. Film analysis and criticism projects will be designed by students.

COMM 433  
Television Criticism  
Analysis of radio and television programs and promotional strategies, including formats, scripts, talent, commercials, public-ness announcements, positioning, ratings, and network-affiliate relationships.

COMM 480  
Television Practicum  
(Prerequisites: COMM 222, COMM 328) Communication seniors undertake significant study resulting in a broadcast-quality videotape or audiocassette suitable for airing by commercial or non-commercial television stations, radio stations or cable systems.

COMM 481  
Internship  
(Prerequisites: Junior or senior standing, plus appropriate course work, and faculty approval) Highly recommended for every major, this on-the-job experience is guided by practitioners in the communication field and supervised individually by a faculty member in consultation with the student’s advisor and the department chair. (Internship credits can only be used in the free elective area.)

COMM 482  
Directed Independent Study  
(Prerequisite: Senior standing) In consultation with the student’s advisor and department chair, Communication Seniors undertake a significant area of study resulting in a major research paper. Students select a Communication professor whom they wish to direct the study. Provided to augment an area of the student’s interest not substantially covered in available departmental courses.

COMM 484  
Special Topics

Overview
The University of Scranton’s Bachelor of Science program in Computer Science dates from 1970 – one of the oldest in Pennsylvania. The Computer Science Program is accredited by the Computing Commission of ABET. The Computer Science major provides an integrated introduction to Software Engineering along with the mathematical skills needed in Computer Science. The program culminates in the senior year with the Computer Projects course. Research and internship opportunities are available. The Computing Sciences department may be reached on the World Wide Web at www.cs.scranton.edu.

Minor in Computer Science
The student must take a minimum of 20 hours including CMPS 134, MATH 142, CMPS 144, CMPS 240 and any two of CMPS 250, 260, 340, 344, 350, 352, 356, 360, 364, 370, 372, 374 or 384.

Computer Information Systems
This program investigates the analysis, design, development, implementation, evaluation and effective use of computer information systems in organizations. Since business and government are principal users of computers, CIS majors will select cognate courses in business. Students are encouraged to participate in an internship.

Minor in Computer Information Systems
The student must take a minimum of 18 credits including CMPS 134, 136 or 144, 330, 331 and two of MATH 142, CMPS 202 or 312, CMPS 240, 311, 340, 356 or 376. Students are encouraged to participate in an internship. The Computing Sciences department may be reached on the World Wide Web at www.cs.scranton.edu.

Course Descriptions
C/IL 102/102L 3 cr. Computing and Information Literacy/Lab

Students learn to use digital technology in the problem-solving process to obtain, evaluate and disseminate information. Two hours lecture, two hours lab. Requires concurrent enrollment in lecture and lab. Students may earn credit for only one C/IL course. Successful completion of C/IL 102/102L (with a grade of C or better) fulfills the computer literacy skills requirement of the University.

CMPS 134 3 cr.

Computer Science I
An introduction to programming concepts and methodology using an appropriate object-oriented programming language (currently Java). Topics include problem analysis, abstraction, modularization, the development and use of algorithms, data structures, and methods.

CMPS 136 3 cr.

Computer Programming II
(Prerequisite: CMPS 134) for non-computing majors who want more object-oriented programming experience. Includes data structures, file processing, graphical user interfaces and event-driven programming. May not be used to satisfy the requirements of CMPS or CIS. May not be taken by a student who has credit for CMPS 144.

CMPS 144 4 cr.

Computer Science II
(Prerequisites: CMPS 134 and MATH 142) This course emphasizes object-oriented software development, addressing both software engineering and programming. Topics include modularization, abstraction, encapsulation/information hiding, software reuse, software testing, classic data abstractions (e.g., lists, trees) and algorithms (e.g., sorting, searching), recursion, program correctness, and basic algorithm analysis.

CMPS 202 3 cr.

Web Development
(Prerequisite: C/IL 102 or equivalent course) A course that covers fundamental aspects of the development of personal, professional, and business resources using Web-development tools. Topics include creating Web pages using basic HTML; advanced HTML concepts; frames; JavaScript to enhance Web pages; forms; CGI (common gateway interface); Java classes. Emphasis is on client-side development although server-side issues are discussed. This course is required for students who do not necessarily have a technical background. May not be used as part of any major in the Computing Sciences department.

TOTAL: 132 CREDITS

1 The three electives in the major must be chosen from CMPS 341, 354, 356, 358, 360, 362, 364, 370, 372, 376, 384, 393, 440 and 481.

2 At least 4 credits must be courses in the natural sciences for science majors which enhance the student’s ability in the application of the scientific method. See departmental advisor for acceptable courses.

HTML; advanced HTML concepts; frames; JavaScript to enhance Web pages; forms; CGI (common gateway interface); Java classes; abstraction, encapsulation/information hiding, software reuse, software testing, classic data abstractions (e.g., lists, trees) and algorithms (e.g., sorting, searching), recursion, program correctness, and basic algorithm analysis.

CMPS 240 3 cr.

Data Structures and Algorithms
(Prerequisite: CMPS 144) An examination of the issues of data representation, algorithm structure, and encapsulation as they pertain to the development of object-oriented software. Abstract data types studied include stacks, queues, binary trees, n-ary trees, and graphs. Various representation alternatives are analyzed and compared, trade-offs frequently encountered by software developers are discussed.

Overview
The University of Scranton’s Bachelor of Science program in Computer Science dates from 1970 – one of the oldest in Pennsylvania. The Computer Science Program is accredited by the Computing Commission of ABET. The Computer Science major provides an integrated introduction to Software Engineering along with the mathematical skills needed in Computer Science. The program culminates in the senior year with the Computing Projects course. Research and internship opportunities are available. The Computing Sciences department may be reached on the World Wide Web at www.cs.scranton.edu.

Minor in Computer Science
The student must take a minimum of 20 hours including CMPS 134, MATH 142, CMPS 240, and any two of CMPS 250, 260, 340, 344, 352, 356, 360, 364, 370, 372, 374 or 384.

Computer Information Systems
This program investigates the analysis, design, development, implementation, evaluation and effective use of computer information systems in organizations. Since business and government are principal users of computers, CIS majors will select cognate courses in business. Students are encouraged to participate in an internship.

Minor in Computer Information Systems
The student must take a minimum of 18 credits including CMPS 134, 136 or 144, 330, 331 and two of MATH 142, CMPS 202 or 312, CMPS 240, 311, 340, 356 or 376. Students are encouraged to participate in an internship. The Computing Sciences department may be reached on the World Wide Web at www.cs.scranton.edu.

Course Descriptions

C/IL 102/102L
3 cr.
Computing and Information Literacy/Lab
Students learn to use digital technology in the problem-solving process to obtain, evaluate and disseminate information. Two hours lecture, two hours lab. Requires concurrent enrollment in lecture and lab. Students may earn credit for only one C/IL course. Successful completion of C/IL 102/102L (with a grade of C or better) fulfills the computing literacy skills requirement of the University.

CMPS 134
3 cr.
Computer Science I
An introduction to programming concepts and methodology using an appropriate object-oriented programming language (currently Java). Topics include problem analysis, abstraction, modularization, the development and use of algorithms, reuse, and the use of programming constructs including data types, classes, control structures, and methods.

CMPS 136
3 cr.
Computer Programming II
(Prerequisite: CMPS 134) for non-computing majors who want more object-oriented programming experience. Includes data structures, file processing, graphical user interfaces and event-driven programming. May not be used to satisfy the requirements of CMPS or CIS. May not be taken by a student who has credit for CMPS 144.

CMPS 144
4 cr.
Computer Science II
(Prerequisites: CMPS 134 and MATH 142) This course emphasizes object-oriented software development, addressing both software engineering and programming. Topics include modularization, abstraction, encapsulation/information hiding, software reuse, software testing, classic data abstractions (e.g., lists, trees) and algorithms (e.g., sorting, searching), recursion, program correctness, and basic algorithm analysis.

CMPS 202
3 cr.
Web Development
(Prerequisite: C/IL 102 or equivalent course) A course that covers fundamental aspects of the development of personal, professional, and business resources using Web development tools. Topics include creating Web pages using basic HTML; advanced HTML concepts; frames; JavaScript to enhance Web pages; forms; CGI (common gateway interface); Java classes. Emphasis is on client-side development although server-side issues are discussed. This is a technical course for students who do not necessarily have a technical background. May not be used as part of any major in the Computing Sciences department.

TOTAL: 123 CREDITS

1 The three electives in the major must be chosen from CMPS 341, 354, 356, 358, 360, 362, 364, 370, 372, 376, 384, 393, 440 and 481.

2 At least 4 credits must be courses in the natural sciences for science majors which enhance the student’s ability in the application of the scientific method. See departmental advisor for acceptable courses.

CMPS 240
3 cr.
Data Structures and Algorithms
(Prerequisite: CMPS 144) An examination of the issues of data representation, algorithm structure, and encapsulation as they pertain to the development of object-oriented software. Abstract data types studied include stacks, queues, binary trees, n-ary trees, and graphs. Various representation alternatives are analyzed and compared, trade-offs frequently encountered by software developers are discussed.
CMPS 250  3 cr.
Machine Organization and Assembly Language Programming
(Prerequisite: CMPS 144) An introductory study of the organization and architecture of computers through an exploration of various virtual machines. Programming at the assembly-language level and interfacing with software components (primarily written in C). Topics include representation of data and instructions, computer arithmetic, memory hierarchies, instruction set, addressing modes, digital logic, microprogramming, pipelining, and parallel processing.

CMPS 260  3 cr.
Theoretical Foundations of Computer Science
(Prerequisite: CMPS 240) An examination of the fundamental models and concepts of computation – automata, formal languages, and grammars – and how they are related. Church-Turing thesis; recursive and recursively enumerable sets; unsolvable problems; complexity of algorithms; Chomsky hierarchy.

CMPS 311  3 cr.
Computer Networks and Security
(Prerequisite: CMPS 136 or CMPS 144) An introduction to intranets and wide-area networking including operating systems fundamentals, hardware considerations, deployment and administration of networks, security issues, intrusion detection/protection, firewalls, VPN’s and encryption. May not be used to satisfy the requirements of the major. May not be taken by a student who has credit for CMPS 354.

CMPS 312  3 cr.
Web Technology
(Prerequisites: C/IL 102 or equivalent, COMM 329, CMPS 311) This course covers the fundamental aspects of developing and maintaining Web sites. It provides a thorough coverage of the structure and elements of HTML and JavaScript necessary to create commercial-quality Web sites. Brief coverage will also be given to graphic design and multimedia content. Emphasis will be placed on client-side development although server-side issues will be considered. May not be used as part of any major in the Computing Sciences Department. Cannot be taken by a student who has credit for CMPS 202 or 356.

CMPS 330  3 cr.
(W) Information Systems Analysis
(Prerequisite: C/IL 102/104 or CMPS 134) Introduction to concepts and practices of information processing. Computerized system require-
CMPS 250 3 cr.
Machine Organization and Assembly Language Programming
(Prerequisite: CMPS 144) An introductory study of the organization and architecture of computers through an exploration of various virtual machines. Programming at the assembly-language level and interfacing with software components (primarily written in C). Topics include representation of data and instructions, computer arithmetic, memory hierarchies, instruction set, addressing modes, digital logic, microprogramming, pipelining, and parallel processing.

CMPS 260 3 cr.
Theoretical Foundations of Computer Science
(Prerequisite: CMPS 240) An examination of the fundamental models and concepts of computation – automata, formal languages, and grammars – and how they are related. Church-Turing thesis; recursive and recursively enumerable sets; unsolvable problems; complexity of algorithms; Chomsky hierarchy.

CMPS 311 3 cr.
Computer Networks and Security
(Prerequisite: CMPS 136 or CMPS 144) An introduction to intranets and wide-area networking including operating systems fundamentals, hardware considerations, deployment and administration of networks, security issues, intrusion detection/protection, firewalls, VPN’s and encryption. May not be used to satisfy the requirements of the major. May not be taken by a student who has credit for CMPS 354.

CMPS 312 3 cr.
Web Technology
(Prerequisites: C/IL 102 or equivalent, COMM 329, CMPS 311) This course covers the fundamental aspects of developing and maintaining Web sites. It provides a thorough coverage of the structure and elements of HTML and JavaScript necessary to create commercial-quality Web sites. Brief coverage will also be given to graphic design and multimedia content. Emphasis will be placed on client-side development although server-side issues will be considered. May not be used as part of any major in the Computing Sciences Department. Cannot be taken by a student who has credit for CMPS 202 or 356.

CMPS 330 3 cr.
(W) Information Systems Analysis
(Prerequisite: C/IL 102/104 or CMPS 134) Introduction to concepts and practices of information processing. Computerized system requires and techniques in providing appropriate decision-making information to management.

CMPS 331 3 cr.
Information Systems Development
(Prerequisite: CMPS 330) A study of system-development methodology and the role played by the systems analyst in developing user-accepted information systems.

CMPS 340 4 cr.
File Processing
(Prerequisites: CMPS 144 required, CMPS 240 recommended.) File structures concepts and file processing applications using an appropriate programming language (currently COBOL). Topics include file maintenance and storage management; file searching, sorting, and merging; concomitant processing; index structures; B-trees; hash tables; indexed sequential files; database concepts.

CMPS 341 3 cr.
Database Systems
(Prerequisites: CMPS 340 required, CMPS 240 recommended) An introduction to database management systems with an emphasis on relational database design and applications. It uses an appropriate database package such as ORACLE or PostgreSQL.

CMPS 344 3 cr.
Programming Languages
(Prerequisite: CMPS 240) A study of programming languages from both the theoretical and practical perspectives. A survey of major and developing paradigms and languages is undertaken which includes use of specific languages to broaden the student’s experience. Implementations is studied through an introduction to language translation along with a study of run-time models and interfaces with virtual machines.

CMPS 350 3 cr.
Computer Architecture
(Prerequisite: CMPS 250) A study of the logical structure of computer-system organization including a survey of logic and design with an emphasis on functional components. Topics include instruction sets, hard-wired and microprogrammed control-unit designs, memory systems (caches and virtual memory), I/O systems (interrupts, DMA, and channels). Overview and examples of alternative and advanced computer architectures (pipeline, array processors, multiprocessors).

CMPS 351 3 cr.
Software Engineering
(Prerequisite: CMPS 330) A study of software engineering methodology and the role played by the software engineers in developing user-accepted information systems.

CMPS 352–ELECT 3 cr.
Operating Systems–Elective
(Prerequisites: CMPS 240, CMPS 250) An introduction to operating systems structure, process management, scheduling and dispatching, process synchronization and interprocess communication, memory management, virtual memory, device management, I/O, and file systems.

CMPS 354 3 cr.
Data Communications and Networks
(Prerequisite: CMPS 352) A study of data communication and networking concepts, including distributed-system architectures, electronic interfaces, data-transmission, data link protocols, terminal networks, computer communication, public-data networks, and local-area networks.

CMPS 356 3 cr.
Web Programming
(Prerequisites: CMPS 240, HTML experience to the level where the students are capable of developing their own Web page) This course covers all aspects of programming on the World Wide Web. This includes the presentation of HTML, Java, JavaScript and CGI. Topics include advanced HTML (maps, forms, etc.) client-server programming basics as they relate to the Web, Java machine concepts, Java/JavaScript similarities and differences, server-side program-
mung, GIP animations, Web programming resources and environments.

CMPS 358 3 cr. Real-Time Systems
(Prerequisite: CMPS 352) A study of issues related to systems that interface with the physical world and must meet the timing constraints imposed on them. Topics include: real-time hardware architecture, real-time operating systems, invoking and managing threads and processes, interprocess communications and synchronization, manipulating process priority, concurrent programming, exception handling, software safety, reliability, and fault tolerance.

CMPS 360 3 cr. Analysis of Algorithms
(Prerequisite: CMPS 240) A survey of methods for designing and analyzing algorithms. Classic algorithms from graph theory, combinatorics and text processing are examined, as are traditional design strategies such as divide-and-conquer, backtracking and dynamic programming. Other topics include NP-completeness and parallel algorithms.

CMPS 362 3 cr. Numerical Analysis

CMPS 364 3 cr. Theory of Computation
(Prerequisite: CMPS 260) The development of a theoretical notion of computability and its relationship to Turing computability and recursive functions; the study of the relationships between automata, formal languages and grammars.

CMPS 370 3 cr. Computer Graphics
(Prerequisite: CMPS 240) An introduction to the hardware, software and techniques used to generate graphical representations by computer. Two and three dimensional concepts, algorithms and architectures are studied. An essential aspect of the course involves the development of programs utilizing appropriate APIs (currently OpenGL is emphasized) as a means of developing expertise. Advanced topics may be pursued as appropriate.

CMPS 372 3 cr. Artificial Intelligence
(Prerequisite: CMPS 240) Problem solving using expert systems, heuristic programming techniques, tree search techniques, and learning mechanisms.

CMPS 374 3 cr. (W) Fundamentals of Software Engineering
(Prerequisite: CMPS 240) An introduction to the concepts of Software Engineering. Stress is placed upon formal models for the design and development of high-quality software. Topics include: project planning, requirements analysis, system design, program design, program implementation, program testing, system testing, system delivery, and maintenance. A group project will be included.

CMPS 376 3 cr. Rapid Prototyping
(Prerequisite: CMPS 136 or CMPS 144) Some common applications using a database with a visual interface (perhaps Web based) can be successfully created using Rapid Prototyping (a.k.a. Rapid Application Development) This course will cover the synergy of combining a visual language and a relational database employing rigorous design techniques.

CMPS 384 3 cr. Special Topics
(Prerequisite: as published) Some recent courses have covered Rapid Prototyping, Real-Time Systems, and Parallel Computing. A syllabus including prerequisites is published prior to the registration period for the course.

CMPS 393 3 cr. Computer Research
(Departmental permission required) A research project carried out by a student under the direction of a faculty member in the department. The results will be prepared in a form suitable for publication. Reader fee.

CMPS 440 3 cr. Compiler Design
(Prerequisite: CMPS 344) Study of techniques and problems involved in constructing compilers. Lexical analysis, syntax analysis, semantic analysis, symbol-table management, code generation, code optimization.

CMPS 481 3 cr. Computer Internship
(Departmental permission required) An extensive job experience in computing which carries academic credit. Prior approval is required and information is available on the department Web site.

CMPS 490 3 cr. (W) Computer Projects
(Prerequisite: Senior standing, departmental permission required) In this course students prepare and present individual computer projects to be evaluated by the instructor and their fellow students.

CRIMINAL JUSTICE

Harry R. Dammer, Ph.D., Chair
See Sociology for faculty listing.

Overview
The Bachelor of Science degree program in Criminal Justice has the following objectives:
1. To prepare students for careers in law enforcement at the local, state or federal level.
2. To prepare students for careers in the field of correction and rehabilitation: parole, prisons, juvenile justice, etc.
3. To provide students with academic preparation for advanced study in law, criminology, public administration and related fields. The Criminal Justice major is administered by the Department of Sociology/Criminal Justice, which also administers the Sociology and Gerontology degree programs. An advisory board of community leaders working in the field of criminal justice has been established to work with University students, faculty and administrators.

Minor in Criminal Justice

Course Descriptions

CJ 110 3 cr.
(S) Introduction to Criminal Justice
A foundation course examining problems in the study of crime and criminal justice, basic elements of criminal law and constitutional rights, and the functions of, as well as the relationship between, major components of the criminal-justice system; agencies and role of law enforcement; prosecution; the judicial process, and corrections.

S/CJ 210 3 cr.
(S) Law and Society
The relationship between law and society, or the interaction of legal and social variables. Examines jurisprudential and social theories of law; development of law; the role of the legal profession; legal behavior and decision making; and law and social change.

S/CJ 212 3 cr.
(W) Research Methods for the Social Sciences
Survey of methods and techniques for achieving interpretable results in research in the criminal-justice field; research design; data collection.

S/CJ 213 3 cr.
(S) Criminology
Crime as a form of deviant behavior; nature and extent of crime; past and present theories; evaluation of prevention, control and treatment programs.

S/CJ 214 3 cr.
(S) Juvenile Delinquency
Nature and extent of delinquency: competing explanatory models and theories; evaluation of prevention, control, and treatment programs.

S/CJ 215 3 cr.
(Q) Statistics for the Social Sciences
An introduction to the techniques used by social scientists to analyze their data. Students learn descriptive and inferential statistics in conjunction with computer usage. Basic skills and procedures are taught for organizing and describing data, assessing relationships among social variables, and using this information to make inferences about the population.

S/CJ 218 3 cr.
(S) The American Court System
Mindful of the role played by our judiciary in resolving disputes, setting policy, and otherwise having an impact on everyday life, this course provides a basic examination of America’s courts in terms of their history and development, their structure and organization, their procedures, people, institutions and issues.
CMPS 358 3 cr.
Real-Time Systems
(Prerequisite: CMPS 352) A study of issues related to systems that interface with the physical world and must meet the timing constraints imposed on them. Topics include: real-time hardware architecture, real-time operating systems, invoking and managing threads and processes, interprocess communications and synchronization, manipulating process priority, concurrent programming, exception handling, software safety, reliability, and fault tolerance.

CMPS 360 3 cr.
Analysis of Algorithms
(Prerequisite: CMPS 240) A survey of methods for designing and analyzing algorithms. Classic algorithms from graph theory, combinatorics and text processing are examined, as are traditional design strategies such as divide-and-conquer, backtracking and dynamic programming. Other topics include NP-completeness and parallel algorithms.

CMPS 362 3 cr.
Numerical Analysis

CMPS 364 3 cr.
Theory of Computation
(Prerequisite: CMPS 260) The development of a theoretical notion of computability and its relationship to Turing computability and recursive functions; the study of the relationships between automata, formal languages and grammars.

CMPS 370 3 cr.
Computer Graphics
(Prerequisite: CMPS 240) An introduction to the hardware, software and techniques used to generate graphical representations by computer. Two and three dimensional concepts, algorithms and architectures are studied. An essential aspect of the course involves the development of programs utilizing appropriate APIs (currently OpenGL is emphasized) as a means of developing expertise. Advanced topics may be pursued as appropriate.

CMPS 372 3 cr.
Artificial Intelligence
(Prerequisite: CMPS 240) Problem solving using expert systems, heuristic programming techniques, tree speed-up techniques, and learning mechanisms.

CMPS 374 3 cr.
(W) Fundamentals of Software Engineering
(Prerequisite: CMPS 240) An introduction to the concepts of Software Engineering. Stress is placed upon formal models for the design and development of high-quality software. Topics include: project planning, requirements analysis, system design, program design, program implementation, program testing, system testing, system delivery, and maintenance. A group project will be included.

CMPS 376 3 cr.
Rapid Prototyping
(Prerequisite: CMPS 136 or CMPS 144) Some common applications using a database with a visual interface (perhaps Web based) can be successfully created using Rapid Prototyping (a.k.a. Rapid Application Development) This course will cover the synergy of combining a visual language and a relational database employing rigorous design techniques.

CMPS 384 3 cr.
Special Topics
(Prerequisite: as published) Some recent courses have covered Rapid Prototyping, Real-Time Systems, and Parallel Computing. A syllabus including prerequisites is published prior to the registration period for the course.

CMPS 393 3 cr.
Computer Research
(Departmental permission required) A research project carried out by a student under the direction of a faculty member in the department. The results will be prepared in a form suitable for publication. Reader fee.

CMPS 440 3 cr.
Compiler Design
(Prerequisite: CMPS 344) Study of techniques and problems involved in constructing compilers. Lexical analysis, syntax analysis, semantic analysis, symbol-table management, code generation, code optimization.

CMPS 481 3 cr.
Computer Internship
(Departmental permission required) An extensive job experience in computing which carries academic credit. Prior approval is required and information is available on the department Web site.

CMPS 490 3 cr.
(W) Computer Projects
(Prerequisite: Senior standing, departmental permission required) In this course students prepare and present individual computer projects to be evaluated by the instructor and their fellow students.

CRIMINAL JUSTICE

Overview
The Bachelor of Science degree program in Criminal Justice has the following objectives:
1. To prepare students for careers in law enforcement at the local, state or federal level.
2. To prepare students for careers in the field of correction and rehabilitation: parole, prisons, juvenile justice, etc.
3. To provide students with academic preparation for advanced study in law, criminology, public administration and related fields. The Criminal Justice major is administered by the Department of Sociology/Criminal Justice, which also administers the Sociology and Gerontology degree programs. An advisory board of community leaders working in the field of criminal justice has been established to work with University students, faculty and administrators.

Minor in Criminal Justice

Course Descriptions

CJ 110 3 cr.
Introduction to Criminal Justice
A foundation course examining problems in the study of crime and criminal justice, basic elements of criminal law and constitutional rights, and the functions of, as well as the relationship between, major components of the criminal-justice system; agencies and role of law enforcement; prosecution; the judicial process, and corrections.

S/CJ 210 3 cr.
Law and Society
The relationship between law and society, or the interaction of legal and social variables. Examines jurisprudential and social theories of law; development of law; the role of the legal profession; legal behavior and decision making; and law and social change.

S/CJ 212 3 cr.
(W) Research Methods for the Social Sciences
Survey of methods and techniques for achieving interpretable results in research in the criminal-justice field; research design; data collection.

S/CJ 213 3 cr.
(S) Criminology
Crime as a form of deviant behavior; nature and extent of crime; past and present theories; evaluation of prevention, control and treatment programs.

S/CJ 214 3 cr.
(S) Juvenile Delinquency
Nature and extent of delinquency; competing explanatory models and theories; evaluation of prevention, control, and treatment programs.

S/CJ 215 3 cr.
(Q) Statistics for the Social Sciences
An introduction to the techniques used by social scientists to analyze their data. Students learn descriptive and inferential statistics in conjunction with computer usage. Basic skills and procedures are taught for organizing and describing data, assessing relationships among social variables, and using this information to make inferences about the population.

S/CJ 218 3 cr.
(S) The American Court System
Mindful of the role played by our judiciary in resolving disputes, setting policy, and otherwise having an impact on everyday life, this course provides a basic examination of America’s courts in terms of their history and development, their structure and organization, their procedures, people, institutions and issues.
will explore the causes, consequences, and criminal-justice system response to white-collar crime.

S/CJ 226  3 cr.  (S,D) Comparative Justice Systems
An exploration of the meaning and character of justice, law and crime in different cultures and countries, and of evolving global standards and patterns of justice, international law, and transnational crime, making specific comparisons between Western and Eastern nations, capitalist and socialist systems, and countries having much crime and little crime.

S/CJ 227  3 cr.  Organized Crime Patterns
The national and international organizational structure of organized crime will be analyzed. Primary attention will be given to comparative theories and concepts. The various methods of prosecution, investigation and control will be discussed.

CJ 230  3 cr.  Crime Prevention
This course analyzes the basic theories of community policing, problem-solving policing and crime prevention. The emphasis is on primary, secondary and tertiary prevention techniques. Emphasis will be given to the various analytical approaches to the study of criminal profiling, terrorism and methods of planning.

S/CJ 232  3 cr.  Public Safety Administration
An overview of the public-safety field – its philosophy, disciplines and research. The course focuses on an examination of the police and governmental responses to disaster and accidents. A primary emphasis is given to the various analytical approaches to the study of terrorism. Methods of planning, investigation and prevention are discussed.

S/CJ 234  3 cr.  Criminal Justice Management
This course surveys major trends in law enforcement including leadership, management, and administration. It includes discussion of police personnel issues, computerized training programs and police health issues. The emphasis is on critical thinking, problem solving and contemporary policing practices.

CJ 237  3 cr.  The Investigative Process
This course considers appropriate investigative procedures concerning major criminal investigations. An analysis of specific investigative theories and courtroom applications will be conducted through learning simulation. The homicide court problem will focus on the preservation and admission of evidence.

CJ 239  3 cr.  Introductory Criminal Analysis
Focuses on the application of analytical techniques that support crime intervention and prevention strategies. Subspecialties include, but are not limited to: (1) criminal investigative analysis, (2) intelligence analysis and (3) operations analysis. The analytical process incorporates innovative strategic and crime mapping tactical applications.

S/CJ 284  3 cr.  Special Topics in Criminal Justice
(Prerequisite: Permission of chairperson and instructor) Courses designed to meet specific needs of individual students or courses offered on a trial basis to determine the value of placing them into the regular curriculum.

S/CJ 220  3 cr.  Penology: The American Correctional System
Analysis and evaluation of contemporary correctional systems; theories of punishment; discussion of recent research concerning the correctional institution and the various field services; the history of corrections in Pennsylvania.

S/CJ 221  3 cr.  Community-Based Corrections
Examination of community treatment in the correctional process; contemporary usage of pre-sentence investigation, selection, supervision, release of probationers and parolees.

S/CJ 224  3 cr.  (S,W) Sociology of Deviance
Critical examination of theories and empirical studies of social deviance, focusing upon the formulation and application of deviant labels, organizations relating to deviance, and deviant behavioral patterns. Special attention given to noncriminal forms of deviance.

S/CJ 225  3 cr.  White-Collar Crime
A study of white-collar crime, including corporate misdeeds, political corruption, occupational illegalities and upperworld deviance. This course

TOTAL: 130 CREDITS

2 In the elective area, if the student is considering general business as a minor, the department strongly recommends ACC 253: Financial Accounting, ACC 294: Managerial Accounting and MGT 351: Principles of Management I.

S/CJ 220 3 cr.
Penology: The American Correctional System
Analysis and evaluation of contemporary correctional systems; theories of punishment; discussion of recent research concerning the correctional institution and the various field services; the history of corrections in Pennsylvania.

S/CJ 221 3 cr.
Community-Based Corrections
Examination of community treatment in the correctional process; contemporary usage of pre-sentence investigation, selection, supervision, release of probationers and parolees.

S/CJ 222 3 cr.
S/CJ 224 3 cr.
(S,W) Sociology of Deviance
Critical examination of theories and empirical studies of social deviance, focusing upon the formulation and application of deviant labels, organizations relating to deviance, and deviant behavioral patterns. Special attention given to noncriminal forms of deviance.

S/CJ 225 3 cr.
White-Collar Crime
A study of white-collar crime, including corporate misdeeds, political corruption, occupational illegalities and upperworld deviance. This course will explore the causes, consequences, and criminal-justice system response to white-collar crime.

S/CJ 226 3 cr.
(S,D) Comparative Justice Systems
An exploration of the meaning and character of justice, law and crime in different cultures and countries, and of evolving global standards and patterns of justice, international law, and transnational crime, making specific comparisons between Western and Eastern nations, capitalist and socialist systems, and countries having much crime and little crime.

S/CJ 227 3 cr.
Organized Crime Patterns
The national and international organizational structure of organized crime will be analyzed. Primary attention will be given to comparative theories and concepts. The various methods of prosecution, investigation and control will be discussed.

S/CJ 230 3 cr.
Crime Prevention
This course analyzes the basic theories of community policing, problem-solving policing and crime prevention. The emphasis is on primary, secondary and tertiary prevention techniques. Emphasis will be given to the various analytical approaches to the study of criminal profiling, terrorism and methods of planning.

S/CJ 232 3 cr.
Public Safety Administration
An overview of the public safety field – its philosophy, disciplines and research. The course focuses on an examination of the police and governmental responses to disaster and accidents. A primary emphasis is given to the various analytical approaches to the study of terrorism, methods of planning, investigation and prevention are discussed.

S/CJ 234 3 cr.
Criminal Justice Management
This course surveys major trends in law enforcement including leadership, management, and administration. It includes discussion of police personnel issues, computerized training programs and police health issues. The emphasis is on critical thinking, problem solving and contemporary policing practices.

S/CJ 237 3 cr.
The Investigative Process
This course considers appropriate investigative procedures concerning major criminal investiga-
S/CJ 317  3 cr.  Trial, Jury and Counsel
A consideration of the rights guaranteed by the Sixth Amendment to The Constitution of the United States, surveying constitutional provisions, statutes, court rules, and cases concerning the right of a criminal defendant to a speedy and public trial, to trial by jury, and to the assistance of counsel.

S/CJ 318  3 cr.  Civil Liability
An examination of the law-enforcement officer or employee as a defendant in a civil suit arising from the scope of his or her employment. Liability based upon rights statutes is examined, along with consideration of the typical defenses.

| TOTAL       | 130 CREDITS           |                       |          |         |

---

1. See note on Math Options, page 213.
2. If EDUC 113 is required in the first semester, it is taken in place of a humanities elective and is counted as a GE free elective.
3. One GE free elective in the fourth year must then be taken as a humanities elective.
4. A third math course is required, it replaces this GE elective.
5. Economics majors may apply up to 6 cognate credits toward a Math minor. Students taking the sequence open to Math majors are strongly urged to complete the calculus sequence by taking MATH 222, particularly if they plan on pursuing graduate studies.

---

**Minor in Economics**

18 credits consisting of ECO 153-154 (or ECO 101, 102), ECO 361-362, plus two upper-level economics courses.

**ENGINEERING**

Robert A. Spalletta, Ph.D., Director
See Physics for faculty listing.

**Overview**

Engineering is the profession in which a knowledge of the mathematical and natural sciences gained by study, experience, and practice is judiciously applied to develop ways to utilize, economically, the materials and forces of nature for the benefit of mankind. A number of majors are available.

**Computer Engineering**

The undergraduate Computer Engineering curriculum is broad-based with continually updated content in computers, engineering science, and engineering design. The objectives of this program are to prepare our students for a professional career in computer engineering and to prepare them for advanced study in computer engineering, computer science, or electrical engineering. The technical core of the program emphasizes theoretical and laboratory skills, hardware and software skills, simulation and design.

Students in the Computer Engineering program study basic science, mathematics, computer science, electrical engineering, design, writing, public speaking, and the liberal arts in order to prepare for a professional career or advanced studies. The program includes courses from the programs of Computer Science and Electrical Engineering, providing balanced coverage and integration of the hardware and software aspects of computer systems. The design process is emphasized throughout all four years, and design projects are included in all laboratory courses. The sophomore and junior years include core courses in computer algorithms, digital system design, computer architectures, microprocessor systems, computer interfacing, and programming. These courses provide a foundation for the senior year, which includes electives and an in-depth two-semester design project.
S/CJ 317
Trial, Jury and Counsel
A consideration of the rights guaranteed by the Sixth Amendment to The Constitution of the United States, surveying constitutional provisions, statutes, court rules, and cases concerning the right of a criminal defendant to a speedy and public trial, to try by jury, and to the assistance of counsel.

S/CJ 318
Civil Liability
An examination of the law-enforcement officer or employee as a defendant in a civil suit arising from the scope of his or her employment. Liability based upon rights statutes is examined, along with consideration of the typical defenses.

TOTAL: 130 CREDITS

---

1 See note on Math Options, page 213.
2 If EDUC 113 is required in the first semester, it is taken in place of a humanities elective and is counted as a GE free elective. One GE free elective in the fourth year must then be taken as a humanities elective.
3 Economics majors may apply up to 6 cognate credits toward a Math minor. Students taking the sequence open to Math majors are strongly urged to complete the calculus sequence by taking MATH 222, particularly if they plan on pursuing graduate studies.
4 Economics majors in the College of Arts and Sciences will apply their elective cognate credits to the following areas (exceptions require the permission of the CAS Dean): Political Science, Psychology, Public Administration, Sociology. Nine credits must be in the same field.
Career opportunities in computer engineering, from computer applications such as computational medicine, oceanic engineering, and office automation to robotics, software engineering systems design, graduate study, reliability and other applications such as neural networks.

Electrical Engineering

The Electrical Engineering major of the Department of Physics/EE prepares the student for the analysis and design of electronic systems and devices whose principal functions are the shaping and control of information. The Department of Physics/EE offers four areas of focus: Computer Engineering, Biomedical Engineering, Optical Engineering, and Environmental Instrumentation Engineering. The specific electives for these areas of focus will be chosen in consultation with the student’s academic advisor.

Electronics-Business

The state of the business world today is such that a major portion of its administrative effort must be geared to the supervision of persons engaged in complex technological processes often involving applications of electronics. As a consequence, the ideal administrator is now one who is conversant with both good business practice and technological know-how. The Electronics-Business major provides a student with a program of carefully selected business and economics courses coupled with a series of coordinated physics and electrical engineering courses so as to provide preparation for an administrative career in an electronically oriented business enterprise.

The program also provides sufficient preparation for further studies leading to the Master of Business Administration.

Pre-Engineering

The University provides a pre-engineering program which introduces the student to the highly technical training necessary for all phases of the engineering profession. This is a two-year course of study which enables the student to transfer to another school to complete his or her degree work.

Of special importance is The University of Scranton’s association with the Cooperative Engineering Program at the University of Detroit Mercy, and its programs in chemical, civil, electrical, environmental, and mechanical engineering. For the student who has completed the pre-engineering curriculum at The University of Scranton, the Detroit Mercy three-year cooperative program offers alternate semesters of formal instruction and work experience in industry. A direct transfer program is available with Widener College, which may be either a co-op program beginning in the summer preceding the junior year or a regular two-year program. In addition to the valuable experience gained from industry, many students have been able to pay the cost of their tuition from the remuneration received for their work. This amounts to a substantial equivalent scholarship grant.

Other schools into which University of Scranton students transfer include Lehigh, Bucknell, Penn State and Drexel.

Generally, different engineering programs have slightly different requirements which must be completed before starting the junior year. These will vary from school to school. Therefore, students should, before beginning the sophomore year, consult with an advisor at the institution at which they plan to complete their studies.

Course Descriptions

ENGR 250 3 cr.
Engineering Mechanics-Statics
(Prerequisite: PHYS 140; pre- or co-requisite: MATH 221) Various types of force systems; resultants and conditions of translational and rotational equilibrium; stress analysis of the parts of different types of structures by graphical, algebraic and vector methods; frictional forces; centroids and second moments of areas of solids. Three hours lecture.

ENGR 251 3 cr.
Engineering Mechanics-Dynamics
(Prerequisite: ENGR 250; pre- or co-requisite: MATH 222) Kinematics of particles and rigid bodies which include linear, curvilinear, angular and relative motions; inertia forces, impulse, momentum, work, energy and power; mechanical vibrations. Three hours lecture.

ENGR 252 3 cr.
Solid State Materials Science
(Prerequisites: PHYS 270, MATH 222) The crystalline state of matter; multielectron atoms and the band theory of solids; quantum statistical techniques; applications to p-n junction diodes including photodetectors, LEDs and photovoltaics; bipolar and field-effect transistors; transistor modeling. Three hours lecture.

ENGR 253 1 cr.
An Introduction to Computer-Aided Design
(Prerequisites: PHYS 140, MATH 144) This course is an introduction to the methods of drafting and design using computer-aided techniques. Topics to be covered include plane geometry construction, projection theory, sectional views, dimensioning, tolerancing and the development of working drawings. Extensive use will be made of commercially available CAD software packages. Two hours laboratory.

ENGR 254 1 cr.
3D Computer-Aided Design
(Prerequisite: ENGR 253) Advanced computer-aided design lab with emphasis on three-dimensional techniques. Topics include wireframe and solid modeling, surface modeling, solid modeling, assembly modeling, and rendering. Three hours laboratory.

**Electrical Engineering Program at the University of Scranton's association with the Cooperative Two-Year Course of Study Which Enables the Phases of the Engineering Profession.**

This is a highly technical training necessary for all program which introduces the student to the pre-engineering curriculum at The University of Scranton, the Detroit Mercy three-year cooperative program offers alternate semesters of formal instruction and work experience in industry. A direct transfer program is available with Widener College, which may be either a co-op program beginning in the summer preceding the junior year or a regular two-year program. In addition to the valuable experience gained from industry, many students have been able to pay the cost of their tuition from the remuneration received for their work. This amounts to a substantial equivalent scholarship grant.

Other schools into which University of Scranton students transfer include Lehigh, Bucknell, Penn State and Drexel.

Generally, different engineering programs have slightly different requirements which must be completed before starting the junior year. These will vary from school to school. Therefore, students should, before beginning the sophomore year, consult with an advisor at the institution at which they plan to complete their studies.

### Electronics-Business Curriculum

- Solid modeling, rendering and Boolean operations and use of a finite-element program for mechanical analysis of CAD designs. Excessive use will be made of commercially available software packages. Two hours laboratory.
- ENGR 350 3 cr. Applied and Engineering Mathematics
  - (Prerequisite: MATH 222, PHYS 141) First- and second-order differential equations with constant coefficients; Fourier series, Fourier transforms and Laplace transforms; partial differential equations and boundary-value problems; special functions (e.g., Bessel functions and Legendre polynomials); numerical analysis and use of maple software. Three hours lecture. (Also listed as PHYS 350.)
- ENGR 352 3 cr. Statistical and Engineering Thermodynamics
  - (Prerequisite: PHYS 270) Derivation of Thermodynamics from probability theory and atomic physics; Laws of Thermodynamics; Maxwell relations; chemical potential and phase changes; refrigerators and heat pumps; theory of gasses and theory of solids. Special topics dependent upon interests of majors represented. Three hours lecture. (Also listed as PHYS 352.)

### Electrical Engineering Curriculum

- EE 243L 1 cr. Digital System Design Laboratory
  - (Formerly EE 345L) Introduction to the design, construction and testing of digital logic circuits. Most of the major components of a computer will be investigated. Use of computer program to draw circuits and designs. Three hours laboratory.

---

### E/E 340 Digital Systems
(Prerequisites: E/E 240, MATH 142, CMPS 350) Analysis and design of advanced digital circuits, minimization techniques, combinational and sequential circuit design and numerical techniques. The interdependence of hardware and software on computer design will be stressed.

EE 343 3 cr.
**Electronic Circuits I**
(Prerequisites: EE 241, ENGR 252) Analysis and design of analog electronic circuits using diodes, BJTs, and FETs. Emphasis is placed on amplifier circuits and their frequency dependence. Three hours lecture.

EE 343L 2 cr.
**Electronic Circuits I Lab**
(Prerequisite: EE 343) Experiments with diodes, BJTs, JFETS and MOSFETs. Some of the experiments are short projects to introduce the student to the application of short principles. Three hours laboratory.

EE 344 3 cr.
**Electronic Circuits II**
(Prerequisite: EE 343, EE 343L) Laboratory-oriented course designed to acquaint students with the operation and design of electronic instrumentation. Analysis of electronic instrumentation. Use in various applications and the design of special-purpose instrumentation. Emphasis on use of operational amplifiers in design situations. One hour lecture and three hours laboratory.

EE 346 3 cr.
**Digital Signal Processing**
(Prerequisites: EE 240, EE 241) A study of discrete-time signals and systems, convolution, z-transform, discrete Fourier transform, and FFT algorithms. Analysis and design techniques for digital filters and their realizations. Emphasis will be on the use of computer-aided interactive digital-signal processing programs for several projects on signal analysis and filter design. Three hours lecture.

EE 447 3 cr.
**Electromagnetics I**
(Prerequisites: PHYS 270, ENGR 350) Analytic treatment of electrical and magnetic theory; vector calculus of electrostatic fields; dielectric materials; vector calculus of magnetic fields. Three hours lecture. (Also listed as PHYS 447.)

EE 448 3 cr.
**Electromagnetics II**
(Prerequisite: EE 447) Magnetic materials, electromagnetic induction, displacement currents, Maxwell’s equations; radiation and waves; applications include transmission lines, wave guides, and antennas. Three hours lecture. (Also listed as PHYS 448.)

EE 448L 1 cr.
**Electromagnetics Design Laboratory**
(Co-requisite: EE 448) Laboratory designed to emphasize and reinforce the experimental basis of electromagnetism. Multi-week projects require the student to perform experiments that measure fundamental electrical constants, the electrical and magnetic properties of matter, and the properties of electromagnetic waves. Two hours laboratory. (Also listed as PHYS 448L.)

EE 449 5 cr.
**Computer Interfacing**
(Prerequisites: EE 344, EE 346) Microprocessor programming and interfacing; data acquisition, manipulation and transmission; microprocessor support devices and computer interface. Periodic written and oral presentations are required. Three hours lecture and four hours laboratory.

EE 450 3 cr.
**Control Systems**
(Prerequisites: EE 344, ENGR 350) Review of system modeling and Laplace transforms; block diagram reduction and signal-flow graphs; transient and steady-state control-system characteristics; root locus and frequency-response methods of analysis and compensation design; state variable methods. Three hours lecture.

EE 451 3 cr.
**Communication Systems**
(Prerequisites: EE 344, ENGR 350) A study of the principles of communication theory with emphasis given to analog and digital communications. Modulation techniques such as AM, DSB, SSB, and FM are discussed in detail. Performance of these systems in the presence of noise is also studied. Three hours lecture.

EE 454 3 cr.
**Robotics Design Project and Professional Practice**
(Prerequisites: EE 449, EE 450) Students design a self-contained intelligent robot required to carry out a complex task. Each project involves creative conception, design, development, evaluation, economic constraints, reliability and safety. Written and oral presentations. One hour lecture and three hours laboratory.

EE 484 3 cr.
**Superconductivity Devices and Circuits**
(Prerequisites: EE 447, ENGR 252) A course designed for students with interest in superconductivity. Strong background in calculus, electromagnetics and solid-state devices is necessary. Topics to be discussed: perfect conductivity, the classical model of superconductivity, and direct applications; the quantum model of superconductivity, Josephson junctions and superconducting devices (SQUIDs). Group projects (literature search and brief presentations at the end of the term) are assigned.

TOTAL: 72 CREDITS

1 EE Major Elective may be substituted for CHEM 113

E/CE 340 3 cr.
Digital Systems
(Prerequisites: E/CE 240, MATH 142, CMPS 350) Analysis and design of advanced digital circuits, minization techniques, combinational and sequential circuit design and numerical techniques. The interdependence of hardware and software on computer design will be stressed.

EE 343 3 cr.
Electronic Circuits I
(Prerequisites: EE 241, ENGR 252) Analysis and design of analog electronic circuits using diodes, BJTs, and FETs. Emphasis is placed on amplifier circuits and their frequency dependence. Three hours lecture.

EE 343L 2 cr.
Electronic Circuits I Lab
(Co-require: EE 343) Experiments with diodes, BJTs, FETs, and MOSFETs. Some of the experiments are short projects to introduce the student to the application of design principles. Three hours laboratory.

EE 344 3 cr.
Electronic Circuits II
(Prerequisite: EE 343, EE 434L) Laboratory-oriented course designed to acquaint students with the operation and design of electronic instrumentation. Analysis of electronic instrumentation. Use of operational amplifiers in design situations. One hour lecture and three hours laboratory.

EE 346 3 cr.
Digital Signal Processing
(Prerequisites: EE 240, EE 241) A study of discrete-time signals and systems, convolution, z-transform, discrete Fourier transform, and FFT algorithms. Analysis and design techniques for digital filters and their realizations. Emphasis will be on the use of computer-aided interactive digital-signal processing programs for several projects on signal analysis and filter design. Three hours lecture.

EE 447 3 cr.
Electromagnetics I
(Prerequisites: PHYS 270, ENGR 350) Analytic treatment of electrical and magnetic theory; vector calculus of electrostatic fields; dielectric materials; vector calculus of magnetic fields. Three hours lecture. (Also listed as PHYS 447.)

EE 448 3 cr.
Electromagnetics II
(Prerequisite: EE 447) Magnetic materials, electromagnetic induction, displacement currents, Maxwell’s equations; radiation and waves; applications include transmission lines, wave guides, and antennas. Three hours lecture. (Also listed as PHYS 448.)

EE 448L 1 cr.
Electromagnetics Design Laboratory
(Co-require: EE 448) Laboratory designed to emphasize and reinforce the experimental basis of electromagnetism. Multi-week projects require the student to perform experiments that demonstrate fundamental electrical constants, the electrical and magnetic properties of matter, and the properties of electromagnetic waves. Two hours laboratory. (Also listed as PHYS 448L)

EE 449 5 cr.
Computer Interfacing
(Prerequisites: EE 344, EE 346) Microprocessor programming and interfacing; data acquisition, manipulation and transmission; microcomputer support devices and common computer interfaces. Periodic written and oral presentations are required. Three hours lecture and four hours laboratory.

EE 450 3 cr.
Control Systems
(Prerequisites: EE 344, ENGR 350) Review of system modeling and Laplace transforms; block diagram reduction and signal-flow graphs; transient and steady-state control-system characteristics; root locus and frequency-response methods of analysis and compensation design; state variable methods. Three hours lecture.

EE 451 3 cr.
Communication Systems
(Prerequisites: EE 344, ENGR 350) A study of the principles of communication theory with emphasis given to analog and digital communications. Modulation techniques such as AM, DSB, SSB, and FM are discussed in detail. Performance of these systems in the presence of noise is also studied. Three hours lecture.

EE 454 3 cr.
Robotics Design Project and Professional Practice
(Prerequisites: EE 449, EE 450) Students design a self-contained intelligent robot required to carry out a complex task. Each project involves creative conception, design, development, evaluation, economic constraints, reliability and safety. Written and oral presentations. One hour lecture and three hours laboratory.

Overview
The English Department offers courses in literature, theatre, writing, film, pedagogy, and theory. Courses are designated as English (ENLT), Theatre (THTR) and Writing (WRTG) and are described below under these groupings. In addition to the majors in English and Theatre described in the following section, the department offers minors in English, Theatre, and Writing. If they wish, English majors may pursue either minors or tracks in Theatre and Writing. English majors pursuing tracks in Writing or Theatre may place these courses in either the elective or cognate area of the major. English majors pursuing minors in Writing or Theatre may place these courses in the cognate area but not in
the elective area of the major. (Courses used for a minor cannot be applied to requirements or electives within the major.)

English Major

The student majoring in English must take ENLT 140: English Inquiry or the equivalent, and twelve other courses designated ENLT, THTR, or WRTG. Students are required to take at least one course in each of the following areas:

A. British Literature: Medieval and Renaissance (ENLT 234, 235, 240, 340, 342, 343)
B. British Literature: Restoration and Eighteenth Century (ENLT 241, 345)
C. British Literature: Romantic and Victorian (ENLT 236, 237, 242, 347, HUM 280)
D. American Literature to 1865 (ENLT 212, 230, 243, 350, 351)
E. Modern British Literature (ENLT 239, 244, 361)
F. American Literature, 1865 to the Present (ENLT 245, 353, 355, 455)

In addition, of the twelve courses beyond ENLT 140 or the equivalent, at least one must be at the 300 level, at least one must be a 400-level senior seminar, at least one more must be at the 300 or 400 level, and at least one must be designated Theory Intensive: ENLT 225, 228, 341, 345, 443, 462. Students may place Theatre and/or Writing courses in either the English major or the cognate area, but no course can be counted for both the major and the cognate. Although the English department strongly recommends ENLT 140 as the initial course in the major, any ENLT course numbered from 120 to 179 may serve as an equivalent and be substituted both in the major and as a prerequisite for more advanced course work. A total of no more than two courses with a number between 120 and 179 can be counted toward the major.

Theatre Major

As a major existing within the English Department, Theatre offers a broad-based liberal arts degree for the theatre generalist. The Theatre major prepares the student for further, more focused training in the theatrical arts through a wide variety of courses in performance arts, technical theatre, design arts, directing, theatre history, playwriting and dramatic literature. Students may focus their programs of study to some degree toward specific interests in these areas of theatre through the use of electives within the major. Theatre majors are strongly encouraged to complete either a minor (perhaps in English or Writing) or a second major (perhaps in English). Other combinations are possible. Theatre majors are required to participate in University Players productions. Theatre minors are strongly encouraged to do so. All students with an interest in theatre, whatever their major, are invited to participate in University Players productions. (See also "Theatre" under Extracurricular Activities.)

Students majoring in Theatre are required to take three introductory courses in both Theatre, Acting, and Technical Theatre (THTR 110, 111, 112), two Theatre History courses (THTR 211, 212), Design for the Theatre (THTR 213), Directing I (THTR 311), and 5 credits of Production Laboratory (THTR 280, 380). Four elective courses in Theatre round out the major. Introduction to Drama (ENLT 122), and at least one other course in Dramatic Literature are required in the student's cognate area. Courses which would satisfy the Dramatic Literature requirement include ENLT 211, 220, 295, 340, 341, 345, 355, 461.

Writing Track

Completion of this track will be noted on the English major's transcript. The student must complete a minimum of five courses (15 credits) designated with the WRTG prefix and numbered at the 200 level or above. Of these five courses, at least one must be in Creative Writing (WRTG 213, 214, 215, 216, 217, 313, 314, 315, 316), and at least one must be in Applied Writing (WRTG 210, 211, 212).

Theatre Minor

To minor in Theatre, the student must take a minimum of six courses (18 credits). Three courses are required: THTR 110, THTR 111 and either THTR 211 or THTR 212. Elective courses counted toward the minor include any course with the THTR prefix and/or WRTG 215, 217, or 315. The student may also include one of the following literature courses: ENLT 122, 211, 220, 295, 340, 341, 345, 355, 461.

Writing Minor

To minor in Writing, the student must take a minimum of six courses (18 credits). All six courses must carry the WRTG prefix, and all six must be listed at the 200 level or above. The student must take at least one course in Creative Writing (WRTG 213, 214, 215, 216, 217, 313, 314, 315, 316) and one course in Applied Writing (WRTG 210, 211, 212).

Course Descriptions

Literature

ENLT 103 3 cr.
Children's Literature
A broad study of literature for children since 1800, with the emphasis on American works since 1950, including aesthetic consideration of the art and design of picture books. Works for children up to the age of 12 are considered.

ENLT 110 3 cr.
History of Cinema
A study of the historical development of motion pictures. Practitioners in America and throughout the world are treated in this concise history of cinema. Film screening fee.

ENLT 111 3 cr.
The Art of Cinema
The study of the artists, technicians and businessmen who make films. Taped interviews of internationally famous filmmakers, as well as an analytic scrutiny of modern films, develop students' intelligent, active participation in the major art form in modern culture. Film screening fee.

ENLT 112 3 cr.
Film Genres
A study of popular film genres (i.e., the western, the thriller, the musical, the historical epic, the woman's picture) as they developed and changed in the U.S. and abroad. Film screening fee.

ENLT 113 3 cr.
Film Criticism
A study of the grammar, poetics, rhetoric, and aesthetic of film criticism constitutes the heart of this course. Film screening fee.

ENLT 120 3 cr.
(CL) Introduction to Fiction
An exploration of the nature of prose fiction, its elements and techniques. The emphasis is critical rather than historical. The range of works and the specific selections may vary with the individual instructor.

ENLT 121 3 cr.
(CL) Introduction to Poetry
An exploration of the nature of poetry, its value, aims, and techniques. The emphasis will be critical rather than historical. The range of poems and the specific selections may vary with the individual instructor.

ENLT 122 3 cr.
(CL) Introduction to Drama
An exploration of the nature of drama, its types, techniques, and conventions. The emphasis will be critical rather than historical. The range of plays and the specific selections may vary with the individual instructor. This course may be counted toward the Theatre major, minor or track.

ENLT 123 3 cr.
(CL) Masterworks of Western Civilization
Study of masterpieces of literature from the Hebrew Old Testament and classic Greek to the modern European, illuminating the development of Western civilization.

ENLT 125 3 cr.
(CL) Classic American Stories
This course will examine representative examples of the American short story from the 19th cen-
the elective area of the major. (Courses used for a minor cannot be applied to requirements or electives within the major.)

English Major
The student majoring in English must take ENLT 140: English Inquiry or the equivalent, and twelve other courses designated ENLT, THTR, or WRTG. Students are required to take at least one course in each of the following areas:
A. British Literature: Medieval and Renaissance (ENLT 234, 235, 240, 340, 342, 343)
B. British Literature: Restoration and Eighteenth Century (ENLT 241, 345)
C. British Literature: Romantic and Victorian (ENLT 236, 237, 242, 347, HUM 280)
D. American Literature to 1865 (ENLT 212, 230, 243, 350, 351)
E. Modern British Literature (ENLT 239, 244, 361)
F. American Literature, 1865 to the Present (ENLT 245, 353, 355, 455)

In addition, of the twelve courses beyond ENLT 140 or the equivalent, at least one must be at the 300 level, at least one must be a 400-level senior seminar, at least one more must be at the 300 or 400 level, and at least one must be designated Theory Intensive: ENLT 225, 228, 341, 345, 443, 462. Students may place Theatre and/or Writing courses in either the English major or the cognate area, but no course can be counted for both the major and the cognate.

Although the English department strongly recommends ENLT 140 as the initial course in the major, any ENLT course numbered from 120 to 179 may serve as an equivalent and be substituted both in the major and as a prerequisite for more advanced course work. A total of no more than two courses with a number between 120 and 179 can be counted toward the major.

Theatre Track
Completion of this track will be noted on the English major’s transcript. The student must complete a minimum of five courses (15 credits) designated with the WRTG prefix and numbered at the 200 level or above. Of these five courses, at least one must be in Creative Writing (WRTG 213, 214, 215, 216, 217, 313, 314, 315, 316), and at least one must be in Applied Writing (WRTG 210, 211, 212).

Theatre Major
As a major existing within the English Department, Theatre offers a broad-based liberal arts degree for the theatre generalist. The Theatre major prepares the student for further, more focused training in the theatrical arts through a wide variety of courses in performance arts, technical theatre, design arts, directing, theatre history, playwriting and dramatic literature. Students may choose their programs of study to some degree toward specific interests in these areas of theatre through the use of electives within the major.

ENLT 140 (CL) English Inquiry
An exploration of fiction, poetry, and drama. The approach is inductive; the aims are a greater understanding of literature, and an introduction to techniques of literary scholarship, theory, and research.

The prerequisite for all 200-level ENLT courses is ENLT 140 or the equivalent. Students must complete the University's Written Communication requirement before they can register for any Writing Intensice literature course.

ENLT 210 (CL) Modern Poetry
Some previous study of poetry expected. Modern poets ranging from Frost and Stevens to Bishop and Larkin are examined. Major emphasis is placed on close readings of representative works and historical and cultural contextualization.

ENLT 211 (CL) Dramatic Comedy
Principles, modes, tactics used in dramatic comedy. The plays of writers ranging from Shakespeare to Neil Simon, as well as several films, will be analyzed as models. Opportunity for student writing of comedy. This course may be counted toward the Theatre major, minor or track.

ENLT 212 (CL) Masters of Darkness
This course will survey a significant sampling of the short works of three of America's most famous "dark Romantic" writers: Melville, Hawthorne, and Poe. Consideration will be given to the historical milieu and the authors' responses to the problems and promises of the American experience.

ENLT 213 (CL) Satire
An exploration of the historical, critical, and conceptual nature of satire, including established satirical conventions and techniques. Representative examples in fiction, drama, poetry, and other media, with emphasis on British literature of the Restoration and 18th century, the Age of Satire.

ENLT 214 Macabre Masterpieces
A survey of English and American horror fiction which focuses on this mode of writing as a serious artistic exploration of the human mind, particularly abnormal psychology. Readings will include works by Mary Shelley, Edgar Allan Poe, Robert Louis Stevenson, Joseph Conrad, and Bram Stoker.

ENLT 215 (CL) Literature of the Absurd
Focusing on literature from 1850 to the present, this course will examine fiction, drama, and poetry that reflect a general sense of disintegrating values and lost religious beliefs. Readings will include works by Poe, Byron, Hardy, Stevenson, Conrad, Williams, Hemingway, and Beckett.

ENLT 220 (CL) Shakespeare
An introduction to the works of William Shakespeare, including forays into each of the major dramatic genres (comedy, tragedy, history, and romance). Consideration will be given to the biographical and cultural contexts of individual works. This course may be counted toward the Theatre major, minor or track.

ENLT 221 (W) Woody Allen
This course examines the films, the published screenplays, the volumes of short prose, and assorted interviews and articles. We will examine some of Woody Allen's sources, such as Plato, Shakespeare, Joyce, and Bergman. Our approach will be historical and analytical.

ENLT 222 (CL,W) Graham Greene's Travellers
Detailed study of several privileged characters who exchange the familiar comforts of home for the disorienting complexities of the post-colonial world. Encountering social unrest in Africa, Latin America, Haiti, and French Indo-China, Greene's protagonists abandon their aloof positions and confront the personal and ethical dilemmas raised by their situations.

ENLT 224 (CL,W) Perspectives in Literature about Illness
This course will explore the narrative conventions of both the (literary) life story and the (scientific) case history as a means of analyzing both the characters involved in literary depictions of illness and the ways in which they perceive and understand others involved in the same health care event.

ENLT 225 (CL,W) Writing Women
(Theory Intensive) This course begins with Virginia Woolf's *A Room of One's Own* and Carolyn Heilbrun's *Writing a Woman's Life*. The reading list includes a range of feminist responses to the questions raised by Woolf and Heilbrun, as well as fiction and poetry from Sappho to Willa Cather and Adrienne Rich.

ENLT 226 (CL,D,W) Novels by Women
(Theory Intensive) A study of novels by and about women, including such authors as Austen, Bronte, Eliot, Chopin, Woolf, Lessing, Byatt, and Morrison. The aim is to expand students' knowledge of the novel's history and development and their understanding of women's experiences as expressed by women writers.

ENLT 227 (CL,W) Frankenstein's Forebears
(Theory Intensive) An interdisciplinary exploration of the influential lives and works of Mary Wollstonecraft (feminist, memoirist, and novel-
ENLT 127 3 cr.
(CL) Myth of the Hero
Mythic materials are examined to discover the underlying heroic archetypal patterns. Then modern literature is examined in the light of the same mythical patterns.

ENLT 140 3 cr.
(CL) English Inquiry
An exploration of fiction, poetry, and drama. The approach is inductive; the aims are a greater understanding of literature, and an introduction to techniques of literary scholarship, theory, and research.

The prerequisite for all 200-level ENLT courses is ENLT 140 or the equivalent. Students must complete the University’s Written Communication requirement before they can register for any Writing Intensive literature course.

ENLT 210 3 cr.
(CL) Modern Poetry
Some previous study of poetry expected. Modern poets ranging from Frost and Stevens to Bishop and Larkin are examined. Major emphasis is placed on close readings of representative works and historical and cultural contextualization.

ENLT 211 3 cr.
(CL) Dramatic Comedy
Principles, modes, tactics used in dramatic comedy. The plays of writers ranging from Shakespeare to Neil Simon, as well as several films, will be analyzed as models. Opportunity for student writing of comedy. This course may be counted toward the Theatre major, minor or track.

ENLT 212 3 cr.
(CL,W) Masters of Darkness
This course will survey a significant sampling of the short works of three of America’s most famous “dark Romantic” writers: Melville, Hawthorne, and Poe. Consideration will be given to the historical milieu and the authors’ responses to the problems and promises of the American experience.

ENLT 213 3 cr.
(CL,W) Satire
Focusing on literature from 1850 to the present, this course will examine fiction, drama, and historical and cultural contextualization.

ENLT 214 3 cr.
(CL) Macabre Masterpieces
A survey of English and American horror fiction which focuses on this mode of writing as a serious artistic exploration of the human mind, particularly abnormal psychology. Readings will include works by Mary Shelley, Edgar Allan Poe, Robert Louis Stevenson, Joseph Conrad, and Bram Stoker.

ENLT 215 3 cr.
(CL) Literature of the Absurd
Focusing on literature from 1850 to the present, this course will examine fiction, drama, and poetry that reflect a general sense of disintegrating values and lost religious beliefs. Readings will include works by Poe, Byron, Hardy, Stevenson, Conrad, Williams, Hemingway, and Beckett.

ENLT 221 3 cr.
(W) Woody Allen
This course examines the films, the published screenplays, the volumes of short prose, and assorted interviews and articles. We will examine some of Woody Allen’s sources, such as Plato, Shakespeare, Joyce, and Bergman. Our approach will be historical and analytical.

ENLT 222 3 cr.
(CL,D,W) Graham Greene’s Travellers
Detailed study of several privileged characters who exchange the familiar comforts of home for the disorienting complexities of the post-colonial world. Encountering social unrest in Africa, Latin America, Haiti, and French Indo-China, Greene’s protagonists abandon their aloof positions and confront the personal and ethical dilemmas raised by their situations.

ENLT 224 3 cr.
(CL,W) Perspectives in Literature about Illness
This course will explore the narrative conventions of both the (literary) life story and the (scientific) case history as a means of analyzing both the characters involved in literary depictions of illness and the ways in which they perceive and understand others involved in the same health care event.

ENLT 225 3 cr.
(CL,D,W) Writing Women
(Theory Intensive) This course begins with Virginia Woolf’s A Room of One’s Own and Carolyn Heilbrun’s Writing a Woman’s Life. The reading list includes a range of feminist responses to the questions raised by Woolf and Heilbrun, as well as fiction and poetry from Sappho to Willa Cather and Adrienne Rich.

ENLT 226 3 cr.
(CL,D) Novels by Women
A study of novels by and about women, including such authors as Austen, Bronte, Eliot, Chopin, Woolf, Lessing, Byatt, and Morrison. The aim is to expand students’ knowledge of the novel’s history and development and their understanding of women’s experiences as expressed by women writers.

ENLT 227 3 cr.
(CL,D,W) Frankenstein’s Forebears
(Theory Intensive) An interdisciplinary exploration of the influential lives and works of Mary Wollstonecraft (feminist, memoirist, and novel-
ENLT 228 3 cr. (CL,D,W) Race in Anglo-American Culture (Theory Intensive) This course will examine English, Anglo-American, and American portrayals of African- and Native American peoples between 1600 and 1860. The reading list includes works from both high culture (poems, plays, and novels) and low culture (Indian captivity narratives, frontier biographies, and slave autobiographies).

ENLT 229 3 cr. (CL) The Cross-Cultural Novella This course aims both to foster an understanding and appreciation of the novella as a distinct literary form and to introduce the student to the literature of a variety of continents and cultures. The course will deal with writers such as Tolstoy, Flaubert, Kafka, Kawabata, Mann, and Gaines.

ENLT 230 3 cr. (CL) American Romanticism This course will deal with representative short works of America’s six major Romantic authors: Emerson, Thoreau, Whitman, Hawthorne, Melville, and Poe.

ENLT 234 3 cr. (CL,W) Camelot Legend This course will examine the development of Arthurian legend-tales of knights and ladies associated with the court of King Arthur—from its early origins in Celtic and Latin medieval literature, through medieval romances and histories, culminating in Malory’s Morte D’Arthur.

ENLT 235 3 cr. (CL,W) Literature in the Age of Chaucer (Area A) This course will explore 14th- and 15th-century English vernacular literature. In addition to Chaucer, authors studied may include Langland, Kempe, and the Pearl Poet.

ENLT 236 3 cr. (CL,W) The Romantic Protest (Area C) A survey of the first half of the British Romantic period. Readings will include Blake, Wordsworth, Coleridge and at least three “minor” writers of this era. Discussions will focus on the Romantic imagination, the role of nature in Romantic mysticism, and Romantic notions concerning heightened sensations and altered realities.

ENLT 237 3 cr. (CL,W) The Darker Romantics (Area C) A survey of the second half of the British Romantic period. Readings will include Byron, Percy Shelley, Keats, and at least three “minor” writers of this era. Discussions will focus on the waning of the “Romantic religion” of Blake, Coleridge, and Wordsworth in an increasingly prosperous, skeptical, and secularized era.

ENLT 239 3 cr. (CL,D,W) Irish Short Story (Area D) Detailed study of short stories from the pens of such masters as Yeats, Joyce, Frank O’Connor, McGovern, Jordan, Trevor, and Beckett. Serious craftsmen aware of the verbal tradition, shapers of the Literary Revival, these masters of language forge a literature that affirms spiritual values in the midst of material misery.

ENLT 240 3 cr. British Literature: Medieval and Renaissance (Area A) A detailed study of representative works and authors from the Anglo-Saxons to the 17th century. Through the emphasis will be on an intensive study of major works in their literary and cultural context, consideration will be given to minor writers as well.

ENLT 241 3 cr. British Literature: Restoration and 18th Century (Area B) Study of a select group of English and Anglo-Irish authors whose works were first published between 1660 and 1776. Discussions and assignments will emphasize literary history, critical analysis, and sociopolitical contexts.

ENLT 242 3 cr. British Literature: Romantic and Victorian (Area C) A study of the major literary works in 19th-century England: poetry, novels and non-fictional prose. The emphasis is threefold: critical analysis; literary history; social, intellectual and political background.

ENLT 243 3 cr. American Literature to 1865 (Area D) An in-depth study of a select group of major American authors from the Colonial Period to the Civil War. Included are Bradford, Franklin, Irving, and Poe. Consideration given to the historical and cultural milieu and development of major American themes and attitudes.

ENLT 244 3 cr. Modern British Literature (Area E) Selected modern British and postmodern English poets, playwrights, and fiction writers: Hopkins, Eliot, Hughes, Auden, Larkin, Spender, Osborne, Stoppard, Pinter, Greene, Waugh, Read, Lodge, Amis, Spark, McEwan and Chatwin.

ENLT 245 3 cr. American Literature, 1865 to the Present (Area F) Study of a select group of major American authors from the Civil War to the present. Included are Twain, Crane, Fitzgerald and Vonnegut. The historical and cultural milieu and the development of major American themes and attitudes are reviewed.

ENLT 295 3 cr. (CL) Shakespeare in Stratford This course combines a traditional study of six Shakespearean plays on the University campus with a week-long residency at the Shakespeare Centre in Stratford-upon-Avon, England. Students will read and discuss the plays produced during the current Royal Shakespeare Company season and attend performances of those plays.

All 300-level ENLT courses have a prerequisite of ENLT 140 or equivalent; a 200-level ENLT course is strongly recommended.

ENLT 340 3 cr. Introduction to Late Medieval Drama (Area A) A survey of 14th- and 15th-century drama, including the Corpus Christi cycle, morality plays such as Everyman, Mankinde and Castle of Perseverence, and the saint’s play. This course may be counted toward the Theatre major, minor or track.

ENLT 341 3 cr. (CL,W) Shakespeare: Special Topics (Theory Intensive) A detailed study of Shakespeare’s treatment of either a particular genre (comedy, tragedy, history, romance) or a particular writer or group across genres. Special attention will be paid to the meaning of plays in performance. This course may be counted toward the Theatre track or minor.

ENLT 343 3 cr. Milton and 17th-Century Poetry Detailed study of the Metaphysical poets, the Cavalier poets, and the poetry of John Milton. This course seeks to provide a bridge between the Elizabethan Age and the Restoration and 18th-century poets.

ENLT 344 3 cr. Milton’s Paradise Lost Intensive study of Milton’s masterpiece. In addition to our reading and discussion of the text itself, we will examine its biographical and historical context and explore a variety of critical approaches to the poem.

ENLT 345 3 cr. (CLW) Restoration and 18th-Century Drama (Area B, Theory Intensive) A survey of the major formal and thematic developments on the London stage between 1660 and 1776. Discussions and assignments will emphasize literary history, critical analysis, and sociopolitical contexts.

ENLT 346 3 cr. The English Novel: 18th and 19th Centuries The history of the English novel from its origins in the early 18th century until the end of the 19th century. The course focuses on such major figures as Defoe, Richardson, Fielding, Austen, Dickens and Eliot.

ENLT 347 3 cr. Victorian Voices This course will focus on three major Victorian authors: one non-fiction prose writer, one novelist, and one poet. Possible authors include Carlyle, Arnold, Ruskin, Dickens, Eliot, Bronze, Tennyson, Browning.

ENLT 348 3 cr. (CL,D,W) Colonial and Postcolonial Fiction Through a detailed study of such authors as Achebe, Conrad, Forster, Kincaid, Kipling, Nai- paul, Orwell, and Rushdie, this course explores the myths and meanings of 19th- and 20th-century European colonialism in Asia, Africa, and the Americas.

ENLT 228 3 cr.
(CL,D,W) Race in Anglo-American Culture (Theory Intensive) This course will examine English, Anglo-American, and American portrayals of African- and Native American peoples between 1600 and 1860. The reading list includes works from both high culture (poems, plays, and novels) and low culture (Indian captivity narratives, frontier biographies, and slave autobiographies).

ENLT 229 3 cr.
(CL,D) The Cross-Cultural Novella
This course aims both to foster an understanding and appreciation of the novella as a distinct literary form and to introduce the student to the literature of a variety of continents and cultures. The course will deal with writers such as Tolskoy, Flaubert, Kafka, Kawabata, Mann, and Gains.

ENLT 230 3 cr.
(CL) American Romanticism
This course will deal with representative short works of America’s six major Romantic authors: Emerson, Thoreau, Whitman, Hawthorne, Melville, and Poe.

ENLT 234 3 cr.
(CL,W) Camelot Legend
This course will examine the development of Arthurian legend-tales of knights and ladies associated with the court of King Arthur from its early origins in Celtic and Latin medieval literature, through medieval romances and histories, culminating in Malory’s Morte D’Arthur.

ENLT 235 3 cr.
(CL,W) Literature in the Age of Chaucer (Area A) This course will explore 14th-century non-dramatic vernacular literature. In addition to Chaucer, authors studied may include Langland, Kempe, and the Pearl Poet.

ENLT 236 3 cr.
(CL,W) The Romantic Protest
Area C) A survey of the first half of the British Romantic period. Readings will include Blake, Wordsworth, Coleridge and at least three “minor” writers of this era. Discussions will focus on the Romantic imagination, the role of nature in Romantic mysticism, and Romantic notions concerning heightened sensations and altered realities.

ENLT 237 3 cr.
(CL,W) The Darker Romantics
Area C) A survey of the second half of the British Romantic period. Readings will include Byron, Percy Shelley, Keats, and at least three “minor” writers of this era. Discussions will focus on the waning of the “Romantic religion” of Blake, Coleridge, and Wordsworth in an increasingly prosperous, skeptical, and secularized era.

ENLT 239 3 cr.
(CL,D,W) Irish Short Story
Area E) Detailed study of short stories from the pens of such masters as Yeats, Joyce, Frank O’Connor, McGovern, Jordan, Trevor, and Beckett. Serious craftsmen aware of the verbal tradition, shapers of the Literary Revival, these masters of language forge a literature that affirms spiritual values in the midst of material misery.

ENLT 240 3 cr.
British Literature: Medieval and Renaissance
Area A) A detailed study of representative works and authors from the Anglo-Saxons to the 17th century. Though the emphasis will be on an intensive study of major works in their literary and cultural context, consideration will be given to minor writers as well.

ENLT 241 3 cr.
British Literature: Restoration and 18th Century
Area B) Study of a select group of English and Anglo-Irish authors whose works were first published between 1660 and 1776. Discussions and assignments will emphasize literary history, critical analysis, and sociopolitical contexts.

ENLT 242 3 cr.
British Literature: Romantic and Victorian
Area C) A study of the major literary works in 19th-century England: poetry, novels and non-fictional prose. The emphasis is threefold: critical analysis; literary history; social, intellectual and political background.

ENLT 243 3 cr.
American Literature to 1865
Area D) An in-depth study of a select group of major American authors from the Colonial Period to the Civil War. Included are Bradford, Franklin, Irving, and Poe. Consideration given to the historical and cultural milieu and development of major American themes and attitudes.

ENLT 244 3 cr.
Modern British Literature
Area E) Selected modern and postmodern English poets, playwrights, and fiction writers: Hopkins, Eliot, Hughes, Auden, Larkin, Spender, Osborne, Stoppard, Pinter, Greene, Waugh, Read, Lodge, Amis, Spark, McEwan and Chatwin.

ENLT 245 3 cr.
American Literature, 1865 to the Present
Area F) Study of a select group of major American authors from the Civil War to the present. Included are Twain, Crane, Fitzgerald and Vonnegut. The historical and cultural milieu and the development of major American themes and attitudes are reviewed.

ENLT 295 3 cr.
(CL) Shakespeare in Stratford
This course combines a traditional study of six Shakespearean plays on the University campus with a week-long residency at the Shakespeare Centre in Stratford-upon-Avon, England. Students will read and discuss the plays produced during the current Royal Shakespeare Company season and attend performances of those plays.

All 300-level ENLT courses have a prerequisite of ENLT 140 or equivalent; a 200-level ENLT course is strongly recommended.

ENLT 340 3 cr.
Introduction to Late Medieval Drama
Area A) A survey of 14th- and 15th-century drama, including the Corpus Christi cycle, morality plays such as Everyman, ManKind and Castle of Penance, and the saint’s play. This course may be counted toward the Theatre major, minor or track.

ENLT 341 3 cr.
(CL,W) Shakespeare: Special Topics
Theory Intensive) A detailed study of Shakespeare’s treatment of either a particular genre (comedy, tragedy, history, romance) or a particular subset across genres. Special attention will be paid to the meaning of plays in performance. This course may be counted toward the Theatre track or minor.

ENLT 342 3 cr.
Renaissance Poetry and Prose
A survey of lyric and narrative poetry, fictional and non-fictional prose, and drama written in England between the time of Sir Thomas More and John Milton. Readings will include More, Surrey, Lyly, Spenser, Sir Philip and Mary Sidney, Donne, Webster, Jonson, Marvell, and Milton.

ENLT 344 3 cr.
Milton’s Paradise Lost
Intensive study of Milton’s masterpiece. In addition to our reading and discussion of the text itself, we will examine its biographical and historical context and explore a variety of critical approaches to the poem.

ENLT 345 3 cr.
(CL,W) Restoration and 18th-Century Drama
Area B, Theory Intensive) A survey of the major formal and thematic developments on the London stage between 1660 and 1776. Discussions will focus on the social, political and institutional changes that re-shaped theatrical productions during this period. This course may be counted toward the Theatre major, minor or track.

ENLT 346 3 cr.
The English Novel: 18th and 19th Centuries
The history of the English novel from its origins in the early 18th century until the end of the 19th century. The course focuses on such major figures as Defoe, Richardson, Fielding, Austen, Dickens and Eliot.

ENLT 347 3 cr.
Victorian Voices
This course will focus on three major Victorian authors: one non-fiction prose writer, one novelist, and one poet. Possible authors include Carlyle, Arnold, Ruskin, Dickens, Eliot, Bronte, Tennant, Browning.

ENLT 348 3 cr.
(CL,D,W) Colonial and Postcolonial Fiction
Through a detailed study of such authors as Achebe, Conrad, Forster, Kincaid, Kipling, Nai- paul, Orwell, and Rushdie, this course explores the myths and meanings of 19th- and 20th-century European colonialism in Asia, Africa, and the Americas.

ENLT 350 3 cr.
Major Works: American Romantics
ENLT 351 3 cr.
Transcendentalists
This course transcends the typical limits of this literary period to Emerson and Thoreau’s major works. Thus, Orestes Brownson, Margaret Fuller, Ellery Channing, Theodore Parker are covered.

ENLT 352 3 cr.
(CL,W) The Development of the American Novel
This course will focus on the ways in which the American novel has reflected our changing literary and cultural values from the late 18th to the 20th century. The reading list will include works by Charles Brockden Brown, Nathaniel Hawthorne, Mark Twain, Kate Chopin, John Steinbeck, and Kurt Vonnegut, Jr.

ENLT 353 3 cr.
Major Works: American Realists
(Area E) Twain’s Huckleberry Finn, Howell’s The Rise of Silas Lapham, James’s The American, Crane’s The Red Badge of Courage, Dreiser’s Sister Carrie and others. Works are evaluated in their historical milieu and the development of American Realism, 1865-1900.

ENLT 354 3 cr.
Major Works of Twain and James
Works to be studied include Twain’s Huckleberry Finn and A Connecticut Yankee in King Arthur’s Court, and James’s Portrait of a Lady and The Ambassadors. These works will be examined both in terms of their historical context and by way of a comparative analysis of the two authors.

ENLT 355 3 cr.
American Drama 1919-1939
(Area E) A review of the first “golden age” of American drama, which includes biting masterpieces such as The Hairy Ape, Awake and Sing, and comic works such as You Can’t Take It with You and The Time of Your Life. This course may be counted toward the Theatre track or minor.

ENLT 356 3 cr.
Major Works of Hemingway and O’Hara
Works to be studied include Hemingway’s The Sun Also Rises and For Whom the Bell Tolls, and O’Hara’s Appointment in Samarra and From the Terrace. These will be examined in terms of both their historical contexts and their basic themes as part of a comparative analysis of the two authors.

ENLT 360 3 cr.
(D) Jewish Literature
The course provides a broad literary overview of Jewish life from medieval times to the present, examining the poetry, fiction, memoirs, and drama of Jewish writers from a variety of cultures.

ENLT 361 3 cr.
Modern Irish Novel
(Area E) A selective introductory course to Ireland’s renowned modern novelists: Francis Smart, John McGahern, William Trevor, Neil Jordan, Brian Moore, Bernard MacLaverty, John Banville and others. These literary artists capture the verve, flavor, and illumination that distinguish today’s Irish novels.

ENLT 362 3 cr.
Literature and Philosophy
(Theory Intensive) This course explores the Platonic insight that on the highest level literature and philosophy converge. We begin with a few of Plato’s dialogues which develop this idea. Then we examine several “literary” works in English which embody it. Our approach is analytical, inductive and historical.

ENLT 363 3 cr.
Magazine Editing
The process of editing is surveyed. Macro-editing (publishing for a defined audience and delighting, surprising, informing, and challenging it) is emphasized over micro-editing (grammar, punctuation, and so forth). Both are fitted into the larger picture of promotion, fulfillment, circulation, advertising, production, and distribution.

ENLT 364 3 cr.
Modern Novel
The evolution of the novel from modern to postmodern times. Major American and English writers are studied, moving from traditional narrative to self-conscious stylistic devices.

ENLT 365 3 cr.
Comparative Romanticism
Major British and American Romantic writers will be studied in an effort to distinguish the forms Romanticism takes in the two countries and to determine possible relationships. Authors to be examined include Blake, Wordsworth, Coleridge, Shelley, Keats, Hawthorne, Poe, Emerson, and Whitman.

ENLT 366 3 cr.
Dante’s Divine Comedy
A canto-by-canto study, in translation, of Dante’s dream vision of hell, purgatory, and heaven. Consideration will be given to the cultural milieu and to medieval art and thought as these affect the allegorical meaning and structure of the poem.

ENLT 367 3 cr.
Conrad’s Fiction
A reading of major works by Conrad and survey of critical response to this quintessential modern Western writer.

ENLT 382-383 3 cr.
Variable credit
Guided Independent Study
A tutorial program open to third-year students. Content determined by mentor.

ENLT 395 3 cr.
Travel Seminar: Ireland
This is an artistic, cultural, literary tour. Students will study the people and places that contribute to Ireland’s distinctive place in the world of literary art. (Intersession or Spring Break)

ENLT 368 3 cr.
Gerard Manley Hopkins, S.J.
Study of the life and works of Gerard Manley Hopkins, S.J., the only priest-poet ever to be honored with a place in Westminster Abbey’s Poet’s Corner.

ENLT 369 3 cr.
American Realists
(Area F) Study of representative figures in the post-Civil War period, the period of the rise of American realism. Authors treated will be Mark Twain, Henry James, Stephen Crane, and selected modern authors.

ENLT 437 3 cr.
Keats: Death and Love
This course will focus almost exclusively on one writer, John Keats, and explore the dynamic relationship in his poetry between death and love.

ENLT 443 3 cr.
Chaucer
(Theory Intensive) A study of Chaucer’s poetry in the context of medieval culture. Readings and assignments will concentrate on The Canterbury Tales, but will also cover the other major poems, such as the Book of the Duchess and the Parliament of Birds.

ENLT 447 3 cr.
Joyce
(Theory Intensive) This course explores the prose works of James Joyce, a major figure in 20th-century literature. We will read Dubliners, A Portrait of the Artist as a Young Man, and, with the help of various guides, Ulysses. We will work to apprehend in Joyce both the universal and the peculiarly Irish.

ENLT 455 3 cr.
American Realists
(Area F) Study of representative figures in the post-Civil War period, the period of the rise of American realism. Authors treated will be Mark Twain, Henry James, Stephen Crane, and selected modern authors.

ENLT 480 3 cr.
Teaching Modern Grammars
This course explores the English language in the context of transformational/generative grammar and in relation to what is expected of middle school and high school English teachers. Techniques for teaching these new grammars and laboratory teaching experience in the first-year writing clinic will be presented.

ENLT 490-491 3 cr.
Variable Credit
Guided Independent Study
A tutorial program open to fourth-year students. Content determined by mentor.

ENLT 490-491 3 cr.
(W) Senior Seminar
The topics of these writing-intensive seminars vary from semester to semester. Based largely on student writing, presentations, and discussion, this capstone course is required in the major and culminates in the student’s development of a seminar paper. May be repeated for credit. Enrollment limited to 15 students per section.
ENLT 351 3 cr.
Transcendentalists
This course transcends the typical limits of this literary period to Emerson and Thoreau’s major works. Thus, Orestes Brownson, Margaret Fuller, Ellery Channing, Theodore Parker are covered.

ENLT 352 3 cr.
(CL, W) The Development of the American Novel
This course will focus on the ways in which the American novel has reflected our changing literary and cultural values from the late 18th to the 20th century. The reading list will include works by Charles Brockden Brown, Nathaniel Hawthorne, Mark Twain, Kate Chopin, John Steinbeck, and Kurt Vonnegut, Jr.

ENLT 353 3 cr.
Major Works: American Realists
(Area E) Twain’s Huckleberry Finn, Howells’ The Rise of Silas Lapham, James’ The American, Crane’s The Red Badge of Courage, Dreiser’s Sister Carrie and others. Works are evaluated in their historical milieu and the development of American Realism, 1865-1900.

ENLT 354 3 cr.
Major Works of Twain and James
Works to be studied include Twain’s Huckleberry Finn and A Connecticut Yankee in King Arthur’s Court, and James’ Portrait of a Lady and The Ambassadors. These works will be examined both in terms of their historical context and by way of a comparative analysis of the two authors.

ENLT 355 3 cr.
American Drama 1919-1939
(Area E) A review of the first “golden age” of American drama, which includes biting masterpieces such as The Hairy Ape, Awake and Sing, and comic works such as You Can’t Take It with You and The Time of Your Life. This course may be counted toward the Theatre track or minor.

ENLT 356 3 cr.
Major Works of Hemingway and O’Hara
Works to be studied include Hemingway’s The Sun Also Rises and For Whom the Bell Tolls, and O’Hara’s Appointment in Samarra and From the Terrace. These will be examined in terms of both their historical contexts and their basic themes as part of a comparative analysis of the two authors.

ENLT 360 3 cr.
(D) Jewish Literature
The course provides a broad literary overview of Jewish life from medieval times to the present, examining the poetry, fiction, memoirs, and drama of Jewish writers from a variety of cultures.

ENLT 361 3 cr.
Modern Irish Novel
(Area E) A selective introductory course to Ireland’s renowned modern novelists: Francis Smart, John McGahern, William Trevor, Neil Jordan, Brian Moore, Bernard MacLaverty, John Banville and others. These literary artists capture the verve, flavor, and illumination that distinguish today’s Irish novels.

ENLT 362 3 cr.
Literature and Philosophy
(Theory Intensive) This course explores the Platonic insight that on the highest level literature and philosophy converge. We begin with a few of Plato’s dialogues which develop this idea. Then we examine several “literary” works in English which embody it. Our approach is analytical, inductive and historical.

ENLT 363 3 cr.
Magazine Editing
The process of editing is surveyed. Macro-editing (publishing for a defined audience and delightful, surprising, informing, and challenging it) is emphasized over micro-editing (grammar, punctuation, and so forth). Both are fitted into the larger picture of promotion, fulfillment, circulation, advertising, production, and distribution.

ENLT 364 3 cr.
Modern Novel
The evolution of the novel from modern to post-modern times. Major American and English writers are studied, moving from traditional narrative to self-conscious stylistic devices.

ENLT 365 3 cr.
Comparative Romanticism
Major British and American Romantic writers will be studied in an effort to distinguish the forms Romanticism takes in the two countries and to determine possible relationships. Authors to be examined include Blake, Wordsworth, Coleridge, Shelley, Keats, Hawthorne, Poe, Emerson, and Whitman.

ENLT 366 3 cr.
Dante’s Divine Comedy
A canto-by-canto study, in translation, of Dante’s dream vision of hell, purgatory, and heaven. Consideration will be given to the cultural milieu and to medieval art and thought as these affect the allegorical meaning and structure of the poem.

ENLT 367 3 cr.
Gerard Manley Hopkins, S.J.
Study of the life and works of Gerard Manley Hopkins, S.J., the only priest-poet ever to be honored with a place in Westminster Abbey’s Poet’s Corner.

ENLT 368 3 cr.
Conrad’s Fiction
A reading of major works by Conrad and survey of critical response to this quintessential modern Western writer.

ENLT 382-383 Variable credit
Guided Independent Study
A tutorial program open to third-year students. Content determined by mentor.

ENLT 395 3 cr.
Travel Seminar: Ireland
This is an artistic, cultural, literary tour. Students will study the people and places that contribute to Ireland’s distinct place in the world of literary art. (Intersession or Spring Break)

All 400-level ENLT courses have a prerequisite of ENLT 140 or equivalent; a 300-level ENLT course is strongly recommended.

ENLT 433 3 cr.
Chaucer
(Theory Intensive) A study of Chaucer’s poetry in the context of medieval culture. Readings and assignments will concentrate on The Canterbury Tales, but will also cover the other major poems, such as the Book of the Duchess and the Parliament of Birds.

ENLT 443 3 cr.
Keats: Death and Love
This course will focus almost exclusively on one writer, John Keats, and explore the dynamic relationship in his poetry between death and love.

ENLT 447 3 cr.
American Realists
(Area F) Study of representative figures in the post-Civil War period, the period of the rise of American realism. Authors treated will be Mark Twain, Henry James, Stephen Crane, and selected modern authors.

ENLT 458 3 cr.
Modern Drama
Some previous study of drama required. A survey of the major trends and authors in 20th-century British and American drama, with some Irish and Continental works included. Readings will include works by Shaw, O’Neill, Miller and Williams. This course may be counted toward the Theatre major, minor, or track.

ENLT 460 3 cr.
Literary Criticism and Theory
(Theory Intensive) This course explores both the derivation and the defining characteristics of a range of contemporary interpretive practices, including those of psychoanalytic, Marxist, feminist, formalist, reader response, structuralist, poststructuralist, and cultural materialist critics.

ENLT 470 3 cr.
Teaching Modern Grammars
This course explores the English language in the context of transformational/generative grammar and in relation to what is expected of middle school and high school English teachers. Techniques for teaching these new grammars and laboratory teaching experience in the first-year writing clinic will be presented.

ENLT 480 Variable Credit
Internship
English majors can receive internship credit for a variety of on-the-job experiences. Approval must be obtained beforehand from chair and dean.

ENLT 482-483 Variable Credit
Guided Independent Study
A tutorial program open to fourth-year students. Content determined by mentor.

ENLT 490-491 3 cr.
(W) Senior Seminar
The topics of these writing-intensive seminars vary from semester to semester. Based largely on student writing, presentations, and discussion, this capstone course is required in the major and culminates in the student’s development of a seminar paper. May be repeated for credit. Enrollment limited to 15 students per section.
Theatre

THTR 110 3 cr.
(CL) Introduction to Theatre
An introduction to the theories and practices of the theatre arts. Dramatic structure, dramatic literature, critical writing, acting, directing, design, practical stagework, and some theatre history will all be touched on in an effort to introduce students to the fullness and variety of the art of theatre.

THTR 111 3 cr.
(CA) Introduction to Acting
This course introduces the student to the fundamental elements of the actor’s craft, including internal and external techniques, character analysis, and vocal/physical warmups. These elements will be used in various in-class exercises and rehearsed performance work. The subject of auditions will also be covered. (First of a three-course sequence.)

THTR 112 4 cr.
Introduction to Technical Theatre
This course introduces the student to the materials, equipment, and techniques used in the construction and finishing of stage sets, including lighting, sound, and special effects. Forty hours of lab work and participation on a crew for a major University Players production will be required.

THTR 210 3 cr.
Intermediate Acting
(Prerequisite: B- or higher in THTR 111.) This course focuses on further exploration of internal acting techniques. Stanislavsky-based and other modern acting systems are explored through exercises, written analysis, and scene/monologue study. There is an emphasis on ensemble acting in the classroom, rehearsal, and production. (Second of a three-course sequence.)

THTR 211 3 cr.
(CL) Theatre History I
A chronological study of western theatre from ancient Greek drama to 17th-century British drama. A selection of plays from representative playwrights will be read and discussed, with an emphasis on the social, cultural, and theatrical contexts within which these playwrights lived and worked.

THTR 212 3 cr.
(CL) Theatre History II
A chronological study of Western theatre from the middle 17th century to the present. A selection of plays from representative playwrights will be read and discussed, with an emphasis on the social, cultural, and theatrical contexts within which these playwrights lived and worked.

THTR 213 3 cr.
(CL) Design for the Theatre
(Prerequisite: THTR 112 with a grade of B- or higher) An introduction to the various design and production elements in theatre. Scenery, lighting, costumes, projections, props and sound will be explored. Students participate in the design elements of the University productions.

THTR 214 3 cr.
Drama Practicum
(Prerequisite: any other course that may be counted in the Theatre minor) Work on one of the major aspects of producing a play: acting, costuming, set construction, lighting, publicity, and box-office management.

THTR 280 1 cr.
Production Laboratory
Theatre majors working on University Players productions can receive credit for serving as props master, master electrician, sound designer, assistant technical director, assistant stage manager, or running crew. Forty hours of production work and strict adherence to deadlines required. May be taken for credit up to five times.

THTR 310 3 cr.
Theories of Theatre
Students will study the theories of theatre advanced in the writing of Diderot, Archer, Stanislavsky, Vakhutangov, Brecht, Copeau, Artaud, Grotowski, Brook, and Schecken.

THTR 311 3 cr.
Directing I
(Prerequisites: B- or higher in THTR 111 or permission of instructor.) An introduction to a range of skills and techniques used by stage directors as they transform scripts into successful performances. Several plays will be read and analyzed. Students will direct a short scene or play for performance.

THTR 313 3 cr.
Set Design for the Theatre
(Prerequisite: THTR 213 with a grade of B- or higher) An exploration of the basic crafts of the theatrical set designer. Concentration on developing one’s personal vision and interpretive skills through script analysis, practice in sketching, drafting, painting, collage, model making, and typical stage construction. Introduction to environmental theatre.

THTR 370 3 cr.
Technical Theatre: Special Topics
Topic and prerequisites will be announced prior to preregistration.

THTR 371 3 cr.
Theatre Design: Special Topics
Topic and prerequisites will be announced prior to preregistration.

**Total: 130 Credits**

1. Major electives: the Theatre major must select four electives from the following: any THTR course at the 200 level or higher; WRTG 215, WRTG 315, and ENLT courses 200 level or higher that qualify as dramatic literature courses.

2. Cognate electives must include two courses in dramatic literature; one of these must be ENLT 122.
THTR 380 2 cr.
Advanced Production Lab
(Prerequisites: 2 cr. of THTR 280, permission of the instructor.) Advanced Theatre majors who work on University Players productions can receive credit for stage management, technical or design work, acting or directing, 80 hours of production work and strict adherence to deadlines required. May be taken for credit only once.

THTR 382-383, 482-483 3 cr.
Independent Study in Theatre
A tutorial program open to junior and senior students who have completed appropriate lower-division coursework.

THTR 410 3 cr.
Advanced Acting
(Prerequisite: B- or higher in THTR 210.) This course focuses on external techniques, especially the use of the actor’s body to create physical characterizations. This work builds on the student’s knowledge and experience through the use of exercises, written analysis, and scene/monologue study. (Third of a three-course sequence.)

THTR 411 3 cr.
Directing II
(Prerequisite: B- or higher in THTR 311 or permission of instructor.) Advanced study of rehearsal techniques, directing methods and styles, and effective director-actor relationships. Students will direct a 20-30 minute one act or excerpt for the Director’s Workshop as part of the University Players season.

THTR 480 Variable Credit
Variable Credit Internship
Theatre majors or minors can receive credit for a variety of on-the-job work experience. Approval must be obtained beforehand from the supervising faculty member, chair, and dean.

Writing
Successful completion of WRTG 105-106 or WRTG 107 with a grade of C or better fulfills the University’s Writing skills requirement. Students must complete that requirement before they can register for any WRTG course at the 200, 300 or 400 level.

WRTG 105 3 cr.
College Writing I
(Placement into 105 required) The first of a two-course sequence that fulfills the University’s Written Communication requirement, this course concentrates on defining and focusing problems, creating arguments, and providing evidence in academic essays. This course cannot be counted toward the Writing Track or the Writing Minor.

WRTG 106 3 cr.
(D) College Writing II
(Prerequisite: WRTG 105) The second of a two-course sequence that fulfills the university’s Written Communication requirement, this course combines study of the elements of style and grammar with instruction in structuring and providing support for argumentative essays. This course cannot be counted toward the Writing Track or the Writing Minor.

WRTG 107 3 cr.
Composition
A study of expository and argumentative prose, and the strategies and techniques used by successful academic writers. Successful completion of WRTG 107 (with a grade of C or better) course fulfills the University’s written communication requirement. It cannot be counted toward the Writing Track or the Writing Minor.

WRTG 210 3 cr.
Advanced Composition
The purpose of this course is to review, practice and apply the principles of a rhetoric of order, stressing invention, disposition, style, tone and theme.

WRTG 211 3 cr.
Technical and Business Writing
A course in scientific or technical writing designed to help students improve their writing skills in preparation for their professions. Specialized training is offered in writing of proposals, reports, instructions, letters, abstracts, resumes, etc.

WRTG 212 3 cr.
Writing for the Law
This course aims to help the student develop the writing skills that will be of particular value to prospective lawyers. Readings, exercises, and assignments stress precision and conciseness as well as careful argument. The course should also be valuable to any student who wants to improve his/her analytical ability.

WRTG 213 3 cr.
Fiction Writing I
Designed to increase students’ skills in writing short fiction, this course augments frequent practice in the genre with attention both to theories of short-story composition and to diverse examples. In a workshop atmosphere, students will read and discuss one another’s work as well as fiction by well-known authors. Photocopying fee.

WRTG 214 3 cr.
Nonfiction Writing I
Designed to develop skills in writing creative nonfiction prose, this course employs a workshop format and requires intensive reading and analysis of student work as well as work by noted practitioners such as Orwell, Baldwin, Didion, and Dillard. Photocopying fee.

WRTG 215 3 cr.
Play Writing I
This course is designed to teach students the basic elements and techniques involved in writing for theatrical performance. Students will write either a one-act play or one act of a two- or three-act play. This course may be counted toward the Theatre Major, Minor, or Track. Photocopying fee.

WRTG 216 3 cr.
Poetry Writing I
Theory and practice of writing poems. Opportunity for sustained, serious responses to student work and practical advice on publishing, graduate programs, etc. The course employs a workshop format and expects students to possess facility with language and a love of reading and writing. Photocopying fee.

WRTG 218 3 cr.
Writing the Web
Students will analyze both the visual and textual contents of e-mail, news groups, chat groups, MUs, and Web sites, and will be expected to produce a portfolio or Web site that demonstrates their ability to work in this new medium. Discussion topics include ethical issues unique to the Internet writing environment.

WRTG 310 3 cr.
Strategies for Teaching Writing
This course for English/Education majors emphasizes strategies for taking students into, through, and beyond the writing process. Students have many opportunities to plan and to design writing assignments, to conduct writing sessions, and to evaluate written composition.

WRTG 313 3 cr.
Fiction Writing II
(Prerequisite: WRTG 213) The advanced workshop augments intensive student writing assignments with theoretical discussions and diverse examples of good fiction by established writers. Photocopying fee.

WRTG 314 3 cr.
Nonfiction Writing II
(Prerequisite: WRTG 214) The advanced workshop augments intensive student writing assignments with discussion and analysis of creative nonfiction by various hands. Photocopying fee.

WRTG 315 3 cr.
Play Writing II
(Prerequisite: WRTG 215) This advanced workshop builds on the skills acquired in Play Writing I, and includes intensive reading and writing assignments that encourage students to explore theatrical styles beyond realism. This course may be counted toward the Theatre major, minor or track. Photocopying fee.

WRTG 316 3 cr.
Poetry Writing II
(Prerequisite: WRTG 216) Advanced workshop on practice and theory of writing poetry. The course encourages extensive reading and intensive writing. Photocopying fee.

WRTG 382-383, 482-483 Variable Credit
Guided Independent Study
A tutorial program open to junior and senior students who have completed appropriate lower-division coursework. Content determined by genre and mentor.

WRTG 480 Variable Credit
Variable Credit Internship
English majors and/or Writing minors can receive internship credits for a variety of on-the-job experiences. Approval must be obtained beforehand from the supervising faculty member, chair and dean.

ENVIRONMENTAL SCIENCE

Faculty
Michael C. Cann, Ph.D., Co-Director, Chemistry Department; Michael D. Carey, Ph.D., Co-Director, Biology Department
See Biology and Chemistry for faculty listings.

Overview
The Environmental Science major is an interdisciplinary program of the Biology and Chemistry Departments at The University of Scranton. The Environmental Science major has the following objectives:
1. To prepare students for positions (in the public or private sector) in the broad field of environmental analysis, compliance, and technology;
2. To prepare students for advanced study in environmental science;
3. To provide a sufficiently comprehensive science and liberal arts background to allow students to pursue advanced training or work in other fields that deal with environmental issues, e.g., environmental law, environmental health, and environmental regulation in business and industry.

The Environmental Science program provides a rigorous and comprehensive grounding in the biological, chemical, and physical aspects of the natural environment, and in the analytical and instrumental techniques used to investigate environmental problems. Upper-class students may choose to focus more closely on either the chemical or biological aspects of environmental science, and must complete either an undergraduate research project or an internship in environmental science. The program also is designed to expose students to the social, political, regulatory, economic, and ethical concerns that are commensurate with defining and addressing environmental issues in today’s world.

Environmental Science Curriculum

I. Required courses in the major and cognate are commensurate with defining and addressing regulatory, economic, and ethical concerns that exposure to the social, political, regulatory, economic, and ethical concerns that are commensurate with defining and addressing environmental issues in today’s world.

II. The student must complete four courses from among the following electives within the major; at least one course must be chosen from each group:

Group A
- CHEM 342 Env. Toxicology 3 cr.
- CHEM 344 Env. Geochemistry 3 cr.
- CHEM 350 General Biochemistry I 3 cr.
- CHEM 352 Chemical Toxicology 3 cr.

Group B
- BIOL 195 Tropical Biology 3 cr.
- BIOL 250 Microbiology 5 cr.
- BIOL 272 Invertebrate Biology 5 cr.
- BIOL 273 Marine Ecology 3 cr.
- BIOL 349 Plant Physiology 5 cr.
- BIOL 370 Animal Behavior 4.5 cr.
- BIOL 374 Vertebrate Biology 4.5 cr.
- BIOL 375 Evolution 3 cr.
- BIOL 471 Applied Ecology 3 cr.
- BIOL 472 Systems Ecology 3 cr.
- BIOL 473 Estuarine Ecology 5 cr.

III. In fulfilling GE requirements, students are strongly encouraged to enroll in:
- PHIL 213 Environmental Ethics 3 cr.
- PS 230 Env. Laws and Regs. 3 cr.
- ECO 103 Econ. of Env. Issues 3 cr.

Course Descriptions
Most of the required and recommended courses in the Environmental Science major reside in other departments, and their descriptions can be found under the appropriate departmental listing.

ESCI 440-441 2 cr.
Topics in Environmental Science
(Prerequisite: Senior Standing in ESCI major or permission of instructor) One credit/semester. Discussions of current and significant environmental science issues.

ESCI 480-481 3 cr.
Internship in Environmental Science
(Prerequisite: Senior Standing in ESCI major or permission of instructor) 1.5 credits/semester. Student to work with private firm, advocacy group, or governmental agency on an environmental issue or technique that involves application of scientific principles to monitor, test, or develop/implement solutions to environmental problems. Project and institutional sponsor subject to approval of the Environmental Science Committee; final project report required.

FOREIGN LANGUAGES
AND LITERATURES

Faculty
Linda Ledford-Miller, Ph.D., Chair
Joyce M. Hanks, Ph.D.
Thomas A. Kamla, Ph.D.
Robert A. Parsons, Ph.D.
Virginia A. Pichietti, Ph.D.
Sergio Ramírez-Franco, Ph.D.
Joseph P. Wilson, Ph.D.
Habib K. Zanzana, Ph.D.

Mission Statement
The mission of the Department of Foreign Languages and Literatures is to prepare students to become proficient in a language, a literature, and a culture other than English so that they may lead empowered and productive lives as global citizens. Foreign language students, especially majors and minors, employ their enhanced cultural awareness, intercultural sensitivity, and global perspective, in order to meet the innumerable challenges of an ever increasingly interrelated and interdependent world.

The Department of Foreign Languages and Literatures at The University of Scranton adheres to the Ignatian principle that foreign language education is a vital part of the student’s intellectual formation. Foreign language acquisition is a vital part of the liberal arts education that is at the core of Jesuit education. Proficiency in foreign languages allows students to understand better the world in which they live; to comprehend better the intellectual and cultural traditions of others; to think and express themselves logically, precisely, and critically in one or more foreign languages; to acquire skills in literary criticism by reading representative foreign authors; to gain insight into the evolution of the culture and civilization of foreign peoples as reflected in their literature.

The Bachelor of Arts program in Classical Languages gives students a solid foundation in Latin and Greek to engender an appreciation of the liberal aspects of Classical studies. Classics majors are encouraged to take their junior year abroad at Loyola University’s Rome Center of Liberal Arts, with which The University of Scranton is affiliated.

Foreign Language majors and students pursuing teaching certification must complete 36 credits in one language beginning with the intermediate level if it is modern, and the elementary level if it is classical. Modern Language majors normally take at least 12 credits in a second language, either modern or classical, as their cognate. A double major may be pursued by taking 36 credits in one language, beginning with the intermediate or elementary level, and by satisfying the major and cognate requirements of another department. The placement of students at a particular foreign-language level is the responsibility of the department.

The department urges students to study abroad during their junior year. In addition, it strongly recommends that students returning from the foreign study experience take at least one course per semester in their major language during the senior year. All returning students are required to take at least one 400-level course in their major language at The University of Scranton.

Minors in Language
French, German, Greek, Italian, Latin and Spanish: 18 credits at the elementary level or above. Placement in a previously studied language will be determined by placement testing in the Language Learning Center.

Overview
The program of the Department of Foreign Languages and Literatures is designed to enable students to read, write, speak and comprehend one or more foreign languages; to think and express themselves logically, precisely, and critically in one or more foreign languages; to acquire skills in literary criticism by reading representative foreign authors; to gain insight into the evolution of the culture and civilization of foreign peoples as reflected in their literature.

Portuguese: 15 credits consisting of PORT 110, PORT 210, and two advanced Portuguese courses.

Minors in Japanese and Russian are sometimes possible, depending upon the availability of courses in these languages or through study abroad. Japanese: 18 credits at the elementary level or higher. Russian: 16 credits consisting of RUSS 110, RUSS 210 and 6 additional credits.

Students who minor in two languages must complete 12 credits in each language beginning at the intermediate level or higher. Elementary courses in any language are not open to students who have studied two or more years of the same language in high school. Exceptions to this policy must be approved by the Department of Foreign Languages and Literatures.

Major in International Language-Business
The major in International Language-Business is a professionally oriented program. Its purpose is to make language study a more career-structured discipline by providing students with the opportunity to acquire a liberal education while, at the same time, taking courses specifically relevant to a business enterprise.

In order to bridge the communication gap between multinational businesses and the lack of functional language skills often exhibited by the personnel representing them, specialized language courses focusing on the business terminology and cultural setting of the countries in question complement the regular language and business courses in this major.

The department urges students to study abroad during their junior year. In addition, it strongly recommends that students who spend the entire junior year abroad plan their studies carefully, so that they will be able to take at least one course per semester in their major language during the senior year. Students who pursue a business internship will earn credits in addition to the 130 credits stipulated for the program, unless there is room in the free area.

Course Descriptions – Modern Languages

Arabic
ARAB 101-102 6 cr.
Elementary Arabic
Designed for non-Arabic-speaking students, this course studies modern standard Arabic and aims to enable students to use and properly pronounce simple Arabic words and to listen, speak, read and write simple sentences. This course also offers a preliminary approach to Arabic grammar.

French
FREN 101-102 6 cr.
(CF) Elementary French
Designed to impart a good basic foundation in comprehending, speaking, reading, and writing French language. Designed primarily for students with little or no background in the French language.

FREN 203 3 cr.
French Cultural Heritage
This course aims to develop understanding of the culture, literature and civilization of France. Representative readings from different periods. Lectures, discussions and readings in English.

FREN 211-212 6 cr.
(CFD) Intermediate French
(Prerequisites: FREN 101-102 or equivalent, as determined by placement exam) Completion of FREN 212 satisfies one semester of the cultural diversity requirements. Designed to give greater scope and depth to the student’s knowledge of the grammar and style of the French language. Taught in French.

FREN 239 3 cr.
(CL) French Christian Thinkers
(Prerequisite: An Introduction to Literature course in the English or Foreign Language departments) Readings and analysis of writings by French Christians from the Middle Ages through the 20th century. Taught in English, but credit in French available for students able to read and write in French, who meet one additional class period per week with instructor.

FREN 311 3 cr.
(CFD) French Conversation
(Prerequisites: FREN 211-212 or equivalent, as determined by placement exam) Intensive

(CLD) French Christian Thinkers
(Prerequisite: An Introduction to Literature course in the English or Foreign Language departments) Readings and analysis of writings by French Christians from the Middle Ages through the 20th century. Taught in English, but credit in French available for students able to read and write in French, who meet one additional class period per week with instructor.

FREN 311
(CFD) French Conversation
(Prerequisites: FREN 211-212 or equivalent, as determined by placement exam) Intensive
French conversation, emphasizing cross-cultural comparisons and development of self-expression in French. Taught in French.

FREN 312  3 cr.
(CFW) French Composition*
(Prerequisites: FREN 211-212 or equivalent, as determined by placement exam) An intensive course in writing in French, stressing grammar, writing analysis and composition. Taught in French.

FREN 313  3cr.
(CEW) Survey of French Literature I
(Prerequisites: FREN 311-312 or equivalent) A review of French literature from the Renaissance to the 18th century.

* Meets three hours per week in class; includes activities inside and/or outside the classroom that involve Language Learning Center (language lab) resources.

FREN 314  3cr.
(CL, D) Survey of French Literature II
(Prerequisites: FREN 311-312 or equivalent) A review of French literature of the 19th and 20th centuries.

FREN 315  3cr.
(D) Survey of French Culture and Civilization
(Prerequisites: FREN 311-312 or equivalent) A review of the geography, history, art and other components of the heritage of continental France, from antiquity to the present.

FREN 316  3cr.
(D) Survey of Francophone Culture and Civilization
(Prerequisites: FREN 311-312 or equivalent) A historical view of the cultural contribution and heritage of French-speaking peoples living outside continental France.

(CL,D) Survey of German Literature and Culture
(Prerequisites: GERM 311-312 or equivalent) A survey of German literature from the 11th century to the contemporary period, with special emphasis on the main intellectual currents as well as the social and political developments.

GERM 319 3 cr.
Business German*
(Prerequisites: GERM 311-312 or equivalent)
Overview of the spoken and written language of the German business world. Formalities and conventions of letter writing, banking, import/export, and other commercial transactions. Analysis of terminology from business-related areas such as finance, insurance and international commerce within a contemporary cultural setting.

GERM 321-322 6 cr.
(W) Advanced Stylistics*
(Prerequisites: GERM 311-312 or equivalent)
Advanced study of syntax and semantics aimed at the development of stylistic sensitivity. Interdisciplinary textual analyses (business and commercial German, communications media, the sciences and humanities) for further practice in composition and conversation.

GERM 421 3 cr.
German Classicism and Romanticism
(Prerequisites: GERM 311-312 or equivalent) A study of the literature of the 18th (Goethe, Schiller, Holderlin) and early 19th centuries (Kleist, Hoffmann, Novalis) in their Classical and Romantic contexts.

GERM 423 3 cr.
Realism and Naturalism
(Prerequisites: GERM 311-312 or equivalent) A study of the works of late 19th-century authors, such as Storm, Fontane and Keller.

GERM 425 3 cr.
German Literature up to 1945
(Prerequisites: GERM 311-312 or equivalent) An in-depth study of such authors as Brecht, Mann, Kafka and Rilke.

GERM 427 3 cr.
Postwar German Literature
(Prerequisites: GERM 311-312, or equivalent) Concentration on contemporary authors such as Frisch, Durrenmatt, Grass and Boll, as well as representative authors from the former East Germany.

GERM 482-483 Variable Credit
Independent Study
(Prerequisites: GERM 311-312 or equivalent; junior or senior standing) Tutorial content determined by mentor.

Hebrew

HEBR 101-102 6 cr.
(C,F) Biblical Hebrew
(HEBR 101 is a prerequisite for HEBR 102) A systematic introduction to the fundamentals of Biblical Hebrew grammar and to certain aspects of ancient Semitic language and culture.

Italian
(Additional course work is available by arranging independent and/or foreign study)

ITAL 101-102 6 cr.
(C,F) Elementary Italian*
Introduction to the Italian language. Designed for beginners.

ITAL 207 3 cr.
(CL,D,W) Italian Women’s Writing in Translation
This course addresses women’s voices and experiences in 20th-century Italian prose, poetry, theater and film. Not all the artists subscribe to a
ITAL 208 3 cr. (D, W) Envisioning Italy From Novel to Film: The Case of Neorealism
This course addresses the way in which authors and film makers have envisioned Italy in the Neorealism tradition. Students will analyze neorealism novels and their cinematic adaptations to determine similarities and differences in the artists’ visions and interpretations of Italian society. This course does not count toward the Italian minor or major.

ITAL 209 3 cr. (D) Italian Cinema: From Origins to Present
Course examines Italian cinema from the silent era to the present. Focus on the impact of historical events on the film industry and on the transformation in style and content in the reaction to specific moments in Italian history. Films with subtitles. Taught in English. Does not count toward the Italian minor or major.

ITAL 211-212 6 cr. (C,E,D) Intermediate Italian*
(Prerequisites: ITAL 101-102 or equivalent) Completion of ITAL 212 satisfies one semester of the cultural diversity requirements. Grammatical review, written and oral composition with selected cultural readings of intermediate difficulty.

ITAL 295 3 cr. (D) Italian Culture and Society
An examination of Italian culture and society from the Renaissance to today. The course traces the development of Italian culture and society through primary texts, including essays, plays, short stories, films, opera and contemporary music, and sculpture and painting. The course includes travel to Italy.

ITAL 313 3 cr. (C,E,D) Survey of Italian Literature I
(Prerequisite: ITAL 311-312 or equivalent) This course, conducted in Italian, introduces students to 19th- and 20th-century Italian literature and to significant literary movements and figures from these periods.

ITAL 314 3 cr. (C,E,D) Survey of Italian Literature II
(Prerequisites: ITAL 311-312 or equivalent) This course, conducted in Italian, introduces students to Italian literature from the medieval period to the 18th century. It focuses on significant literary movements and figures from these periods.

Japanese
(Additional course work is available by arranging independent and/or foreign study)

JAP 101-102 6 cr. (C,E,D) Elementary Japanese*
Development of the fundamental skills, listening, speaking, reading, and writing, with emphasis on language performance. Emphasis on practical application of the basic skills for business-related activities. Relevant cultural aspects are introduced. Designed primarily for students with no background in the Japanese language.

JAP 211-212 3 cr. (C,E,D) Intermediate Japanese*
(Prerequisites: JAP 101-102 or equivalent) This course continues development of the four major skills: listening, speaking, reading, and writing. Upon completion of the course students will understand all the basic concepts of the structure of the language.

PORT 210 4.5 cr. (C,E,D) Intensive Intermediate Portuguese*
(Prerequisites: PORT 110 or equivalent) A continuation of elementary Portuguese. Students will refine, through oral and written activities, literary and other readings, and video, the skills learned in PORT 110. Cultural knowledge of the Lusophone world will also be further developed. Meets four days a week. Offered spring only, odd years.

Russian
(Additional course work is available by arranging independent and/or foreign study)

RUSS 110 5 cr. (C,F) Intensive Elementary Russian
Primary emphasis on developing the skills of understanding, speaking, reading and writing Great Russian, with thorough study of the Cyrillic alphabet. Meets five days a week. Offered fall only, even years.

RUSS 210 5 cr. (C,F) Intensive Intermediate Russian
(Prerequisite: RUSS 110 or equivalent) Continues development of the four major skills: listening, speaking, reading, and writing. Builds on grammatical concepts learned in RUSS 110 and provides a solid foundation for the student interested in visiting Russia and/or in reading the Russian classics, contemporary literature and newspapers. Meets five days a week. Offered spring only, odd years.

RUSS 295 6 cr. (C,L,D) Contemporary Russian Culture and Language
(Prerequisite: RUSS 210 or equivalent) A summer travel course to St. Petersburg, Russia. An examination of the development of Russian history, art, literature, language, and culture.

Spanish

SPAN 101-102 6 cr. (C,F) Elementary Spanish*
Fundamentals of grammar, pronunciation, conversation; suitable readings and written exercises. Designed primarily for students with little or no background in the Spanish language.

SPAN 203 3 cr. (C,L,D) Topics in Latin American Cultural Heritage
This course aims to develop understanding of the culture, literature, and civilization of Latin America (i.e., Brazil and Spanish America). Lectures, discussions and readings in English.

SPAN 211-212 6 cr. (C,F) Intermediate Spanish*
(Prerequisites: SPAN 101-102 or equivalent, as determined by placement exam) Completion of SPAN 212 satisfies one semester of the cultural diversity requirements. Grammatical review, written and oral composition with selected cultural readings of intermediate difficulty.

SPAN 295 6 cr. (C,F,D) Contemporary Mexican Culture and Language*
(Prerequisite: SPAN 211 or higher) An intensive travel course to Guadalajara, Mexico; 3 credits in Humanities (foreign language area), 3 credits in the social sciences (political science area), and cultural diversity credit. Team taught by University faculty from the departments of Foreign Languages and Political Science with assistance from Mexican faculty at UNIVA. (Also listed as PS 295.)

SPAN 296 3 cr. (C,L,D) Topics in the Culture, Civilization, and Literature of Latin America
Travel course: develops understanding of the culture, literature and civilization of Latin America. Taught in English. Students desiring credit in Spanish must do all readings and writing in Spanish and meet with professor for discussions in Spanish.

Medical Spanish*

SPAN 310 3 cr. (C,F,D) Medical Spanish*
(Prerequisites: SPAN 311 or equivalent) Designed for the student who plans to work in any area of health care, this course focuses on the needs and problems of Spanish-speaking patients. Students learn specialized vocabulary and improved communicative ability through conversation and composition and develop an increased awareness of health issues often of particular concern to Hispanics.

Spanish Conversation*

SPAN 311 3 cr. (C,F,D) Spanish Conversation*
(Prerequisites: SPAN 211-212 or equivalent, as determined by placement exam) Reading-based conversation stressing development of self-expression in Spanish. Practice in oral composition.

* Meets three hours per week in class; includes activities inside and/or outside the classroom that involve Language Learning Center (language lab) resources.

** Meets three hours per week in class; includes activities inside and/or outside the classroom that involve Language Learning Center (language lab) resources.
feminist ideology, but their works share an interest in issues concerning women. Students examine the styles, themes and historical contexts of the primary works. Does not count toward the Italian minor or major.

ITAL 208 3 cr. (D,W) Envisioning Italy From Novel to Film: The Case of Neorealism
This course addresses the way in which authors and film makers have envisioned Italy in the Neorealist tradition. Students will analyze neorealist novels and their cinematic adaptations to determine similarities and differences in the artists’ visions and interpretations of Italian society. This course does not count toward the Italian minor or major.

ITAL 209 3 cr. Italian Cinema: From Origins to Present
Course examines Italian cinema from the silent era to the present. Focus on the impact of historical events on the film industry and on the transformation in style and content in the reaction to specific moments in Italian history. Films with subtitles. Taught in English. Does not count toward the Italian minor or major.

ITAL 211-212 6 cr. (CF) Intermediate Italian*
(Prerequisites: ITAL 101-102 or equivalent)
Completion of ITAL 212 satisfies one semester of the cultural diversity requirements. Grammatical review, written and oral composition with selected cultural readings of intermediate difficulty.

ITAL 295 3 cr. (D) Italian Culture and Society
An examination of Italian culture and society through primary texts, including essays, plays, short stories, films, opera and contemporary music, and sculpture and painting. The course includes travel to Italy.

ITAL 311-321 6 cr. (CF, W) Advanced Italian Composition and Conversation*
(Prerequisite: ITAL 211-212 or equivalent)
Completion of ITAL 312 satisfies one semester of the writing-intensive requirements. An intensive course in Italian composition and conversation with emphasis on detailed study of advanced grammatical and stylistic usage of the Italian language.

ITAL 313 3 cr. (CL) Survey of Italian Literature I
(Prerequisite: ITAL 311-312 or equivalent) This course, conducted in Italian, introduces students to 19th- and 20th-century Italian literature and to significant literary movements and figures from these periods.

ITAL 314 3 cr. (CL) Survey of Italian Literature II
(Prerequisites: ITAL 311-312 or equivalent) This course, conducted in Italian, introduces students to Italian literature from the medieval period to the 18th century. It focuses on significant literary movements and figures from these periods.

Japanese
(Additional course work is available by arranging independent and/or foreign study)

JAP 101-102 6 cr. (CF) Elementary Japanese*
Development of the fundamental skills, listening, speaking, reading and writing, with emphasis on language performance. Emphasis on practical application of the basic skills for business-related activities. Relevant cultural aspects are introduced. Designed primarily for students with no background in the Japanese language.

JAP 211-212 3 cr. Intermediate Japanese*
(Prerequisites: JAP 101-102 or equivalent) This course continues development of the four major skills: listening, speaking, reading and writing. Upon completion of the course students will understand all the basic concepts of the structure of the language.

Portuguese
(Additional course work is available by arranging independent and/or foreign study)

PORT 210 4.5 cr. (CF) Intensive Intermediate Portuguese*
(Prerequisite: PORT 101 or equivalent) A continuation of elementary Portuguese. Students will refine, through oral and written activities, literary and other readings, and video, the skills learned in PORT 110. Cultural knowledge of the Lusophone world will also be further developed. Meets four days a week. Offered spring only, odd years.

Russian
(Additional course work is available by arranging independent and/or foreign study)

RUSS 110 5 cr. (CF) Intensive Elementary Russian
Primary emphasis on developing the skills of understanding, speaking, reading and writing Great Russian, with thorough study of the Cyrillic alphabet. Meets five days a week. Offered fall only, even years.

RUSS 210 5 cr. (CF) Intensive Intermediate Russian
(Prerequisite: RUSS 110 or equivalent) Continuation of elementary Russian. Development of the four major skills: listening, speaking, reading, and writing. Builds on grammatical concepts learned in RUSS 110 and provides a solid foundation for the student interested in visiting Russia and/or in reading the Russian classics, contemporary literature and newspapers. Meets five days a week. Offered spring only, odd years.

RUSS 295 6 cr. Contemporary Russian Culture and Language
(Prerequisite: RUSS 210 or equivalent) A summer travel course to St. Petersburg, Russia. An examination of the development of Russian history, art, literature, language and culture.

Spanish

SPAN 101-102 6 cr. (CF) Elementary Spanish*
Fundamentals of grammar, pronunciation, conversation; suitable readings and written exercises. Designed primarily for students with little or no background in the Spanish language.

SPAN 203 3 cr. (CL,D) Topics in Latin American Cultural Heritage
This course aims to develop understanding of the culture, literature and civilization of Latin America (i.e., Brazil and Spanish America). Lectures, discussions and readings in English.

SPAN 211-212 6 cr. (CF) Intermediate Spanish*
(Prerequisites: SPAN 101-102 or equivalent, as determined by placement exam) Completion of SPAN 212 satisfies one semester of the cultural diversity requirements. Grammatical review, written and oral composition with selected cultural readings of intermediate difficulty.

SPAN 295 6 cr. (C,D,S) Contemporary Mexican Culture and Language*
(Prerequisite: SPAN 211 or higher) An intersession travel course to Guadalajara, Mexico; 3 credits in Humanities (foreign language area), 3 credits in the social sciences (political science area), and cultural diversity credit. Team taught by University faculty from the departments of Foreign Languages and Political Science with assistance from Mexican faculty at UNIVA. (Also listed as PS 295.)

SPAN 296 3 cr. (CL,D) Topics in the Culture, Civilization, and Literature of Latin America
Travel course, develops understanding of the cultural, literary and civilization of Latin America. Taught in English. Students desiring credit in Spanish must do all readings and writing in Spanish and meet with professor for discussions in Spanish.

SPAN 310 3 cr. Medical Spanish*
(Prerequisites: SPAN 311 or equivalent)
Designed for the student who plans to work in any area of health care, this course focuses on the needs and problems of Spanish-speaking patients. Students learn specialized vocabulary and improved communicative ability through conversation and composition and develop an increased awareness of health issues often of particular concern to Hispanics.

SPAN 311 3 cr. (C,D) Spanish Conversation*
(Prerequisites: SPAN 211-212 or equivalent, as determined by placement exam) Reading-based conversation stressing development of self-expression in Spanish. Practice in oral composition.

* Meets three hours per week in class; includes activities inside and/or outside the classroom that involve Language Learning Center (language lab) resources.
SPAN 312 3 cr.  
(CFW) Spanish Composition*  
(Prerequisite: SPAN 311 or equivalent) Intensive writing practice stressing grammar, writing analysis, and composition.

SPAN 313 3 cr.  
Spanish Culture and Civilization*  
(Prerequisites: SPAN 311-312 or equivalent) An overview of the diverse historical, political, religious and artistic factors that have determined the cultural make-up of the peoples of the Iberian peninsula.

SPAN 314 3 cr.  
(D,W) Topics in Latin-American Culture and Civilization*  
(Prerequisites: SPAN 311-312 or equivalent) The course examines the diverse cultural, historical, linguistic, religious, and political features of Latin America.

SPAN 319 3 cr.  
Business Spanish*  
(Prerequisites: SPAN 311-312 or equivalent) An introduction to the principal genres of literature (poetry, short story, essay, drama and novel) through analysis of representative works in the Hispanic tradition. Required prerequisite for all upper-division literature courses.

SPAN 320 3 cr.  
(CL) Introduction to Hispanic Literature  
(Prerequisites: SPAN 311-312 or equivalent) An introduction to the principal genres of literature (poetry, short story, essay, drama and novel) through analysis of representative works in the Hispanic tradition. Required prerequisite for all upper-division literature courses.

SPAN 321 3 cr.  
(W) Advanced Stylistics*  
(Prerequisites: SPAN 311-312 or equivalent) Designed to achieve more sophisticated use of the Spanish business world. Formality and conventions of letter writing, banking, import/export, and other commercial transactions. Analysis of terminology from business-related areas such as finance, insurance and international commerce within a contemporary cultural setting.

SPAN 323 3 cr.  
Contemporary Issues*  
(Prerequisite: SPAN 311-312 or equivalent) A conversation-intensive course. Discussion and reports based on readings in a broad range of current periodicals and focusing on issues of relevance to the Hispanic world and to the particular career or interest areas of students.

SPAN 330 3 cr.  
(CL) History of Spanish Literature  
(Prerequisite: SPAN 320) Study of Spanish literature from Cantar de mio Cid to 20th century, with emphasis on main literary currents in each century.

SPAN 331 3 cr.  
(CL,D) Survey of Spanish-American Literature  
(Prerequisite: SPAN 320) A survey of Spanish-American literature from the 16th century to the present, with representative readings from each of the principal cultural areas.

SPAN 335 3 cr.  
(D) Service and the Hispanic Community  
(Prerequisites: SPAN 311-312 or equivalent) Focus on Hispanic cultures and traditions, the immigrant experience and cultural displacement. Each student, with assistance from local social service agencies, College Volunteers and the course professor, develops and carries out a service project to the local Hispanic community involving 40 to 45 hours of service work.

SPAN 421 3 cr.  
Twentieth-Century Spanish Drama  
(Prerequisite: SPAN 320) Peninsular drama of the 20th century including dramatic forms after Buero Vallejo and new directions of Spanish theatre in the post-Franco era.

SPAN 422 3 cr.  
Spanish-American Drama  
(Prerequisite: SPAN 320) Spanish-American drama from the late 19th century to the present, with emphasis on contemporary trends.

SPAN 423 3 cr.  
Hispanic Lyric Poetry  
(Prerequisite: SPAN 320) The development of lyric poetry in the Spanish-speaking world. Examples of early poetry in Spain and Spanish America are studied to establish an awareness of the Hispanic lyric tradition, but the main focus of the course is on 20th-century Spanish America and such figures as Gabriela Mistral, Pablo Neruda, and Cesar Vallejo.

SPAN 439 3 cr.  
The Craft of Translation  
A study of the techniques of translation with emphasis on accurate terminology and proper syntax when translating newspaper articles, legal documents, medical records, business records and correspondence, essays, poems, songs, and short fiction.

SPAN 482-483 Variable Credit  
Guided Independent Study  
(Prerequisites: Junior or senior standing; SPAN 311-312 or equivalent) A tutorial program with content determined by mentor.

SPAN 484 3 cr.  
Topics in Hispanic Prose  
(Prerequisites: SPAN 320) Prose fiction of Spain and/or Spanish America. Topics may focus on an author, a period, a movement, a country or region, or a theme. Content may vary and the course may, therefore, be repeated for credit with consent of department chair.

Course Descriptions – Classical Languages

Greek

GRK 111-112 6 cr.  
(CF) Elementary Greek  
An intensive course in the fundamentals of Classical Greek grammar, with readings from both Attic and Koine (New Testament) Greek texts in GRK 112.

GRK 205 3 cr.  
(D) Legacy of Greece and Rome  
Survey of the artistic and cultural treasures of classical Greece and Rome, with a focus on their enduring legacy in our own civilization.

GRK 207 3 cr.  
Roots of Greek in English  
The relationship of both Greek and English to the other languages of the Indo-European family: the Greek elements that have come into English are presented: bases, prefixes, numerals, hybrids, etc. A study of the 20-25% English words that come from Greek, particularly in scientific fields.

GRK 211-212 6 cr.  
Intermediate Greek  

GRK 213 3 cr.  
(CL,D,W) Classical Greek Literature and Mythology  
This course examines the role that mythology played in Greek literature, and examines the changing attitudes of the Greeks towards the Olympian gods from Homer to the fourth century B.C. All readings and lectures in English.

GRK 220 3 cr.  
Ancient Civilization: Greece  
The political, constitutional, and cultural history of Greece from the earliest times to the death of Alexander the Great. All readings and lectures in English.

GRK 295 3 cr.  
(D) Classic and Contemporary Greek Culture  
Travel course (nine days) during the Spring Break. A study of contemporary and classical Greek culture with a focus on the Greek legacy in our own Western civilization. In Greece, students visit Athens, the Acropolis, National Archeological Museum, Corinth, Mycenae, Epidaurus, Olympia, Delphi, and three Greek islands. Additionally, students attend 20 regularly scheduled classes during the semester.

GRK 311-312 3-6 cr.  
Readings in Greek Literature  
(Prerequisites: GRK 211-212 or equivalent) Selections from Greek writers to suit students’ special interests.

GRK 482-483 Variable Credit  
Guided Independent Study  
(Prerequisites: GRK 211-212 or equivalent; junior or senior standing) Tutorial content determined by mentor.

Latin

LAT 111-112 6 cr.  
(CF) Elementary Latin  
An intensive course in the fundamentals of Latin reading and composition.
SPAN 312 3 cr.
(CFW) Spanish Composition*
(Prerequisite: SPAN 311-312 or equivalent) Intensive writing practice stressing grammar, writing analysis, and composition.

SPAN 313 3 cr.
Spanish Culture and Civilization*
(Prerequisites: SPAN 311-312 or equivalent) An overview of the diverse historical, political, religious and artistic factors that have determined the cultural make-up of the peoples of the Iberian peninsula.

SPAN 314 3 cr.
(D,W) Topics in Latin-American Culture and Civilization*
(Prerequisites: SPAN 311-312 or equivalent) The course examines the diverse cultural, historical, linguistic, religious, and political features of Latin America.

SPAN 319 3 cr.
Business Spanish*
(Prerequisites: SPAN 311-312 or equivalent) Overview of the spoken and written language of the Spanish business world. Formalities and conventions of letter writing, banking, import/export, and other commercial transactions. Analysis of terminology from business-related areas such as finance, insurance and international commerce within a contemporary cultural setting.

SPAN 320 3 cr.
(CL) Introduction to Hispanic Literature
(Prerequisites: SPAN 311-312 or equivalent) An introduction to the principal genres of literature (poetry, short story, essay, drama and novel) through analysis of representative works in the Hispanic tradition. Required prerequisite for all upper-division literature courses.

SPAN 321 3 cr.
(W) Advanced Stylistics*
(Prerequisites: SPAN 311-312 or equivalent) Designed to achieve more sophisticated use of Spanish, both orally and in writing. Includes intensive examination of compositions and translation exercises, as well as discussion of areas of particular difficulty for the non-native speaker (e.g., false cognates and unfamiliar structures).

SPAN 3123 3 cr.
Contemporary Issues*
(Prerequisite: SPAN 311-312 or equivalent) A conversation-intensive course. Discussion and reports based on readings in a broad range of current periodicals and focusing on issues of relevance to the Hispanic world and to the particular career or interest areas of students.

SPAN 330 3 cr.
(CL) History of Spanish Literature
(Prerequisite: SPAN 320) Study of Spanish literature from Cantar de Mio Cid to 20th century, with emphasis on main literary currents in each century.

SPAN 331 3 cr.
(CL,D) Survey of Spanish-American Literature
(Prerequisite: SPAN 320) A survey of Spanish-American literature from the 16th century to the present, with representative readings from each of the principal cultural areas.

SPAN 335 3 cr.
(D) Service and the Hispanic Community
(Prerequisites: SPAN 311-312 or equivalent) Focus on Hispanic cultures and traditions, the immigrant experience and cultural displacement. Each student, with assistance from local service agencies, Colleague Volunteers and the course professor, develops and carries out a service project to the local Hispanic community involving 40 to 45 hours of service work.

SPAN 421 3 cr.
Twentieth-Century Spanish Drama
(Prerequisite: SPAN 320) Peninsular drama of the 20th century including dramatic forms after Buero Vallejo and new directions of Spanish theatre in the post-Franco era.

SPAN 422 3 cr.
Spanish-American Drama
(Prerequisite: SPAN 320) Spanish-American drama from the late 19th century to the present, with emphasis on contemporary trends.

SPAN 430 3 cr.
(CL,D) Hispanic Women Writers
(Prerequisite: SPAN 320) This course examines writing by Hispanic women, including prose, poetry, drama and essays, and investigates the social, political, aesthetic, and feminist contexts of their writing. Cross-listed with Women’s Studies. (See Women’s Studies Concentration section.)

SPAN 433 3 cr.
Hispanic Lyric Poetry
(Prerequisite: SPAN 320) The development of lyric poetry in the Spanish-speaking world. Examples of early poetry in Spain and Spanish America are studied to establish an awareness of the Hispanic lyric tradition, but the main focus of the course is on 20th-century Spanish America and such figures as Gabriela Mistral, Pablo Neruda, and Cesar Vallejo.

GRK 211-212 6 cr.
Intermediate Greek

GRK 213 3 cr.
(CL,D,W) Classical Greek Literature and Mythology
This course examines the role that mythology played in Greek literature, and examines the changing attitudes of the Greeks towards the Olympian gods from Homer to the fourth century B.C. All readings and lectures in English.

GRK 220 3 cr.
Ancient Civilization: Greece
The political, constitutional, and cultural history of Greece from the earliest times to the death of Alexander the Great. All readings and lectures in English.

GRK 295 3 cr.
(D) Classic and Contemporary Greek Culture
Travel course (nine days) during the Spring Break. A study of contemporary and classical Greek culture with a focus on the Greek legacy in our own Western civilization. In Greece, students visit Athens, the Acropolis, National Archeological Museum, Corinth, Mycenae, Epidaurus, Olympia, Delphi, and three Greek islands. Additionally, students attend 20 regularly scheduled classes during the semester.

GRK 311-312 3-6 cr.
Readings in Greek Literature
(Prerequisites: GRK 211-212 or equivalent) Selections from Greek writers to suit students’ special interests.

GRK 482-483 Variable Credit
Guided Independent Study
(Prerequisites: Junior or senior standing; SPAN 311-312 or equivalent) A tutorial program with content determined by mentor.

GREEK
GRK 111-112 6 cr.
(CF) Elementary Greek
An intensive course in the fundamentals of Classical Greek grammar, with readings from both Attic and Koine (New Testament) Greek texts in GRK 112.

GRK 205 3 cr.
(D) Legacy of Greece and Rome
Survey of the artistic and cultural treasures of classical Greece and Rome, with a focus on their enduring legacy in our own civilization.

GRK 207 3 cr.
Roots of Greek in English
The relationship of both Greek and English to the other languages of the Indo-European family: the Greek elements that have come into English are presented: bases, prefixes, numerals, hybrids, etc. A study of the 20-25% English words that come from Greek, particularly in scientific fields.

LAT 111-112 6 cr.
(CF) Elementary Latin
An intensive course in the fundamentals of Latin reading and composition.
LAT 205 3 cr.
History of Latin Literature
A survey of Roman and post-Roman Latin literature. Taught in English.

LAT 207 3 cr.
Roots of Latin in English
The relationship of both Latin and English to the other languages of the Indo-European family; the Latin elements that have come into English are presented; bases, prefixes, numerals, hybrids, etc. Approximately 60-65% of English words come from Latin.

LAT 211-212 6 cr.
(CF) Intermediate Latin
(Prerequisites: LAT 111-112 or equivalent) Review of fundamentals. Reading of selections from Caesar, Cicero and Virgil.

LAT 213 3 cr.
(CL,D,W) Classical Roman Literature and Mythology
The course examines the role that mythology played in Roman literature, and examines the changing attitudes of the Romans toward the divinities, manifested in literature from Plautus to Apeles. All readings and lectures in English.

LAT 220 3 cr.
Ancient Civilization: Rome
The political, constitutional, and cultural history of Rome from the earliest times to the end of the Western empire. All readings and lectures in English.

LAT 311-312 3-6 cr.
Readings in Latin Literature
(Prerequisites: LAT 211-212 or equivalent) Selections from Latin writers to suit the students’ special interests. Topics will vary from year to year; the course may, therefore, be repeated for credit.

LAT 482-483 Variable Credit
Guided Independent Study
(Prerequisites: LAT 211-212) A tutorial program open to Junior and Senior students only. Content determined by mentor.

Course Descriptions – Literature

LIT 205 3 cr.
(CL,D,W) Modern Latin-American Literature in Translation
A survey in English of 20th-century Latin American writers. Introduction to major literary movements, such as the “Boom” and “magical realism,” which have influenced writers in the U.S., Europe and elsewhere.

LIT 207 3 cr.
(CL,D,W) Literature of American Minorities
Examination of racial and ethnic groups from the settlement of America until the present. Examination of the historical context and current situation of Native Americans, African-Americans, Hispanic Americans, Asian Americans, women-as-minority, and other marginalized groups. Readings from literature and other disciplines. Cross-listed with Women’s Studies Concentration.

LIT 208 3 cr.
(CL,D) French Masterpieces in English Translation
The study of selected major works from the leading French writers of the 19th and 20th centuries who have made an important contribution to the development of Western civilization. Such authors as Stendhal, Flaubert, Gide, Proust, Camus and Malraux will be discussed.

LIT 209 3 cr.
(CL,D) Masterworks of Russian and Slavic Literature
A survey of major literary achievements of Slavic peoples, including Dostoyevsky and Tolstoy. No knowledge of Slavic languages is required. All readings and lectures are in English.

LIT 384 3 cr.
(CL,D) Special Topics in American Minority Literature
This course examines a particular minority group in American society through texts written by and about that group. Representative groups include, for example, Native Americans, African Americans, Asian Americans, Hispanic Americans and women. This course may be repeated for credit when content varies.

Lawrence W. Kennedy, Ph.D.
Lee M. Penyak, Ph.D.
Susan L. Poulsin, Ph.D.
Robert W. Shaffer, Ph.D.

Overview
The department aims: (1) to train the student in solid historical methodology; (2) to present history as the study of interdependent human activities and concrete events which have social significance; (3) to engender an intelligent and critically sympathetic understanding of various civilizations and cultures. Outstanding students are eligible for consideration in the Combined Baccalaureate/Master’s Degree program (please refer to the section on The Graduate School and the Graduate School Catalog for specifics of the program). Through careful utilization of inter-session and summer sessions, it is possible to complete both the B.A. and M.A. degrees within a four-year period. Contact the chair or the graduate-program director of the department for additional information.

See the Pre-Law section in the catalog for details of the department’s success in this area.

Minor in History
A minor in History (18 credits) should include HIST 110-111 or HIST 125-126 plus any four additional history courses.

International Studies
A major in International Studies seeks to provide the student with a full recognition and understanding of the multitudinous forces which shape the contemporary world – nationalism, wars, political and economic ideologies, cultural differentials, and modern technology. Such a broad knowledge and understanding of world affairs can be utilized in careers in teaching, international business, the legal profession, journalism, the Foreign Service of the United States and other government agencies.

Minor in International Studies
A minor in International Studies (18 credits) should include HIST 110 and 111 or PS 130 and 131 plus four additional courses from the following: PS 212, PS 213, PS 217, PS 218, PS 219, PS 221, PS 222, PS 295, PS 318, PS 319, PS 328, PS 330, PS 331, PS 332, PS 338; HIST 125, HIST 126, HIST 211, HIST 213, HIST 214, HIST 215, HIST 219, HIST 220, HIST 226, HIST 295, HIST 335, HIST 338, HIST 339, and GEOG 217.

Course Descriptions

GEOG 134 3 cr.
(S) World Regional Geography
Introduces the major concepts and skills of geography. A regional approach stresses the five themes of geography including location, place, human environment interaction, movement and region.

GEOG 217 3 cr.
(D.S) Cultural Geography
Study of the influence of geography on the origin, structure, and spread of culture. Focuses on describing and analyzing the ways language, religion, economy, government and other cultural phenomena vary or remain consistent from place to place.

HIST 110-111 6 cr.
(CH) History of the United States
The United States from the time of its European beginnings to the present with special emphasis on the history of Pennsylvania; colonial origins to Reconstruction; Gilded Age to the modern era.

HIST 120-121 6 cr.
(CH) Europe, 1500 to the Present
European history with concentration upon the political aspects of European development. The rise of national monarchies; political, social, economic and intellectual developments; industrialism, the new nationalism and liberalism.

HIST 125 3 cr.
(CH,D) Colonial Latin America
An introduction to colonial Latin American history: civilizations; the Spanish and Portuguese colonial period, with emphasis on the themes of conquest, colonialism, race, class and gender.
LAT 205 History of Latin Literature 3 cr.
A survey of Roman and post-Roman Latin literature. Taught in English.

LAT 207 Roots of Latin in English 3 cr.
The relationship of both Latin and English to the other languages of the Indo-European family; the Latin elements that have come into English are presented; bases, prefixes, numerals, hybrids, etc. Approximately 60-65% of English words come from Latin.

LAT 211-212 6 cr. (CF) Intermediate Latin
(Prerequisites: LAT 111-112 or equivalent) Review of fundamentals. Reading of selections from Caesar, Cicero and Virgil.

LAT 213 3 cr. (CL,D,W) Classical Roman Literature and Mythology
The course examines the role that mythology played in Roman literature, and examines the changing attitudes of the Romans toward the divinities, manifested in literature from Plautus to Apuleius. All readings and lectures in English.

LAT 220 3 cr. Ancient Civilization: Rome
The political, constitutional, and cultural history of Rome from the earliest times to the end of the Western empire. All readings and lectures in English.

LAT 311-312 3-6 cr. Readings in Latin Literature
(Prerequisites: LAT 211-212 or equivalent) Selections from Latin writers to suit the students' special interests. Topics will vary from year to year; the course may, therefore, be repeated for credit.

LAT 482-483 Variable Credit Guided Independent Study
(Prerequisites: LAT 211-212) A tutorial program open to Junior and Senior students only. Content determined by mentor.

Course Descriptions – Literature

LIT 105 3 cr. (CL,D) Introduction to World Literature in Translation
This course introduces students to significant works in English translation of world literature, while introducing the genres of narrative (fiction and non-fiction), poetry, and drama, and the critical terminology needed to discuss them. Taught in English. Readings may vary.

LIT 205 3 cr. (CL,D,W) Modern Latin-American Literature in Translation
A survey in English of 20th-century Latin American writers. Introduction to major literary movements, such as the "Boom" and "magical realism," which have influenced writers in the U.S., Europe and elsewhere.

LIT 207 3 cr. (CL,D,W) Literature of American Minorities
Examination of racial and ethnic groups from the settlement of America until the present. Examination of the historical context and current situation of Native Americans, African-Americans, Hispanic Americans, Asian Americans, women-as-minority, and other marginalized groups. Readings from literature and other disciplines. Cross-listed with Women's Studies Concentration.

LIT 208 3 cr. (CL,D) French Masterpieces in English Translation
The study of selected major works from the leading French writers of the 19th and 20th centuries who have made an important contribution to the development of Western civilization. Such authors as Stendhal, Flaubert, Gide, Proust, Camus and Malraux will be discussed.

LIT 209 3 cr. (CL,D) Masterworks of Russian and Slavic Literature
A survey of major literary achievements of Slavic peoples, including Dostoyevsky and Tolstoy. No knowledge of Slavic languages is required. All readings and lectures are in English.

LIT 384 3 cr. (CL,D) Special Topics in American Minority Literature
This course examines a particular minority group in American society through texts written by and about that group. Representative groups include, for example, Native Americans, African Americans, Asian Americans, Hispanic Americans and women. This course may be repeated for credit when content varies.

Overview
The department aims: (1) to train the student in solid historical methodology; (2) to present history as the study of interdependent human activities and concrete events which have social significance; (3) to engender an intelligent and critically sympathetic understanding of various civilizations and cultures. Outstanding students are eligible for consideration in the Combined Baccalaureate/Master’s Degree program (please refer to the section on The Graduate School and to the Graduate School Catalog for specifics of the program). Through careful utilization of intersession and summer sessions, it is possible to complete both the B.A. and M.A. degrees within a four-year period. Contact the chair or the graduate-program director of the department for additional information. See the Pre-Law section in the catalog for details of the department’s success in this area.

Minor in History
A minor in History (18 credits) should include HIST 110 and 111 or PS 130 and 131 plus four additional courses from the following: PS 212, PS 213, PS 217, PS 218, PS 219, PS 221, PS 222, PS 295, PS 318, PS 319, PS 328, PS 330, PS 331, PS 332, PS 338; HIST 125, HIST 126, HIST 211, HIST 213, HIST 214, HIST 215, HIST 219, HIST 220, HIST 226, HIST 295, HIST 335, HIST 338, HIST 339, and GEOG 217.

Course Descriptions

GEOG 134 3 cr. (S) World Regional Geography
Introduces the major concepts and skills of geography. A regional approach stresses the five themes of geography including location, place, human environment interaction, movement and region.

GEOG 217 3 cr. (D,S) Cultural Geography
Study of the influence of geography on the origin, structure, and spread of culture. Focuses on describing and analyzing the ways language, religion, economy, government and other cultural phenomena vary or remain consistent from place to place.

HIST 110-111 6 cr. (CH) History of the United States
The United States from the time of its European beginnings to the present with special emphasis on the history of Pennsylvania; colonial origins to Reconstruction; Gilded Age to the modern era.

HIST 120-121 6 cr. (CH) Europe, 1500 to the Present
European history with concentration upon the rise of national monarchies; political, social, economic and intellectual developments; industrialism, the new nationalism and liberalism.

HIST 125 3 cr. (CH,D) Colonial Latin America
An introduction to colonial Latin American history: American civilizations; the Spanish and Portuguese colonial period, with emphasis on the themes of conquest, colonialism, race, class and gender.

Total: 130 Credits

HIST 126 3 cr.
(CH,D) Modern Latin America
An introduction to modern Latin American history: the Latin American republics, with emphasis on the themes of nation building, dictatorship, cultural identity, revolutionary movements, and inter-American relations.

HIST 140 3 cr.
(W) The Craft of the Historian
Introduction to the craft of the historian including the techniques of historical study, research and writing as well as historiography. Students will be given various exercises dealing with both primary and secondary sources to enable them to think historically through writing exercises based on historical questions.

HIST 210 3 cr.
History as Biography
An exploration of the nature of biography and its relationship to the study of the past. Biographies of several major figures from the modern era will be read and studied to exemplify different biographical techniques and their utility as means of historical inquiry.

HIST 211 3 cr.
The Third World: Empire to Independence
A study of the developing nations with the developed nations in the contemporary world.

HIST 212 3 cr.
(D) Rebels, Rogues, and Reformers
A sociological cross-cultural, and psychohistorical approach to those folk heroes, political “expropriators” and bandits whose spectacular exploits have been romanticized and preserved through the centuries. Figures such as Robin Hood, Courtoche, Pancho Villa, Jesse James, Che Guevara and others will be considered.

HIST 213 3 cr.
(CH,D) Gender and Family in Latin America
(Prerequisite: HIST 125, HIST 126, PS 219, or SPAN 203) Examines the role of gender and family in Latin America from 1521 to present. Themes of gender roles, marriage, family and licit and illicit sexuality will be highlighted. Individual units will examine machismo, machanism, relations of power and women in the workplace. Distinctions will be made according to race and class.

HIST 214 3 cr.
(CH,D) History of Contemporary World Politics
Deals directly with the history of the political, economic, and social issues that are current in international affairs including the future possibilities of world order and the crises of foreign-policy making.

HIST 215 3 cr.
(CH,D) Church and Society In Latin America
(Prerequisite: HIST 125, HIST 126, PS 219, or SPAN 203) Examines the historic role of the Catholic Church in Latin America. Major themes include the conversion of New World peoples to Catholicism, syncretism, church and state, and liberation theology. Other units include...

### Notes
1. Students may use cognate electives to develop a second major.
2. Department requires HIST 140. The Craft of the Historian, for history majors; students admitted to four-year B.A./M.A. program are recommended to take HIST 500. Research Methods. No student should take both Research Methods courses.
3. Senior History majors are required to take HIST 490 or HIST 491.

HIST 126
(CH,D) Modern Latin America
An introduction to modern Latin American history: the Latin American republics, with emphasis on the themes of nation building, dictatorship, cultural identity, revolutionary movements, and inter-American relations.

HIST 140
(W) The Craft of the Historian
Introduction to the craft of the historian including the techniques of historical study, research and writing as well as historiography. Students will be given various exercises dealing with both primary and secondary sources to enable them to think historically through writing exercises based on historical questions.

HIST 210
3 cr.
History as Biography
An exploration of the nature of biography and its relationship to the study of the past. Biographies of several major figures from the modern era will be read and studied to exemplify different biographical techniques and their utility as means of historical inquiry.

HIST 211
3 cr.
The Third World: Empire to Independence
A study of the developing nations with the developed nations in the contemporary world.

HIST 212
3 cr.
(D) Rebels, Rogues, and Reformers
A sociological cross-cultural, and psychohistorical approach to those folk heroes, political "expropriators" and bandits whose spectacular exploits have been romanticized and preserved through the centuries. Figures such as Robin Hood, Car- touche, Pancho Villa, Jesse James, Che Guevara and others will be considered.

HIST 213
3 cr.
(CH,D) Gender and Family in Latin America
(Prerequisite: HIST 125, HIST 126, PS 219, or SPAN 203) Examines the role of gender and family in Latin America from 1521 to present. Themes of gender roles, marriage, family and licit and illicit sexuality will be highlighted. Individual units will examine machismo, marianism, relations of power and women in the workplace. Distinctions will be made according to race and class.

HIST 214
3 cr.
(CH,D) History of Contemporary World Politics
Deals directly with the history of the political, economic, and social issues that are current in international affairs including the future possibilities of world order and the crises of foreign-policy making.

HIST 215
3 cr.
(CH,D) Church and Society In Latin America
(Prerequisite: HIST 125, HIST 126, PS 219, or SPAN 203) Examines the historic role of the Catholic Church in Latin America. Major themes include the conversion of New World peoples to Catholicism, syncretism, church and state, and liberation theology. Other units include...
indigenous religions and beliefs, Protestantism and Judaism in Latin America.

HIST 216 3 cr. (CH,D) Race in American History
The course studies the role of race in American history from the colonial era to the present, focusing on the experience of African-Americans with consideration given to other racial and ethnic groups. Topics include: slavery; “Jim Crow” laws; the Ku Klux Klan; black migration of the 20th century; African-American community life; and the civil rights struggle.

HIST 217 3 cr. (CH) History of American Catholicism
A survey of the significant events, trends, and individuals within the Catholic experience in America from the earliest colonial settlements to the post-Vatican II era.

HIST 218 3 cr. The World at War, 1939-45
Examination of the tactics, strategy, and global significance of World War II. The logistics and scope of the conflict. Importance of propaganda, patriotism and the people. Film-seminar approach. Film fee.

HIST 219 3 cr. (CH,D) Modern World History
A study of change and development in the world during the 20th century. Emphasis on cultural, economic, and political differences between Western and non-Western states.

HIST 220 3 cr. (CH) War and Modern Society
(Formerly H/P/S 215) Role of military force in international relations; historical background focusing on wars, American and European, of 19th and 20th century; theories of function of war; arms control and deterrence of war.

HIST 221 3 cr. (CH,D) The American West
A study of acquisition, settlement, and development of the Trans-Mississippi West, including the mining, cattleman’s and farmer’s frontiers; Indian removal, and Manifest Destiny in Texas and Oregon.

HIST 222 3 cr. History of American Presidential Elections
A study of the candidates, issues and campaigns in American Presidential elections from Washington to Kennedy. The course will also examine the evolution of the electoral process and the relationship between political parties.

HIST 223 3 cr. Introduction to Irish History
An introduction to Irish History which surveys the principal political, social, economic and intellectual changes in Irish life since the time of the pre-Celtic peoples. Topics will include: Celtic civilization; the coming of Christianity; the Norman invasion; the English connection; Irish nationalism; and the “troubles” in Northern Ireland.

HIST 224 3 cr. (CH,D) Ethnic and Racial Minorities in Northeastern Pennsylvania
Film-seminar approach to the study of various ethnic groupings in Northeastern Pennsylvania. Seeks to achieve better understanding of the immigrant’s problems and accomplishments through use of documentary and feature films.

HIST 225 3 cr. Imperial Russia
From the crystallization of political forms in the ninth century through the Kievan State, Mongolian Invasion, rise of Muscovy to the European Empire from the 17th to the end of the 19th century.

HIST 226 3 cr. Russian from Revolution to Revolution
An examination of 20th-century Russia and the Soviet Union, beginning with the reign of Tsar Nicholas II and culminating with the breakup of the USSR and its aftermath. Analysis of the pre-revolutionary Russia, the Bolshevik Revolution, Lenin and Stalin, World War II, the Cold War, the fall of communism and Russia’s place in world affairs.

HIST 227 3 cr. (D) The Civilization of Islam
An introduction to the history of Islamic civilization from the career of the Prophet Muhammad (c. 632 AD) to the eve of European colonization and imperialism.

HIST 228-229 6 cr. Ancient History
A survey of ancient civilizations of the Near East and Mediterranean worlds. The culture, society and science of Mesopotamia and Persia; Egypt – the Gift of the Nile; the ancient Israelites; heroic, archaic, classical and Hellenistic Greece; republican and imperial Rome; the origins of Christianity.

HIST 230-231 Medieval History
The civilization of medieval Christendom from the fall of the Roman Empire to the beginning of the 14th century; its religious, social, economic, cultural and political aspects; the relationship between church and society, belief and life style, ideal and reality; the interaction between Western Christendom, Byzantium and Islam.

HIST 232 3 cr. (CH) England, 1485 to 1714
The end of the Wars of the Roses; Tudor Absolutism; Henry VIII and Reformation; Elizabeth I; Renaissance and Elizabethan music and literature; the Stuarts; Colonialism; Commonwealth; Restoration; the Revolution of 1688; reign of Anne.

HIST 233 3 cr. (CH) England, 1714 to Present
Parliamentary rule; Cabinet government; political parties; Industrial Revolution; 19th-century reforms; building of a British Empire; World War I; problems of readjustment; World War II; Britain and the world today.

HIST 236 3 cr. Modern Germany: Unification and Empire
The 1815 Confederation; 1848 and the failure of liberalism; the Age of Bismarck; Wilhelm II and the “New Course”; World War I and the Collapse of the Empire.

HIST 237 3 cr. Modern Germany: The Twentieth Century
The troubled birth of the Weimar Republic; the Ruhr Crisis; the Stresa Era; economic collapse and the rise of Nazism; the Third Reich, and World War II; the two Germanies and “economic miracle.”

HIST 238 3 cr. (CH,D) History of American Women: From Colonization to Mid-Nineteenth Century
A study of American women from the colonial era to the mid-19th century. Changes in the family, the workforce, women’s participation in politics and reform movements, and Native-American and African-American women.

HIST 239 3 cr. (CH,D) History of American Women: From Mid-Nineteenth Century to the Present
A study of American women since the mid-19th century. The effects of industrialization on the family, women’s participation in the workforce, the Depression and the family, women and war, the feminist movement, and the conservative response.

HIST 240 3 cr. (D) Modern Italy
This course will examine major developments in Italian history from the Napoleonic invasion until current crises of the Republic. Important themes for discussion will be the unification movement, the liberal state, Fascism and anti-Fascist resistance, the postwar Republic, cultural and social change, and economic development.

HIST 241 3 cr. Law in the Western Tradition
A survey of ideas about law in Western civilization from antiquity until the Civil War. Emphasis on the legal systems, such as the Hebrew, the Athenian, the Roman, the German, and the Catholic, that influenced the modern ideas about the law.

HIST 295 3 cr. (CH) Britain: Past and Present
(Prerequisite: any 100 level History course) Combines with a travel experience to Great Britain to introduce the student to the major historical, cultural, political, economic and social events in Britain’s past and present.

HIST 296 3 cr. (D) Italian History and Heritage
Combines with a travel experience to introduce the student to Italy’s cultural heritage and the history of the current Italian Republic. Students will visit sites of historic, artistic and religious significance as well as important places of the contemporary Italian republic.

HIST 310 3 cr. Colonial America, 1607-1763
The European background of the Age of Discovery; the founding of the British-American colonies; their political, economic and cultural development; British colonial policy and administration; the development of an American civilization.

HIST 311 3 cr. American Revolution, 1763-1789
Background to the War for Independence; British imperial policy; the development of economic and ideological conflicts; the military contest; British ministerial policy and the parliamentary opposition; the Confederation; the formation of the Constitution.
indigenous religions and beliefs, Protestantism and Judaism in Latin America.

HIST 216 3 cr.
(CH,D) Race in American History
The course studies the role of race in American history from the colonial era to the present, focusing on the experience of African-Americans with consideration given to other racial and ethnic groups. Topics include: slavery; “Jim Crow” laws; the Ku Klux Klan; black migration of the 20th century; African-American community life; and the civil rights struggle.

HIST 217 3 cr.
(CH) History of American Catholicism
A study of the candidates, issues and campaigns in American Presidential elections from Washington to Kennedy. The course will also examine the evolution of the electoral process and the relationship between political parties.

HIST 220 3 cr.
(CH) War and Modern Society
A study of acquisition, settlement, and development from the career of the Prophet Muhammad (c. 632 AD) to the eve of European colonization and imperialism.

HIST 221 3 cr.
(CH,D) The American West
A study of American women since the mid-19th century. Emphasis on cultural, political and reform movements, and Native-American women.

HIST 222 3 cr.
History of American Presidential Elections
A study of American women from the colonial era to the present, focusing on the experience of African-Americans with consideration given to other racial and ethnic groups. Topics include: slavery; “Jim Crow” laws; the Ku Klux Klan; black migration of the 20th century; African-American community life; and the civil rights struggle.

HIST 223 3 cr.
Introduction to Irish History
An introduction to Irish history which surveys the principal political, social, economic and intellectual changes in Irish life since the time of the pre-Celtic peoples. Topics will include: Celtic civilization; the coming of Christianity; the Norman invasion; the English connection; Irish nationalism; and the “troubles” in Northern Ireland.

HIST 224 3 cr.
(CH,D) Ethnic and Racial Minorities in Northeastern Pennsylvania
A study of the role of military force in 20th-century Russia and the collapse and rise of Nazism; the Third Reich, Ruhr Crisis; the Stresemann Era; economic collapse and the rise of Nazism; the Third Reich, and World War II; the two Germanies and the “New Course”; World War I and the Collapse of the Empire.

HIST 225 3 cr.
Imperial Russia
From the crystallization of political forms in the ninth century through the Kievan State, Mongolian invasion, rise of Moscow to the Eurasian Empire from the 17th to the end of the 19th century.

HIST 226 3 cr.
Russian from Revolution to Revolution
An examination of 20th-century Russia and the Soviet Union, beginning with the reign of Tsar Nicholas II and culminating with the breakup of the USSR and its aftermath. Analysis of the pre-revolutionary Russia, the Bolshevik Revolution, Lenin and Stalin, World War II, the Cold War, the fall of communism and Russia’s place in world affairs.

HIST 227 3 cr.
(D) The Civilization of Islam
An introduction to the history of Islamic civilization from the career of the Prophet Muhammad (c. 632 AD) to the eve of European colonization and imperialism.

HIST 228-229 6 cr.
Ancient History
A survey of ancient civilizations of the Near East and Mediterranean worlds. The culture, society and science of Mesopotamia and Persia; Egypt – the Gift of the Nile; the ancient Israelites; heroic, archaic, classical and Hellenistic Greece; republican and imperial Rome; the origins of Christianity.

HIST 230-231 6 cr.
Medieval History
The civilization of medieval Christendom from the fall of the Roman Empire to the beginning of the 14th century; its religious, social, economic, cultural and political aspects; the relationship between church and society, belief and life style, ideal and reality; the interaction between Western Christendom, Byzantium and Islam.

HIST 232 3 cr.
(CH) England, 1485 to 1714
The end of the Wars of the Roses; Tudor Absolutism, Henry VIII and Reformation; Elizabeth I; Renaissance and Elizabethan music and literature; the Stuarts; Colonialism; Commonwealth; Restoration; the Revolution of 1688; reign of Anne.

HIST 233 3 cr.
(CH) England, 1714 to Present
Parliamentary rule; Cabinet government; political parties; Industrial Revolution; 19th-century reforms; building of a British Empire; World War I; problems of readjustment; World War II; Britain and the world today.

HIST 236 3 cr.
Modern Germany: Unification and Empire
The 1815 Confederation; 1848 and the failure of liberalism; the Age of Bismarck: Wilhelm II and the “New Course”; World War I and the Collapse of the Empire.

HIST 237 3 cr.
Modern Germany: The Twentieth Century
The troubled birth of the Weimar Republic: the Ruhr Crisis; the Stresemann Era; economic collapse and the rise of Nazism; the Third Reich, and World War II; the two Germanies and their significance as well as important places of the contemporary Italian Republic.

HIST 238 3 cr.
(CH,D) History of American Women: From Colonization to Mid-Nineteenth Century
A study of American women from the colonial era to the mid-19th century. Changes in the family, the workforce, women’s participation in politics and reform movements, and Native-American and African-American women.

HIST 239 3 cr.
(CH,D) History of American Women: From Mid-Nineteenth Century to the Present
A study of American women since the mid-19th century. The effects of industrialization on the family, women’s participation in the workforce, the Depression and the family, women and war, the feminist movement, and the conservative response.

HIST 240 3 cr.
(D) Modern Italy
This course will examine major developments in Italian history from the Napoleonic invasion until current crises of the Republic. Important themes for discussion will be the unification movement, the liberal state, Fascism and anti-Fascist resistance, the postwar Republic, cultural and social change, and economic development.

HIST 241 3 cr.
Law in the Western Tradition
A survey of ideas about law in Western civilization from antiquity until the Civil War. Emphasis on the legal systems, such as the Hebrew, the Athenian, the Roman, the German, and the Catholic, that influenced the modern ideas about the law.

HIST 295 3 cr.
(PREREQUISITE: any 100 level History course)
Combines with travel experience in Great Britain to introduce the student to the major historical, cultural, political, economic and social events in Britain’s past and present.

HIST 296 3 cr.
(D) Italian History and Heritage
Combines with travel experience to introduce the student to Italy’s cultural heritage and the history of the current Italian Republic. Students will visit sites of historic, artistic and religious significance as well as important places of the contemporary Italian republic.

HIST 310 3 cr.
Colonial America, 1607-1763
The European background of the Age of Discovery; the founding of the British-American colonies; their political, economic and cultural development; British colonial policy and administration; the development of an American civilization.

HIST 311 3 cr.
American Revolution, 1763-1789
Background to the War for Independence; British imperial policy; the development of economic and ideological conflicts; the military contest; British ministerial policy and the parliamentary opposition; the Confederation; the formation of the Constitution.
HIST 312 3 cr.
The Early National Period of American History, 1789-1824
Beginning of the New Government; politics and diplomacy in the Federalist Era; Jeffersonian Democracy; the War of 1812; nationalism and sectionalism, Marshall and the rise of the Supreme Court.

HIST 313 3 cr.
The Age of Andrew Jackson, 1824-1850
Politics and society in the Jacksonian Era, slavery and the antislavery crusade, American expansion in the 1840s; the Mexican War; the emergence of the slavery issue.

HIST 314 3 cr.
Civil War and Reconstruction
Crisis Decade, disintegration of national bonds; The War: resources, leadership, strategy, politics, monetary policy, diplomacy; Reconstruction: realistic alternatives, presidential and congressional phases, effects in the North and South.

HIST 315 3 cr.
American Progressivism, War, and Reaction, 1900-1929
(Prerequisites: HIST 110 and 111) American society from the age of Theodore Roosevelt and Woodrow Wilson to the “New Era” of the Roaring Twenties. Topics include Progressive reform movements, World War I and cultural conflict in the 1920s.

HIST 316 3 cr.
(CH) From Depression to Cold War: 1929-1960
A study of American society from the Great Depression to the election of 1960. The course will focus on the New Deal; American entry into World War II; the origins of the Cold War; and America in the age of “consensus.”

HIST 317 3 cr.
History of United States Immigration
(Prerequisites: HIST 110-111) A study of immigration to the United States with emphasis on the period from the Revolution to the restrictive legislation of the 20th century. Motives and characteristics of immigration. Experiences of newcomers.

HIST 318 3 cr.
A History of American Assimilation
(Prerequisites: HIST 110-111) The history of assimilation (or adjustment) of immigrants to American life. Nativism from pre-Civil War days to the 1920s. The “Old Immigration” and the “New Immigration” considered in the social, political, economic, and religious contexts of their eras. Special problems of the second generation from the 1850s to the 1960s.

HIST 319-320 6 cr.
Byzantine Civilization
The Byzantine Empire from its origins in the fourth century to its collapse in the 15th; the political and economic growth of the Empire with emphasis on its art and religion.

HIST 321-322 6 cr.
(CH) American Ideas and Culture
(Prerequisites: HIST 110 for HIST 321; HIST 111 for HIST 322) History of American art, architecture, literature and thought; Colonial developments; the American enlightenment; the emergence of a national culture; Romanticism, post-Civil War realism in American art and literature; the intellectual response to the industrial order; the American mind in the 1920s; the intellectual and cultural response to the Depression; post-WWII World War II developments.

HIST 323 3 cr.
The Renaissance
A study of culture in Italy from the 14th to the 16th centuries. Humanism, art, historiography and politics will be emphasized.

HIST 324 3 cr.
The Reformation
The history of Europe during the era of religious revivalism (16th century). The course will focus on the magisterial Protestant reformers, the Catholic Counter-Reformation and dynastic politics.

HIST 325 3 cr.
French Revolution to 1815
(Prerequisite: HIST 120) Historical antecedents; the philosophies; republicanism and the fall of the monarchy; Reign of Terror; the Directory; Napoleon; internal achievements; significance of the Spanish and Russian campaigns; and War of Liberation.

HIST 326 3 cr.
Europe in the Age of Absolutism
(Recommanded for Background: HIST 120) A study of the major political, social, economic and intellectual movements in Europe from the rise of royal absolutism until the outbreak of the French Revolution.

HIST 327 3 cr.
(CH,D,W) The African Experience in Latin America 1500-1900
(Prerequisite: HIST 125, HIST 126, PS 219, or SPAN 203) Examines the experiences of Africans in the colonies and former colonies of Latin America and the Caribbean with emphasis on Spanish America and Portuguese Brazil. Units will highlight slavery, the response of slaves to subjugation; the role of free Africans and men and women of color, intermarriage, religion and music.

HIST 330 3 cr.
Europe, 1815-1914
(Prerequisite: HIST 121) A study of 19th-century Europe concentrating on The Congress of Vienna and its aftermath, the Age of Nationalism and Realism, European Dynamism and the non-European world, and the Age of Modernity and Anxiety.

HIST 331 3 cr.
(C) Recent U.S. History: 1960 to the Present
A study of American society since 1960. The course will focus on the New Frontier and Great Society; the Vietnam War; protest movements; Watergate; and the conservative response to these developments.

HIST 332 3 cr.
America in the Gilded Age, 1865-1900
(Prerequisites: HIST 110-111) American society in the age of industrialization and urbanization. Topics include the emergence of big business and labor conflict, immigration and the growth of cities, Populism, imperialism, and the Spanish-American War.

HIST 333-334 6 cr.
Twentieth-Century Europe
World War I; Treaty of Versailles; Russia becomes the USSR; the European struggle for security; Italian Fascism; rise of Nazi Germany; Asia between the two wars; World War II; loss of colonial empires in Africa and Asia; development of the Cold War; Marshall Plan and NATO.

HIST 335 3 cr.
World War II, Cold War and Detente
The diplomacy of World War II; the development of the Cold War between the U.S. and the U.S.S.R. and the adoption of the policy of detente.

HIST 336 3 cr.
History of American Law
(Prerequisites: HIST 110-HIST 111) Traces the history of ideas and concepts utilized by the courts, legislature, organized bar and administrative agencies to solve legal problems; and shows how American legal thought and reasoning developed from Colonial days to the present.

HIST 337 3 cr.
English Constitutional and Legal History
Anglo-Saxon basis; Norman political institutions; Magna Carta; beginnings of common law; jury system; Tudor absolutism; struggle for sovereignty; rise of House of Commons; democratic reforms; extension of administrative law.

HIST 338-339 6 cr.
American Diplomatic History
(Prerequisites: HIST 110-111) A study of American diplomatic history and principles; The Revolution; Early American policies on isolation and expansion; The War of 1812; The Monroe Doctrine; Manifest Destiny; The Civil War; American imperialism and the Spanish-American War; Latin American diplomacy in the 20th century; World War I; attempts to preclude further war; World War II; Cold War; Contemporary problems.

HIST 340 3 cr.
History of Urban America
(Prerequisites: HIST 110-111) The evolution of cities in the United States from the founding of colonial settlements to the end of the 20th century. The nature of cities and urban life, the process and impact of urban growth, and the problems facing contemporary cities will all be considered.

HIST 390 3-6 cr.
History Internship
A practical work experience which exposes the student to the nature of historical investigation, analysis, and/or writing in a museum, historical site, or public agency. Supervision by faculty and agencies.

HIST 490 3 cr.
(W) Seminar in European History
(Restricted to senior History majors and four-year B.A./M.A. History students) An analysis of selected topics in European history from the 15th to the 20th century. Extensive readings. Historical research and writing stressed.

HIST 491 3 cr.
(W) Seminar in American History
(Restricted to senior History majors and four-year B.A./M.A. History students) An analysis of selected topics in U.S. or Latin American history from the Colonial era to the present. Extensive readings. Historical research and writing stressed.
HIST 312  3 cr.
The Early National Period of American History, 1789-1824
Beginning of the New Government; politics and diplomacy in the Federalist Era; Jeffersonian Democracy; the War of 1812; nationalism and sectionalism, Marshall and the rise of the Supreme Court.

HIST 313  3 cr.
The Age of Andrew Jackson, 1824-1850
Politics and society in the Jacksonian Era, slavery and the antislavery crusade, American expansion in the 1840s; the Mexican War; the emergence of the slavery issue.

HIST 314  3 cr.
Civil War and Reconstruction
Crisis Decade, disintegration of national bonds; The War: resources, leadership, strategy, politics, monetary policy, diplomacy; Reconstruction: realistic alternatives, presidential and congressional phases, effects in the North and South.

HIST 315  3 cr.
American Progressivism, War, and Reaction, 1900-1929
(Prerequisites: HIST 110 and 111) American society from the age of Theodore Roosevelt and Woodrow Wilson to the “New Era” of the Roaring Twenties. Topics include Progressive reform movements, World War I and cultural conflict in the 1920s.

HIST 316  3 cr.
(CH) From Depression to Cold War: 1929-1960
A study of American society from the Great Depression to the election of 1960. The course will focus on the New Deal; American entry into World War II; the origins of the Cold War; and America in the age of “consensus.”

HIST 317  3 cr.
History of United States Immigration
(Prerequisites: HIST 110-111) A study of immigration to the United States with emphasis on the period from the Revolution to the restrictive legislation of the 20th century. Motives and characteristics of immigration. Experiences of newcomers.

HIST 318  3 cr.
A History of American Assimilation
(Prerequisites: HIST 110-111) The history of assimilation (or adjustment) of immigrants to American life. Nativism from pre-Civil War days to the 1920s. The “Old Immigration” and the “New Immigration” considered in the social, political, economic, and religious contexts of their eras. Special problems of the second generation from the 1850s to the 1960s.

HIST 319-320  6 cr.
Byzantine Civilization
The Byzantine Empire from its origins in the fourth century to its collapse in the 15th; the political and economic growth of the Empire with emphasis on its art and religion.

HIST 321-322  6 cr.
(Ch) American Ideas and Culture
(Prerequisites: HIST 110 for HIST 321; HIST 111 for HIST 322) History of American art, architecture, literature, and thought; Colonial developments; the American enlightenment; the emergence of a national culture; Romanticism, post-Civil War realism in American art and literature; the intellectual response to the industrial order; the American mind in the 1920s; the intellectual and cultural response to the Depression; post-World War II developments.

HIST 323  3 cr.
The Renaissance
A study of culture in Italy from the 14th to the 16th centuries. Humanism, art, historiography and politics will be emphasized.

HIST 324  3 cr.
The Reformation
The history of Europe during the era of religious revivalism (16th century). The course will focus on the magisterial Protestant reformers, the Catholic Counter-Reformation and dynamic politics.

HIST 325  3 cr.
French Revolution to 1815
(Prerequisite: HIST 120) Historical antecedents; the philosophies; republicanism and the fall of the monarchy; Reign of Terror; the Directory; Napoleon; internal achievements; significance of the Spanish and Russian campaigns; and War of Liberation.

HIST 326  3 cr.
Europe in the Age of Absolutism
(Recommended for Background: HIST 120) A study of the major political, social, economic and intellectual movements in Europe from the rise of royal absolutism until the outbreak of the French Revolution.

HIST 327  3 cr.
(CH,D,W) The African Experience in Latin America 1500-1900
(Prerequisite: HIST 125, HIST 126, PS 219, or SPAN 203) Examines the experiences of Africans in the colonies and former colonies of Latin America and the Caribbean with emphasis on Spanish America and Portuguese Brazil. Units will highlight slavery, the response of slaves to subjugation; the role of free Africans and men and women of color, intermarriage, religion and music.

HIST 330  3 cr.
Europe, 1815-1914
(Prerequisite: HIST 121) A study of 19th-century Europe concentrating on The Congress of Vienna and its aftermath, the Age of Nationalism and Realism, European Dynamism and the non-European world, and the Age of Modernity and Anxiety.

HIST 331  3 cr.
(C) Recent U.S. History: 1960 to the Present
A study of American society since 1960. The course will focus on the New Frontier and Great Society; the Vietnam War; protest movements; Watergate; and the conservative response to these developments.

HIST 332  3 cr.
America in the Gilded Age, 1865-1900
(Prerequisites: HIST 110-111) American society in the age of industrialization and urbanization. Topics include the emergence of big business and labor conflict, immigration and the growth of cities, Populism, imperialism, and the Spanish-American War.

HIST 333-334  6 cr.
Twentieth-Century Europe
World War I; Treaty of Versailles; Russia becomes the USSR; the European struggle for security; Italian Fascism; rise of Nazi Germany; Asia between the two wars; World War II; loss of colonial empires in Africa and Asia; development of the Cold War; Marshall Plan and NATO.

HIST 335  3 cr.
World War II, Cold War and Detente
The diplomacy of World War II; the development of the Cold War between the U.S. and the U.S.S.R. and the adoption of the policy of detente.

HIST 336  3 cr.
History of American Law
(Prerequisites: HIST 110-HIST 111) Traces the history of ideas and concepts utilized by the courts, legislature, organized bar and administrative agencies to solve legal problems; and shows how American legal thought and reasoning developed from Colonial days to the present.

HIST 337  3 cr.
English Constitutional and Legal History
Anglo-Saxon basis; Norman political institutions; Magna Carta; beginnings of common law; jury system; Tudor absolutism; struggle for sovereignty; rise of House of Commons; democratic reforms; extension of administrative law.

HIST 338-339  6 cr.
American Diplomatic History
(Prerequisites: HIST 110-111) A study of American diplomatic history and principles; The Reformation; Early American policies on isolation and expansion; The War of 1812; The Monroe Doctrine; Manifest Destiny; The Civil War; American imperialism and the Spanish-American War; Latin American diplomacy in the 20th century; World War I; attempts to prelude further war; World War II; Cold War; Contemporary problems.

HIST 340  3 cr.
History of Urban America
(Prerequisites: HIST 110-111) The evolution of cities in the United States from the founding of colonial settlements to the end of the 20th century. The nature of cities and urban life, the process and impact of urban growth, and the problems facing contemporary cities will all be considered.

HIST 390  3-6 cr.
History Internship
A practical work experience which exposes the student to the nature of historical investigation, analysis, and/or writing in a museum, historical site, or public agency. Supervision by faculty and agencies.

HIST 490  3 cr.
(W) Seminar in European History
(Restricted to senior History majors and four-year B.A./MA. History students) An analysis of selected topics in European history from the 15th to the 20th century. Extensive readings. Historical research and writing stressed.

HIST 491  3 cr.
(W) Seminar in American History
(Restricted to senior History majors and four-year B.A./MA. History students) An analysis of selected topics in U.S. or Latin American history from the Colonial era to the present. Extensive readings. Historical research and writing stressed.
MATH 100 3 cr. (W) Seminar in International Studies
Required for International Studies majors. Other advanced undergraduates may take this course with permission of the professor. This course may be used for either History or Political Science credit.

Mathematics

Faculty

Jakub S. Jasiński, Ph.D., Chair
Maureen T. Carroll, Ph.D.
Steven T. Dougherty, Ph.D.
Gary E. Eichelberger, M.A.
Anthony P. Ferzola, Ph.D.
Bernard Johns, M.A.
Jeri J. Levko, S.J., Ph.D.
Masood Otarod, SCD
Krzysztof Plotka, Ph.D.
Zhongcheng Xiong, Ph.D.

Overview

The Mathematics program balances algebra vs. analysis in its basic courses and pure vs. applied mathematics (including probability and statistics) in its advanced courses. Supporting courses balance traditional physics with contemporary computer science. Graduates have great flexibility; some continue study in mathematics or related fields, some teach, some become actuaries and some work in jobs which vary from programming to teaching, some become actuaries and some work in jobs which vary from programming to teaching. A student chapter of the Mathematical Association of America encourages early professionalism.

Minor in Mathematics

The Mathematics minor must include MATH 114, 221, 222, and 351 and two additional electives chosen from Mathematics courses numbered over 300 or PHYS 350.

Biomathematics

The Biomathematics major leads to employment or graduate study ranging from biostatistics through public health to medicine. The major contains four tracks: Epidemiology, Molecular Biology, Physiology, or Population Biology. Students interested in medical school should alter the standard schedule so that General Biochemistry can be elected in the third year. This may be done by attending summer sessions, by using AP credits, or – when approved by an academic advisor – by shifting General and Analytical Chemistry to the first year and Organic Chemistry to the second year.

Course Descriptions

MATH 005 3 cr. Algebra
A study of algebra including factoring, exponents, radicals, graphing, and linear and quadratic equations. Enrollment is restricted to Dexter Hanley College students who are limited in algebra skills. Permission of the dean of Dexter Hanley College is required in order to enroll in this course. Credits count only as free elective.

MATH 101 3 cr. (Q) Mathematics Discovery
Topics exploring various aspects of mathematical reasoning and modeling are selected to bring the excitement of contemporary mathematical thinking to the nonspecialist. Examples of topics covered in the past include fractal geometry, chaos theory, number theory, and non-Euclidean geometry. Not open to students with credit for or enrolled in any Mathematics course numbered above 101.

MATH 102 3 cr. (Q) Fundamentals of Numerical Mathematics
(Prerequisite: Not open to students with credit for, or enrolled in, MATH 105 or any mathematics course numbered above 105) A study of the fundamental elementary concepts underlying numbers and number systems and their applications. Topics covered include logic, sets, functions, the natural numbers, integers, rational numbers, real numbers, estimation, number theory, patterns, counting, and probability, in addition to other topics chosen by the instructor.

MATH 103 4 cr. (Q) Pre-Calculus Mathematics
An intensified course covering the topics of algebra, trigonometry, and analytic geometry. Not open to students with credit for or enrolled in any calculus course.

Electives for Mathematics majors. Major electives are selected from Mathematics courses numbered above MATH 300; also PHYS 350, PHYS 351, CMPS 362 or CMPS 364. A student must select an elective at least once of MATH 447 or 449, and at least two of MATH 312, 445, 446, 460, 461. Additional courses numbered under MATH 300 may be taken as free electives but not as major electives. Most Mathematics electives are offered every other year. Check with the department chair for the current schedule.

Q Cognate electives must be used to complete a minor, a concentration, a second major, secondary-education certification, or a package of courses pre-approved by the department.

The results of the placement tests administered during freshman orientation assist students and their advisors in choosing the proper beginning-level mathematics sequence and the proper entry-level within that sequence. If a course is a prerequisite for a second course, directly or indirectly, and a student receives credit for the second course then that student will not be allowed to register for the prerequisite course.

MATH 105 3 cr. (Q) Fundamentals of Geometric Mathematics
(Prerequisite: Not open to students with credit for, or enrolled in, any other mathematics course numbered above 102) A study of the fundamental concepts underlying geometric mathematics and its applications. Topics include logic, sets, functions and relations, classical geometry, measurement, transformations, statistics, and analytic geometry and its relationship to algebra and functions, in addition to other topics chosen by the instructor.

MATH 106 3 cr. (Q) Quantitative Methods
Topics from algebra including exponents, radicals, linear and quadratic equations, graphing functions (including quadratic, exponential and logarithmic), and linear inequalities. Not open to students with credit for or enrolled in MATH 103.

Electives for Mathematics majors: Major electives are selected from Mathematics courses numbered above MATH 300, also PHYS 350, PHYS 351, CMPS 362 or CMPS 364. A student must select at least one of MATH 447 or 449, and at least two of MATH 312 or 455, 460, 465. Additional courses numbered under MATH 300 may be taken as free electives but not as major electives. Most Mathematics electives are offered every other year. Check with the department chair for the current schedule.

* Cognate electives must be used to complete a minor, a concentration, a second major, secondary-education certification, or a package of courses pre-approved by the department.

The results of the placement tests administered during freshman orientation assist students and their advisors in choosing the proper beginning-level mathematics sequence and the proper entry-level within that sequence. If a course is a prerequisite for a second course, directly or indirectly, and a student receives credit for the second course then that student will not be allowed to register for the prerequisite course.

MATH 105 3 cr.
(Q) Fundamentals of Geometric Mathematics
(Prerequisite: Not open to students with credit for, or enrolled in, any other mathematics course numbered above 102) A study of the fundamental concepts underlying geometric mathematics and its applications. Topics include logic, sets, functions and relations, classical geometry, measurement, transformations, statistics, and analytic geometry and its relationship to algebra and functions. In addition to other topics chosen by the instructor.

MATH 106 3 cr.
(Q) Quantitative Methods I
Topics from algebra including exponents, radicals, linear and quadratic equations, graphing, functions (including quadratic, exponential and logarithmic), and linear inequalities. Not open to students with credit for or enrolled in MATH 103.

Mathematics

### MATH 107 3 cr.
**Quantitative Methods II**
(Prerequisite: MATH 106 or equivalent) Topics from differential calculus including limits, derivatives, curve sketching, marginal cost functions, and maximum-minimum problems. Integration. Not open to students with credit for or enrolled in MATH 114.

### MATH 108 3 cr.
**Quantitative Methods III**
(Prerequisite: MATH 107 or 114) Topics from integral calculus including the definite and indefinite integral, techniques of integration, and multivariable calculus. Not open to students with credit for or enrolled in MATH 221.

### MATH 114 4 cr.
**Analysis I**
(Prerequisite: MATH 103 or equivalent) The beginning of a 12-credit sequence covering the topics of calculus and analytic geometry. Limits, derivatives, integration. Fundamental Theorem.

### MATH 142 4 cr.
**Discrete Structures**
A study of symbolic logic, sets, combinatorics, mathematical induction, recursion, graph theory, and trees. Intended for Mathematics, Computer Science, and Computer Information Systems majors, but open to other qualified students.

### MATH 221 4 cr.
**Analysis II**
(Prerequisite: MATH 114) Topics include applications of the definite integral, transcendental functions, methods of integration, improper integral, parametric equations, polar coordinates, and indeterminate forms.

### MATH 222 4 cr.
**Analysis III**
(Prerequisite: MATH 221) Topics include: infinite series, vectors, solid analytic geometry, multivariable calculus, and multiple integration.

### MATH 310 4 cr.
**Applied Probability and Mathematical Statistics**
(Prerequisite: MATH 221) Basic concepts of probability theory, random variables, distribution functions, multivariable distributions, sampling theory, estimation, confidence intervals, hypothesis testing, linear models and analysis of variance.

### MATH 312 3 cr.
**Probability Theory**
(Prerequisite: MATH 221) Basic concepts of probability theory, random variables and their distribution functions; limit theorems and Markov chains.

### MATH 314 3 cr.
**Statistics**
(Prerequisite: MATH 312) Measure of central tendency, measure of dispersion, continuous random variables, expected value, moments, confidence intervals, hypothesis testing, regression, and correlation.

### MATH 320 3 cr.
**Chaos and Fractals**
(Prerequisite: One math course beyond MATH 221 and one CMPS course or equivalent experience) Study of chaotic dynamical systems and fractal geometry. Topics from discrete dynamical systems theory include iteration, orbits, graphical analysis, fixed and periodic points, bifurcations, symbolic dynamics, Sarkovskii’s theorem, the Schwarzian derivative, and Newton’s method. Topics from fractal geometry include fractal, Hausdorff, and topological dimension, L-systems, Julia and Mandelbrot sets, iterated function systems, the collage theorem, and strange attractors.

### MATH 325 3 cr.
**History and Philosophy of Mathematics**
(Prerequisite: MATH 222 and either MATH 142 or a math course numbered above 300 or instructor’s permission) A survey of major developments in mathematics from ancient through modern times. In addition to the mathematics, this course focuses on the context in which these results were discovered as well as the lives of the mathematicians. Topic may include development of numeral systems, Euclidean and non-Euclidean geometry, algebra, calculus, number theory, real analysis, logic and set theory. Offered fall of odd-numbered years only.

### MATH 330 3 cr.
**Actuarial Mathematics**
(Prerequisite: MATH 221) Theory of interest, accumulation and discount, present value, future value, annuities, perpetuities, amortizations, sinking funds, and yield rates.

### MATH 341 4 cr.
**Differential Equations**
(Prerequisite: MATH 222) Treatment of ordinary differential equations with applications. Topics include: first-order equations, first-order systems, linear and non-linear systems, numerical methods, and Laplace transforms. Computer-aided solutions will be used when appropriate.

### MATH 345 3 cr.
**Geometry**
Euclidean, non-Euclidean, and projective geometry. Transformations and invariants.

### MATH 346 3 cr.
**Number Theory**
(Prerequisite: MATH 114) Topics include divisibility, the Euclidean algorithm, linear diophantine equations, prime factorization, linear congruences, some special congruences, Wilson’s theorem, theorems of Fermat and Euler, Euler phi function and other multiplicative functions, and the Mobius Inversion Formula.

TOTAL: 132.5-136.5 CREDITS

2. MATH 314 may be substituted for BIOL 379 but only after MATH 312 has been completed.

MATH 107 3 cr.
(Q) Quantitative Methods II
(Prerequisite: MATH 106 or equivalent) Topics from differential calculus including limits, derivatives, curve sketching, marginal cost functions, and maximum-minimum problems. Integration. Not open to students with credit for or enrolled in MATH 114.

MATH 114 4 cr.
(Q) Analysis I
(Prerequisite: MATH 103 or equivalent) The beginning of a 12-credit sequence covering the topics of calculus and analytic geometry, limits, derivatives, integration. Fundamental Theorem.

MATH 142 4 cr.
(Q) Discrete Structures
A study of symbolic logic, sets, combinatorics, mathematical induction, recursion, graph theory, and trees. Intended for Mathematics, Computer Science, and Computer Information Systems majors, but open to other qualified students.

MATH 184-284-384-484 1-4 cr.
Special Topics
Topics, prerequisites, and amount of credit will be announced prior to preregistration.

MATH 204 3 cr.
(Q) Special Topics of Statistics
Study of the computational aspects of statistics; hypothesis testing, goodness of fit; nonparametric tests; linear and quadratic regression, correlation and analysis of variance. Not open to students who have credit for or are enrolled in an equivalent statistics course (e.g., PSYC 210, MATH 312 or MATH 314).

MATH 221 Analysis II
(Prerequisite: MATH 114) Topics include: applications of the definite integral, transcendental functions, methods of integration, improper integral, parametric equations, polar coordinates, and indeterminate forms.

MATH 222 Analysis III
(Prerequisite: MATH 221) Topics include: infinite series, vectors, solid analytic geometry, multivariable calculus, and multiple integration.

MATH 301 4 cr.
Statistics
(Prerequisite: MATH 221) Basic concepts of probability theory, random variables, distribution functions, multivariable distributions, sampling theory, estimation, confidence intervals, hypothesis testing, linear models and analysis of variance.

MATH 312 3 cr.
Probability Theory
(Prerequisite: MATH 221) Basic concepts of probability theory, random variables and their distribution functions; limit theorems and Markov chains.

MATH 314 3 cr.
Statistics
(Prerequisite: MATH 312) Measure of central tendency, measure of dispersion, continuous random variables, expected value, moments, confidence intervals, hypothesis testing, regression, and correlation.

MATH 315 3 cr.
Number Theory
(Prerequisite: MATH 114) Topics include divisibility, the Euclidean algorithm, linear diophantine equations, prime factorization, linear congruences, some special congruences, Wilson’s theorem, theorems of Fermat and Euler, Euler phi function and other multiplicative functions, and the Mobius Inversion Formula.
MATH 351 3 cr. Linear Algebra
(Prerequisite: MATH 221) Vector spaces, matrices, determinants, linear transformations, eigenvalues, eigenvectors, inner products, and orthogonality.

MATH 360 3 cr. Coding Theory
(Prerequisite: MATH 351) A study of algebraic coding theory. Topics include: linear codes, encoding and decoding, hamming, perfect, BCH cyclic and MDS codes, and applications to information theory.

MATH 446 3 cr. Real Analysis I
(Prerequisite: MATH 222) Topics include: the algebra and topology of the real numbers, functions, sequences of numbers, limits, continuity, absolute and uniform continuity, and differentiation.

MATH 447 3 cr. Real Analysis II
(Prerequisite: MATH 446) Selections from: integration theory, infinite series, and sequences and infinite series of functions, and related topics.

MATH 448 3 cr. Modern Algebra I
(Prerequisite: MATH 351) Fundamental properties of groups, rings, polynomials, and homomorphisms.

MATH 449 3 cr. Modern Algebra II
(Prerequisite: MATH 448) Further study of algebraic structures.

MATH 460 3 cr. Topology
(Prerequisite: MATH 446) Topological spaces: connectedness, compactness, separation axioms, and metric spaces.

MATH 461 3 cr. Complex Variables
(Prerequisite: MATH 222) The theory of complex variables: the calculus of functions of complex variables, transformations, conformal mappings, residues and poles.

MATH 462 3 cr. Vector Calculus
(Prerequisites: MATH 222, MATH 351) The calculus of scalar and vector fields and of functions defined on paths or surfaces. Implicit Function, Green’s, Stokes, and Gauss’ Theorems. Applications.

MATH 493-494 6 cr. Undergraduate Mathematics Research
An introduction to mathematical research. Students will be required to investigate, present, and write up the result of an undergraduate-level mathematical research project. Students will gain experience in researching the mathematical literature, investigating a mathematical problem, and learning how to write a mathematical paper. Students will be required to present their results in both oral and written form.

MEDIA AND INFORMATION TECHNOLOGY

Matthew M. Reavy, Ph.D., Director

Overview

Electronic communication has significantly changed the world in many ways. Virtually all aspects of communication within and between institutions and corporations are affected by the need to provide information in multiple media. As the fields of computers and communication have come together, we have created the need for a new type of educational preparation. No longer do we look only to print documents and oral presentations as the way to convey information. Rather, there is a great need for people who are knowledgeable in both the technical aspects and the communication aspects of this new paradigm.

Our program builds on the strengths of several departments at the University to produce a program that has strength in all its parts. Starting with Physics/Electrical Engineering to provide a careful look at the science of communication, we add the support of the Computing Sciences to provide programming tools and network expertise. To the student’s understanding of the science and the languages of computers, we add the practical and theoretical skills of the Communication Department to produce effective multimedia specialists. The student may add additional writing courses from the English Department. In addition to courses in the major, the student will develop a content area in another discipline and will be required to produce a major project in this area. This culminating project will demonstrate practical experience as well as theoretical knowledge.

Media and Information Technology students tend to focus their studies on either Media specialization, investigating a mathematical problem, and learning how to write a mathematical paper. Students will be required to present their results in both oral and written form.

TOTAL: 130 CREDITS

To most effectively use the skills developed in the Media and Information Technology major, a content area is needed. Therefore, each student will complete either: (a) another academic major; or (b) an academic minor (or concentration) and take a course in Statistics (Quantitative Reasoning Area).

1. Or CMPS 144
2. Also GE NSCI requirement
3. MATH 204 or any other statistics course that fits into GE QUAN. If the cognate is a second major in the sciences, any GE QUAN is acceptable.
4. PHIL 214 Computers and Ethics or equivalent course in Philosophy or Theology/Religious Studies area.

Web development or digital video production. Students are free to pursue other interdisciplinary interests such as online advertising or database journalism.
MATH 351 3 cr.
Linear Algebra
(Prerequisite: MATH 221) Vector spaces, matrices, determinants, linear transformations, eigenvalues, eigenvectors, inner products, and orthogonality.

MATH 360 3 cr.
Coding Theory
(Prerequisite: MATH 351) A study of algebraic coding theory. Topics include: linear codes, encoding and decoding, hamming, perfect, BCH cyclic and MDS codes, and applications to information theory.

MATH 446 3 cr.
Real Analysis I
(Prerequisite: MATH 222) Topics include: the algebra and topology of the real numbers, functions, sequences of numbers, limits, continuity, absolute and uniform continuity, and differentiation.

MATH 447 3 cr.
Real Analysis II
(Prerequisite: MATH 446) Selections from: integration theory, infinite series, sequences and infinite series of functions, and related topics.

MATH 448 3 cr.
Modern Algebra I
(Prerequisite: MATH 351) Fundamental properties of groups, rings, polynomials, and homomorphisms.

MATH 449 3 cr.
Modern Algebra II
(Prerequisite: MATH 448) Further study of algebraic structures.

MATH 460 3 cr.
Topology
(Prerequisite: MATH 446) Topological spaces: connectedness, compactness, separation axioms, and metric spaces.

MATH 461 3 cr.
Complex Variables
(Prerequisite: MATH 222) The theory of complex variables: the calculus of functions of complex variables, transformations, conformal mappings, residues and poles.

MATH 462 3 cr.
Vector Calculus
(Prerequisites: MATH 222, MATH 351) The calculus of scalar and vector fields and of functions defined on paths or surfaces. Implicit Function, Green’s, Stokes, and Gauss’ Theorems. Applications.

MATH 493-494 6 cr.
Undergraduate Mathematics Research
An introduction to mathematical research. Students will be required to investigate, present, and write up the results of an undergraduate-level mathematical research project. Students will gain experience in researching the mathematical literature, investigating a mathematical problem, and learning how to write a mathematical paper. Students will be required to present their results in both oral and written form.

MEDIA AND INFORMATION TECHNOLOGY

Matthew M. Reavy, Ph.D., Director

Overview
Electronic communication has significantly changed the world in many ways. Virtually all aspects of communication within and between institutions and corporations are affected by the need to provide information in multiple media. As the fields of computers and communication have come together, they have created the need for a new type of educational preparation. No longer do we look only to print documents and to oral presentations as the way to convey information. Rather, there is a great need for people who are knowledgeable in both the technical aspects and the communication aspects of this new paradigm. Our program builds on the strengths of several departments at the University to produce a program that has strength in all its parts. Starting with Physics/Electrical Engineering to provide a careful look at the science of communication, we add the support of the Computing Sciences to provide programming tools and network expertise. To the student’s understanding of the sciences and the languages of computers, we add the practical and theoretical skills of the Communication Department to produce effective multimedia specialists. The student may add additional writing courses from the English Department. In addition to courses in the major, the student will develop a content area in another discipline and will be required to produce a major project in this area. This culminating project will demonstrate practical experience as well as theoretical knowledge. Media and Information Technology students tend to focus their studies on either Web development or digital video production. Students are free to pursue other interdisciplinary interests such as online advertising or database journalism.

**TOTAL: 130 CREDITS**

To most effectively use the skills developed in the Media and Information Technology major, a content area is needed. Therefore, each student will complete either: (a) another academic major; or (b) an academic minor (or concentration) and take a course in Statistics (Quantitative Reasoning Area).

1. Or ECON 414
2. Also GE NSCI requirement
3. MATH 204 or any other statistics course that fits into GE QUAN. If the cognate is a second major in the sciences, any GE QUAN is acceptable.

To most effectively use the skills developed in the Media and Information Technology major, a content area is needed. Therefore, each student will complete either: (a) another academic major; or (b) an academic minor (or concentration) and take a course in Statistics (Quantitative Reasoning Area).
Major Electives (see department pages for course descriptions)

- CMPS 312  Web Technology
  (or CMPS 202)
- CMPS 376  Rapid Prototyping
- COMM 310  Mass Communication Law
- COMM 324  Computer-Assisted Newswriting
- ECO 370  Interactive Marketing
  (prerequisite: MKT 351)
- MIT 310  E-Research: Information-seeking Skills and Strategies
- MIT 481  Internship in Information Technology
- PHYS 103  Seeing the Light
- PHYS 108  New York Times Physics
- PHYS 113  Science of Photography
- WRTG 211  Technical and Business Writing
- WRTG 218  Writing the Web

Course Descriptions

MIT 310  E-Research: Information-seeking Skills and Strategies
This course concentrates on the use of the Internet for research in a variety of fields, emphasizing online research techniques and effective online search strategies, both of which will be valuable for careers in the 21st century. Topics include collection of information, evaluation and selection of databases, and evaluation of information from web resources. Types of online information resources will be included, e.g., government documents, statistical sources, consumer, medical, and business information; online communities, etc.; online periodical databases; use of search engines; copyright and fair use issues; and citing electronic sources. Students will develop lifelong learning skills for locating and evaluating information. Hands-on experience will be emphasized.

MIT 481  Internship in Information Technology
This is an extensive job experience in media and information technology that carries academic credit. Prior approval is required.

MIT 490  (W) Information Technology Project
(Seniors only, departmental permission required).
In this course, students prepare and present Information Technology projects to be evaluated by the instructor and their fellow students.

MILITARY SCIENCE/ARMY RESERVE OFFICER TRAINING CORPS (ROTC)

Overview
The University of Scranton’s Military Science Department, also known as the Royal Warrior Battalion, was named the top officer-producing program in the Second Brigade and was documented in the top 10% of 105 programs in the Eastern ROTC Region for 2002. It was also selected as “Best Unit” for 1999-2000 in the Eastern ROTC Region, and the department established itself in the top 10% of all 270 ROTC programs in 1998.

The Royal Warrior Battalion has a flexible ROTC program that can be tailored to most students’ needs, and classes are offered on campus. Two- and four-year programs are available, both of which can lead to a commission as an officer in the United States Army (after passing a medical examination). Most students take one course per semester of the basic course program (freshman and sophomore years), and one course per semester of the advanced courses (junior and senior years).

The Royal Warrior Battalion enjoys outstanding results in awarding scholarships. In the spring 2004 semester, 122 students were enrolled in the Royal Warrior Battalion, with 56 scholarship recipients.

Advanced ROTC Course
Juniors, seniors, and graduate students qualify for entry into the Advanced ROTC course in three ways:

1. On-campus courses: Most students take the introductory Military Science courses of the basic Military Science program on campus during their freshman and sophomore years. This allows them to participate in adventure training, and to learn about the opportunities and responsibilities of being an Army officer without incurring any obligation.
2. Summer programs: Students may also qualify through a paid, five-week Leadership Training Course (LTC) summer training session held in Fort Knox, Kentucky, which provides military training equivalent to the instruction received by freshmen and sophomores in the basic course program.
3. Advanced Placement: Students with any prior military service, members of the United States Army Reserves or National Guard, or former Junior ROTC members may qualify for advanced placement into the Advanced ROTC program.

Two-Year Program
Available to qualified full-time students (who must have a minimum of two academic years remaining to degree completion) who meet criteria set forth in paragraphs (2) or (3) above. Application for this program should be made prior to the end of the spring semester of the sophomore year for those students not previously enrolled in Military Science instruction. Also available for graduate students.

Four-Year Program
Consists of attending the freshman and sophomore courses; students can begin as late as the fall semester of their sophomore year if approved by the department chair. Enrollment in the first four courses of Military Science is accomplished in the same manner as any other college course and carries no military obligation for non-scholarship students. Application to enroll in the advanced Military Science courses should be made while the student is enrolled in Military Science 202. Each contracted student is required to complete the Leadership Development Assessment Course (LDAC), a paid, five-week training course held during the summer months between a student’s junior and senior year at Fort Lewis, near Seattle, Washington. Transportation, food, lodging, and medical and dental care are provided at no cost to the student.

Scholarships
There are significant scholarship opportunities for ROTC students. Scholarships pay annually up to $20,000 for tuition, $900 for books, and $2,500-$4,000 stipend (paid monthly). The stipend pays $250 monthly (August to May) for freshmen and up to $400 monthly for seniors. Freshmen and sophomores can apply for three- and two-year full scholarships in December. Historically, most University of Scranton students win scholarships by their junior year. Winners of full, high school level, ROTC scholarships are provided free room and board by The University of Scranton.

Partner in Nursing Education (PNE)
In 1996, the Army designated The University of Scranton as a PNE and sends many high-school-level Army ROTC Nursing Scholarship recipients to Scranton each year. Additionally, Nursing students who complete the Army Nurse Summer Training Program (NSTP) receive 3 credits towards NURS 482 lab.

Transcript Credit
Up to 15 Military Science credits can be counted on the transcript. Additionally, Physical Fitness Training (PHED 138) can count for the 3 required Physical Education credits and nursing students receive 3 credits toward senior-year clinicals for Army NSTP. Candidates for an Army commission through Military Science are required to fulfill curriculum requirements in fields such as communications, military history, and computer literacy. Generally, these requirements will be met by satisfying the University’s general-education requirements. Contact the professor of Military Science for specific requirements.

Minor in Leadership
American Military Leadership emphasizes total competence in one’s field, coupled with an absolute respect for ethics. It is based on the knowledge of people, history, and current management principles. The Military Science Department offers a minor in Leadership that capitalizes on the classroom instruction offered in the courses listed below provided by several University departments. The minor also offers unique field experiences for students to practice leadership skills in demanding but safe and controlled training activities. The minor is open to all University students in the advanced military science courses. A minor in Leadership requires 18 credits, at least six of which must be approved electives outside of the Military Science department. The student must take MS 301, MS 302, MS 401, and MS 402, plus courses from the list of approved electives. They must also complete a University internship approved by the instructor of record, the Professor of Mili-

The student must take MS 301, MS 302, MS 401, and MS 402, plus courses from the list of approved electives. They must also complete a University internship approved by the instructor of record, the Professor of Mili-
tary Science. The student may choose two electives from the following approved courses:

- CJ 237 MS 201, 202
- GEOG 134 MS 480
- HIST 214 MS 481
- HIST 216 PHED 138
- HIST 218 PS 130, 131
- HIST 219 PS 213
- HIST 220 PS 227
- HIST 223 PS 231
- HIST 239 PS 232
- INTD 103 PS 327
- MGT 351 PS 329
- MGT 352 PSYC 220
- MGT 471 PSYC 236
- MGT 490 PSYC 284
- MS 101, 102 S/CJ 234

The student must receive a grade of C or better in each course in order for it to count towards the minor, and the student must have an average of 3.0 in the courses counting toward the minor.

Course Descriptions

MS 101-102 2 cr.

Concepts of Leadership I-II

Instruction is designed to provide basic understanding of military knowledge while concentrating on leadership skills and civic responsibilities important to all citizens. Students may elect to participate in activities that produce expertise in rappelling, orienteering, first aid, swimming and marksmanship.

MS 111-112 0 cr.

Leadership Applications Laboratory

Freshmen and sophomores are encouraged to participate in this elective. Hands-on instruction is designed to reinforce classroom training on leadership.

MS 131-132 0 cr.

Advanced Leadership Applications Laboratory

Advanced-course junior/senior students are required to attend. Students plan, conduct and coordinate training under the supervision of ROTC faculty and staff members. Emphasis is on reinforcement of classroom leadership training and military instruction to prepare juniors for situations they will experience at the advanced summer camp.

MS 201-202 4 cr.

Dynamics of Leadership I-II

Instruction is designed to familiarize the student with basic military operations and the principles of leadership. Students experience hands-on training with navigation and topographic equipment, first aid and military weapons.

MS 301-302 3 cr.

Military Leadership I-II

(Prerequisite: MS 201-202 or equivalent) This course continues to develop each student’s leadership qualities and teaches students how to plan, resource and execute effective training in preparation for attendance at the Leadership Development Assessment Course prior to their senior year. (MS 301 is 2 credits; MS 302 is 1 credit.)

MS 401-402 3 cr.

Advanced Military Leadership

Taught by the Professor of Military Science, this course continues to develop the student’s leadership skills. Emphasis is on operations of a military staff, briefing techniques, effective writing, army training systems, and the logistical and administrative support of military operations. (MS 401 is 2 credits; MS 402 is 1 credit.)

MS 480 2 cr.

Internship in Military Science: Leadership Development Assessment Course

(Prerequisites: MS 301, MS 302, contracted status as a cadet) This internship is a paid five-week experience of training and evaluation conducted at Fort Lewis, Washington with ROTC cadets from all across the country. It gives the student the opportunity to practice the leadership theory acquired in the classroom.

MS 481 1 cr.

Internship in Military Science: Cadet Troop Leading

(Prerequisites: MS 301, MS 302, contracted status as a cadet) This internship is a paid three-week experience of leadership training and mentoring. The intern leads and supervises soldiers in the planning and execution of the unit’s scheduled training as an understudy to a military officer in the U.S. Army.

PHED 138 1 cr.

Physical Fitness Training

Stretching, strengthening exercises, and an aerobic workout, supervised by Army ROTC faculty. This course counts toward the 3-credit PHED requirement during the junior and senior years. This course is open to all students.

NEUROSCIENCE

J. Timothy Cannon, Ph.D., Program Director

Overview

The foundation courses of this interdisciplinary curriculum are selected from the Biology, Psychology, and Chemistry departments. Depending upon the electives chosen, the program can prepare students for a variety of graduate programs within the field of neuroscience. Such graduate training may draw from a range of disciplines, including biology, psychology, anatomy, pharmacology, toxicology, biophysics, biochemistry and medicine.

Students have ample research opportunities in laboratories that can support a diversity of behavioral, biochemical, neurophysiological and neuroanatomical investigations. The program is administered by an interdisciplinary committee.

Major in Neuroscience

42.5 to 46.5 credits. Majors must take two electives from both Biology and Psychology. Psychology electives must be drawn from PSYC 220, 221, 222, 225, 230, 234, 235, or, with permission of the director, PSYC 284 or 384. Biology electives must be drawn from those intended for Biology majors. With permission of the director, NEUR 394: Special

Neuroscience
J. Timothy Cannon, Ph.D., Program Director
Overview
The foundation courses of this interdisciplinary curriculum are selected from the Biology, Psychology, and Chemistry departments. Depending upon the electives chosen, the program can prepare students for a variety of graduate programs within the field of neuroscience. Such graduate training may draw from a range of disciplines, including biology, psychology, anatomy, pharmacology, toxicology, biophysics, biochemistry, and medicine.
Topics in Neuroscience may be used to fulfill one Psychology or Biology elective requirement.

Cognate in Neuroscience
31 to 37 credits. Students should consider their proposed graduate program when choosing cognate electives from the areas of chemistry, mathematics, physics, and computer science.

Course Descriptions

**NEUR 231**
3-4.5 cr.
(E.W) Behavioral Neuroscience
(Prerequisite: PSYC 110 or BIOL 141-142)
Introduction to the field of neuroscience, examining the cellular bases of behavior, effects of drugs and behavior, brain/body correlates of motivation and emotion, and neural changes accompanying pathology. Three hours lecture and optional 1.5-credit laboratory. Lab fee; lab offered fall only. (Also listed as PSYC 231.)

**NEUR 330L**
2 cr.
(W) Neuroscience Research Methods Lab
(Prerequisite: BIOL 348 or BIOL 358 or PSYC 231) This lab will expose students to an array of research technologies, strategies and data analysis techniques related to the field of neuroscience. Primary literature relevant to laboratory exercises will be read and incorporated into lab reports and proposals.

**NEUR 348**
4.5 cr.
Functional Neuroanatomy
(Prerequisite: BIOL 245, or, for Neuroscience majors, PSYC 231) Study of the organization and function of the neuron, neural circuits, and the major sensory and motor components of the central nervous system; bioelectric phenomena, synaptic transmission; the neural basis for higher mental functions. Six research-oriented laboratory exercises. One hour lecture; three hours lab. (Also listed as PSYC 348.)

**NEUR 358**
3 cr.
Cellular and Molecular Neurobiology
(Prerequisites: BIOL 141-142) Introduces Biology and Neuroscience majors to the cellular and molecular biology of the vertebrate nervous system. Includes ion channel structure and function, synthesis, packaging and release of neurotransmitters, receptor and transduction mechanisms, intracellular signalling, cell-to-cell communication, glial cell function, and neural growth and development. Three hours lecture. (Also listed as BIOL 358.)

**NEUR 384**
3-6 cr.
Special Topics in Neuroscience
(Formerly NEUR 170; prerequisites: BIOL 141-142, PSYC 231) Course topics are developed by individual faculty to provide in-depth coverage of specific areas in neuroscience. Some courses have required or elective laboratory components. Course titles and descriptions will be provided in advance of registration.

**NEUR 493-494**
3-6 cr.
Undergraduate Research in Neuroscience
(Formerly NEUR 160-161; prerequisites: BIOL 141-142, PSYC 231, PSYC 330, and permission of instructor) Individual study and research on a specific topic relevant to neuroscience under the supervision of a faculty member. It is strongly recommended that this research be initiated during the junior year, and it is expected that research will extend over a two-semester period.

**PHILOSOPHY**

**Faculty**
Richard J. Konoski, Ph.D., Chair
David W. Black, Ph.D.
Timothy K. Casey, Ph.D.
Matthew J. Fairbanks, Ph.D.
Chris Chapman, Ph.D.
Ronald McKinney, S.J., Ph.D.
Sharon M. Meagher, Ph.D.
Ann A. Pang-White, Ph.D.
William V. Rowe, Ph.D.

**Overview**
The basic objectives of the Philosophy Department may be stated as follows:
1. To inspire the student to confront the philosophical problems implicit in the experience of self, others and the universe, together with the question of their relations to ultimate transcendence (God and immortality);
2. To develop in the student habits of clear, critical thinking within the framework of both an adequate philosophical methodology and accepted norms of scholarship;
3. To introduce the student to reading critically the great philosophers, past and present; and
4. Finally, to help the student to formulate for himself or herself a philosophy of life or worldview consistent with the objectives of liberal education at a Catholic university.

For the Bachelor of Arts degree in Philosophy, the major must take 24 credits (eight courses) in Philosophy in addition to the 6 credits required of all students. These 24 credits must include a logic course and at least two courses on the 300 or 400 level. Majors should take logic before the senior year.

See also the Philosophy offerings in the SJLA Program described elsewhere in this catalog.

**Minor in Philosophy**
A minor in Philosophy consists of 18 credits — the 6 credits required of all students and 12 additional credits. Seven distinct philosophy minors are available: the traditional open minor, Ethical Issues of Professional Life, Philosophy and Commercial Life, Pre-Law, History of Philosophy, Philosophy and Religious Life, and Philosophy and Science. Course listings for specific minors are available on the Philosophy Department Web page or in the Philosophy Department office.

**Course Descriptions**

**PHIL 120:** Introduction to Philosophy is a prerequisite for PHIL 210: Ethics. PHIL 210 is a prerequisite for all other philosophy courses.

**PHIL 120**
Introduction to Philosophy
The aim of this course is to awaken in the student an appreciation of the nature and method of philosophical inquiry through an examination of key texts that grapple with central questions in the history of philosophy.

**PHIL 210**
Ethics
(Prerequisite: PHIL 120) An examination of moral issues through close readings of important historical texts such as the writings of Plato, Aristotle, Augustine, Aquinas, Kant or Mill. Themes will include happiness, virtue, the nature of justice, free choice, conscience, natural law and obligation, God and morality.

**PHIL 211**
(P) Business Ethics
This course is an application of standard philosophical principles and theories to the critical study of questions, issues, and problems that surround the moral conduct of business. Recommended for business majors.

**PHIL 212**
(P) Medical Ethics
Considering nine ethical methodologies, this course views health care holistically in terms of human biological and psychological needs to show that ethical action must intend to satisfy them. Ethical principles are applied to such issues as professional communication, sexuality, procreation, experimentation, bodily modification, and death. Recommended for health care students.

**PHIL 213**
(P) Environmental Ethics
An introduction to environmental philosophy and the various ethical responses to the ecological crisis of the late 20th century. Examines such issues as biocentrism vs. anthropocentrism, the relation between culture and nature, the environmental ethic debate.

**PHIL 214**
(P) Computers and Ethics
Ethical aspects of hacking, software, piracy, computer-aided decision making, protection of software by copyright, patent, trade secret laws, unauthorized use of computer resources, privacy and database security, program warranties and programmer responsibility, artificial intelligence, the interface between human and computer.

**PHIL 215**
(P) Logic
An introduction to logic as the science of argument including the nature of arguments in ordinary language, deduction and induction, truth and validity, definition, informal fallacies, categorical propositions and syllogisms, disjunctive and hypothetical syllogisms, enthymemes, and dilemmas.

**PHIL 218**
(PD) Feminism: Theory and Practice
What is feminism? What is the relationship between feminist theory and practice? This course focuses on these and related philosophical questions. Special attention will be paid to the interrelationship of gender, class and race. This course also fulfills a requirement in the Women’s Studies Concentration.

**PHIL 220**
(P) Ancient Philosophy
The study of Socrates, Plato, Aristotle and their immediate successors. Special emphasis on the theory of knowledge, the metaphysics and philosophical anthropology of Plato and Aristotle.
Topics in Neuroscience may be used to fulfill one Psychology or Biology elective requirement.

**Cognate in Neuroscience**
31 to 37 credits. Students should consider their projected graduate program when choosing cognate electives from the areas of chemistry, mathematics, physics, and computer science.

**Course Descriptions**

**NEUR 231** 3-4.5 cr.
(W.E) Behavioral Neuroscience
(Prerequisite: PSYC 110 or BIOL 141-142) Introduction to the field of neuroscience, examining the cellular bases of behavior, effects of drugs and behavior, brain/body correlates of motivation and emotion, and neural changes accompanying pathology. Three hours lecture and optional 1.5-credit laboratory. Lab fee; lab offered fall only. (Also listed as BIOL 231.)

**NEUR 330L** 2 cr.
(W) Neuroscience Research Methods Lab
(Prerequisite: BIOL 348 or BIOL 358 or PSYC 231) This lab will expose students to an array of research technologies, strategies and data analysis techniques related to the field of neuroscience. Primary literature relevant to laboratory exercises will be read and incorporated into lab reports and proposals.

**NEUR 348** 4.5 cr.
Functional Neuroanatomy
(Prerequisite: BIOL 245, or, for Neuroscience majors, PSYC 231) Study of the organization and function of the neuron, neural circuits, and the major sensory and motor components of the central nervous system; bioelectric phenomena, synaptic transmission; the neural basis for higher functions such as cognition, memory, and learning. Three hours lecture; three hours lab. (Also listed as BIOL 348.)

**NEUR 358** 3 cr.
Cellular and Molecular Neurobiology
(Prerequisite: BIOL 141-142) Introduces Biology and Neuroscience majors to the cellular and molecular biology of the vertebrate nervous system. Includes ion channel structure and function, synthesis, packaging and release of neurotransmitters, receptor and transduction mechanisms, intracellular signalling, cell-to-cell communication, glial cell function, and neural growth and development. Three hours lecture. (Also listed as BIOL 358.)

**NEUR 384** 3-6 cr.
Special Topics in Neuroscience
(Formerly NEUR 170; prerequisites: BIOL 141-142, PSYC 231) Course topics are developed by individual faculty to provide in-depth coverage of specific areas in neuroscience. Some courses have required or elective laboratory components. Course titles and descriptions will be provided in advance of registration.

**NEUR 493-494** 3-6 cr.
Undergraduate Research in Neuroscience
(Formerly NEUR 160-161; prerequisites: BIOL 141-142, PSYC 231, PSYC 330, and permission of instructor) Individual study and research on a specific topic relevant to neuroscience under the supervision of a faculty member. It is strongly recommended that this research be initiated during the junior year, and it is expected that the research will extend over a two-semester period.

</table>

1. Foreign language is recommended by department.
2. In the Capstone area of 24 hours, the department requires that 12 credits be focused in one field. It should be noted that 6 credits are not required by the department in the major area are added to the free area in senior year. These may be taken in any field, including Philosophy.

**PHIL 221**
(P) Medieval Philosophy
A survey of philosophy in the European Middle Ages, including the connections between medieval philosophy and its classical and Christian sources; questions concerning nature, grace, reason, faith, theology, philosophy, and the nature and ethos of scholasticism.

**PHIL 222**
(P) Modern Philosophy I

**PHIL 223**
(P) Modern Philosophy II
The development of idealism in the thought of Kant, Fichte, Schelling, and Hegel, with its influence on Feuerbach, Marx, Engels, and Kierkegaard. Special consideration of dialectical thinking in its resolution of the antitheses of reality and appearance, freedom and necessity, infinite and finite, and faith and knowledge.

**PHIL 224**
(P) Foundations of Twentieth-Century Philosophy
A study of some of the key figures that have set the tone for the 20th-century philosophy. Buber, Marx, Kierkegaard, Hume and Russell are studied in detail.

**PHIL 225**
(PD) Asian Philosophy
This course will introduce students to the various systems of Asian philosophy including Hinduism, Buddhism, Confucianism, Taoism and Shinto with special emphasis on the metaphysics, ethics and political philosophy of these systems.

**PHIL 226**
(PD) Chinese Philosophy
An introduction to the classical Chinese understanding. The course explores Daoist teachings and vision, the thought of Confucius and Buddhism.

**PHIL 227**
(P) Political Philosophy
Philosophical and ethical analysis of the social nature of man with emphasis on modern social questions. Ethics of the family, of nation and of communities. International ethics.

**PHIL 229**
(PD) Philosophy of Religion
An investigation of the main topics in philosophers’ reflections on religion; arguments for the existence of God; meaningful statements about God; assessment of religious experience; notions of miracle, revelation, and immortality; the problem of evil; relations between religious faith and reason; religion and ethics. Readings from classical and contemporary authors.

**PHIL 231**
(PD) Philosophy of Women
This course reviews the philosophies of women in western thought from Plato and Aristotle to Nietzsche, Schopenhauer, and Beauvoir. It concludes with an interdisciplinary selection of readings, to be addressed philosophically, on women in art, anthropology, literature, politics, theology, psychology, etc.

**PHIL 232**
Idea of a University

**PHIL 233**
(P) Existentialism
A critical study of selected works of Kierkegaard, Jaspers, Marx, and Sartre, with special emphasis on the existentialist themes of selfhood, freedom, dread, responsibility, temporality, body, limited and unlimited knowledge and reality, and fidelity to community.

**PHIL 236**
(P) Freud and Philosophy
Examination of overt and covert philosophical implications of Freud’s system of psychoanalysis. Emphasis on actual writings of Freud, particularly after 1920.

**PHIL 238**
(P) Wealth and the Human Good
What is wealth? Is wealth the key to happiness? Is it possible for individual human beings and human society to flourish without wealth? What does it mean to say that the measure of success in contemporary consumer society is wealth? These and other questions related to life in modern capitalist commercial society will be addressed in the course.

**PHIL 240**
(BW) Logic and Written Discourse
PHIL 240 is to equip students with an understanding of the conditions that constitute good reasoning, and also the skill to construct good arguments in writing. It covers the following four areas: the nature of logical arguments, deduction (e.g., syllogism, propositional logic), induction (e.g., analogical reasoning, causal inference), and fallacies.

**ED/P 306**
(P) Philosophy of Education
An examination of representative modern systemic philosophies of education with a critical analysis of the answers that each system of philosophy provides to the important questions concerning the nature of knowledge, value, and man and society.

**PHIL 310**
(P) Epistemology
An introduction to the theory of knowledge ranging from ancient to contemporary philosophy. Topics include sensation, perception, memory, recollection, reason, truth, science, technology, language, and the body. The unifying theme of the course is the historical importance of imagination and the central role it plays in knowing.

**PHIL 311**
(P) Metaphysics
A textual inquiry into the adequacy of philosophers’ answers to the fundamental question, “What is?” Special attention will be given to Plato, Aristotle, Aquinas, Kant’s critical philosophy and the issues of nature and history.

**PHIL 312**
(P) Modern Philosophy III
A study of 19th-century European philosophers such as Hegel, Nietzsche, Kierkegaard and Marx. We will consider the place of philosophy in history and society, the theme of conflict in life and thought, and the simultaneous spread and decay of humanism in Europe.

<tbody>
<tr>
<td>PHIL 313</td>
<td>Philosophy and Friendship</td>
<td>3 cr.</td>
<td>An historical survey of primary texts which discuss friendship. Readings in the course include authors of the ancient, medieval, modern and contemporary periods in the history of philosophy. Some of these authors are Xenophon, Plato, Aristotle, Cicero, Augustine, de Montaigne, Bacon, Kant, Emerson, Nietzschle, Gray, Arendt and Sartre.</td>
</tr>
<tr>
<td>PHIL 314</td>
<td>(PD,W) Philosophy and the City</td>
<td>3 cr.</td>
<td>This course explores philosophical issues connected to urban and public policy. Students will analyze the relationship between philosophy and public life and will develop a deeper understanding of their own relation to the city and their roles as citizens.</td>
</tr>
<tr>
<td>PHIL 315</td>
<td>(P) Twentieth-Century Political Philosophy</td>
<td>3 cr.</td>
<td>This course is a survey of modern social contract theory and its relation to capitalism, and of modern Marxism. Issues raised will include obligation and consent, equality, freedom and self-determination, the role of markets, and the role of the state.</td>
</tr>
<tr>
<td>PHIL 316</td>
<td>(P,W) American Perspectives on Health Care Ethics</td>
<td>3 cr.</td>
<td>This course will consider basic ethical issues in the practice and distribution of health care in the United States. Topics covered will include the physician-patient relationship, clinical issues such as transplants or end-of-life concerns, the nature of professionalism, just distribution, and the role of the state.</td>
</tr>
<tr>
<td>PHIL 319</td>
<td>(P) Philosophy of Law</td>
<td>3 cr.</td>
<td>A study of the various justifications of law and their implications. Special consideration will be given to the problems of civil disobedience and the force of law in private institutions.</td>
</tr>
<tr>
<td>PHIL 320</td>
<td>(P) Aesthetics</td>
<td>3 cr.</td>
<td>The main theories of the essential character of beauty or art, how they are judged, how they are related to the mind and the whole person, how they are created and how this creativity expresses a commitment to oneself and to the world. (May be used for Art History minor.)</td>
</tr>
<tr>
<td>PHIL 321</td>
<td>Great Books</td>
<td>3 cr.</td>
<td>Major thinkers in the Western philosophical, religious, political and literary traditions. This course emphasizes philosophical themes in literature.</td>
</tr>
<tr>
<td>PHIL 325</td>
<td>(P) Literature and Ethics</td>
<td>3 cr.</td>
<td>This course examines the “old quarrel between philosophy and literature,” the dispute between Plato and Ancient Athenian poets regarding the best and truest source of moral knowledge, and examines the impact of this quarrel on contemporary moral theory and practice.</td>
</tr>
<tr>
<td>PHIL 326</td>
<td>(PD) Advanced Topics in Feminist Philosophy</td>
<td>3 cr.</td>
<td>(P) This course will explore a special topic in feminist philosophy. Course may be repeated as topics vary. Possible topics might include: feminist aesthetics, issues of equality, theories of the body. This course is cross-listed with Women’s Studies.</td>
</tr>
<tr>
<td>PHIL 327</td>
<td>Readings in the Later Plato</td>
<td>3 cr.</td>
<td>A survey and contextualization of the dialogues usually said to be “Later” in Plato’s intellectual development will precede a textually based examination of those dialogues in which Plato’s dialectic turns on the “concept” of difference. Thaetetus, Sophist, and Parmenides will be emphasized.</td>
</tr>
<tr>
<td>PHIL 328</td>
<td>(P) Philosophy of Literature</td>
<td>3 cr.</td>
<td>This course examines the nature of literature, and its relation to philosophy and political life. Students will study both classical texts on literature and contemporary Anglo-American examinations and appropriations of them, as well as recent European literary theory.</td>
</tr>
<tr>
<td>PHIL 331</td>
<td>(P) Feminist Philosophy of Science</td>
<td>3 cr.</td>
<td>A feminist critique of both the alleged value-free character of modern science and the positivist philosophy of science supporting this view. The course thus focuses on feminist arguments for the contextual, i.e., social, political and economic, nature of science and the resulting need to rethink such key concepts as objectivity, evidence and truth in light of androcentrism and gender bias. Consideration is also given to critical responses from feminist and nonfeminist defenders of more traditional accounts of science.</td>
</tr>
<tr>
<td>PHIL 340</td>
<td>(PD) Philosophy and Judaism</td>
<td>3 cr.</td>
<td>A study of several Jewish thinkers who lived and wrote in the context of two “endings”: the end of European Jewery in the Holocaust and the end of the Jewish Diaspora through the creation of Israel.</td>
</tr>
<tr>
<td>PHIL 401</td>
<td>(P) Philosophy of Culture</td>
<td>3 cr.</td>
<td>Examines the meaning of the term “culture.” Explores the notions of civilization and barbarism, common principles in cultural development, and the interaction of such cultural forces as myth, magic, language, art, religion, science, and technology. Special attention will be given to the question of “progress” and “regress” in culture.</td>
</tr>
<tr>
<td>PHIL 411</td>
<td>(P) Thomas Aquinas: Philosophy and Controversy</td>
<td>3 cr.</td>
<td>PHIL 411 is a contextual study of Thomas Aquinas’ philosophy, a great thinker in the 13th century. Students will explore his metaphysics, ethics, and anthropology will be examined. His dispute with the Averroists on the status of the intellect, the condemnation of some propositions of his in 1277, and his later canonization in 1325 will also be discussed.</td>
</tr>
<tr>
<td>PHIL 412</td>
<td>(P) Art and Metaphysics</td>
<td>3 cr.</td>
<td>The course utilizes the work of Martin Heidegger as well as several contemporary American novelists to explore the philosophical problem of nihilism as it manifests itself today in the relationship between modern technology and art. Special attention is given to modern architecture.</td>
</tr>
<tr>
<td>PHIL 414</td>
<td>(PD,W) Philosophy of Emmanuel Levinas</td>
<td>3 cr.</td>
<td>This course is a study of the 20th-century Jewish philosopher Emanuel Levinas. We will focus on Levinas’ theory of ethical experience, an account that takes its categories from both Greek and Hebrew sources, thereby enriching the dialogue between Jewish and Christian traditions in philosophy.</td>
</tr>
<tr>
<td>PHIL 418</td>
<td>(P) Phenomenology</td>
<td>3 cr.</td>
<td>An introduction to this 20th-century European movement through selected works of Husserl, Heidegger, Sartre, and Merleau-Ponty. Topics include the nature of the self, lived experience, history, social reality, sense perception, technology and science, space and time, the lived body, and the theory of intentionality.</td>
</tr>
<tr>
<td>PHIL 420</td>
<td>(P) Philosophy of Rhetoric</td>
<td>3 cr.</td>
<td>A systematic investigation of the form, meaning and influence of rhetoric. Explores the relationships between topic and metaphor, logic and narration, ethos and logos, conscience and persuasion. Special attention is given to the various relationships between rhetoric and philosophy.</td>
</tr>
<tr>
<td>PHIL 425</td>
<td>Postmodern Philosophy</td>
<td>3 cr.</td>
<td>An examination of the transition from modernist culture and thought to postmodernist culture and thought. Derrida’s method of deconstruction will serve as the paradigm example of postmodernism. Recommended for those interested especially in literature and fine arts.</td>
</tr>
<tr>
<td>PHIL 430</td>
<td>(P) Philosophy of the Social and Behavioral Sciences</td>
<td>3 cr.</td>
<td>The goal of the course is to encourage students to think philosophically about issues raised in social scientific studies, especially regarding the following: (1) the problem of cross-cultural understanding and interpretation, (2) the difficulties of research design and methodology, and (3) the relationship between social science, ethics, and policy making.</td>
</tr>
<tr>
<td>PHIL 431</td>
<td>(P) Philosophy of Science</td>
<td>3 cr.</td>
<td>An introduction to the history and philosophy of science. Selections from Darwin’s The Origins of Species (1859) and The Descent of Man (1871) and Popper, Feyerabend, Hanson, Stace, Quine, Frank, Rescher, Hempel, and Baier.</td>
</tr>
<tr>
<td>PHIL 434</td>
<td>(P) Issues in Philosophy and Theology</td>
<td>3 cr.</td>
<td>This course will investigate certain modern and contemporary problems in the relationship between philosophy and theology. In particular, it will examine the ways in which philosophical discussions (both specific arguments and general positions) influence theological discussions, as evidence of the suggestion that philosophy “gives voice” to theology.</td>
</tr>
<tr>
<td>PHIL 435</td>
<td>(P) Formal and Symbolic Methods of Algebra</td>
<td>3 cr.</td>
<td>A survey of algebraic systems, with special emphasis on the work of Sheffer. The algebraic systems of modern mathematics are examined in detail, with special emphasis on the work of Sheffer.</td>
</tr>
<tr>
<td>PHIL 436</td>
<td>(P) Logic</td>
<td>3 cr.</td>
<td>This course covers the basics of modern logic, including propositional logic and first-order logic, as well as model theory and proof theory. The course will also introduce students to the philosophy of logic.</td>
</tr>
<tr>
<td>PHIL 437</td>
<td>(P) History of Philosophy and Psychology</td>
<td>3 cr.</td>
<td>A survey of the development of philosophical thought, with special emphasis on the major philosophical movements of the past. The course will also introduce students to the philosophy of history.</td>
</tr>
<tr>
<td>PHIL 438</td>
<td>(P) Philosophy of Science</td>
<td>3 cr.</td>
<td>An introduction to the history and philosophy of science. Selections from Darwin’s The Origins of Species (1859) and The Descent of Man (1871) and Popper, Feyerabend, Hanson, Stace, Quine, Frank, Rescher, Hempel, and Baier.</td>
</tr>
<tr>
<td>PHIL 439</td>
<td>(P) Philosophy of the Social and Behavioral Sciences</td>
<td>3 cr.</td>
<td>The goal of the course is to encourage students to think philosophically about issues raised in social scientific studies, especially regarding the following: (1) the problem of cross-cultural understanding and interpretation, (2) the difficulties of research design and methodology, and (3) the relationship between social science, ethics, and policy making.</td>
</tr>
<tr>
<td>PHIL 440</td>
<td>(P) Ethics</td>
<td>3 cr.</td>
<td>A survey of the major ethical theories, with special emphasis on the work of Kant, Mill, and Nietzsche. The course will also introduce students to the philosophy of ethics.</td>
</tr>
<tr>
<td>PHIL 441</td>
<td>(P) Aesthetics</td>
<td>3 cr.</td>
<td>The main theories of the essential character of beauty or art, how they are judged, how they are related to the mind and the whole person, how they are created and how this creativity expresses a commitment to oneself and to the world. (May be used for Art History minor.)</td>
</tr>
</tbody>
</table>

College of Arts and Sciences • Philosophy
PHIL 313  
(P) Philosophy and Friendship  
An historical survey of primary texts which discuss friendship. Readings in the course include authors of the ancient, medieval, modern and contemporary periods in the history of philosophy. Some of these authors are, Xenophon, Plato, Aristotle, Cicero, Augustine, de Montaigne, Bacon, Kant, Emerson, Nietzsche, Gray, Arendt and Sartre.

PHIL 314  
(PD,W) Philosophy and the City  
This course explores philosophical issues connected to urban and public policy. Students will analyze the relationship between philosophy and public life and will develop a deeper understanding of their own role in the city and their roles as citizens.

PHIL 315  
(P) Twentieth-Century Political Philosophy  
This course is a survey of modern social contract theory, and its relation to capitalism, and of modern Marxism. Issues raised will include obligation and consent, equality, freedom and self-determination, the role of markets, and the role of the state.

PHIL 316  
(P) American Perspectives on Health-Care Ethics  
This course will consider basic ethical issues in the practice and distribution of health care in the United States. Topics covered will include the physician-patient relationship, clinical issues such as transplants or end-of-life concerns, the nature of professionalism, just distribution, ethics and contemporary American examination. His dispute with the Averroists on the status of the intellect, the condemnation of some propositions of his in 1277, and his later canonization in 1325 will also be discussed.

PHIL 317  
(P) Philosophy and Friendship  
A study of several Jewish thinkers who lived and wrote in the context of two "endings": the end of European Jewery in the Holocaust and the end of the Jewish Diaspora through the creation of Israel.

PHIL 340  
(RD) Philosophy and Judaism  
A study of several Jewish thinkers who lived and wrote in the context of two "endings": the end of European Jewery in the Holocaust and the end of the Jewish Diaspora through the creation of Israel.

PHIL 410  
(P) Philosophy of Culture  
Examines the meaning of the term "culture." Explores the notions of civilization and barbarism, common principles in cultural development, and the interaction of such cultural forces as myth, magic, language, art, religion, science, and technology. Special attention will be given to the question of "progress" and "regress" in culture.

PHIL 411  
(P) Thomas Aquinas: Philosophy and Controversy  
PHIL 411 is a contextual study of Thomas Aquinas' philosophy, a great thinker in the 13th century. Selections from his metaphysics, ethics, and anthropology will be examined. His dispute with the Averroists on the status of the intellect, the condemnation of some propositions of his in 1277, and his later canonization in 1325 will also be discussed.

PHIL 412  
(P) Art and Metaphysics  
The course utilizes the work of Martin Heidegger as well as several contemporary American novelists to explore the philosophical problem of nihilism as it manifests itself today in the relationship between modern technology and art. Special attention is given to modern architecture.

PHIL 413  
(P) Philosophy of Science  
An introduction to the history and philosophy of science. Selections from Darwin’s The Origin of Species (1859) and The Descent of Man (1871) and Popper, Feyerabend, Hanson, Stace, Quine, Frank, Rescher, Hempel, and Baier.

PHIL 414  
(PD,W) Philosophy of Emmanuel Levinas  
PHIL 414 is a study of the 20th-century Jewish philosopher Emmanuel Levinas. We will focus on Levinas’ theory of ethical experience, an account that takes its categories from both Greek and Hebrew sources, thereby enriching the dialogue between Jewish and Christian traditions in philosophy.

PHIL 418  
(P) Phenomenology  
An introduction to the 20th-century European movement through selected works of Husserl, Heidegger, Sartre, and Merleau-Ponty. Topics include the nature of the self, lived experience, history, social reality, sense perception, technology and science, space and time, the lived body, and the theory of intentionality.

**PHYSICS**

Declan Mulhall, Ph.D.
Argyrios C. Varonides, Ph.D.
Christine A. Zakowski, Ph.D.

**Overview**
The Department of Physics and Electrical Engineering offers majors in Physics and Biophysics, as well as the Electrical Engineering, Computer Engineering and Electronics-Business majors described earlier. The objectives of the department are to provide skills, understanding, and the methodology required to initiate active participation in the development of new knowledge about the material universe. The approach of the physicist, based as it is on the analysis of mathematical models dealing with matter and energy and their interactions, supplies a unique and important insight to the solution of problems in many disciplines.

A 1988 study by the Office of Institutional Research at Franklin and Marshall College shows that over 66 years, The University of Scranton ranked 33rd out of 977 four-year, private, primarily undergraduate institutions. Scranton ranked 33rd out of 977 four-year, private, primarily undergraduate institutions.

**Minor in Physics**
21 credits, including PHYS 140, 141, 270 (all with labs), 352, ENGR 252, and at least one of PHYS 473, 372 and/or 371.

**Major in Biophysics**
The Biophysics major is designed to prepare a student to apply the physical and mathematical sciences to problems arising in the life sciences and medicine. By choosing proper electives, the student can prepare to enter graduate study of biophysics, biology, biochemistry, medicine or dentistry.

**Course Descriptions**

**PHYS 100** 3 cr.
(E) History of Science and Technology
The evolution of scientific inquiry in human history. Focus on key concepts and laws of nature that have enabled humans to develop modern technological societies. A major theme will be that science arises from traditions that are spiritual as well as technical, with the spiritual tradition being explored from the perspective of the life and traditions of the Catholic Church.

**PHYS 101** 3 cr.
(E) The Solar System
The study of the solar system, its origin, its evolution, its fate. Study of the planets, asteroids, meteors and comets. Theories about the cosmos from antiquity to the modern age.

**PHYS 102** 3 cr.
(E) Earth Science
Selected topics from geology and meteorology, weather forecasting, rocks and surface water, mountain building, volcanoes, earthquakes, plate tectonics, and oceanography.

**PHYS 103** 3 cr.
(E) Seeing the Light
The physics of light and vision. Includes topics such as biophysics of the human eye, the visual system, color vision, binocular vision, and the wave nature of light.

**PHYS 104** 3 cr.
(E) Introduction to Consumer Technology
Every day we listen to the radio or compact-disc recordings, watch TV, use photocopiers and fax machines without really knowing how they work. Every day we are bombarded with information regarding the impact of technology on our lives. Every day we are bombarded with information allowing the participation in the assessment of important social, political, and scientific issues.

**PHYS 105** 3 cr.
(E) Man and the Evolutionary Universe
The study of the universe from the ancient times to the present. The ideas and approaches of various peoples are to be discussed, from the era of the powerful myths to the scientific approach of the Greeks, up to modern times, focusing on man and the evolving universe, in a historical and modern perspective. The role and the involvement of the Church in scientific thinking will be stressed as well.

**PHYS 106** 3 cr.
(E) Energy and the Environment
Focus on various aspects of man’s use of energy and changes in the environment that accompany that use. Sources of energy; the nature of the present energy and environmental crises and possible solutions; energy requirements of the future; conservation; and alternate energy sources.

**PHYS 107** 3 cr.
(E) “Hands-On” Physics
An introduction to the scientific method with an emphasis on physical reality. A series of experiments and discussions illustrate various physical phenomena allowing the participation in the assessment of important social, political, and scientific issues.

**PHYS 108** 3 cr.
(W,E) New York Times Physics
Every day we are bombarded with information regarding the impact of technology on our lives. Using The New York Times, students will explore the scientific and technological concepts of our modern world. Topics will vary weekly.

**PHYS 109** 3 cr.
(E) The Conscious Universe
A course that discusses and concentrates on matters like waves, quanta and quantum theory. Science will be viewed as a rational enterprise committed to obtaining knowledge about the actual character of physical reality and the character of the physical law.

1. Physics majors starting with MATH 103 due to placement test results take one less Physics elective.

**PHYS 106**
(E) Energy and the Environment
Focus on various aspects of man’s use of energy and changes in the environment that accompany that use. Sources of energy; the nature of the present energy and environmental crises and possible solutions; energy requirements of the future; conservation; and alternate energy sources.

**PHYS 107**
(E) “Hands-On” Physics
An introduction to the scientific method with an emphasis on physical reality. A series of experiments and discussions illustrate various physical phenomena allowing the participation in the assessment of important social, political, and scientific issues.

**PHYS 108**
(W/E) New York Times Physics
Every day we are bombarded with information regarding the impact of technology on our lives. Using The New York Times, students will explore the scientific and technological concepts of our modern world. Topics will vary weekly.

**PHYS 109**
(E) The Conscious Universe
A course that discusses and concentrates on matters like waves, quanta and quantum theory. Science will be viewed as a rational enterprise committed to obtaining knowledge about the actual character of physical reality and the character of the physical law.

**TOTAL: 134 CREDITS**

**PHYS 110**

**Meteorology**

Focus on the basic physical and chemical phenomena involved in the determination of climate and weather, enabling the student to comprehend weather events, patterns, and forecasting. Topics include: atmosphere composition and structure, moisture and precipitation, cloud formation, pressure and wind, cyclones, circulation of atmosphere, air masses and fronts, and forecasting.

**PHYS 112**

**Natural and Manmade Disasters**

This introductory-level science course for non-science majors covers earthquakes, tsunamis, floods, volcanos, landslides, fire, comet/meteor impacts and nuclear accidents. The conditions necessary for the disasters, the forces that are unleashed, and civilization’s role in them are examined. (Not for major elective credit in Physics, Biophysics or EE).

**PHYS 113**

**E (E) The Science of Light and Photography**

An introductory-level science course intended for non-science majors covers the basic science of light and its application in the technology of photography. Topics range from a historical overview of early photographic methods to modern digital cameras. The scientific principles of light waves and rays, the optics of lenses, the process involved in picture taking and the formation and development of the image. Topics include the nature of light, laws of optics, development of black and white and color images, and digital electronics for photographic capture and display. Not for major elective credit in Physics, Biophysics or EE.

**PHYS 114**

**Solar Electricity**

The history, physics and engineering of obtaining energy from the sun, with special attention to environmental impact of Photovoltaic (PV) technology. Topics include: environmental protection, economic growth, job creation, diversity of supply, rapid deployment, technology transfer and innovation with a free, abundant and inexhaustible fuel source. Not for major elective credit in Physics, Biophysics or Electrical Engineering.

**PHYS 120–121**

**E (E) General Physics**

(Prerequisites: MATH 103-114) General college course for pre-medical, pre-dental, biology, biochemistry and physical therapy majors. Mechanics, heat, electricity and magnetism, sound and light. Three hours lecture and two hours laboratory.

**PHYS 140–141**

**E (E) Elements of Physics**

(Prerequisites: MATH 114-221) Calculus-based introduction to the elements of physics. Topics covered: mechanics, heat, sound, light and electricity and magnetism. Required of Physics, Electrical Engineering, Mathematics, Computer Science and Chemistry majors. Three hours lecture and two hours laboratory.

**PHYS 201**

**E (E) Stellar Evolution**

An introduction to astrophysics for non-science students, it concentrates on the study of the sun, stars and the universe. Their evolution, birth, lifetimes and deaths. The remnants of the stars, and exotic entities such as neutron stars, quasars, black holes. Galaxies and galaxy formations. The expanding universe. Red shifts and cosmological principles. Grand unified theories.

**PHYS 204**

**Information: Technology**

Lectures and demonstrations are designed to describe and explain the basics of information technology and engineering for students outside the technical disciplines. It includes data representation, graphics and visual information, data compression, data transmission and network technology.

**PHYS 270**

**Elements of Modern Physics**

(Prerequisites: PHYS 141, MATH 114) Introductory modern Physics course for Physics and Engineering majors; also recommended for other science majors. Review of classical physics; special theory of relativity; atomic theory of hydrogen from Bohr to Schroedinger; multielectron atoms and the periodic table; introduction to nuclear physics. Three hours lecture and two hours laboratory. Lab fulfills a writing intensive requirement (W).

Meteorology

Focus on the basic physical and chemical phenomena involved in the determination of climate and weather, equipping the student to comprehend weather events, patterns, and forecasting. Topics include: atmosphere composition and structure, moisture and precipitation, cloud formation, pressure and wind, cyclones, circulation of atmosphere, air masses and fronts, and forecasting.

**PHYS 112** 3 cr.

Natural and Manmade Disasters

This introductory-level science course for non-science majors covers earthquakes, tsunamis, floods, volcanic eruptions, landslides, fire, comet/meteor impacts and nuclear accidents. The conditions necessary for the disasters, the forces that are unleashed, and civilization’s role in them are examined. (Not for major elective credit in Physics, Biophysics or EE).

**PHYS 113** 3 cr.

(E) The Science of Light and Photography

An introductory-level science course intended for non-science majors covers the basic science of light and its application in the technology of photography. Topics range from a historical overview of early photographic methods to modern digital cameras. The scientific principles of light waves and rays, the optics of lenses, the process involved in picture taking and the formation and development of the image. Topics include the nature of light, laws of optics, development of black and white and color images, and digital electronics for photographic capture and display. Not for major elective credit in Physics, Biophysics or EE.

**PHYS 114** 3 cr.

Solar Electricity

The history, physics and engineering of obtaining energy from the sun, with special attention to environmental impact of Photovoltaic (PV) technology. Topics include: environmental protection, economic growth, job creation, diversity of supply, rapid deployment, technology transfer and innovation with a free, abundant and inexhaustible fuel source. Not for major elective credit in Physics, Biophysics or Electrical Engineering.

**PHYS 120-121** 8 cr.

(E) General Physics

(Prerequisites: MATH 103-114) General college course for pre-medical, pre-dental, biology, biochemistry and physical therapy majors. Mechanics, heat, electricity and magnetism, sound and light. Three hours lecture and two hours laboratory.

**PHYS 140-141** 8 cr.

(E) Elements of Physics

(Prerequisite: MATH 114-221) Calculus-based introduction to the elements of physics. Topics covered: mechanics, heat, sound, light and electricity and magnetism. Required of Physics, Electrical Engineering, Mathematics, Computer Science and Chemistry majors. Three hours lecture and two hours laboratory.

**PHYS 201** 3 cr.

(E) Stellar Evolution

An introduction to astrophysics for non-science students, it concentrates on the study of the sun, stars and the universe. Their evolution, birth, lifetimes and deaths. The remnants of the stars, and exotic entities such as neutron stars, quasars, black holes. Galaxies and galaxy formations. The expanding universe. Red shifts and cosmological principles. Grand unified theories.

**PHYS 204** 3 cr.

Information Technology

Lectures and demonstrations are designed to describe and explain the basics of information technology and engineering for students outside the technical disciplines. It includes data representation, graphics and visual information, data compression, data transmission and network technology.

**PHYS 270** 4 cr.

Elements of Modern Physics

(Prerequisites: PHYS 141, MATH 114) Introductory modern Physics course for Physics and Engineering majors; also recommended for other science majors. Review of classical physics; special theory of relativity; atomic theory of hydrogen from Bohr to Schroedinger; multielectron atoms and the periodic table; introduction to nuclear physics. Three hours lecture and two hours laboratory.
tor calculus of electrostatic fields; dielectric materials; vector calculus of magnetic fields.
Three hours lecture. (Also listed as EE 447.)

PHYS 448 Electromagnetics II
(Co-requisite: PHYS 447) Magnetic materials, electromagnetic induction, displacement currents, Maxwell’s equations; radiation and waves; applications include transmission lines, wave guides and antennae. Three hours lecture. (Also listed as EE 448.)

PHYS 448L Electromagnetics Design Laboratory
(Co-requisite: PHYS 448) Laboratory designed to emphasize and reinforce the experimental basis of electromagnetics. Multi-week projects require the student to perform experiments that measure fundamental electrical constants, the electrical and magnetic properties of matter, and the properties of electromagnetic waves. Two hours laboratory. (Also listed as EE 448L.)

PHYS 460 Non-linear Systems and Chaos
3 cr.
Non-linear systems in mechanics and electronics are studied. Limit cycles, chaotic attractors, hysteresis, stability and phase space are defined and applied to complex systems. Classical oscillators, e.g., Duffing oscillator, the van der Pol oscillator and the Lorenz equations, will be solved through various approximation methods. Chaos, bifurcations, routes to chaos, chaotic maps, correspondence between maps and Poincare sections of physical systems will be studied.

PHYS 473 Optics
3 cr.
(Prerequisites: PHYS 270, MATH 341 or PHYS 350) An introduction to the principles of geometrical, physical and quantum optics. Topics to be covered include ray and wave optics, superposition, diffraction, interference, polarization, Fourier methods, and coherence theory. Practical devices such as photodetectors and light sources will also be discussed. Three hours lecture.

PHYS 474 Acoustics
3 cr.
(Prerequisite: PHYS 350) This course covers the fundamentals of vibration as applied to one-, two- and three-dimensional systems with varied boundary conditions. Transmission, absorption, attenuation, and radiation are covered. Resonators and wave guides and filters are studied along with the fundamentals of transducers. Acoustical issues in hearing are covered, time permitting.

PHYS 493-494 6 cr.
Undergraduate Physics Research I-II
(Prerequisite: Permission of the instructor) Students choose a research project sponsored by a member of the department and approved by the instructor and chairperson. Students gain experience with research literature, techniques and equipment. Weekly seminars are given on quantum mechanics, mathematics tools, and topics related to ongoing research projects. A written report is required.

POLITICAL SCIENCE

Faculty
Jean W. Harris, Ph.D., Chair
Leonard W. Champney, Ph.D.
Robert A. Koci, Ph.D.
William J. Parente, Ph.D.
Gretchen Van Dyke, Ph.D.

Overview
The Bachelor of Science program in Political Science imparts to students an understanding of:
1. The scope and purpose of government in civil society;
2. The origins, goals, and limitations of democratic government;
3. The structure and functions of the institutions of American government;
4. The similarities and differences in the structures and functions of the governments of other countries; and
5. The nature of the relationships among these governments in the international community.

The Political Science Department offers courses in the major subfields of political science: political institutions, political theory, international relations, comparative politics, public policy, and quantitative methods. In addition to the major in Political Science, the department offers a track in Public Administration and Public Affairs and a minor in Political Science.

Students in the major must take 21 Political Science credits required for the major are selected by the student.

Public Administration and Public Affairs Track
Political Science majors may concentrate in Public Administration and Public Affairs. This track is designed for students who may seek a career in government service at the federal, state, or local level. It develops analytic and quantitative skills, while providing substantive knowledge of a range of public-policy problems, and the management systems designed to implement policy decisions.

Students in this track complete the courses required for the Political Science major as well as PS 135: State and Local Government, PS 232: Public Administration, and PS 480: Public Administration Internship. For their remaining Political Science electives, students choose four courses from the following: PS 216, 227, 230, 231, 319, 322, 325, 327, 329.

Students in this track would complete their cognate in one of two ways. For option one students complete HIST 110-111, HIST 120-121, ECO 153, ECO 154, ACC 253, ACC 254. Option two entails completing a minor, concentration, or another special program in consultation with Dr. Champney or Dr. Harris, the track advisors.

Minor in Political Science
To minor in Political Science, a student must take a minimum of 18 credits in Political Science, including PS 130-131: American National Government I-II.

Course Descriptions
IS 390 3 cr.
(W) Seminar in International Studies
Required for International Studies majors. Other advanced undergraduates may take this course with permission of the professor. This course can count for either Political Science credit or History credit.

PS 130 3 cr.
(S) American National Government I
Addresses key principles of American government: democracy, constitutionalism, separation of powers, and federalism. It also covers political parties, voring, public opinion, interest groups and the media.

PS 131 3 cr.
(S) American National Government II
Addresses structure and functions of the branches of government: Congress, the presidency, bureaucracy, and the courts. It also covers civil rights and civil liberties.

PS 135 3 cr.
(S) State and Local Government
This track is designed for students who may seek a career in government service at the federal, state, or local level. It develops analytic and quantitative skills, while providing substantive knowledge of a range of public-policy problems, and the management systems designed to implement policy decisions. Students in this track complete the courses required for the Political Science major as well as PS 135: State and Local Government, PS 232: Public Administration, and PS 480: Public Administration Internship. For their remaining Political Science electives, students choose four courses from the following: PS 216, 227, 230, 231, 319, 322, 325, 327, 329.

Students in this track would complete their cognate in one of two ways. For option one students complete HIST 110-111, HIST 120-121, ECO 153, ECO 154, ACC 253, ACC 254. Option two entails completing a minor, concentration, or another special program in consultation with Dr. Champney or Dr. Harris, the track advisors.

Minor in Political Science
To minor in Political Science, a student must take a minimum of 18 credits in Political Science, including PS 130-131: American National Government I-II.

Course Descriptions
IS 390 3 cr.
(W) Seminar in International Studies
Required for International Studies majors. Other advanced undergraduates may take this course with permission of the professor. This course can count for either Political Science credit or History credit.

PS 130 3 cr.
(S) American National Government I
Addresses key principles of American government: democracy, constitutionalism, separation of powers, and federalism. It also covers political parties, voring, public opinion, interest groups and the media.

PS 131 3 cr.
(S) American National Government II
Addresses structure and functions of the branches of government: Congress, the presidency, bureaucracy, and the courts. It also covers civil rights and civil liberties.

PS 135 3 cr.
(S) State and Local Government
This track is designed for students who may seek a career in government service at the federal, state, or local level. It develops analytic and quantitative skills, while providing substantive knowledge of a range of public-policy problems, and the management systems designed to implement policy decisions. Students in this track complete the courses required for the Political Science major as well as PS 135: State and Local Government, PS 232: Public Administration, and PS 480: Public Administration Internship. For their remaining Political Science electives, students choose four courses from the following: PS 216, 227, 230, 231, 319, 322, 325, 327, 329.

Addresses key principles of American government: democracy, constitutionalism, separation of powers, and federalism. It also covers political parties, voring, public opinion, interest groups and the media.

PS 131 3 cr.
(S) American National Government II
Addresses structure and functions of the branches of government: Congress, the presidency, bureaucracy, and the courts. It also covers civil rights and civil liberties.
tor calculus of electrostatic fields; dielectric materials; vector calculus of magnetic fields.
Three hours lecture. (Also listed as EE 447.)

PHYS 448 Electromagnetics II
(Prerequisite: PHYS 447) Magnetic materials, electromagnetic induction, displacement currents, Maxwell’s equations; radiation and waves; applications include transmission lines, wave guides and antennas. Three hours lecture. (Also listed as EE 448.)

PHYS 448L Electromagnetics Design Laboratory
(Prerequisite: PHYS 448) Laboratory designed to emphasize and reinforce the experimental basis of electromagnetism. Multi-week projects require the student to perform experiments that measure fundamental electrical constants, the electrical and magnetic properties of matter, and the properties of electromagnetic waves. Two hours laboratory. (Also listed as EE 448L.)

PHYS 460 Non-linear Systems and Chaos
3 cr.
Non-linear systems in mechanics and electronics are studied. Limit cycles, chaotic attractors, hysteresis, stability and phase space are defined and applied to complex systems. Classical oscillators, e.g., Duffing oscillator, the van der Pol oscillator and the Lorenz equations, will be solved through various approximation methods. Chaos, bifurcations, routes to chaos, chaotic maps, correspondence between maps and Poincare sections of physical systems will be studied.

PHYS 473 Optics
3 cr.
Prerequisites: PHYS 270, MATH 341 or PHYS 350 An introduction to the principles of geometrical, physical and quantum optics. Topics to be covered include ray and wave optics, superposition, diffraction, interference, polarization, Fourier methods, and coherence theory. Practical devices such as photodetectors and light sources will also be discussed. Three hours lecture.

PHYS 474 Acoustics
3 cr.
Prerequisite: PHYS 350 This course covers the fundamentals of vibration as applied to one-, two- and three-dimensional systems with varied boundary conditions. PS 232: Public Administration
PS 480: Public Administration Internship

This track is designed for students who may seek a career in government service at the federal, state, or local level. It develops analytic and quantitative skills, while providing substantive knowledge of a range of public-policy problems, the management systems designed to implement policy decisions.

Minor in Political Science
To minor in Political Science, a student must take a minimum of 18 credits in Political Science. Required for International Studies majors. Other policy areas of interest to students in the class may be added with the approval of the instructor.

Course Descriptions

IS 390 (W) Seminar in International Studies
Required for International Studies majors. Offered for up to 3 credits.

PS 130
(Prerequisite: Permission of the instructor) Students in the major must take PS 130, 131, 212, 217, 240, and either 313 or 314. The remaining 21 Political Science credits required for the major are selected by the student.

PS 131
(Prerequisite: Permission of the instructor) Students in the major must take PS 130, 131, 212, 217, 240, and either 313 or 314. The remaining 21 Political Science credits required for the major are selected by the student.

Public Administration and Public Affairs Track
Political Science majors may concentrate in Public Administration and Public Affairs. This track is designed for students who may seek a career in government service at the federal, state, or local level. It develops analytic and quantitative skills, while providing substantive knowledge of a range of public-policy problems, the management systems designed to implement policy decisions.

Students in this track complete the courses required for the Political Science major as well as:
PS 135: State and Local Government
PS 232: Public Administration
PS 480: Public Administration Internship

This track is designed for students who may seek a career in government service at the federal, state, or local level. It develops analytic and quantitative skills, while providing substantive knowledge of a range of public-policy problems, the management systems designed to implement policy decisions.

Students in this track complete the courses required for the Political Science major as well as:

¹ The department also recommends a modern foreign language. The departmental advisor should be consulted.

² Political Science majors are required to take either PS 313: Classical Political Ideas or PS 314: Modern Political Ideas. Both are recommended.

PS 219 3 cr.
Survey of Latin American Politics
An overview of the political cultures and political dynamics of Latin America. A series of representative nations is examined to provide a general overview of the region. Topics include historical figures and events, the processes of democratization and modernization, and issues in contemporary politics.

PS 220 3 cr.
(S,D) Ideologies
A study of the three major political ideologies that shaped the 20th century (communism, fascism, and liberalism) and of those that may shape the twenty-first: feminism, racism, egalitarianism, environmentalism, libertarianism, and communitarianism.

PS 221 3 cr.
Politics of Southeast Asia
Domestic politics of Southeast Asia and international politics affecting the region. The ASEAN nations (Thailand, Indonesia, Malaysia, Philippines, Singapore, and Brunei) and Myanmar, the region’s only socialist country, along with the three communist states of Indochina: Vietnam, Laos, and Cambodia are considered; spheres of influence and capitalism versus state socialism as a lever of economic development are also discussed.

PS 222 3 cr.
Politics in Russia
This course considers Russian politics and colonialism from the Revolution to contemporary economic efforts to move toward capitalism. The politics of the remnants of the Soviet empire are examined and Stalin and the Bolshevik experiment are also examined.

PS 227 3 cr.
(D) Women, Authority and Power
In our representative democracy, women are a minority of elected and appointed government officials. This course studies the historical and current paradox of women and U.S. public policy decision making. It examines the role of women in pressure politics, their integration into positions of political authority, and the future prospects for the political power and authority of women.

PS 230 3 cr.
(S) Environmental Laws and Regulations
Consideration of the variety of statutory laws legislated by Congress, as well as the variety of administrative rules and regulations promulgated by the executive branch. Policy areas include air pollution, water pollution, solid and toxic waste disposal, management of public lands, and the regulation of nuclear power. A brief introduction to international cooperation and conflict.

PS 231 3 cr.
(S) Environmental Policy Process
The role of legislative, executive, and judicial institutions in shaping the content of environmental policy. Discussion of the processes by which such policies are formulated and implemented, including consideration of the impact of federalism.

PS 232 3 cr.
Public Administration
A study of the structures, scope and processes of American public bureaucracies. The growth of the executive branches of governments, the role of public bureaucrats in our democratic government, and the experiences of American public bureaucrats are analyzed.

PS 240 3 cr.
(Q,W) Research Methods in Political Science
Consideration of both qualitative and quantitative research methods in the study of Political Science. Topics include: primary source material, legal research, analysis of aggregate data, analysis of survey data and use of focus groups. Special consideration is given to survey research and public opinion polling. Course also introduces principles of univariate, bivariate and multivariate statistical techniques.

PS 280 3 cr.
Pre-Law Internship

An intersem travel course to Guatemala, Mexico, for credits in Humanities (foreign language area, intermediate and/or advanced level), credits in the social sciences (political science), and cultural diversity credit. The program is taught by University of Scranton faculty from the Departments of Foreign Languages and Political Science with assistance from Mexican faculty at UNIVA. (Also listed as SPAN 295.)
A study of the three major political ideologies that shaped the 20th century (communism, fascism, and liberalism) and of those that may shape the twenty-first: feminism, racism, egalitarianism, environmentalism, libertarianism, and communitarianism.

PS 222 Politics in Russia
This course considers Russian politics and colonialism from the Revolution to contemporary economic efforts to move toward capitalism. The politics of the remnants of the Soviet empire are examined and Stalin and the Bolshevik experiment are also examined.

PS 227 (D) Women, Authority and Power
In our representative democracy, women are a minority of elected and appointed government officials. This course studies the historical and current paradoxes of women and U.S. public policy decision making. It examines the role of women in pressure politics, their integration into positions of political authority, and the future prospects for the political power and authority of women.

PS 230 (S) Environmental Laws and Regulations
Consideration of the variety of statutory laws legislated by Congress, as well as the variety of administrative rules and regulations promulgated by the executive branch. Policy areas include air pollution, water pollution, solid and toxic waste disposal, management of public lands, and the regulation of nuclear power. A brief introduction to international cooperation and conflict.

PS 231 (S) Environmental Policy Process
The role of legislative, executive, and judicial institutions in shaping the content of environmental policy. Discussion of the processes by which such policies are formulated and implemented, including consideration of the impact of federalism.

PS 232 Public Administration
A study of the structures, scope and processes of American public bureaucracies. The growth of the executive branches of governments, the role of public bureaucracies in our democratic government, and the experiences of American public bureaucrats are analyzed.

PS 240 (Q,W) Research Methods in Political Science
Consideration of both qualitative and quantitative research methods in the study of Political Science. Topics include primary source material, legal research, analysis of aggregate data, analysis of survey data and use of focus groups. Special consideration is given to survey research and public opinion polling. Course also introduces principles of univariate, bivariate and multivariate statistical techniques.

PS 280 Pre-Law Internship
A pre-Law Internship directed by the University of Scranton and the Pre-Law Office. This course also introduces public opinion polling. Course also introduces principles of univariate, bivariate and multivariate statistical techniques.
John Rawls, Robert Nozick, C.B. MacPherson, Isaiah Berlin, and Leo Strauss will be included.

PS 316 3 cr. Jurisprudence
An examination of the differences between “the law” and “the laws”; the nature of legal systems; the nature and grounds of political, moral and legal obligations, and the controversy between the traditions of Natural Law and Positive Law.

PS 317 3 cr. Parties, Elections, and Interest Groups
Discussion of the historical development and current status of political parties and interest groups in the United States. Emphasis on the functions performed by political parties in our system vs. their functions in other systems, such as parliamentary democracies. Emphasis also on factors shaping the creation, maintenance, and political power of organized interest groups.

PS 318 3 cr. (W) U.S. Foreign Policy: Cold War and Aftermath
Examines and analyzes critically the content of American foreign policy in the Cold War and post-Cold War eras. Special emphasis on themes, goals and means of American foreign policy, particularly national security.

PS 319 3 cr. (W) U.S. Foreign Policy Process
Examines the actual formulation and implementation of American foreign policy within the decision-making process. Analyzes what the process is, who the decision makers are, and internal and external variables of policy making in the U.S. Involves at least two in-depth American foreign policy case studies.

PS 322 3 cr. Public Personnel
(Prerequisites: At least two of PS 130, 131, 135, 231, 232 or permission of instructor) An examination of public-personnel administration and management. Theories of organization, personnel choices, personnel management, civil-service history, and current issues in personnel administration and management are considered.

PS 325 3 cr. Politics of the Budgetary Process
(Prerequisites: At least two of PS 130, 131, 135, 231, 232 or permission of instructor) Public budgeting in theory and practice is discussed. Historical reforms and the inevitable politics of the process are considered. Use of budget simulations allow for practical experience.

PS 326 3 cr. Theories of Political Economy
An examination of the works of the great thinkers in the tradition of the political economy, and an extensive study of the historical evolution of theories of value, the creation of value and the increase of productive abilities.

PS 327 3 cr. U.S. Congress
Reading and discussion of selected Federalist Papers in order to appreciate the founders’ views on human nature, the nature of government, democracy, and legislatures. An examination of the structure and function of the contemporary United States Congress, including the impact of political parties and interest groups on the business of Congress. Theories of representation are also considered.

PS 328 3 cr. (D) Modern China

PS 329 3 cr. The American Presidency
This course focuses on the American presidency — historical development, powers of the office, elections, models of the presidency and, to a lesser extent, the relations between the president and Congress, and the president and the Judiciary.

PS 330 3 cr. Western Europe in World Affairs
This seminar provides an historical, political, and analytical foundation for understanding the profound political and economic changes facing Europeans today. This involves studying the two world wars, the formation of Cold-War alliances and security systems, the European integration movement, the foreign policies of major European states, and organization of post–Cold War Europe.

PS 331 3 cr. (W) The European Union
(Enrollment only by permission from the professor.) Provides an in-depth study of the European Union and its 25 member states in order to prepare students for an intercollegiate simulation of the EU, which is held in Washington, D.C., each December. Students examine the EU’s theoretical and historical foundations, its institutions and policy procedures, and the ongoing challenges for European integration.

PS 332 3 cr. (D) Modern Japan
This course examines the history and politics of Japan; the period of the shoguns; the reforms of the modernizing Meiji era at the end of the 19th century; the Japanese effort to conquer Asia; the postwar political structure; the question, “Is Japan a democracy?”; and the economic miracle of the present.

PS 333 3 cr. Politics of Islam
The political ideology of Islam; efforts to establish theocracies in a number of states from Iran to Egypt to Malaysia and Indonesia; Islam as a political opposition in such countries as the Philippines, Russia, and China; Shiites versus Sunnis sects; the politics of Israel and the Islamic states of the Middle East; OPEC; the Palestinian question; political terrorism; Islam as an expansionist ideology.

PS 384 3 cr. Special Topics in Political Science
Study and analysis of selected topics in the field of Political Science. The particular topic or topics will vary from year to year depending on the instructor and changing student needs.

PS 480 3 cr. Political Science Internship I
Permission of faculty advisor and department chair required for internship registration.

PS 481 3 cr. Political Science Internship II
Permission of faculty advisor and department chair required for internship registration.

James P. Buchanan, Ph.D., Chair
Brad A. Alford, Ph.D.
Galen L. Baril, Ph.D.
J. Timothy Cannon, Ph.D.
John J. Dunstone, Ph.D.
Thomas P. Hogan, Ph.D.
Christie Pugh Karpik, Ph.D.
John C. Norcross, Ph.D.
John J. O’Malley, Ph.D.
Carole S. Slotterback, Ph.D.

Overview
Psychology provides a unique educational experience of quality, breadth and flexibility. Our curriculum has been carefully designed to give students a balanced education in the discipline and the widest range of career options, from baccalaureate entry-level positions to graduate training in prestigious universities. According to a recent independent study, the number of the University’s graduates who have gone on to receive doctorates in psychology has placed us in the top 10% of comparable institutions nationally.

Psychology majors are required to take PSYC 110, 210, 330 with lab, 390 (fall, junior year), and 490-491 (senior year). Students also take a minimum of five courses from the following list with at least one course in each group: Physiological Processes (230, 231), Learning Processes (234, 235), Social-Developmental Processes (220, 221), and Individual Processes (224, 225). Students are free to choose from any of these or the remaining Psychology courses to fulfill the four additional course requirements in the major. Completion of any combination of two optional laboratory courses and advanced topics seminars will constitute an elective Psychology course. Students are encouraged to take PSYC 493-494: Undergraduate Research in their junior or senior year.

The Psychology Department encourages students to tailor their programs to their own needs and interests. For example, students interested in marketing, personnel, or industrial-organizational psychology may elect a business minor and recommended courses in Psychology. Interdisciplinary programs, such as the Human Development Concentration,
John Rawls, Robert Nozick, C.B. MacPherson, Isaiah Berlin, and Leo Strauss will be included.

PS 316 3 cr.
Jurisprudence
An examination of the differences between "the law" and "the laws"; the nature of legal systems; the nature and grounds of political, moral and legal obligations, and the controversy between the traditions of Natural Law and Positive Law.

PS 317 3 cr.
Parties, Elections, and Interest Groups
Discussion of the historical development and current status of political parties and interest groups in the United States. Emphasis on the functions performed by political parties in our systems vs. their functions in other systems, such as parliamentary democracies. Emphasis also on factors shaping the creation, maintenance, and political power of organized interest groups.

PS 318 3 cr.
(W) U.S. Foreign Policy: Cold War and Aftermath
Examines and analyzes critically the content of American foreign policy in the Cold War and post–Cold War eras. Special emphasis on themes, goals and means of American foreign policy, particularly national security.

PS 319 3 cr.
(W) U.S. Foreign Policy Process
Examines the actual formulation and implementation of American foreign policy within the decision-making process. Analyzes what the process is, who the decision makers are, and internal and external variables of policy making in the U.S. Involves at least two in-depth American foreign policy case studies.

PS 322 3 cr.
Public Personnel
(Prerequisites: At least two of PS 130, 131, 135, 231, 232 or permission of instructor) An examination of public-personnel administration and management. Theories of organization, personnel choices, personnel management, civil-service history, and current issues in personnel administration and management are considered.

PS 325 3 cr.
Politics of the Budgetary Process
(Prerequisites: At least two of PS 130, 131, 135, 231, 232 or permission of instructor) Public budgeting in theory and practice is discussed. Historical reforms and the inevitable politics of the process are considered. Use of budget simulations allow for practical experience.

PS 326 3 cr.
Theories of Political Economy
An examination of the works of the great thinkers in the tradition of the political economy, and an extensive study of the historical evolution of theories of value, the creation of value and the increase of productive abilities.

PS 327 3 cr.
U.S. Congress
Reading and discussion of selected Federalist Papers in order to appreciate the founders’ views on human nature, the nature of government, democracy, and legislatures. An examination of the structure and function of the contemporary United States Congress, including the impact of political parties and interest groups on the business of Congress. Theories of representation are also considered.

PS 328 3 cr.
(D) Modern China

PS 329 3 cr.
The American Presidency
This course focuses on the American presidency—historical development, powers of the office, elections, models of the presidency and, to a lesser extent, the relations between the president and Congress, and the president and the Judiciary.

PS 330 3 cr.
Western Europe in World Affairs
This seminar provides an historical, political, and analytical foundation for understanding the profound political and economic changes facing Europeans today. This involves studying the two world wars, the formation of Cold-War alliances and security systems, the European integration movement, the foreign policies of major European states, and organization of post–Cold War Europe.

PS 331 3 cr.
(W) The European Union
(Enrollment only by permission from the professor.) Provides an in-depth study of the European Union and its 25 member states in order to prepare students for an intercollegiate simulation of the EU, which is held in Washington, D.C., each December. Students examine the EU’s theoretical and historical foundations, its institutions and policy procedures, and the ongoing challenges for European integration.

PS 332 3 cr.
(D) Modern Japan
This course examines the history and politics of Japan; the period of the shoguns; the reforms of the modernizing Meiji era at the end of the 19th century; the Japanese effort to conquer Asia; the postwar political structure; the question, “Is Japan a democracy?”; and the economic miracle of the present.

PS 333 3 cr.
Politics of Islam
The political ideology of Islam; efforts to establish theocracies in a number of states from Iran to Egypt to Malaysia and Indonesia; Islam as a political opposition in such countries as the Philippines, Russia, and China; Shiite versus Sunni sects; the politics of Israel and the Islamic states of the Middle East; OPEC; the Palestinian question; political terrorism; Islam as an expansionist ideology.

PS 334 3 cr.
Special Topics in Political Science
Study and analysis of selected topics in the field of Political Science. The particular topic or topics will vary from year to year depending on the instructor and changing student needs.

PS 338 3 cr.
Modern China

PS 339 3 cr.
The American Presidency
This course focuses on the American presidency—historical development, powers of the office, elections, models of the presidency and, to a lesser extent, the relations between the president and Congress, and the president and the Judiciary.

PS 340 3 cr.
Western Europe in World Affairs
This seminar provides an historical, political, and analytical foundation for understanding the profound political and economic changes facing Europeans today. This involves studying the two world wars, the formation of Cold-War alliances and security systems, the European integration movement, the foreign policies of major European states, and organization of post–Cold War Europe.

PS 341 3 cr.
(W) The European Union
(Enrollment only by permission from the professor.) Provides an in-depth study of the European Union and its 25 member states in order to prepare students for an intercollegiate simulation of the EU, which is held in Washington, D.C., each December. Students examine the EU’s theoretical and historical foundations, its institutions and policy procedures, and the ongoing challenges for European integration.

PS 342 3 cr.
(D) Modern Japan
This course examines the history and politics of Japan; the period of the shoguns; the reforms of the modernizing Meiji era at the end of the 19th century; the Japanese effort to conquer Asia; the postwar political structure; the question, “Is Japan a democracy?”; and the economic miracle of the present.

PS 343 3 cr.
Politics of Islam
The political ideology of Islam; efforts to establish theocracies in a number of states from Iran to Egypt to Malaysia and Indonesia; Islam as a political opposition in such countries as the Philippines, Russia, and China; Shiite versus Sunni sects; the politics of Israel and the Islamic states of the Middle East; OPEC; the Palestinian question; political terrorism; Islam as an expansionist ideology.

PS 347 3 cr.
Western Europe in World Affairs
This seminar provides an historical, political, and analytical foundation for understanding the profound political and economic changes facing Europeans today. This involves studying the two world wars, the formation of Cold-War alliances and security systems, the European integration movement, the foreign policies of major European states, and organization of post–Cold War Europe.

Overview
Psychology provides a unique educational experience of quality, breadth and flexibility. Our curriculum has been carefully designed to give students a balanced education in the discipline and the widest range of career options, from baccalaureate entry-level positions to graduate training in prestigious universities. According to a recent independent study, the number of the University’s graduates who have gone on to receive doctorates in psychology has placed us in the top 10% of comparable institutions nationally.

Psychology majors are required to take PSYC 110, 210, 330 with lab, 390 (fall junior year), and 490-491 (senior year). Students also take a minimum of five courses from the following list with at least one course in each group: Physiological Processes (230, 231), Learning Processes (234, 235), Social-Developmental Processes (220, 221), and Individual Processes (224, 225). Students are free to choose from any of these or the remaining Psychology courses to fulfill the four additional course requirements in the major. Completion of any combination of two optional laboratory courses and advanced topics seminars will constitute an elective Psychology course. Students are encouraged to take PSYC 493-494: Undergraduate Research in their junior or senior year.

The Psychology Department encourages students to tailor their programs to their own needs and interests. For example, students interested in marketing, personnel, or industrial-organizational psychology may elect a business minor and recommended courses in Psychology. Interdisciplinary programs, such as the Human Development Concentration.
and dual majors with a number of other departments are also available. Students should consult their advisor and the Psychology Handbook for recommended courses, both major and cognate, tailored to their interests.

To avoid duplication of course content, Psychology majors may not register for the following courses: HS 242: Counseling Theories, HS 293: Research methods in Human Services, and HS 323: Psychiatric Rehabilitation. Students who wish to declare a minor or a second major in Human Services should consult their advisors and the chair of Human Services with regard to the above course restrictions.

Minor in Psychology

18 credits, consisting of PSYC 110, PSYC 210, PSYC 330 lecture, and one course from three of the following four groups: Physiological Processes (230, 231), Learning Processes (234, 235), Social-Development Processes (220, 221), and Individual Processes (224, 225). An equivalent statistics course and/or an equivalent methods course may be substituted for PSYC 210: Statistics and/or PSYC 330: Research Methods. Contact the Department Chair for a list of these courses. Any substituted course must then be replaced with a 3-credit Psychology course.

Course Descriptions

PSYC 110 3 cr.
(S) Fundamentals of Psychology
An introduction to the scientific study of behavior through a survey of psychology’s principal methods, content areas and applications. Course requirements include participation in psychological research or preparation of a short article review.

PSYC 110L 0.5 cr.
Demonstrations For Fundamentals of Psychology
This lab is offered only in the fall semester and is restricted to and required only for students who enter the University as freshman Psychology majors and who are enrolled in the Psychology majors’ fall section of PSYC 110. It is a team taught by the psychology faculty and will entail exercises, simulations and applications. The course is graded pass/fail.

PSYC 210 3 cr.
(Q) Statistics in the Behavioral Sciences
Basic statistics in the behavioral sciences, including organization and display of data; measures of central tendency; variability; correlation and regression; one- and two-sample t-tests; confidence intervals, one-way and two-way analysis of variance, chi-square; and consideration of effect size, power, and null hypothesis testing including types of errors. Introduction to the computerized statistical-analysis package SPSS-PC.

PSYC 220 3 cr.
(S) Social Psychology
(Prerequisite: PSYC 110) Social determinants of behavior from a psychological perspective. Topics include liking, love, conformity, persuasion, attitude change, and person perception.

PSYC 221 3 cr.
(S) Childhood and Adolescence
(Prerequisite: PSYC 110) Survey of psychological research dealing with the development and behavior of children. The physical, cognitive and social aspects of development from infancy to adolescence are considered.

PSYC 222 3 cr.
(S) Adulthood and Aging
(Prerequisite: PSYC 110) Survey of psychological research dealing with the age-graded aspects of behavior in adulthood. Course will consider the physical, cognitive and social aspects of the aging process from late adolescence to death. Topics include occupation selection, marriage, parenthood, middle age, retirement and dying.

TOTAL: 131 CREDITS

1. * MATH 103, 106 or 114
3. * BIOL 101 and either BIOL 201 (Anatomy and Physiology) or BIOL 202 (The ABC of Genetics) or BIOL 110-111 or BIOL 141-142. Lab credit for BIOL 110-111 and 141-142 can be placed in GE Elective area.
4. * No more than 15 credits of Psychology electives may be placed in the free elective area.
5. * Entering fall-semester freshmen enrolled in the majors only PSYC 110 section must also enroll in PSYC 110L. PSYC 110L is required only for entering fall-semester freshmen.

PSYC 224 3 cr.
(S) Personality
(Prerequisite: PSYC 110) A survey and critical evaluation of personality and its implications for assessment, psychotherapy, and research.

PSYC 225 3 cr.
(S) Abnormal Psychology
(Prerequisite: PSYC 110) A comprehensive survey of mental and behavioral disorders from biological, psychological, and sociocultural perspectives. The course will consider diagnosis and labeling, overview of specific disorders, and various treatment approaches.

PSYC 230 3-4 cr.
Sensation and Perception
(Prerequisite: PSYC 110) Concerns the study of sensory mechanisms and perceptual phenomena. Optional lab entails supervised individual experimentation. Lecture, 3 credits; optional 1-credit laboratory. Lab fee; lab offered only in spring.
and dual majors with a number of other departments are also available. Students should consult their advisor and the Psychology Handbook for recommended courses, both major and cognate, tailored to their interests.

To avoid duplication of course content, Psychology majors may not register for the following courses: HS 242: Counseling Theories, HS 293: Research methods in Human Services, and HS 323: Psychiatric Rehabilitation. Students who wish to declare a minor or a second major in Human Services should consult their advisors and the chair of Human Services with regard to the above course restrictions.

Minor in Psychology

18 credits, consisting of PSYC 110, PSYC 210, PSYC 330, and one course from three of the following four groups: Physiological Processes (230, 231), Learning Processes (234, 235), Social-Development Processes (220, 221), and Individual Processes (224, 225). An equivalent statistics course and/or an equivalent methods course may be substituted for PSYC 210: Statistics and/or PSYC 330: Research Methods. Contact the Department Chair for a list of these courses. Any substituted course must then be replaced with a 3-credit Psychology course.

Course Descriptions

PSYC 110 3 cr.
(S) Fundamentals of Psychology
An introduction to the scientific study of behavior through a survey of psychology's principal methods, content areas and applications. Course requirements include participation in psychological research or preparation of a short article review.

PSYC 110L 0.5 cr.
Demonstrations For Fundamentals of Psychology
This lab is offered only in the fall semester and is restricted to and required only for students who enter the University as freshman Psychology majors and who are enrolled in the Psychology majors' fall section of PSYC 110. It is team taught by the psychology faculty and will entail exercises, simulations and applications. The course is graded pass/fail.

PSYC 210 3 cr.
(Q) Statistics in the Behavioral Sciences
Basic statistics in the behavioral sciences, including organization and display of data; measures of central tendency; variability; correlation and regression; one- and two-sample t-tests; confidence intervals, one-way and two-way analysis of variance, chi-square; and consideration of effect size, power, and null hypothesis testing including types of errors. Introduction to the computerized statistical-analysis package SPSS-PC.

PSYC 220 3 cr.
(S) Social Psychology
(Prerequisite: PSYC 110) Social determinants of behavior from a psychological perspective. Topics include liking, love, conformity, persuasion, attitude change, and person perception.

PSYC 221 3 cr.
(S) Childhood and Adolescence
(Prerequisite: PSYC 110) Survey of psychological research dealing with the development and behavior of children. The physical, cognitive and social aspects of development from infancy to adolescence are considered.

PSYC 222 3 cr.
(S) Adulthood and Aging
(Prerequisite: PSYC 110) Survey of psychological research dealing with the age-graded aspects of behavior in adulthood. Course will consider the physical, cognitive and social aspects of the aging process from late adolescence to death. Topics include occupation selection, marriage, parenthood, middle age, retirement and dying.

| TOTAL: 131 CREDITS | | | |

1  MATH 103, 105 or 114
2  The department strongly recommends WRTG 211 (Technical & Business Writing) in preparation for Research Methods and higher-level Psychology courses, and Soc 110 (Intro. to Sociology).
3  BIOI 101 and either BIOI 201 (Anatomy and Physiology) or BIOI 202 (The ABC of Genetics) or BIOI 110-111 or BIOI 141-142. Lab credit for BIOI 110-111 and 141-142 can be placed in GE Elective area.
4  No more than 15 credits of Psychology electives may be placed in the free elective area.
5  Entering fall-semester freshmen enrolled in the majors only PSYC 110 section must also enroll in PSYC 110L. PSYC 110L is required only for entering fall-semester freshmen.

PSYC 224 3 cr.
(S) Personality
(Prerequisite: PSYC 110) A survey and critical evaluation of personality and its implications for assessment, psychotherapy, and research.

PSYC 225 3 cr.
(S) Abnormal Psychology
(Prerequisite: PSYC 110) A comprehensive survey of mental and behavioral disorders from biological, psychological, and sociocultural perspectives. The course will consider diagnosis and labeling, overview of specific disorders, and various treatment approaches.

PSYC 230 3-4 cr.
Sensation and Perception
(Prerequisite: PSYC 110) Concerns the study of sensory mechanisms and perceptual phenomena. Optional lab entails supervised individual experimentation. Lecture, 3 credits; optional 1-credit laboratory. Lab fee; lab offered only in spring.
PSYC 231 3-4.5 cr.
(E) Behavioral Neuroscience
(Prerequisite: PSYC 110 or BIOL 141-142)
Introduction to the field of neuroscience, examining the cellular bases of behavior, effects of drugs and behavior, brain/body correlates of motivation and emotion, and neural changes accompanying pathology. Three hours lecture and optional 1-credit laboratory. Lab fee; lab offered fall only. (Also listed as NEUR 231.)

PSYC 234 3-4 cr.
(S) Cognitive Psychology
(Prerequisite: PSYC 110) Considers a number of approaches to the study of human cognitive processes with an emphasis on the information-processing model. Topics include pattern recognition, attention, memory, imagery, concepts and categories, and problem solving. Lecture, 3 credits; optional 1-credit laboratory. Lab fee; lab offered fall only.

PSYC 235 3-4.5 cr.
Conditioning and Learning
(Prerequisite: PSYC 110) Concerns the experimental study of both classical and instrumental conditioning. Optional lab involves supervised animal and human experimentation. Lecture, 3 credits; optional 1-credit laboratory. Lab fee; spring only.

PSYC 236 3 cr.
Industrial/Organizational Psychology
(Prerequisite: PSYC 110) The psychological study of people at work. Topics include personnel selection and training, motivation, leadership, the physical work environment, and computer applications. Fall only.

PSYC 237 3 cr.
(D.S) Psychology of Women
(Prerequisite: PSYC 110) Examines the biological, sociological and cultural influences on the psychology of women. Topics include gender socialization, sex roles, and the impact of gender on personality, communication, achievement, and mental health. Fall, every other year.

Special Topics courses at the 200 level are developed by individual Psychology faculty to provide in-depth coverage of a specific area. Prerequisites include PSYC 110, at least sophomore status, and other Psychology courses as determined by the instructor. This course and PSYC 384 may be used only once to satisfy major elective requirements.

PSYC 238 3 cr.
Special Topics: Adolescence
Special Topics: Behavior Modification
Special Topics: Sports Psychology

PSYC 239 5 cr.
Research Methods in the Behavioral Sciences
(Prerequisites: PSYC 110; a grade of C or higher in PSYC 210) A survey of scientific method and research design in the behavioral sciences. Topics include single subject, survey, correlational and experimental research. Lecture and lab involve computerized data analyses. Lab also includes supervised research and scientific writing. Lecture, 3 credits; lab, 2 credits. Lab fee; lab offered only in spring. The laboratory is writing-intensive (W).

PSYC 235 3 cr.
(W) Psychological Testing
(Prerequisites: PSYC 110; a grade of C or higher in PSYC 210) Provides a thorough grounding in principles of testing and a review of the major types of assessment, including intellectual, personality, and interest.

PSYC 236 3 cr.
(W) Clinical Psychology
(Prerequisites: PSYC 110; a grade of C or higher in PSYC 225) An overview of contemporary clinical psychology focusing on its practices, contributions and directions. Topics include clinical research, psychological assessment, psychotherapy systems, community applications, and emerging specialties, such as health and forensic psychology. Fall only.

PSYC 284 3 cr.
Academic and Career Development in Psychology
(Prerequisites: Junior standing; Psychology major) This seminar, designed for Psychology majors in their junior year, will entail studying, discussing, and applying information on academic planning, career development, and graduate school. Course requirements include attendance at several academically related department events or psychologically related university presentations. Graded Satisfactory/Unsatisfactory. Fall only.

PSYC 480 3 cr.
Field Experience in Clinical Settings
(Prerequisites: Junior or senior status; a grade of C or higher in PSYC 225; PSYC 335; PSYC 360; permission of instructor) This course entails supervised field experience in a mental-health or social-service facility in the community. Students are required to spend 8 hours a week at their placement and 1.5 hours a week in a seminar throughout the semester. The professor provides classroom instruction, and the on-site supervisor provides clinical supervision. Graded Satisfactory/Unsatisfactory.

PSYC 481 3 cr.
Field Experience in Personnel Psychology
(Prerequisites: Junior or senior status; a grade of B or higher in PSYC 236 and 335; MGT 361; permission of instructor) This course entails supervised field experience in a personnel office. Students are required to spend 10 hours a week at their placement and one hour periodically throughout the semester in a seminar. Graded Satisfactory/Unsatisfactory. Offered as a reader.

PSYC 490 3 cr.
History and Literature of Psychology I
(Prerequisites: Senior standing; Psychology major or minor) This lecture and discussion course will examine the history of modern psychology from pre-Socratic philosophers to contemporary perspectives. Emphasis will be placed on the influential works of various schools of thought that have shaped the emergence of psychology. Fall only.

PSYC 491 1.5 cr.
(W) History and Literature of Psychology II
(Prerequisites: Senior standing; a grade of C or higher in PSYC 490) This seminar, designed for students with a major or minor in Psychology, will entail critical reading, analysis, and discussion of selections from the seminal literature in psychology, including selected works of William James, Sigmund Freud, and B.F. Skinner. Individual professors will choose additional readings on the basis of their interests and student preferences. Spring only.

PSYC 492 1-1.5 cr.
Advanced Topics Seminar
Seminar course featuring selected advanced topics in psychology. Restricted to junior and senior majors by permission of the instructor. The specific topic, scheduling format and course prerequisites will vary by instructor. The topics with specific prerequisites will be listed each semester in the course bulletin and can be obtained for the academic year from the department chair.

PSYC 493-494 3-6 cr.
Undergraduate Research
(Prerequisites: Junior or senior standing; PSYC 330; a grade of B or higher in PSYC 330 lecture and the Psychology course most relevant to research topics; permission of instructor) Individual study and research on a specific topic under the supervision of a faculty member. Students are expected to spend a minimum of 10 hours a week on research activities throughout the semester.

SOCIOLoGY

Faculty
Harry R. Dammer, Ph.D., Chair
Thomas E. Baker, M.S.
Joseph F. Cimini, J.D.
David O. Friedrichs, M.A.
John B. Pyle, M.A.
Loreen Wolfer, Ph.D.
Midori Yamanouchi-Rynn, Ph.D.

Overview
Courses in Sociology are designed to meet the intellectual and career interests of students who are concerned about what is happening in their society and in their daily personal interaction with other people. The courses are designed to help the student interested in social work, human services, industrial organization, urban planning, etc., to attain a pre-professional orientation in these fields.

Students interested in Urban Planning are advised to include SOC 116, 224, 231 and 232 in their electives; for Social Work, SOC 234, 115, 116, 118 and 224; for Medical Services/Administration, SOC 216, GERO 212,

**SPECIAL TOPICS COURSES**

Special Topics courses at the 200 level are developed by individual Psychology faculty to provide in-depth coverage of a specific area. Prerequisites include PSYC 110, at least sophomore status, and other Psychology courses as determined by the instructor. This course and PSYC 384 may be used only once to satisfy major elective requirements.
Sociology

SOCI 110
Introduction to Sociology
3 cr.
Fundamental principles in the field of sociology. Stratification, ethnicity, deviance; basic institutions of society; social change and demographic trends.

SOCI 112
Social Problems
3 cr.
Application of sociological principles to major issues in contemporary society.

SOCI 115
Introduction to Social Work
3 cr.
Growth of social work as a professional endeavor. The scope of social work; casework in the medical, psychiatric, family and child welfare, and guidance fields, community organization, social research, social planning, social group work. Current trends in social work.

SOCI 116
Community Organization
3 cr.
A general introduction to the process of community organization, as a field of both social work and human endeavor. The coordination and financing of welfare activities, methods of appraising community needs and resources, planning and the initiation of welfare services. Services of a voluntary and governmental nature, strategies of power.

SOCI 118
Child Welfare
3 cr.

SOCI 132
Introduction to Archaeology
3 cr.
An introduction to the study of archaeology from anthropological and historical perspectives. Areas to be explored include survey and site recognition, excavation planning, record keeping, treatment of artifacts, and above-ground archaeology.

SOCI 210
Marriage and the Family
3 cr.
An historical, comparative, and analytical study of marriage and family institutions. Problems of courtship, mate selection and marriage adjustment in modern society.

SOCI 211
Methods of Social Research
3 cr.
This course is designed to help the student understand the range of research methods used in sociological and gerontological research/investigations and evaluate their strengths and weaknesses. It will also help students to appreciate some basic problems involved in the collection and analysis of data.

TOTAL: 130 CREDITS

1 In the cognate Social Science electives, the department recommends a mix of Human Services, Criminal Justice, Gerontology, Political Science and Psychology electives, especially PSYC 224 (Personality).
2 Department Recommendation: The social-work internship may be taken in either the junior or senior year, or both (not to exceed a maximum of 6 credits of internship).
216, 218 and 230; for Human Resources/Administration, SOC 226, 227 and 228.

The Department of Sociology/Criminal Justice also administers the Criminal Justice major and the Gerontology major.

**Minor in Sociology**

18 credits, including SOC 110, SOC 112, and SOC 318. The following electives are strongly recommended by the department: SOC 224, SOC 226, SOC 231, SOC 234.

**Major in Gerontology**

The degree program in Gerontology has the following objectives:

1. To understand the processes of aging;
2. To prepare for careers in agencies and institutions serving the older adult, such as area agencies on aging, family services, long-term care facilities, federal, state, and local governmental agencies, retirement communities, business and industry, etc.;
3. To provide a liberal gerontology education with special emphasis on the development of the whole person; and
4. To provide students with academic preparation for advanced study in gerontology, social work, public administration, social welfare and related fields.

The Scranton area is especially suited to serve as a laboratory setting for gerontology education with its high proportion of older adults and its many agencies and facilities for the same. The department has established an Advisory Board in Gerontology composed of practitioners in the field: health specialists, community leaders, and senior citizens. The Advisory Board will help to ensure that the program curriculum is current.

**Minor in Gerontology**

18 credits, including SOC 110, GERO 110, and GERO 230. The following electives are strongly recommended by the department in the Gerontology sequence: GERO 218, GERO 216, GERO 212, GERO 232.

**Course Descriptions**

**Sociology**

SOC 110 3 cr.
(S) Introduction to Sociology
Fundamental principles in the field of sociology. Stratification, ethnicity, deviance; basic institutional, class, and gender perspectives; social change and demographic trends.

SOC 112 3 cr.
(S) Social Problems
Application of sociological principles to major issues in contemporary society.

SOC 115 3 cr.
Introduction to Social Work
Growth of social work as a professional endeavor. The scope of social work; casework in the medical, psychiatric, family and child welfare, and guidance fields; community organization, social research, social planning, social group work. Current trends in social work.

SOC 116 3 cr.
Community Organization
A general introduction to the process of community organization, as a field of both social work and human endeavor. The coordination and financing of welfare activities, methods of appraising community needs and resources, planning and the initiation of welfare services. Services of a voluntary and governmental nature, strategies of power.

SOC 118 3 cr.
Child Welfare

SOC 132 3 cr.
Introduction to Archaeology
An introduction to the study of archaeology from anthropological and historical perspectives. Areas to be explored include survey and site recognition, excavation planning, record keeping, treatment of artifacts, and above-ground archaeology.

SOC 210 3 cr.
(D,W) Marriage and the Family
An historical, comparative, and analytical study of marriage and family institutions. Problems of courtship, mate selection and marriage adjustment in modern society.

SOC 211 3 cr.
Methods of Social Research
This course is designed to help the student understand the range of research methods used in sociological and gerontological research/investigations and evaluate their strengths and weaknesses. It will also help students to appreciate some basic problems involved in the collection and analysis of data.

SOC 212 3 cr.
Religion and Society
A survey of religious systems and their interrelations with society and social institutions, with emphasis on the social consequences and determinants of religious behavior. The theories of Durkheim, Weber, Parsons, Bellah, Berger and Luckman will be examined.

SOC 213 3 cr.
Collective Behavior and Social Movements
This course will examine collective behavior which includes protest demonstrations, riots, mass or diffuse phenomena such as fads and crazes, social movements, and revolution, with a decided emphasis on social and political movements. This course is recommended for those interested in sociology, political science, history, or other social sciences.

SOC 215 3 cr.
Methods of Social Research
This course is designed to help the student understand the range of research methods used in sociological and gerontological research/investigations and evaluate their strengths and weaknesses. It will also help students to appreciate some basic problems involved in the collection and analysis of data.
work and aspirations. The career path from education, occupational mobility are noted. The student is made aware of the relationship among education, and for various organizational and professional roles and for individual women.

SOC 216 Medical Sociology
The social dimensions of health and illness; role of physician, nurse and patient; social organization of health services; the content of medical practice; culture and health disorders; mental health and mental illness.

SOC 217 (D,W) Family Issues and Social Policy
This service-learning course examines family problems of work and poverty, separation and divorce, family violence, and elder care, addressing each in terms of describing the social problem and why it exists and the program/policies designed to address it. Students are offered solutions and are helped and are helped to apply multicultural interpretations.

SOC 220 Business and Society
Modern industrialism as social behavior. Social conditions in the rise of industrialism and their effect on the worker; collective bargaining and industrial conflict, the industrial community; social classes and the industrial order. This course also shows how the business sector impacts on society and on the globalization of the economy.

SOC 229 Crisis in Population
A study of the basic variables of population, birth, death and migration, socioeconomic and cultural variables affecting population growth, projections and forecasts. The chief natural and social demographic theories. Population policies and practices in selected world areas.

SOC 230 Urban Sociology
Urban ecology and culture as the dominant form of community life in contemporary society; their characteristics, peculiarities, and problems.

SOC 232 (D) Great American Cities
A sociological exploration of selected major U.S. cities will review a variety of cultures and examine that matrix of ideas, creeds, religions, races, ethnicities, attitudes, habits, artifacts and institutions – social, educational, artistic, political and economic – which condition the way the people in each city live.

SOC 234 (S,D) Cultural Anthropology
Social and cultural organization among primitive or preliterate societies; marriage, property, religion, magic and tribal control. Significance of the study of primitive cultures for understanding of urban industrial civilizations.

SOC 235 Peoples of East Asia
The anthropology of the East Asian culture area, focusing particularly on China and Japan. Topics include basic social institutions, world views, culture and personality, and the problem of modernization.

SOC 236 Special Topics in Sociology
(Please indicate the topic) Courses designed to meet specific needs of individual students or courses offered on a trial basis to determine the value of placing them into the regular curriculum.

SOC 318 Sociological Theory
An examination of the major theoretical developments in sociological theory from the classical period of Marx, Weber, and Durkheim to contemporary schools such as structural-functionalism, conflict theory, exchange theory, and symbolic interaction.

SOC 382-383 Independent Study in Sociology
(Prerequisite: Consent of the chair and instructor) Designed for advanced students who are capable of independent study. A program of planned research under the guidance of a faculty member.

SOC 480-481 Internship in Social Work
(Prerequisite: Consent of the chair and instructor) Designed for advanced students who are capable of independent study. A program of planned research under the guidance of a faculty member.

SOC 480-481 Internship in Social Work
(Prerequisite: Consent of the chair and instructor) Designed for advanced students who are capable of independent study. A program of planned research under the guidance of a faculty member.

S/CJ 220 Penology: Corrections
A study of correctional institutions for offenders or at risk of delinquency. The relationships between prisons, probation and rehabilitation.

S/CJ 224 Criminal Justice
The sociology of law enforcement, corrections, and criminal justice. An examination of the structure and functioning of the criminal justice system and an understanding of the role of society, culture, and economic factors in the criminal justice process.

S/CJ 226 Comparative Justice Systems
Comparative analysis of justice systems and the role of law and order in different societies. An examination of the similarities and differences among systems of justice.

S/CJ 232 Public Safety Administration
An examination of the role of public safety administrators in the criminal justice system. An examination of the roles of police, fire and emergency medical services.

S/CJ 234 Criminal Justice Management
Management of criminal justice agencies and the role of management in the criminal justice system. An examination of the role of management in the criminal justice system.

S/CJ 314 The Bill of Rights and Criminal Justice
The Bill of Rights and their relevance to criminal justice. An examination of the role of the Bill of Rights in the criminal justice system.

S/CJ 316 Principles of Evidence
An examination of the role of evidence in the criminal justice system. An examination of the role of evidence in the criminal justice system.

S/CJ 319 Trial, Jury and Counsel
An examination of the role of the trial, jury and counsel in the criminal justice system. An examination of the role of the trial, jury and counsel in the criminal justice system.

S/CJ 320 Civil Liability
An examination of the role of civil liability in the criminal justice system. An examination of the role of civil liability in the criminal justice system.

S/CJ 324 Victimology
An examination of the role of victimology in the criminal justice system. An examination of the role of victimology in the criminal justice system.
The role of sport in civilized societies; sport as work and recreation; women and minorities in sport; sport in education; sport and the mass media.

SOC 215 3 cr.
Feminism and Social Change
This course examines the relationships between feminism and social change, studying feminist movements and how feminist ideologies, strategies, and individuals influenced social movements. It also explores the outcomes of women’s movements, the mobilization of counter-movements, and the consequences of feminism for society for various organizational and professional roles and for individual women.

SOC 216 3 cr.
Medical Sociology
The social dimensions of health and illness; role of physician, nurse and patient; social organization of health services; the content of medical practice; culture and health disorders; mental health and mental illness.

SOC 217 3 cr.
(D/W) Family Issues and Social Policy
This service-learning course examines family problems of work and poverty, separation and divorce, family violence, and elder care, addressing each in terms of describing the social problem and why it exists and the program/policies designed to address it. Students are offered solutions and are helped and are helped to apply multicultural understandings.

SOC 224 3 cr.
(S/D) American Minority Groups
Patterns of adjustment between ethnic and racial groups, with special attention given to the American scene. Prejudice and discrimination as opposed to the democratic ideology.

SOC 226 3 cr.
Sociology of Work and Professions
The nature and role of contemporary occupations and professions in the life cycle are discussed; occupational choice, career patterns and occupational mobility are noted. The student is made aware of the relationship among education, work and aspirations. The career path from entry-level job to retirement is examined.

SOC 227 3 cr.
Business and Society
Modern industrialism as social behavior. Social conditions in the rise of industrialism and their effect on the worker: collective bargaining and industrial conflict, the industrial community; social classes and the industrial order. This course also shows how the business sector impacts on society and on the globalization of the economy.

SOC 228 3 cr.
Social Psychology
Study of individual behavior as affected by cultural and social stimuli. Emphasis on the analysis of human conduct in social settings.

SOC 229 3 cr.
Crisis in Population
A study of the basic variables of population, birth, death and migration, socioeconomic and cultural variables affecting population growth, projections and forecasts. The chief natural and social demographic theories. Population policies and practices in selected world areas.

SOC 231 3 cr.
Urban Sociology
Urban ecology and culture as the dominant form of community life in contemporary society; their characteristics, peculiarities, and problems.

SOC 232 3 cr.
(D) Great American Cities
A sociological exploration of selected major U.S. cities will review a variety of cultures and examine that matrix of ideas, creeds, religions, races, ethnicities, attitudes, habits, artifacts and institutions – social, educational, artistic, political and economic – which condition the way the people in each city live.

SOC 234 3 cr.
(S/D) Cultural Anthropology
Societal and social organization among primitive or preliterate societies; marriage, property, religion, magic and tribal control. Significance of the study of primitive cultures for understanding of urban industrial civilizations.

SOC 235 3 cr.
Peoples of East Asia
The anthropology of the East Asian culture area, focusing particularly on China and Japan. Topics include basic social institutions, world views, culture and personality, and the problem of modernization.

SOC 284 3 cr.
Special Topics in Sociology
(Prerequisite: Consent of the chair and the instructor) Courses designed to meet specific needs of individual students or courses offered on a trial basis to determine the value of placing them into the regular curriculum.

SOC 318 3 cr.
Sociological Theory
An examination of the major theoretical developments in sociological theory from the classical period of Marx, Weber, and Durkheim to contemporary schools such as structural-functionalism, conflict theory, exchange theory, and symbolic interaction.

SOC 382-383 3 cr.
Independent Study in Sociology
(Prerequisite: Consent of the chair and instructor) Designed for advanced students who are capable of independent study. A program of planned research under the guidance of a faculty member.

SOC 480-481 3 cr.
Internship in Social Work
(Prerequisite: Junior or senior standing; permission of instructor) Supervised experiential learning designed to broaden the educational experience of students through practical experience and work assignments with governmental and/or community agencies in the field of social work. Supervision by a faculty member and agency supervisor.

Approved courses from other curricula:
Sociology majors may be advised to choose several courses taught in the Criminal Justice sequence; courses so approved include:

S/CJ 210 Law and Society
S/CJ 213 Criminology
S/CJ 214 Juvenile Delinquency
S/CJ 218 The American Court System
S/CJ 220 Penology: Corrections
S/CJ 221 Community-based Corrections
S/CJ 224 Sociology of Deviance
S/CJ 225 White Collar Crime
S/CJ 226 Comparative Justice Systems
S/CJ 227 Organized Crime Patterns
S/CJ 232 Public Safety Administration
S/CJ 234 Criminal-Justice Management
S/CJ 314 The Bill of Rights and Criminal Justice
S/CJ 316 Principles of Evidence
S/CJ 317 Trial, Jury and Counsel
S/CJ 318 Civil Liability
S/CJ 324 Victimology

SOC 310 3 cr.
Sociology of Crime and Justice
A multidisciplinary examination of the cognitive and affective aspects of aging. The course covers social, psychological, physiological, economic, and health aspects of aging, as well as service delivery systems. It explores planning and action strategies aimed at enhancing the quality of life and providing adequate benefits and services for the elderly.

SOC 311 3 cr.
Social Problems of Aging
This course studies specific problems of the aged in America, with attention to issues of inequality in opportunities and rewards; of mental health, housing, minorities, and institutions; of crime and victimization; of economic status, work, leisure, and retirement; of attractiveness, aging and sexuality; of drugs, doctors, nursing homes and hospitals.

SOC 410 3 cr.
Aging Around the World
A cross-cultural approach looking at the ways in which a variety of societies deal with aging and the aged. The issues of work, economics, other types of expertise and different definitions of the aged are analyzed.

SOC 412 3 cr.
Aging and the Life Cycle
Rites of passage, age norms, and role rehearsals for life transitions; the life cycle in comparative cultures; sociological dimensions of adulthood and aging concerning the work cycle, sport and leisure development, patterns of consumer behavior and life style, and the family cycle.

SOC 414 3 cr.
Aging and Human Behavior
A critical examination of life satisfaction in old age; the social and psychological factors which affect it; factors contributing to the psychological well-being of older adults as a function of their position in the social system.

SOC 416 3 cr.
Aging and the Community
Consideration of selected community strategies affecting desired changes in the development and implementation of social services and programs for the elderly: legislative action, interagency relationships, the citizen role.

TOTAL: 130 CREDITS

GERO 218

Health and Aging

An explorative study of the mental and physical health problems prevalent in the older adult population, with emphasis upon the preventive aspect of health care as applied by themselves and health-care providers. Health-care approaches appropriate to the various problems, and relevant resources within the home and community are considered.

GERO 220

Crime and Aging

A consideration of crime as it affects aging; examining the older adult as victim, offender, practitioner, and perpetrator, in light of current thought, policy, and law.

GERO 230

Social Policy and Aging

Review of major legislation affecting older adults, including the Social Security Act, Older Americans Act, Medicare, and various local, state, and national programs for the aged.

GERO 232

Aging and Death

This course offers the student an opportunity to explore the mystery and meaning of death. Focus is on a number of aspects of dying and the death process, such as the dying individual and the family; cross-cultural perspectives; terminal illness; professions and death; rites and rituals.

GERO 284

Special Topics in Gerontology

(Prerequisite: Permission of the chair and the instructor) Courses designed to meet specific needs of individual students or courses offered on a trial basis to determine the value of placing them into the regular curriculum.

GERO 382-383

Independent Study in Gerontology

Designed for advanced students who are capable of independent study. A program of planned research in gerontology under the guidance of a faculty member. Registration upon approval of the chairperson of the department and the instructor directing the study.

GERO 480-481

Internship in Gerontology

(Prerequisite: Junior or senior standing; permission of instructor) Supervised experiential learning in one or more organizations that serve older adults. Supervision by a faculty member and agency supervision required.

Overview

As “faith seeking understanding,” theology plays an essential role in the quest for God, wisdom, and human fulfillment. Catholic education recognizes that theology addresses certain basic human questions in ways that speak to the heart and mind as no other discipline can. Theology approaches such questions not in isolation, but as a partner in a living exchange between the Church and the diverse traditions of the world. Theology/Religious Studies courses seek to form conscience and character, helping our students address contemporary questions of good and evil, freedom and truth, life and death. In addition to courses with a primarily Christian focus, the department offers courses in non-Christian religious traditions. The General Education requirement of 6 Theology credits for all students is fulfilled by T/R 121-122, a two-semester introductory sequence. These courses must be completed before students take upper-division courses in Theology.

Major in Theology/Religious Studies

The Bachelor of Arts degree in Theology/Religious Studies requires 30 credits in the major (including the two introductory courses), allowing for a second major and/or minor or concentration in many fields. Theology majors must take at least four courses at the 300 or 400 level, including at least one semester of the Theology Capstone Seminar, T/R 490. To ensure a well-rounded back-
An explorative study of the mental and physical health problems prevalent in the older adult population, with emphasis upon the preventive aspect of health care as applied by themselves and health-care providers. Health-care approaches appropriate to the various problems, and relevant resources within the home and community are considered.

**GERO 220**  
Crime and Aging  
A consideration of crime as it affects aging; examining the older adult as victim, offender, practitioner, and perpetrator, in light of current thought, policy, and law.

**GERO 230**  
Social Policy and Aging  
Review of major legislation affecting older adults, including the Social Security Act, Older Americans Act, Medicare, and various local, state, and national programs for the aged.

---

1. Department recommendation: The Gerontology Internship may be taken in either the junior or senior year, or both (not to exceed a maximum of 6 credits of internship).
ground in the discipline, each major must take at least one course from each of the following categories:

**Old Testament:**
- T/RS 210Z, 310Z, 311Z, 312Z, 313Z, 440Z

**New Testament:**

**History:**

**Doctrinal:**

**Moral Theology:**

**Theological Studies Track**
Completion of this track will be noted on the Theology major’s transcript. The student must minor in Counseling and Human Services, including in that minor CHS 111, 112, 241 and 341. Included among the courses for the major or minor must be T/RS 338Z, with placement in a pastoral setting, and a Pastoral Studies capstone seminar.

**Theology/Religious Studies Minor**
The minor in Theology/Religious Studies requires 18 credits: T/RS 121 and 122 plus four more courses. In choosing courses for a minor, students may concentrate in one area of theology or they may select courses from several areas.

**Course Descriptions**

- **HEBR 101-102 (6 cr)** Biblical Hebrew (HEBR 101 is a prerequisite for HEBR 102)
  A systematic introduction to the fundamentals of Biblical Hebrew grammar and to certain aspects of ancient Semitic language and culture.

- **T/RS 121 (3 cr)** (P) Theology I: Introduction to the Bible
  A survey of central texts and themes of the Bible. Its purpose is to develop biblical literacy as well as skills in interpreting various literary forms and key theological concepts.

- **T/RS 122 (3 cr)** (P) Theology II: Introduction to Christian Theology
  (Prerequisite: T/RS 121) A survey of key Christian themes: creation, Christ’s incarnation and redemption, the Church and sacraments, Christian personhood, and the practice of prayer, virtue, and hope for the future.

- **T/RS 210Z (3 cr)** (P) Jews, Christians, and the Bible
  (Formerly T/RS 207) A survey of ancient and modern ways of reading the Bible. The focus will be on a group of central biblical figures whose stories will be examined in the context of ancient Israelite history and society. The biblical stories will then be compared with later elaborations by Jewish and Christian interpreters.

- **T/RS 211 (3 cr)** Perspectives on Western Culture
  The religious, philosophical and political writings of major thinkers of the Western tradition. The first semester includes the study of the Bible, Aristotle’s Ethics, Plato’s Apology, Augustine’s City of God, and the thought of Aquinas. Emphasis is on the study of these works as they illuminate the current world.

- **T/RS 212 (3 cr)** Saints and Holiness
  An inquiry into the nature of Christian sanctity by an examination of the lives and accomplishments of traditional saints and of contemporary persons who respond to the Gospel message.

- **T/RS 213 (3 cr)** American Catholic Thought
  The major themes of American Catholic tradition from colonial times to the present are placed in their historical, religious, social and political context.

- **T/RS 214C (3 cr)** (PW) Inside the Catholic Tradition
  (Formerly T/RS 184C) This introduction to Catholic Tradition will study its scope, depth, and ongoing development, reception, and characteristics. Topics covered include Faith and Revelation, the intercommunion of Scripture and Tradition, the role of Magisterium, and the development of doctrine. Selected readings are taken from important conciliar texts and theologians.

- **T/RS 215Z (3 cr)** (P) The History of Christian Theology
  (Formerly T/RS 210) A study of the vital growth of Christianity’s life, doctrine, worship and spirituality over the centuries. Special emphasis will be placed on principal leaders, thinkers and heroes.

- **T/RS 216Z (3 cr)** (P) Judaism in Modern Times
  This course is a detailed study of the history of modern Judaism (1700 to present) in all of its aspects, including Messianism, Hasidism, Jewish Emancipation, new Jewish religious movements, Zionism, Holocaust, and the rise of the State of Israel.

- **T/RS 218Z (3 cr)** (P) Women in Christianity
  (Formerly T/RS 315) An exploration of some of the major roles women have played in Christian thought and experience, including their contributions as disciples, spiritual guides, and social critics. Will also examine assumptions about male and female identities and consider challenges to traditional roles.

- **T/RS 219Z (3 cr)** (P) The Religions of the World
  (Formerly T/RS 314) An exploration of belief in the traditions of the classical historical religions of the world through both systematic analysis and the reading of sacred texts.

- **T/RS 220 (3 cr)** (P) Spirituality: Liturgy and Sacraments
  A basic course in sacraments which explores the religious experience of the faith community and its expression in sacraments. Two features of the Rite of Christian Initiation of Adults, its process-orientation and the role of community, will serve as basis for the examination of new sacramental models. Specific attention will be given to the development of a sacramental spirituality.

ground in the discipline, each major must take at least one course from each of the following categories:

**Old Testament:** T/RS 210Z, 310Z, 311Z, 312Z, 313Z, 440Z  
**Doctrine:** T/RS 220, 222, 328Z, 329Z, 330Z, 331Z  
**Moral Theology:** T/RS 230, 231, 232, 236, 332Z, 334Z, 335Z, 337Z  

**Pastoral Studies Track**
Completion of this track will be noted on the Theology major’s transcript. The student must minor in Counseling and Human Services, including in that minor CHS 111, 112, 241 and 341. Included among the courses for the major or minor must be T/RS 338Z, with placement in a pastoral setting, and a Pastoral Studies capstone seminar.

**Theology/Religious Studies Minor**
The minor in Theology/Religious Studies requires 18 credits: T/RS 121 and 122 plus four more courses. In choosing courses for a minor, students may concentrate in one area of theology or they may select courses from several areas.

**Course Descriptions**

**HEBR 101-102**  6 cr.  
**The Biblical Hebrew**  
A systematic introduction to the fundamentals of Biblical Hebrew grammar and to certain aspects of ancient Semitic language and culture.

**T/RS 121**  3 cr.  
**Theology I: Introduction to the Bible**  
A survey of central texts and themes of the Bible. Its purpose is to develop biblical literacy as well as skills in interpreting various literary forms and key theological concepts.

**T/RS 122**  3 cr.  
**Theology II: Introduction to Christian Theology**  
(Prerequisite: T/RS 121) A survey of key Christian themes: creation, Christ’s incarnation and redemption, the Church and sacraments, Christian personhood, and the practice of prayer, virtue, and hope for the future.

**T/RS 210Z**  3 cr.  
(PD) Jews, Christians, and the Bible  
(Formerly T/RS 207) A survey of ancient and modern ways of reading the Bible. The focus will be on a group of central biblical figures whose stories will be examined in the context of ancient Israelite history and society. The biblical stories will then be compared with later elaborations by Jewish and Christian interpreters.

**T/RS 211**  3 cr.  
Perspectives on Western Culture  
The religious, philosophical and political writings of major thinkers of the Western tradition. The first semester includes the study of the Bible, Aristotle’s Ethics, Plato’s Apology, Augustine’s City of God, and the thought of Aquinas. Emphasis is on the study of these works as they illuminate the current world.

**T/RS 212**  3 cr.  
Saints and Holiness  
An inquiry into the nature of Christian sanctity by an examination of the lives and accomplishments of traditional saints and of contemporary persons who respond to the Gospel message.

**T/RS 213**  3 cr.  
American Catholic Thought  
The major themes of American Catholic tradition from colonial times to the present are placed in their historical, religious, social and political context.

**T/RS 214C**  3 cr.  
(PW) Inside the Catholic Tradition  
(Formerly T/RS 184C) This introduction to Catholic Tradition will study its scope, depth, and ongoing development, reception, and characteristics. Topics covered include Faith and Revelation, the intercommunion of Scripture and Tradition, the role of Magisterium, and the development of doctrine. Selected readings are taken from important conciliar texts and theologians.

**T/RS 215Z**  3 cr.  
(P) The History of Christian Theology  
(Formerly T/RS 210) A study of the vital growth of Christianity’s life, doctrine, worship and spirituality over the centuries. Special emphasis will be placed on principal leaders, thinkers and heroes.

**T/RS 216Z**  3 cr.  
(PD) Judaism in Modern Times  
This course is a detailed study of the history of modern Judaism (1700 to present) in all of its aspects, including Mysticism, Hasidism, Jewish Emancipation, new Jewish religious movements, Zionism, Holocaust, and the rise of the State of Israel.

**T/RS 217**  3 cr.  
(PD) The Holocaust in Context: History and Theology  
An exploration of the Holocaust through the perspective of the history of anti-Semitism. The course will examine the historical aspects of the Holocaust as well as the moral and theological issues raised by it.

**T/RS 218Z**  3 cr.  
(PD) Women in Christianity  
(Formerly T/RS 315) An exploration of some of the major roles women have played in Christian thought and experience, including their contributions as disciples, spiritual guides, and social critics. Will also examine assumptions about male and female identities and consider challenges to traditional roles.

**T/RS 219Z**  3 cr.  
(PD) The Religions of the World  
(Formerly T/RS 314) An exploration of belief in the traditions of the classical historical religions of the world through both systematic analysis and the reading of sacred texts.

**T/RS 220**  3 cr.  
(P) Spirituality: Liturgy and Sacraments  
A basic course in sacraments which explores the religious experience of the faith community and its expression in sacraments. Two features of the Rite of Christian Initiation of Adults, its process-orientation and the role of community, will serve as basis for the examination of new sacramental models. Specific attention will be given to the development of a sacramental spirituality.
In this light, the idea that medicine is a calling is a (limited) evil, that health is a responsibility. This course will consider the relationship between liturgy and theology, as realities in the Christian life which form and inform one another. Fundamental documents of the Roman liturgy will be introduced, with an eye toward discerning insights into God, Christ, the Church, the sacraments and the human person which are embodied therein.

Introduction to the Theology of the Byzantine Churches
(Formerly T/RS 225) The Byzantine theological tradition develops special emphases within the mainstream of the Christian tradition. This course introduces the student to the study of some of the specifically Byzantine contributions to the understanding of the Christian mystery, with particular emphasis on early developments.

Introduction to Eastern Liturgies

A Theology of Marriage
(Formerly T/RS 240) This course will introduce students to the theology of marriage. It will focus on the distinctiveness of Christian marriage, its sacramentality, marriage as a vocation and covenant, love and friendship in marriage, sex, singleness, family and children. Questions of the state of the institution of marriage in contemporary culture will also be discussed.

Faith and Healing: God and Contemporary Medicine
(Formerly T/RS 313) This course will consider the history of Western medicine in the light of a range of Christian notions such as that life is a gift from God, that the body is good, that illness is a (limited) evil, that health is a responsibility. In this light, the idea that medicine is a calling and healing an art will be considered.

Biomedical Ethics
(Formerly T/RS 330) This course will present theological reflections on the two main ethical theories undergirding contemporary biomedical ethics. It will also present and discuss relevant philosophical and theological arguments on such issues as abortion, care of handicapped infants, euthanasia, suicide, and the profession of medicine.

Parables in Pop Culture
(Formerly T/RS 214) This course is designed to help students attend to and interpret the narratives of popular culture from the perspective of Christian faith. We will discuss Jesus’ use of parables, engage the theological tradition of “finding God in all things,” and analyze a variety of artistic productions (movies, television and music) that represent dominant themes of contemporary culture.

Moral Theology
A study of the Christian moral tradition, its history and principles. Among areas to be treated are: the family, sexual activity and human rights.

Social Ethics
This course will prepare students to recognize ethical dimensions of political, economic and social issues through the study of the following pertinent writings of Pope Paul VI and Pope John Paul II, a classic work of political theory, and several contemporary writings on such issues as morality, foreign policy and economic justice.

John Paul II and Catholic Social Thought
This course will explore the dialogue between the Catholic Church and modern ideologies on social and political matters. Readings include pertinent documents of the Second Vatican Council and recent papal writings, especially those of Pope John Paul II.

Money and Power in the Biblical Tradition
(Formerly T/RS 328) A study of the presentations of various social-justice issues in the Old and New Testaments, including wealth and poverty as signs of God’s favor, obligations to care for and protect the poor, and faith as involving both rights and responsibilities.

Theology of Birth and Death
This course will investigate the meaning and significance of the birth and death of human beings in the Christian tradition. Related topics will be: suicide, euthanasia, capital punishment, contraception and abortion.

Politics: A Christian Perspective
An inquiry into the role of the state, the Church and the individual in political life. Special attention is given to the problem of violence; the course is set in the unique American perspective of Church-State relations.

Nietzsche and Christianity
A focus on Nietzsche’s relation to and critique of Western thought in general and Christian thought in particular. Nietzsche’s deep influence on contemporary theology and philosophy will be shown through extended readings from his collected works.

Money and Power in the Biblical Tradition
(Formerly T/RS 328) A study of the presentations of various social-justice issues in the Old and New Testaments, including wealth and poverty as signs of God’s favor, obligations to care for and protect the poor, and faith as involving both rights and responsibilities.

Scrools and Scriptures
What are the Dead Sea Scrolls? Do they predict the future? Were they suppressed by the Vatican? Do they reveal secret information about Jesus? Conspiracy theories and tabloid headlines abound, but what do the scrolls really tell us?
T/RS 221 3 cr.
Prayer
Introduction to the nature, purpose, and method of prayer in the Catholic Christian tradition.

T/RS 222 3 cr.
(P) Introduction to Liturgical Theology
This course will consider the relationship between liturgy and theology, as realities in the Christian life which form and inform one another. Fundamental documents of the Roman liturgy will be introduced, with an eye toward discerning insights into God, Christ, the Church, the sacraments and the human person which are embodied therein.

T/RS 223Z 3 cr.
Introduction to the Theology of the Byzantine Churches
(Formerly T/RS 225) The Byzantine theological tradition develops special emphases within the mainstream of the Christian tradition. This course introduces the student to the study of some of the specifically Byzantine contributions to the understanding of the Christian mystery, with particular emphasis on early developments.

T/RS 224Z 3 cr.
(P) Introduction to Eastern Liturgies

T/RS 225Z 3 cr.
(P) A Theology of Marriage
(Formerly T/RS 240) This course will introduce students to the theology of marriage. It will focus on the distinctiveness of Christian marriage, its sacramentality, marriage as a vocation and covenant, love and friendship in marriage, sex, singleness, family and children. Questions of the nature of the institution of marriage in contemporary culture will also be discussed.

T/RS 226Z 3 cr.
(P) Faith and Healing: God and Contemporary Medicine
(Formerly T/RS 315) This course will consider the history of Western medicine in the light of a range of Christian notions such as that life is a gift from God, that the body is good, that illness is (a limited) evil, that health is a responsibility. In this light, the idea that medicine is a calling and healing an art will be considered.

T/RS 227Z 3 cr.
(P) Biomedical Ethics
(Formerly T/RS 330) This course will present theological reflections on the two main ethical theories undergirding contemporary biomedical ethics. It will also present and discuss relevant philosophical and theological arguments on such issues as abortion, care of handicapped infants, euthanasia, suicide, and the profession of medicine.

T/RS 228Z 3 cr.
(P) Parables in Pop Culture
(Formerly T/RS 214) This course is designed to help students attend to and interpret the narratives of popular culture from the perspective of Christian faith. We will discuss Jesus’ use of parables, engage the theological tradition of “finding God in all things,” and analyze a variety of artistic productions (movies, television and music) that represent dominant themes of contemporary culture.

T/RS 230 3 cr.
(P) Moral Theology
A study of the Christian moral tradition, its history and principles. Among areas to be treated are: the family, sexual activity and human rights.

T/RS 231 3 cr.
(P) Social Ethics
This course will prepare students to recognize ethical dimensions of political, economic and social issues through the study of the following: pertinent writings of Pope Paul VI and Pope John Paul II, a classic work of political theory, and several contemporary writings on such issues as morality, foreign policy and economic justice.

T/RS 232 3 cr.
John Paul II and Catholic Social Thought
This course will explore the dialogue between the Catholic Church and modern ideologies on social and political matters. Readings include pertinent documents of the Second Vatican Council and recent papal writings, especially those of Pope John Paul II.

T/RS 233 3 cr.
(FW) Suffering
This course examines the way in which Christians and Jews narrate their suffering in the context of God’s purpose. Traditional formulations of “the problem of evil” will be critiqued, and the concept of redemptive suffering will be explored.

T/RS 234 3 cr.
(PD) Twentieth-Century Peacemakers
A study of some of the principles and methods of “waging peace” found in the lives and writings of Mohandas Gandhi, Dorothy Day, Thomas Merton and Martin Luther King.

T/RS 235 3 cr.
(P) The Theology of Birth and Death
This course will investigate the meaning and significance of the birth and death of human beings in the Christian tradition. Related topics will be: suicide, euthanasia, capital punishment, contraception and abortion.

T/RS 236 3 cr.
(FW) Prophets and Profits: The Economy in the Christian Life
An inquiry into the witness of the Church with regard to questions of wealth, business, economics and formulation of public policy. Biblical sources, Church tradition, and contemporary narratives will be employed to assess the common good.

T/RS 237 3 cr.
Politics: A Christian Perspective
An inquiry into the role of the state, the Church and the individual in political life. Special attention is given to the problem of violence; the course is set in the unique American perspective of Church-State relations.

T/RS 238 3 cr.
Nietzsche and Christianity
A focus on Nietzsche’s relation to and critique of Western thought in general and Christian thought in particular. Nietzsche’s deep influence on contemporary theology and philosophy will be shown through extended readings from his collected works.

T/RS 239Z 3 cr.
(P) Money and Power in the Biblical Tradition
(Formerly T/RS 338) A study of the presentation of various social-justice issues in the Old and New Testaments, including wealth and poverty as signs of God’s favor, obligations to care for and protect the poor, and faith as involving both rights and responsibilities.

T/RS 240Z 3 cr.
(P) Scrolls and Scriptures
What are the Dead Sea Scrolls? Do they predict the future? Were they suppressed by the Vatican? Do they reveal secret information about Jesus? Conspiracy theories and tabloid headlines abound, but what do the scrolls really tell us?

This course will look at the tabloids, the conspiracy theories and the scrolls themselves to understand better Judaism and early Christianity.

T/RS 241Z 3 cr.
(P) Early Biblical Heroes and Villains
(Prerequisites: T/RS 121, T/RS 122) This course will be a theological study of some of the historical books of the Old Testament, especially Joshua, Judges, and the four books concerning kings. Major figures and narratives, like those of King David and the prophet Elijah, will be the main focus.

T/RS 296 3 cr.
(PD) Life Along the Dead Sea
A three-component travel course: (1) Participation in a one-week archaeological excavation at Ein Gedi, Israel; (2) A one-week tour of important biblical sites; and (3) A University of Scranton–based series of lectures for background and context.

T/RS 310Z 3 cr.
(P) The Heart of the Old Testament
(Formerly T/RS 309) An in-depth look at the five books of Moses (Genesis, Exodus, Leviticus, Numbers and Deuteronomy) using ancient and modern exegetical views to examine and emphasize the central theme of the Covenant.

T/RS 311Z 3 cr.
Job and the Psalter
(Formerly T/RS 306) A close look at the wisdom literature of the Old Testament. The study of both the Book of Psalms and the Book of Job will emphasize theological themes.

T/RS 312Z 3 cr.
(P) The Great Prophets
(Formerly T/RS 308) An examination of the four major prophets of the Old Testament: Isaiah, Jeremiah, Ezekiel and Daniel; with an emphasis on the study of selected texts.

T/RS 313Z 3 cr.
(P) Faith and Justice in the Prophetic Tradition
(Formerly T/RS 208) The goals of contemporary Jesuit education are the service of faith and the promotion of justice. This course will examine the roots of these ideals in the writings of the OT prophets, with special attention to Isaiah.
T/RS 314Z 3 cr.
(P) The Four Gospels
(Formerly T/RS 206) A study of the four Gospels from the perspectives of history, theology, and literature.

T/RS 315Z 3 cr.
(PW) John's Gospel and Letters
(Formerly T/RS 304) A close look at the Fourth Gospel and the Epistles of John with an emphasis on their literary, historical, and theological characteristics.

T/RS 316Z 3 cr.
(PW) Passion and Resurrection Narratives
(Formerly T/RS 307) A study of the theology of each of the Gospels by an analysis of the key narratives of the Passion and Resurrection in the four Gospels.

T/RS 317Z 3 cr.
(P) Pauline Letters
(Formerly T/RS 204) An introduction to the writings of the Apostle Paul, exploring Jewish and Greco-Roman influences on his letters as well as his contribution to basic Christian beliefs and practices.

T/RS 318Z 3 cr.
(P) The Apocalypse of St. John
(Formerly T/RS 305) This introduction to the last book of the Bible will emphasize the literary forms and thought patterns of apocalyptic literature as well as the historical and theological character of the book itself, highlighting both textual interpretation and contemporary relevance.

T/RS 319Z 3 cr.
(P,D,W) Judaism in the Time of Jesus
(Formerly T/RS 335) A study of first-century Jewish religious sects as well as the cultural, political, and historical setting of the Roman Empire in which Jesus lived and preached and where monotheism continued to develop.

T/RS 320Z 3 cr.
(P) Early Christian Writers
(Formerly T/RS 215) This course is designed to provide an introduction to the main figures, theological currents and ideas of the formative period of the history of Christian theology by a close reading of selected texts from the major authors of the first six centuries of the Church.

T/RS 321Z 3 cr.
(P) Development of Christian Thought to 1100
(Formerly T/RS 218) A survey of the principal theological, spiritual and institutional developments in the first millennium of the Church's life.

T/RS 322Z 3 cr.
(P) Development of Christian Thought 1100 to 1800
(Formerly T/RS 219) Survey of the principal theological, spiritual, and institutional developments in the Church in the medieval, reformation, and early modern periods.

T/RS 323Z 3 cr.
(P) Protestant Traditions
(Formerly T/RS 228) This course will examine both historical and contemporary representatives of selected Protestant traditions, focusing on their characteristic understandings of (1) scripture, tradition and knowledge of God; (2) grace, faith and works; and (3) the Church and the Christian life.

T/RS 324Z 3 cr.
Jesuit Spirit
(Formerly T/RS 312) The Society of Jesus (Jesuits): its spirituality, tradition and history from their 16th-century origins in the Spiritual Exercises of St. Ignatius of Loyola through the contemporary period, with special emphasis on Jesuit theological and cultural contributions to the Church.

T/RS 325Z 3 cr.
(P) Heaven and Hell
(Formerly T/RS 223) Besides studying the origins of the Christian belief in the afterlife, the course will also focus on Catholic and Protestant formulations of the doctrines of salvation and damnation as well as literary responses to the notions of heaven and hell.

T/RS 326Z 3 cr.
Belief and Unbelief
(Formerly T/RS 327) A multidisciplinary inquiry into the nature of Faith in the Catholic tradition with special attention to the challenges of modernity.

T/RS 327Z 3 cr.
Spiritual Classics
(Formerly T/RS 324) A study of the autobiographies of St. Augustine and St. Teresa of Avila (The Confessions and Life of Teresa of Jesus). As an introduction to the study of the spiritual life, John Paul II's “Sign of Contradiction” is read.

T/RS 328Z 3 cr.
Models of the Church
(Formerly T/RS 318) A brief survey of various expressions of the Church’s nature and mission throughout its history, from the New Testament through Vatican II. Exploration of some contemporary approaches, including liberation and feminist theology, and such questions as: What and who is the “true Church”? Where is it located? What is the place of Mary in the life of the Church?

T/RS 329Z 3 cr.
(P) Signs and Symbols
(Formerly T/RS 323) A study of the nature and purpose of symbols in the Church. Students will draw from the insights of contemporary symbol theorists as they piece together their own definition of “symbol.” This definition will then be used to gain a new perspective on the Church’s doctrine and sacraments as fundamentally symbolic realities.

T/RS 330Z 3 cr.
(P) Christ in Tradition and Culture
(Formerly T/RS 227) Examines the meaning and message of Jesus Christ as understood and communicated in the faith of his followers with special consideration given to the symbolic dimensions and cultural aspects of that Christian understanding.

T/RS 331Z 3 cr.
(FW) God and the Earth
(Formerly T/RS 316) This course will explore the way human beings relate to the land and to other life forms and how this relationship is affected by belief in God. Biblical and other theological texts from Christianity and other religious traditions will be considered.

T/RS 332Z 3 cr.
(P) Jesus and the Moral Life
(Formerly T/RS 338) A study of how the life of Jesus and the theological claims Christians make about his person relate to the moral life. Historical resources of the first century will be considered as well as contemporary writings in Christian ethics.

T/RS 333Z 3 cr.
(P) Friendship and the Christian Life
(Formerly T/RS 321) This course will explore friendship as a central practice of the Christian life, especially the moral and spiritual life, and examine virtues such as fidelity, forgiveness, and love as they are essential for sustaining and nurturing friendships.

T/RS 334Z 3 cr.
(P,D,W) The Church and Contemporary Social Issues
(Formerly T/RS 326) Explores the religious and ethical dimensions of social issues such as prejudice and violence. The findings of related social sciences and literature are placed in the context of Christian anthropology to give the student a concrete view of their interrelationship.

T/RS 335Z 3 cr.
(P) Christian Ethics
(Formerly T/RS 333) This course will discuss the practice of the Christian moral life in contemporary society. The Christian virtues will be distinguished and related to selected problems arising in our lives as private individuals, as members of families, as professionals, and as citizens. Other topics to be treated include: evil, sin, Christian liberty, Christian perfection, relativism and humanism.

T/RS 336Z 3 cr.
(P,D) The Jewish Way of Life
(Formerly T/RS 333) As a global introduction to Judaism this course will examine: essential beliefs, holidays and life ceremonies, Jewish history and modern Judaism, especially the Holocaust, the State of Israel and the Coming to America.

T/RS 337 3 cr.
(P,D,W) Jewish Approaches to Ethics
A survey of Jewish approaches to ethics and ethical problems with comparisons to other religious traditions and the writings of secular ethicists.

T/RS 338Z 3 cr.
(P,D,W) Psychology and Spirituality
(Formerly T/RS 439; prerequisite: PSYC 110) This course explores selected Christian and Buddhist traditions of spirituality as understood by their practitioners and from the perspective of contemporary representatives or schools of Western psychology. The course concludes by assessing positive and negative aspects of these psychological approaches to understanding and evaluating spiritual experience.

T/RS 339Z 3 cr.
Eastern Christian Spirituality
(Formerly T/RS 325) A study of the meaning of the spiritual life for Eastern Christian writers with a particular emphasis upon Sts. Athanasius, Gregory of Nyssa and Gregory Palamas. Themes such as prayer, image of and likeness with God,
T/RS 314Z 3 cr.  (P) The Four Gospels (Formerly T/RS 206) A study of the four Gospels from the perspectives of history, theology and literature.

T/RS 315Z 3 cr.  (PW) John's Gospel and Letters (Formerly T/RS 304) A close look at the Fourth Gospel and the Epistles of John with an emphasis on their literary, historical, and theological characteristics.

T/RS 316Z 3 cr.  (PW) Passion and Resurrection Narratives (Formerly T/RS 307) A study of the theology of each of the Gospels by an analysis of the key narratives of the Passion and Resurrection in the four Gospels.

T/RS 317Z 3 cr.  (P) Pauline Letters (Formerly T/RS 204) An introduction to the writings of the Apostle Paul, exploring Jewish and Greco-Roman influences on his letters as well as his contribution to basic Christian beliefs and practices.

T/RS 318Z 3 cr.  (P) The Apocalypse of St. John (Formerly T/RS 305) This introduction to the last book of the Bible will emphasize the literary forms and thought patterns of apocalyptic literature as well as the historical and theological character of the book itself, highlighting both critical interpretation and contemporary relevance.

T/RS 319Z 3 cr.  (PD,W) Judaism in the Time of Jesus (Formerly T/RS 335) A study of first-century Jewish religious sects as well as the cultural, political, and historical setting of the Roman Empire in which Jesus lived and preached and where monotheism continued to develop.

T/RS 320Z 3 cr.  (P) Early Christian Writers (Formerly T/RS 215) This course is designed to provide an introduction to the major figures, theological currents and ideas of the formative period of the history of Christian theology by a close reading of selected texts from the major authors of the first six centuries of the Church.

T/RS 321Z 3 cr.  (P) Development of Christian Thought to 1100 (Formerly T/RS 218) A survey of the principal theological, spiritual and institutional developments in the first millennium of the Church’s life.

T/RS 322Z 3 cr.  (P) Development of Christian Thought 1100 to 1800 (Formerly T/RS 219) Survey of the principal theological, spiritual, and institutional developments in the Church in the medieval, reformation, and early modern periods.

T/RS 323Z 3 cr.  (P) Protestant Traditions (Formerly T/RS 228) This course will examine both historical and contemporary representatives of selected Protestant traditions, focusing on their characteristic understandings of (1) scripture, tradition and knowledge of God; (2) grace, faith and works; and (3) the Church and the Christian life.

T/RS 324Z 3 cr.  (P) Jesus Spirit (Formerly T/RS 312) The Society of Jesus (Jesuits): its spirituality, tradition and history from their 16th-century origins in the Spiritual Exercises of St. Ignatius of Loyola through the contemporary period, with special emphasis on Jesuit theological and cultural contributions to the Church.

T/RS 325Z 3 cr.  (P) Heaven and Hell (Formerly T/RS 223) Besides studying the origins of the Christian belief in the afterlife, the course will also focus on Catholic and Protestant formulations of the doctrines of salvation and damnation as well as literary responses to the notions of heaven and hell.

T/RS 326Z 3 cr.  (P) Belief and Unbelief (Formerly T/RS 327) A multidisciplinary inquiry into the nature of faith in the Catholic tradition with special attention to the challenges of modernity.

T/RS 327Z 3 cr.  (P) Spiritual Classics (Formerly T/RS 324) A study of the autobiographies of St. Augustine and St. Teresa of Avila (The Confessions and Life of Teresa of Jesus). As an introduction to the study of the spiritual life, John Paul II’s “Sign of Contradiction” is read.
discernment of spirits, hesychasm and icons will be discussed.

T/RS 440Z  
Introduction to Old Testament  
(Formerly T/RS 400) An introduction to the primary methods and problems of Old Testament interpretation: its historical background, the theological analysis and synthesis of major sections, as well as the use of source, form, and redaction criticism and such more recently developed approaches as social, scientific, literary, and feminist criticism.

T/RS 441  
Inside the New Testament  
An introduction to the primary methods and problems of New Testament interpretation focusing on the contents, historical background and theological import of major passages. Among the specific topics studied will be from and redaction criticism along with recent critical approaches to the text such as structuralist exegesis, narrative and feminist criticisms.

T/RS 445  
Pastoral Theology  
This course is based on the assumption that when done properly, all theology is pastoral. Throughout the course, students will “read” both the liturgy and classical theological texts in a pastoral way, as well as reflect theologically on their own pastoral experience. It will be conducted in seminar format.

T/RS 480  
Internship  
(Prerequisite: Junior standing, 15 credits of Theology/Religious Studies) Theology majors and minors can receive credits for a variety of ministerial experiences. Approval must be obtained beforehand from supervising faculty member and chairperson. Internship credits can be placed in the cognate or free area; they do not count toward the 30 credits needed for a Theology major or the 18 credits needed for a Theology minor.

T/RS 490  
Theology Capstone Seminar  
(Prerequisite: 12 credits of Theology/Religious Studies). A capstone seminar required for Theology majors, recommended for minors and available to other qualified students with permission of instructor. Topics will vary from semester to semester depending on student interest and faculty expertise. The use of primary sources and research appropriate to the specific topic will be emphasized. Students may take more than one semester of this course.

T/RS 491  
Pastoral Studies Capstone Seminar  
(Prerequisites: 9 CHS cr., 9 T/RS cr. and T/RS 338Z; co-requisite: Pastoral Studies internship) Exploration of the history, development and theology of Christian pastoral ministry, methods of theological reflection and pastoral assessment, and formation of pastoral caregivers’ professional identity. Readings from pastoral theology texts, presentations by practitioners, case presentations by students. (Also listed as CHS 491.)
The Kania School of Management

The vision of The Kania School of Management is to prepare students to make lasting contributions to their organizations and communities.
The Arthur J. Kania School of Management is to provide a Jesuit inspired education for service to others. The mission of The University of Scranton is committed to:

• Instilling intellectual curiosity and lifelong learning.
• Creating and disseminating knowledge.
• Facilitating student development of business skills and independent thinking.
• Fostering a comprehension of, and sensitivity to, international issues and social justice.
• Modeling personal integrity and ethical decision making.
• Providing and promoting opportunities for others.

Department Programs
Ten programs are available in The Kania School of Management: Accounting – Track in Financial Accounting, Accounting – Track in Managerial Accounting, Accounting Information Systems, Business Administration, Electronic Commerce, Finance, International Business, Management, Marketing, and Operations Management. In addition, a B.S. in Economics is jointly offered with the College of Arts and Sciences. These programs prepare the student for a career in business or for graduate study. In addition to the requirements of the major and the business core, students in The Kania School of Management will complete the same general education core as students in the other undergraduate colleges. At least 50% of the major and business core credits must be earned at The University of Scranton. Apart from minor exceptions, which require the explicit approval of the dean of the school, the student will spend the senior year in residence at the University.

The Kania School of Management is a member of the SAP University Alliance. This program enhances the value of the curriculum by placing the latest information technology in the classroom to give the next generation of business leaders a real-world advantage. The school has a fully operational SAP R/3 system for instructional use. Members of the faculty have been specifically trained by SAP America and are integrating Enterprise Resource Planning systems in appropriate classes.

Math Options
Two math options are available to Business majors:

Option I (6 credits)
MATH 107 (Quantitative Methods II)
MATH 108 (Quantitative Methods III)

Option II (8 credits)
MATH 114 (Analysis I)
MATH 221 (Analysis II)

Both options cover the topics of calculus. Option I takes an applied approach; Option II a theoretical approach.

Overview
Accounting plays a vital role in the business and investment decisions made by the management, owners and creditors of organizations. Because of this important role, accounting has become known as the “language of business.” To fulfill the needs of students entering this discipline, the Accounting Department of The University of Scranton offers majors in two tracks: Financial Accounting and Managerial Accounting. In addition, a combined Bachelor of Science/Master of Business Administration Degree program is available for students interested in professional certification in states requiring 150 credit hours of education. The department’s undergraduate degree program in Accounting Information Systems is described separately in this catalog.

Math Options
Two math options are available to Business majors:

Option I (6 credits)
MATH 107 (Quantitative Methods II)
MATH 108 (Quantitative Methods III)

Option II (8 credits)
MATH 114 (Analysis I)
MATH 221 (Analysis II)

Both options cover the topics of calculus. Option I takes an applied approach; Option II a theoretical approach.

Overview
Accounting plays a vital role in the business and investment decisions made by the management, owners and creditors of organizations. Because of this important role, accounting has become known as the “language of business.” To fulfill the needs of students entering this discipline, the Accounting Department of The University of Scranton offers majors in two tracks: Financial Accounting and Managerial Accounting. In addition, a combined Bachelor of Science/Master of Business Administration Degree program is available for students interested in professional certification in states requiring 150 credit hours of education. The department’s undergraduate degree program in Accounting Information Systems is described separately in this catalog.

Financial Accounting focuses on the needs of users outside of the organization, primarily investors and creditors. This accounting information facilitates the investment and credit decisions that are inherent in a market economy. The financial track is best suited for those students aspiring to become Certified Public Accountants (CPAs). While licensure of CPAs is separately governed by each state’s legislative body, the Accounting Department provides students with opportunities to satisfy the education requirements of any state in which they may aspire to become certified. (Please refer to the combined B.S./M.B.A. degree program below.)

Managerial Accounting focuses on the information needs of users within the organization. This information aids in planning and controlling the organization’s activities, and in evaluating the performance of the organization’s segments and managers. The managerial accounting track is best suited for those students aspiring to become Certified Management Accountants (CMAs).

The success of our graduates is demonstrated by their job placements. Alumni are employed by Big Four, regional, and local public accounting firms, by many notable firms in private industry, as well as by governmental and not-for-profit organizations. Qualified students have opportunities for on-the-job training through our internship program.

Combined Bachelor of Science/Master of Business Administration Degree Program
The Accounting Department of The University of Scranton offers interested and qualified students the opportunity to earn both a Bachelor of Science degree in accounting and a Master of Business Administration degree with an accounting specialization. While this program may benefit any student interested in the accounting discipline, the program was developed in response to the adoption by most states of a 150-credit-hour educational requirement to become a Certified Public Accountant. With judicious course scheduling, most students can complete the program within five academic years.

Managerial Accounting focuses on the information needs of users within the organization. This information aids in planning and controlling the organization’s activities, and in evaluating the performance of the organization’s segments and managers. The managerial accounting track is best suited for those students aspiring to become Certified Management Accountants (CMAs).

The success of our graduates is demonstrated by their job placements. Alumni are employed by Big Four, regional, and local public accounting firms, by many notable firms in private industry, as well as by governmental and not-for-profit organizations. Qualified students have opportunities for on-the-job training through our internship program.

Combined Bachelor of Science/Master of Business Administration Degree Program
The Accounting Department of The University of Scranton offers interested and qualified students the opportunity to earn both a Bachelor of Science degree in accounting and a Master of Business Administration degree with an accounting specialization. While this program may benefit any student interested in the accounting discipline, the program was developed in response to the adoption by most states of a 150-credit-hour educational requirement to become a Certified Public Accountant. With judicious course scheduling, most students can complete the program within five academic years.

* Students are tested for math placement during summer orientation. On the basis of these tests and their high school background it will be recommended that some students take Option II, especially if they expect to pursue graduate studies. The majority of students will be placed in Option I, and may also be required to take MATH 106: Quantitative Methods I as a prerequisite to taking MATH 107.
Accreditation
The Kania School of Management is accredited by The Association to Advance Collegiate Schools of Business (AACSB International) on both the undergraduate and graduate levels.

Mission Statement
The mission of The Arthur J. Kania School of Management is to provide a Jesuit inspired business education, within a culture of excellence that prepares women and men for success. To achieve this mission, The Kania School of Management of The University of Scranton is committed to:

• Instilling intellectual curiosity and lifelong learning.
• Creating and disseminating knowledge.
• Facilitating student development of business skills and independent thinking.
• Fostering a comprehension of, and sensitivity to, international issues and social justice.
• Modeling personal integrity and ethical decision making.
• Providing and promoting opportunities for service to others.

Departmental Programs
Ten programs are available in The Kania School of Management: Accounting – Track in Financial Accounting, Accounting – Track in Managerial Accounting, Accounting Information Systems, Business Administration, Electronic Commerce, Finance, International Business, Management, Marketing, and Operations Management. In addition, a B.S. in Economics is jointly offered with the College of Arts and Sciences. These programs prepare the student for a career in business or for graduate study. In addition to the requirements of the major and the business core, students in The Kania School of Management will complete the same general education core as students in the other undergraduate colleges. At least 50% of the major and business core credits must be earned at The University of Scranton. Apart from minor exceptions, which require the explicit approval of the dean of the school, the student will spend the senior year in residence at the University. The Kania School of Management is a member of the SAP University Alliance. This program enhances the value of the curriculum by placing the latest information technology in the classroom to give the next generation of business leaders a real-world advantage. The school has a fully operational SAP R/3 system for instructional use. Members of the faculty have been specifically trained by SAP America and are integrating Enterprise Resource Planning systems in appropriate classes.

Graduation Requirements
In order to graduate in a business major, in addition to the 2.00 minimum grade-point average (GPA) overall, the student must have earned a minimum 2.00 GPA in both the major and business core coursework.

Minors
A minor in general Business is available to non-business students with the exception of students majoring in Chemistry-Business, Electronics-Business and Economics (SOM only). It will consist of 21 credits:

- ECO 101 Current Economic Issues
- ACC 253 Financial Accounting
- ECO 351 Environment of International Business
- FIN 351 Introduction to Finance
- MGT 351 Principles of Management
- MKT 351 Introduction to Marketing
- OIM 471 Business Information Management

The last five must be taken after the other courses, and may be taken no earlier than the junior year. Minors in Accounting, Accounting Information Systems, Economics, Electronic Commerce, Finance, Management of People and Teams, Management of Structures and Systems, and Operations Management are described under those respective programs.

Business Cognate
Non-Business students with special needs may pursue a personal cognate in Business, but may not take more than 25% of their total credit hours in Business. With the approval of his or her advisor, the student is free to select a variable number of Business courses. However, the prerequisites stated in the catalog must be observed, and upper-division courses may not be taken before the junior year.

Math Options
Two math options are available to Business majors:

Option I* (6 credits)
- MATH 107 (Quantitative Methods II)
- MATH 108 (Quantitative Methods III)

Option II* (8 credits)
- MATH 114 (Analysis I)
- MATH 221 (Analysis II)

Both options cover the topics of calculus. Option I takes an applied approach; Option II a theoretical approach.

Business Leadership Program
Robert L. McKeage, Ph.D., Director
See page 76.
Accounts payable, receivable, inventory, depreciation, and cost classification; the cost accounting process. A survey of long-term liabilities, owners' equity of corporations, and partnerships; the cash-flow statement, and cost analysis and accumulation.

ACC 253 3 cr.
Financial Accounting (For non-accounting, non-AIS, non-EMT majors) A survey of the accounting cycle, basic financial statements, theory and techniques of income, asset, and liability recognition.

ACC 254 3 cr.
Managerial Accounting (Continuation of ACC 253 for non-accounting, non-AIS, non-EMT and non-finance majors; prerequisite: ACC 251) This course examines accounting information primarily from the perspective of a user within the organization. Topics covered include cost allocation, product costing, budgeting, profit planning, and performance evaluation.

ACC 361 3 cr.
Intermediate Accounting I (Prerequisite: junior standing, ACC 252) A comprehensive study of contemporary accounting theory, concepts and procedures and their application to the asset classifications on the balance sheet. Current pronouncements of the various accounting organizations relevant to assets will be emphasized.

ACC 362 3 cr.
Intermediate Accounting II (Prerequisite: ACC 361) Application of contemporary accounting theory to liabilities and stockholder's equity classifications of the balance sheet. Current pronouncements of accounting organizations relevant to liabilities and owners' equity accounts will be emphasized.

ACC 363 3 cr.
Federal Taxes (Prerequisite: ACC 252 or 254, junior standing) An introductory course covering pertinent phases of federal income taxation. Emphasis on business transactions, preparation of individual returns, and finding the answers to federal tax questions.

ACC 364 3 cr.
Auditing Theory (Prerequisite: ACC 361) Regulatory, legal, ethical, and technical issues related to the independent audit service. Examination of auditing standards, statistical methods and techniques involved in the examination of certain transaction cycles.

ACC 365 3 cr.
Federal Taxation of Corporations and Partnerships (Prerequisite: ACC 252) An introduction to the taxation of C and S corporations and partnerships, including analysis of the tax consequences of their formation, operation, and liquidation.

ACC 370 3 cr.
Fraud Examination (Prerequisite: ACC 252, 254, or 210) This course provides the student with an understanding of the various forms of fraud that take place...
Students interested in this B.S./M.B.A. degree program should apply to the Graduate School as prescribed by the Graduate School Catalog as early as December of their junior year at The University of Scranton. Criteria for acceptance into the combined program include the student’s previous academic performance, GMAT score, letters of recommendation and statement of purpose. Students admitted into this combined B.S./M.B.A. degree program may elect to follow either the Financial Accounting track, the Managerial Accounting track, or the Accounting Information Systems major. Students must adhere to requirements as listed in the Graduate School Catalog.

Minor in Accounting

The Accounting minor provides students of any major with an understanding of the language of business, thus serving to expand their career possibilities. The minor also serves as an excellent foundation for students who might later pursue a graduate business degree or law degree. The minor consists of four required courses (ACC 251-252 or ACC 253-254, ACC 361 and ACC 363), plus two elective courses (any 300- or 400-level accounting courses). Therefore, business students (and other students who are required to take two semesters of sophomore-level accounting) can complete the minor by taking four additional accounting courses beyond the two accounting courses that are required of their major. Other students can complete the minor by taking no more than six accounting courses. Interested students should contact their advisors in the KSOM Advising Center.

Course Descriptions

ACC 210 3 cr.
Survey of Managerial and Financial Accounting
(Not open to students needing 6 credits in introductory accounting) A foundation course for ACC 502. Topics covered include recording transactions, adjusting and closing entries, and preparing financial statements; the form and content of each financial statement; and the principles underlying accounting treatment of economic events. Managerial accounting terminology, concepts and cost classification; the cost of goods manufactured and sold statement; and the budgeting process are also covered.

ACC 251 3 cr.
Financial Accounting I
(For accounting, AIS, EMT and finance majors) A survey of accounting principles, concepts and procedures. Topics covered include financial statements, the information-processing cycle, cash, receivables, inventory costing methods, plant and equipment, intangibles, and current liabilities.

ACC 252 3 cr.
Financial Accounting II
(Continuation of ACC 251 for accounting, AIS, EMT and finance majors; prerequisite: ACC 251) A study of long-term liabilities, owners’ equity of corporations and partnerships, the cash-flow statement, and cost analysis and accumulation.

ACC 253 3 cr.
Financial Accounting
(For non-accounting, non-AIS, non-EMT and non-finance majors) A survey of the accounting cycle, basic financial statements, theory and techniques of income, asset, and liability recognition.

ACC 254 3 cr.
Managerial Accounting
(Continuation of ACC 253 for non-accounting, non-AIS, non-EMT and non-finance majors; prerequisite: ACC 253) This course examines accounting information primarily from the perspective of a user within the organization. Topics covered include cost allocation, product costing, budgeting, profit planning, and performance evaluation.

ACC 361 3 cr.
Intermediate Accounting I
(Prerequisite: junior standing, ACC 252) A comprehensive study of contemporary accounting theory, concepts and procedures and their application to the asset classifications on the balance sheet. Current pronouncements of the various accounting organizations relevant to assets will be emphasized.

ACC 362 3 cr.
Intermediate Accounting II
(Prerequisite: ACC 361) Application of contemporary accounting theory to liabilities and stockholder’s equity classifications of the balance sheet. Current pronouncements of accounting organizations relevant to liabilities and owners’ equity accounts will be emphasized.

ACC 363 3 cr.
Federal Taxes
(Prerequisites: ACC 252 or 254, junior standing) An introductory course covering pertinent phases of federal income taxation. Emphasis on business transactions, preparation of individual returns, and finding the answers to federal tax questions.

ACC 364 3 cr.
Auditing Theory
(Prerequisite: ACC 361) Regulatory, legal, ethical, and technical issues related to the independent audit service. Examination of auditing standards, statistical methods and techniques involved in the examination of certain transaction cycles.

PhD in Business Administration:

Total: 133-135 Credits

First Year

GE S/BH | ECO 153-154 | Prin. of Micro-Macro Economics | 3 | 3

3 One GE free elective in the fourth year must then be taken as a humanities elective.
4 If a third math course is required, it replaces this GE elective.
5 The major electives for the Managerial Accounting track are ACC 363, 460, 470, 471, 472, 474, 475 and 480.

Topics to include budgeting and profit planning, cost-volume-profit analysis and direct costing.

#### ACC 470
3 cr.
**Law for Accountants**
(Prerequisite: MGT 251) A study of the law of contracts, sales, commercial paper, secured transactions, rights of debtors and creditors, and bankruptcy.

#### ACC 471
3 cr.
**Management Auditing**
(Prerequisite: ACC 362) An in-depth examination of the accountant in the manager’s position. Includes administrative effectiveness and efficiency as provided through sound internal controls, and design and implementation of monitoring systems within the organization to promote better cost-benefit decisions.

#### ACC 472
3 cr.
**Advanced Accounting II**
(Prerequisite: ACC 362) A study of the theories and promulgated standards of accounting related to international operations, partnerships, estates and trusts, installment sales, consignments, SEC reporting, and interim financial reporting.

#### ACC 473
3 cr.
**Advanced Auditing**
(Prerequisite: ACC 364) An examination of statistical analysis in making audit judgments; internal control and auditing issues relating to EDP systems; risk assessment and testing for certain transaction cycles; and other attestation services and reports.

#### ACC 474
3 cr.
**Accounting Information Systems**
(Prerequisite: ACC 252) The design and application of accounting systems in both the manual and automated environments. Analysis of information’s accumulation and use patterns in organizations with a focus on providing useful and timely information. Extensive computer usage of Professional Business Software.

#### ACC/IB 475
3 cr.
**International Accounting**
(Prerequisites: ACC 252 or 254, ECO 351) This course is designed for both accounting and non-accounting majors with an interest in global accounting issues. The environmental influences on accounting development, the reporting standards for selected countries, financial statement analysis, and taxation and managerial accounting issues for multi-national business entities are examined.

Within and outside of the organization, the student is exposed to the control and investigative techniques essential to the prevention and detection of these frauds.

#### ACC 460
3 cr.
**Advanced Accounting I**
(Prerequisite: ACC 362) The theories and promulgated standards of accounting related to multiple business units, including accounting for business combinations, consolidated financial statements, minority interest, and branch accounting. Also covered is governmental and nonprofit accounting.

#### ACC 461
3 cr.
**Cost Accounting**
(Prerequisites: ACC 252; junior standing) Theories, techniques and procedures in cost accumulation, reporting and control, including such topics as job-order costs, process costs, by-products and joint-products costing, and standard cost and variance analysis.

#### ACC 462
3 cr.
**Advanced Managerial Accounting**
(Prerequisite: ACC 461) Accounting techniques as control devices in business with emphasis on the use of accounting data in business decisions.

---

### ACCOUNTING INFORMATION SYSTEMS

Michael O. Mensah, Ph.D., Chair, Accounting Department

See Accounting for faculty listing.

**Overview**

The explosion of electronic commerce, the use of enterprise systems, the growth of global alliances and information sharing, and other information technology-driven developments have expanded the variety of opportunities available to professionals with a strong and integrated knowledge of accounting principles (the “language of business”) and the evolving information technologies needed to implement and manage accounting information systems (AIS). AIS professionals provide value to their organizations or clients by using their skills to help generate reliable, timely, and relevant decision-making information for the use of managers and other stakeholders. These professionals assist their organizations or clients in assessing the opportunities and risks associated with specific information technology deployments. They also oversee the implementation and management of accounting systems within their organizations. In the assurance sector, AIS professionals often function as information systems auditors. They provide accounting, technology, and other skills to support traditional as well as paperless audits. They are often called upon to assist in special investigations such as fraud audits and forensics.

The objective of the AIS major is to prepare students to function in the corporate, public accounting, and non-profit sectors as entry-level accounting systems professionals. Students can select electives for either an accounting information systems auditing or a general information systems management emphasis. AIS majors are encouraged to pursue professional certifications such as the Certified Information Systems Security Professional (CISSP), the Certified Information Systems Auditor (CISA), and the Certified Internal Auditor (CIA). In addition, students may also plan to become Certified Public Accountants (CPA) or Certified Fraud Examiners (CFE). The AIS major is a four-year undergraduate program. However, students

**Overview**

The explosion of electronic commerce, the use of enterprise systems, the growth of global alliances and information sharing, and other information technology-driven developments have expanded the variety of opportunities available to professionals with a strong and integrated knowledge of accounting principles (the “language of business”) and the evolving information technologies needed to implement and manage accounting information systems (AIS). AIS professionals provide value to their organizations or clients by using their skills to help generate reliable, timely, and relevant decision-making information for the use of managers and other stakeholders. These professionals assist their organizations or clients in assessing the opportunities and risks associated with specific information technology deployments. They also oversee the implementation and management of accounting systems within their organizations. In the assurance sector, AIS professionals often function as information systems auditors. They provide accounting, technology, and other skills to support traditional as well as paperless audits. They are often called upon to assist in special investigations such as fraud audits and forensic accounting.

The objective of the AIS major is to prepare students to function in the corporate, public accounting, and nonprofit sectors as entry-level accounting systems professionals. Students can select electives for either an accounting systems auditing or a general information systems management emphasis. AIS majors are encouraged to pursue professional certifications such as the Certified Information Systems Security Professional (CISSP), the Certified Information Systems Auditor (CISA), and the Certified Internal Auditor (CIA). In addition, students may also plan to become Certified Public Accountants (CPA) or Certified Fraud Examiners (CFE). The AIS major is a four-year undergraduate program. However, students
may use the combined BS/MBA program at the University to meet the 150 hour requirement for CPA certification as needed. Qualified students have opportunities for on-the-job training through our internship program.  

**Minor in Accounting Information Systems**  
The Accounting Information Systems minor provides students of any major with an understanding of basic accounting and an opportunity to acquire related information technology knowledge and skills. The minor serves to expand students' career opportunities in areas such as accounting, business, government, non-profit management and law enforcement. The minor consists of 18 credits: ACC 251 and 252 or ACC 253, ACC 474, ACC 254, AIS 372, and two additional 300- or 400-level AIS courses. Therefore, business students (and other students who are required to take two semesters of sophomore-level accounting courses) can complete the minor by taking four additional Accounting/AIS courses.

Minor in Accounting Information Systems

The Accounting Information Systems minor provides students of any major with an understanding of basic accounting and an opportunity to acquire related information technology knowledge and skills. The minor serves to expand students’ career opportunities in areas such as accounting, business, government, non-profit management and law enforcement. The minor consists of 18 credits: ACC 251 and 252 or ACC 253, ACC 474, ACC 254, AIS 372, and two additional 300- or 400-level AIS courses. Therefore, business students (and other students who are required to take two semesters of sophomore-level accounting courses) can complete the minor by taking four additional Accounting/AIS courses.

Course Descriptions

AIS 372 3 cr.
Accounting for Electronic Business (Prerequisites: ACC 252 or ACC 254, junior standing) This course will introduce students to the role of accounting in today’s global business environment. Students will examine how technology has impacted the techniques of accounting and reporting. Computerized models of accounting will be used to explore the tools available to compile data for management decision and reporting. Both Internet and traditional business transactions will be evaluated. (Also listed as EC 372.)

AIS 373 3 cr.
Object Oriented Applications in Business and Accounting (Prerequisite: ACC 474) This course is an introduction to the design and analysis of computer systems utilizing an object-oriented approach. Topics include: major methodologies, methods and techniques for analysis and design, concepts and techniques for development projects, CASE tool support development work, and approaches to planning for systems implementation, evaluation, and maintenance.

AIS 381 3 cr.
Electronic Business Information Systems Security and Ethics (Prerequisite: AIS 362) This course is designed to provide students with an understanding of the technical, managerial, legal and ethical issues of information security. Topics include: Web server and client security; secure transactions and payments; information security; digital certificates and practices; legal, moral and ethical issues; intellectual property and patents; governmental regulations and policies; and emerging technologies. (Also listed as EC 362.)

AIS 367 3 cr.
Enterprise Accounting and Control (Prerequisites: ACC 252 or ACC 254, junior standing) This course examines how accounting principles, methods, and techniques are harnessed to meet the reporting needs of an organization in an integrated management and information technology environment. It is designed to demonstrate the integration of both financial and managerial accounting procedures with the core business processes and organizational elements of an enterprise. (Also listed as EMT 367.)

AIS 372 3 cr.
Accounting for Electronic Business (Prerequisites: ACC 252 or ACC 254, junior standing) This course will introduce students to the role of accounting in today’s global business environment. Students will examine how technology has impacted the techniques of accounting and reporting. Computerized models of accounting will be used to explore the tools available to compile data for management decision and reporting. Both Internet and traditional business transactions will be evaluated. (Also listed as EC 372.)

AIS 373 3 cr.
Object Oriented Applications in Business and Accounting (Prerequisite: ACC 474) This course is an introduction to the design and analysis of computer systems utilizing an object-oriented approach. Topics include: major methodologies, methods and techniques for analysis and design, concepts and techniques for development projects, CASE tool support development work, and approaches to planning for systems implementation, evaluation, and maintenance.

AIS 381 3 cr.
Electronic Business Information Systems Security and Ethics (Prerequisite: AIS 362) This course is designed to provide students with an understanding of the technical, managerial, legal and ethical issues of information security. Topics include: Web server and client security; secure transactions and payments; information security; digital certificates and practices; legal, moral and ethical issues; intellectual property and patents; governmental regulations and policies; and emerging technologies. (Also listed as EC 471.)

AIS 473 3 cr.
Advanced Auditing Issues: Information Systems Auditing (Prerequisites: ACC 364 and ACC 474) The objective of this course is to develop competence in information systems auditing (the audit and control of computer-based information systems) by focusing on the design and implementation of audit approaches in automated settings. Topics include: information systems (IS) audits, IS controls, risk assessment, and computer-assisted audit techniques (CAATS).

AIS 474 3 cr.
Accounting Information Systems (Prerequisite: ACC 252) The design and application of accounting systems in both the manual and automated environments. Analysis of information’s accumulation and use patterns in organizations with a focus on providing useful and timely information. Extensive computer usage of Professional Business Software.

AIS 483 3 cr.
Business Applications of Communication Networks (Prerequisite: ACC 474) Use of computer and telecommunication networks to achieve organizational goals. Topics include data communications; planning and design of communication networks; data integrity, independence and security, client-server computing; global communica-
Overview
The Business Administration major is designed to serve the student who wishes to approach the study of business from a broader perspective than would be possible with a traditional functional major. In addition, the major offers a track (Enterprise Resource Planning) that uses a business processes perspective for the study of business. For the student pursuing the more general Business Administration major, the student’s program of study will include a set of advanced electives selected according to a plan of study developed with the assistance of an academic advisor. This major is especially well suited for any student pursuing a degree in the evening.

Enterprise Resource Planning Track

Required courses
EMT 351 3 cr. Business Process Overview
EMT 462 3 cr. Production Planning and Control
EMT 463 3 cr. Enterprise Human Resources
EMT 470 3 cr. Enterprise Information Systems
EMT 471 3 cr. Business Information Management
OIM 473 3 cr. Communication Networks and Applications

Electives
Two free electives from KSOM courses

Course Descriptions
EMT 351 Business Process Overview
This is the first course in the area of enterprise management. Students will learn to appreciate the integration of a company's core business processes. Students will be exposed to the main business processes that drive an organization, the interactions within and between them, and the effect of integration on the decision-making environment. This course uses an enterprise-wide integrated information-systems software and simulated data for a model company. (Also listed as OIM 353.)

EMT 367 Enterprise Accounting and Control
(Prerequisites: EMT 251-252 or EEM 253-254) This course examines how accounting principles, methods, and techniques are harnessed to meet the reporting needs of an organization in an integrated management-and-information-technology environment. It is designed to demonstrate the integration of both financial and managerial accounting procedures with the core business processes and organizational elements of an enterprise. (Also listed as AIS 367.)

EMT 460 Customer Support Systems
(Prerequisites: EMT 351, MKT 351) An interdisciplinary approach to enterprise management that focuses on the customer is emphasized. The objective of the course is to orient enterprise-wide decision making to successful customer-relationship management on an ongoing basis. (Also listed as MKT 460.)

EMT 461 Enterprise Treasury Management
(Prerequisites: EMT 351, FIN 351) This course is designed to provide advanced study in the financial-management area through detailed analysis of financial statements, liquidity crises, cash optimization, credit analysis, banking arrangements, loan contracts, commercial paper and the use of money market. (Also listed as MKT 461.)

EMT 462 Production Planning and Control
(Prerequisites: EMT 351, OIM 352) This course concerns the study of production planning and control activities in an enterprise resource-planning context. Topics include: aggregate planning, capacity planning, master production scheduling, material requirements planning, production-activity control, purchasing, inventory models, and Just-in-Time systems. Interactions between operations and the other functional areas of the business will be demonstrated using enterprise management systems software.

## Business Administration

**Gerald Biberman, Ph.D., Program Director**

### Overview

The Business Administration major is designed to serve the student who wishes to approach the study of business from a broader perspective than would be possible with a traditional functional major. In addition, the major offers a track (Enterprise Resource Planning) that uses a business processes perspective for the study of business. For the student pursuing the more general Business Administration major, the student’s program of study will include a set of advanced electives selected according to a plan of study developed with the assistance of an academic advisor. This major is especially well suited for any student pursuing a degree in the evening.

### Enterprise Resource Planning Track

#### Required courses
- EMT 351 Business Process Overview 3 cr.
- EMT 470 Enterprise Information Systems 3 cr.
- EMT 471 Configuration & Consulting 3 cr.

#### Any three courses from the following
- EMT 367/AlS 367 Accounting & Control 3 cr.
- EMT 461/FIN 361 Enterprise Treasury Management 3 cr.
- MKT 361 Marketing Research 3 cr.
- EMT 463/MGT 361 Enterprise HR Systems 3 cr.
- OIM 363 Quality Management 3 cr.
- EMT 462/OIM 470 Production Planning & Control 3 cr.
- EC 470 Supply Chain Management 3 cr.
- EC 462 Database Management Systems 3 cr.
- EC 461 Internet Applications Development 3 cr.
- OIM 473 Communication Networks & Applications 3 cr.

#### Electives
- Two free electives from KSOM courses

### Course Descriptions

**EMT 351 Business Process Overview**

This is the first course in the area of enterprise management. Students will learn to appreciate the integration of a company’s core business processes. Students will be exposed to the main business processes that drive an organization, the interactions within and between them, and the effect of integration on the decision-making environment. This course uses an enterprise-wide integrated information-systems software and simulated data for a model company. (Also listed as OIM 353.)

**EMT 367 Enterprise Accounting and Control**

(Prerequisites: Acc 251-252 or Acc 253-254) This course examines how accounting principles, methods, and techniques are harnessed to meet the reporting needs of an organization in an integrated management-and-information-technology environment. It is designed to demonstrate the integration of both financial and managerial accounting procedures with the core business processes and organizational elements of an enterprise. (Also listed as AlS 367.)

**EMT 460 Customer Support Systems**

(Prerequisites: EMT 351, MGT 351) An interdisciplinary approach to enterprise management that focuses on the customer is emphasized. The objective of the course is to orient enterprise-wide decision making to successful customer-relationship management on an ongoing basis. (Also listed as MGT 460.)

**EMT 461 Enterprise Treasury Management**

(Prerequisites: EMT 351, FIN 351) This course is designed to provide advanced study in the financial-management area through detailed analysis of financial statements, liquidity crises, cash optimization, credit analysis, banking arrangements, lease contracts, commercial paper and the use of money market. (Also listed as FIN 361.)

**EMT 462 Production Planning and Control**

(Prerequisites: EMT 351, OIM 352) This course concerns the study of production planning and control activities in an enterprise-resource-planning context. Topics include: aggregate planning, capacity planning, master production scheduling, material requirements planning, production-activity control, purchasing, inventory models, and just-in-Time systems. Interactions between operations and the other functional areas of the business will be demonstrated using enterprise management Systems software.

will be exposed to the management of the enterprise systems software. They will learn about business integration through the concepts of business engineering and business workflow.

EMT 471 3 cr.

Configuration and Consulting
(Prerequisite: EMT 351) Focus is on the implementation of enterprise systems projects and the role of consultants in such implementation. It examines the integrated business processes of an enterprise, and the concepts of developing data models, business objects, and event-process chains. Students develop implementation plans for enterprise systems software. The course will also discuss the configuration procedures in implementing enterprise systems software. The goal of the course is to prepare the students to become consultants in enterprise systems.

ECONOMICS

Faculty
Edward M. Schall, Ph.D., Chair
Frank P. Corcione, Ph.D.
Satyajit Ghosh, Ph.D.
Riaz Hussain, Ph.D.

Hong V. Nguyen, Ph.D.
Iordanis Petsas, Ph.D.
Murli Rajan, Ph.D.
Susan Trusler, Ph.D.

Overview
The major in Economics, which is available both through The Kania School of Management and The College of Arts and Sciences, provides an excellent training for understanding the economic events and developments of our complex industrialized society and of the world economies. It equips the student with training and background needed to assume professional decision-making positions in the financial sector, industry, commerce, banking, or government service. It also gives a strong preparation for the pursuit of graduate studies in Economics or the law.

Minor in Economics
18 credits consisting of ECO 153, 154 (or ECO 101, 102), 361, 362, plus two upper level ECO courses (Kania School students may not use ECO 351).

Course Descriptions

ECO 101 3 cr.
(S) Current Economic Issues
Intended to provide a foundation in economics for non-business students. This course provides analysis of current economic issues relevant to the U.S. economy and the world. Issues such as economic policy, budget deficit, federal debt, recession, inflation, health care, environment, and regulation of business are studied. Not a substitute for ECO 153-154 or other upper-level economics courses.

ECO 103 3 cr.
(S) The Economics of Environmental Issues
This course provides students with a framework for viewing environmental issues as economic issues. Alternative methods for addressing environmental problems are examined, including “command and control” regulatory policies and “market-based” policies. The evolution of public policies toward the environment is discussed. Not open to Economics or Business majors or minors.

ECO 153 3 cr.
(S) Principles of Microeconomics
This course centers on the salient characteristics of the modern free-enterprise economic system. Topics include the operations of the price system as it regulates production, distribution, and consumption, and as it is in turn modified and influenced by private groups and government.

ECO 154 3 cr.
(S) Principles of Macroeconomics
This course analyzes the determinants of aggregate economic activity. The main areas studied are the monetary and banking system, the composition and fluctuations of national income, and inflation, all as influenced by monetary and fiscal policy.

ECO/IB 351 3 cr.
(D) Environment of International Business
(Prerequisites: ECO 153-154 or ECO 101, junior standing) This course introduces the student to the growing field of international business, touching on the economic, social and political environments of international trade and multinational corporations. International institutions and agencies that impact on international business are discussed and practical aspects of these topics are emphasized.

TOTAL: 130-132 CREDITS

1 See note on Math Options on page 213.
2 If EDUC 113 is required in the first semester, it is taken in place of a humanities elective and is counted as a GE free elective. One GE free elective in the fourth year must then be taken as a humanities elective.
3 If a third math course is required, it replaces this GE elective.
4 Economics majors may apply up to 6 cognate credits toward a math minor. Students taking the sequence open to math majors are strongly urged to complete the calculus sequence by taking MATH 222, particularly if they plan on pursuing graduate studies. Economics majors registered in The Kania School of Management will apply 9 of their elective cognate credits to one of the following areas (exceptions require the permission of the KOSM Dean): Accounting, Finance, International Business, Management, Marketing, Operations Management. The remaining cognate credits may be applied to the social sciences or from the other business areas (but note that no more than 30 credits altogether can be taken in business subjects, exclusive of Economics courses). Care must be taken to observe prerequisites.

ECO 361 3 cr.
Intermediate Microeconomics
(Prerequisite: ECO 153) This course centers on the analysis of production and cost theories. The topics studied are pure competition, monopoly, oligopoly, monopolistic competition and factor pricing. Economics majors take in sophomore year; Finance majors in the junior year.

ECO 362 3 cr.
Intermediate Macroeconomics
(Prerequisite: ECO 154) Course centers on the study of national income accounting, price level fluctuations, issues of unemployment, inflation, full employment, and impact of monetary and fiscal policy on income level and distribution.

The remaining cognate credits may be applied to the social sciences or from the other business areas (but note that no more than 30 credits altogether can be taken in business subjects, exclusive of Economics courses). Care must be taken to observe prerequisites.

ECO 361 3 cr.
Intermediate Microeconomics
(Prerequisite: ECO 153) This course centers on the analysis of production and cost theories. The topics studied are pure competition, monopoly, oligopoly, monopolistic competition and factor pricing. Economics majors take in sophomore year; Finance majors in the junior year.

ECO 362 3 cr.
Intermediate Macroeconomics
(Prerequisite: ECO 154) Course centers on the study of national income accounting, price level fluctuations, issues of unemployment, inflation, full employment, and impact of monetary and fiscal policy on income level and distribution.
Economics majors take in sophomore year; Finance in junior year.

ECO 363  Applied Econometrics 3 cr.
(Prerequisites: ECO 361, ECO 362, STAT 253) This course deals with the modeling and estimation of relationships in applied economics. The topics covered include single-equation structural modeling and time-series modeling; estimation methods and problems; testing of economic hypotheses; and forecasting. The emphasis of the course is on applications involving the use of actual data.

ECO 364  Labor Economics and Labor Regulations 3 cr.
(Prerequisites: ECO 153-154) Analysis of labor supply and demand; measurement and theory of unemployment; occupational choice; wage differentials; labor-market issues and policies; labor legislation.

ECO 365  Mathematical Economics 3 cr.
(Prerequisites: ECO 361, ECO 362, STAT 253, MATH 107, MATH 108 or permission of the instructor) This course studies the methodology of modern economic analysis. Emphasis is placed on developing the rigorous theoretical foundations of micro and macroeconomics using tools of calculus and linear algebra. Topics such as comparative static analysis, general equilibrium analysis, consumer and firm behavior, intertemporal decision making, decision-making under uncertainty, theory of growth and rational expectation hypothesis are covered.

ECO/IB 375  International Economics 3 cr.
(Prerequisites: ECO 153-154 or ECO 351 or permission of the instructor) This course explains the rationale for international trade and gains from trade and discusses various trade policies. Topics covered in the course include: comparative advantage, free trade and trade restrictions (tariffs, quotas, etc.), the trade policy of the United States, exchange rates and their determinants, balance-of-payments analysis and the significance of multinational corporations.

ECO 410  Economics for K-12 Teachers 3 cr.
Provides an introduction to fundamental economic concepts as well as a review of techniques and materials (print, audiovisual, etc.) that can be used to teach economics at the K-12 grade levels. Emphasis is placed on strategies designed to integrate economics into such courses as language arts, mathematics and social studies. Not a substitute for other economics courses.

ECO 460  Monetary and Financial Economics 3 cr.
(Prerequisite: ECO 362, FIN 351) This course emphasizes the interrelations between financial markets, financial institutions and aggregate economic activity. Topics include: an overview of financial institutions, introduction to money and capital markets, fundamentals of interest rates, the money supply process, the conduct of monetary policy, and other topics that occupy the subject matter of money and financial markets.

ECO 465  Development Economics 3 cr.
(Prerequisites: ECO 153-154) This course introduces students to contemporary development economics. Topics include: the concept and measurement of economic development, the problems and prospects of the less developed countries, and the alternative theories and processes of economic development.

ECO 470  Law and Economics 3 cr.
(Prerequisite: ECO 361 or permission of the instructor) This course focuses on the public policy implications of law and economics. It is based on the notion that legal rules establish implicit prices for different types of behavior and that consequences of these rules can be analyzed using microeconomics. In particular, microeconomic theory is used to analyze economic aspects of property, contracts, torts, and crime.

ECO 471  Advanced Macroeconomics 3 cr.
(Prerequisites: ECO 362, 460, 363 or permission of the instructor) This course centers on the study of recent advances in macroeconomic analysis. Topics include empirical macroeconomic analysis, open economy macroeconomics, the role of expectations, economic policy and economic growth.

ECO 490  Economics Seminar 3 cr.
Advanced study of a special area in economics. Topics and prerequisites vary.

The following courses are offered infrequently:
ECO 102  Fundamentals of Economic Analysis
ECO 200  (S) Economic Security and Personal Finance

ECO 366  Economic Geography
ECO 461  Managerial Economics
ECO 462  Urban and Regional Economics
ECO 463  Public Finance and Taxation
ECO 464  Environmental Economics & Policy

Please contact the department chair for course schedules and detailed descriptions.

ELECTRONIC COMMERCE

Prasadarao Kakumanu, Ph.D., Chair, Operations and Information Management Department
See Operations and Information Management for faculty listing.

Overview
Electronic commerce is an emerging business environment that provides common business services, multimedia content publishing and secure interactive web sites by integrating back-end and front-end applications. The necessary electronic commerce infrastructure is provided by integrating information and telecommunication technologies, the Internet and the World Wide Web, and business models that incorporate security, privacy, and legal issues. Electronic commerce lets companies reach new markets, operate around the clock, shorten the product-development cycle, enhance customer service, reduce or eliminate inventory related costs, and create enterprise links – all at lower costs. The phenomenal growth in online commerce increases the demand for people with skills in areas such as electronic commerce infrastructure, new business initiatives, law and security, electronic payment, financial services, and interactive marketing. The program below develops the knowledge and skills necessary for linked organizations in the new millennium.

Minor in Electronic Commerce
To minor in Electronic Commerce the student must take a minimum of 18 credits. Three courses are required: C/IL 104 (or equivalent), ECO 251, and OIM 471 and any three of the following: ECO 362, 370, 371, 372, 461, 462, 470, 471, 472, 473; OIM 353, 363, 470.

Course Descriptions
EC 251  Introduction to Electronic Business 3 cr.
(Prerequisite: C/IL 104) This course explores how the Internet has revolutionized the buying and selling of goods and services in the marketplace. Topics include: Internet business models, electronic commerce infrastructure, designing online storefronts, payment acceptance and security issues, and the legal and ethical challenges of electronic commerce. Students will also gain hands-on experience in creating a web site using an HTML authoring tool.

EC 361  Electronic Business Communication Networks (Prerequisite: EC 251) The course is designed to provide students with networking and telecommunications fundamentals necessary to develop enterprise networks to conduct business on the Internet. Topics include: network fundamentals and technologies, wireless networks and the Internet, network security, management, and trends. Discussion is focused on business applications within and among organizations. Hands-on experience and case studies will be used to illustrate concepts.

EC 362  Database Management Systems for Electronic Business (Prerequisites: EC 251, OIM 471) This course deals with the use of database management systems to support electronic business. Topics include: data modeling; database design and normalization; structured query language (SQL); database application development; integration of web server and database server; distributed databases; data warehousing; and data mining. (Also listed as AIS 362.)

EC 370  Interactive Marketing (Prerequisites: MKT 351, junior standing) This course examines the integration of evolving interactive technologies in the design and implementation of marketing programs. The use of information technology infrastructure to support the execution of conception, pricing, promotion and distribution of ideas, goods and services has the potential of making the marketing process more efficient and productive. (Also listed as MKT 370.)
Economics majors take in sophomore year; Finance in junior year.

**ECO 363**
**Applied Econometrics**
(Prerequisites: ECO 361, ECO 362, STAT 253) This course deals with the modeling and estimation of relationships as applied to economics. The topics covered include single-equation structural modeling and time-series modeling; estimation methods and problems; testing of economic hypotheses; and forecasting. The emphasis of the course is on applications involving the use of actual data.

**ECO 364**
**Labor Economics and Labor Regulations**
(Prerequisites: ECO 153-154) Analysis of labor supply and demand; measurement and theory of unemployment; occupational choice; wage differentials; labor-market issues and policies; labor legislation.

**ECO 365**
**Mathematical Economics**
(Prerequisites: ECO 361, ECO 362, STAT 253, MATH 107, MATH 108 or permission of the instructor) This course studies the methodology of modern economic analysis. Emphasis is placed on developing the rigorous theoretical foundations of micro and macroeconomics using tools of calculus and linear algebra. Topics such as comparative static analysis, general equilibrium analysis, consumer and firm behavior, intertemporal decision making, and decision-making under uncertainty, theory of growth and rational expectation hypothesis are covered.

**ECO/IB 375**
**International Economics**
(Prerequisites: ECO 153-154 or ECO 351 or permission of the instructor) This course explains the rationale for international trade and gains from trade and discusses various trade policies. Topics covered in the course include: comparative advantage, free trade and trade restrictions (tariffs, quotas, etc.), the trade policy of the United States, exchange rates and their determinants, balance-of-payments analysis and the significance of multinational corporations.

**ECO 410**
**Economics for K-12 Teachers**
Provides an introduction to fundamental economic concepts as well as a review of techniques and materials (print, audiovisual, etc.) that can be used to teach economics at the K-12 grade levels. Emphasis is placed on strategies designed to integrate economics into such courses as language arts, mathematics and social studies. Not a substitute for other economics courses.

**ECO 460**
**Monetary and Financial Economics**
(Prerequisite: ECO 362, FIN 351) This course emphasizes the interrelations between financial markets, financial institutions and aggregate economic activity. Topics include: an overview of financial institutions, introduction to money and capital markets, fundamentals of interest rates, the money supply process, the conduct of monetary policy, and other topics that occupy the subject matter of money and financial markets.

**ECO 465**
**Development Economics**
(Prerequisites: ECO 153-154) This course introduces students to contemporary development economics. Topics include: the concept and measurement of economic development, the problems and prospects of the less developed countries, and the alternative theories and processes of economic development.

**ECO 470**
**Law and Economics**
(Prerequisite: ECO 361 or permission of the instructor) This course focuses on the public policy implications of law and economics. It is based on the notion that legal rules establish implicit prices for different types of behavior and that consequences of these rules can be analyzed using microeconomics. In particular, microeconomic theory is used to analyze economic aspects of property, contracts, torts, and crime.

**ECO 471**
**Advanced Macroeconomics**
(Prerequisites: ECO 362, 460, 363 or permission of the instructor) This course centers on the study of recent advances in macroeconomic analysis. Topics include empirical macroeconomic analysis, open-economy macroeconomics, the role of expectations, economic policy and economic growth.

**ECO 490**
**Economics Seminar**
Advanced study of a special area in economics. Topics and prerequisites vary.

**Electronic Commerce**

**Overview**
Electronic Commerce is the exchange of goods and services via electronic networks. It involves the use of computer and network technologies in Supply Chain Management. Students will learn how principles of Supply Chain Management integrate into the management of the enterprise and the business processes. Students will examine the use of information technologies in Supply Chain Management. Computer software will be used to gain hands-on experience. (EC 470 and OIM 366 are jointly offered.)

**EC 471** Information Systems Security
(Prerequisite: OIM 471) The course provides students with a basic understanding of the technical, managerial, legal and ethical issues of information security. Topics include cryptographic systems, IP concepts and behavior, Internet and systems threat assessment, secure transactions and payments, antivirus tools, password management and cracking, and system auditing. Students will largely utilize Microsoft Windows platforms, but other operating systems will be discussed. (Also listed as AIS 381.)

**EC 472** Electronic Business and Entrepreneurship
(Prerequisite: Senior standing) The course examines the issues related to the starting of new technology-based businesses. It focuses on entrepreneurial traits, idea generation, entry strategies, marketing plans and development of business plans. Venture capital and other forms of financing will also be covered. In addition there will be a discussion on legal and intellectual properties issues. (Also listed as OIM 472.)

**EC 473** Business Applications of Communication Networks
(Prerequisite: OIM 471) Use of computer and telecommunication networks to achieve organizational goals. Topics include data communications; planning and design of communication networks; data integrity, independence and security; client-server computing; global communication; the Internet; applications of telecommunication networks and current issues and future trends. (Also listed as AIS 483 and OIM 473.)

---

**FINANCE**

**Overview**
The practitioner in finance must be familiar with the tools and techniques available and, given the resources and constraints of organizations and the general economic environment in which the organization operates, be adept at efficiently managing the fiscal resources of the organization, including the raising of funds and their short-term and long-term investment. Career opportunities in finance include Banking – Bank Examiner, Trust Officer, Investments – Financial Analyst, Security Broker, Corporate – Financial Analyst, Working Capital Management.

### EC 371 Investments
(Prerequisites: FIN 351, junior standing) This course provides students with an overview of the fundamentals of investing. Topic coverage will include debt, equity and derivatives markets. Internet resources will be used to develop security valuation models.

### EC 372 Accounting for Electronic Business
(Prerequisites: ACC 252 or ACC 254, junior standing) Introduces students to the role accounting is playing in today’s business environment and how technology has impacted the techniques of accounting and reporting. Computerized models of accounting are used to explore the software tools available for decisions and reporting. Internet business and traditional business transactions will be evaluated. Students will see the effects of control features built into software systems. (Also listed as AIS 372.)

### EC 461 Internet Applications Development
(Prerequisite: EC 473) An introduction to existing and evolving Internet technologies needed for web site development and management. Client and server-side scripts will be utilized to explore their role in interacting with customers, customizing web pages, processing forms, maintaining state, and connecting to databases. Course delivery will be primarily conducted through hands-on assignments and projects.

### EC 462 Projects in Electronic Business
(Prerequisite: EC 461) In this course, students will integrate their knowledge and skill in business and technology to acquire the big picture of an electronic business. The purpose of this course is to synthesize knowledge acquired in different courses to develop a secure working electronic commerce site. Students will work in a team-oriented environment under the guidance of the instructor.

### EC 470 Supply Chain Management
(Prerequisite: OIM 352 or permission of instructor) Many companies view Supply Chain Management as the core of their business strategy. Students will learn how principles of Supply Chain Management integrate into the management of the enterprise and the business processes. Students will examine the use of information technologies in Supply Chain Management. Computer software will be used to gain hands-on experience. (EC 470 and OIM 366 are jointly offered.)

### EC 471 Information Systems Security
(Prerequisite: OIM 471) The course provides students with a basic understanding of the technical, managerial, legal and ethical issues of information security. Topics include cryptographic systems, IP concepts and behavior, Internet and systems threat assessment, secure transactions and payments, antivirus tools, password management and cracking, and system auditing. Students will largely utilize Microsoft Windows platforms, but other operating systems will be discussed. (Also listed as AIS 381.)

### EC 472 Electronic Business and Entrepreneurship
(Prerequisite: Senior standing) The course examines the issues related to the starting of new technology-based businesses. It focuses on entrepreneurial traits, idea generation, entry strategies, marketing plans and development of business plans. Venture capital and other forms of financing will also be covered. In addition there will be a discussion on legal and intellectual properties issues. (Also listed as OIM 472.)

### EC 473 Business Applications of Communication Networks
(Prerequisite: OIM 471) Use of computer and telecommunication networks to achieve organizational goals. Topics include data communications; planning and design of communication networks; data integrity, independence and security; client-server computing; global communication; the Internet; applications of telecommunication networks and current issues and future trends. (Also listed as AIS 483 and OIM 473.)

### Finance

**Minor in Finance**

18 credits consisting of ECO 153, 154, 351, FIN 351 and two upper level Finance courses (from FIN 361, 362, 470, 471, 472, 475.)

**Course Descriptions**

**FIN 361 Working Capital Management**

(Prerequisites: FIN 351) This course is designed to provide advanced study in the financial-management area through detailed analysis of financial statements, liquidity crises, cash optimization, credit analysis, banking arrangements, loan contracts, commercial paper and the use of money market. (Also listed as EMT 461.)

**FIN 362 Investments**

(Prerequisite: FIN 351) An introduction to the theory and process of managing investments. Topics include practical operation of the equity markets, debt options and futures markets. Stock-valuation models using fundamental technical and random-walk approaches.

**FIN 470 Capital Investment and Structure**

(Prerequisite: FIN 351) Advanced study in the “permanent” financial aspects of the firm, including capital-budgeting models, optimal-replacement processes, abandonment, leasing, cost of capital, capital structure, mergers and acquisitions, and bankruptcy.

**FIN 471 Derivative Securities**

(Prerequisite: FIN 352) This course looks at the nature of derivative securities, focusing on options. It develops pricing models for options, emphasizing the Black-Scholes model. The use of options in various investment strategies is discussed in terms of risk and return. Students use real-time data to implement these strategies.

**FIN 472 Portfolio Management**

(Prerequisite: FIN 352) Advanced study of professional management of various portfolios including those of banks, insurance companies, pension funds, and non-profit institutions. Markowitz and Sharpe models, data availability, and computerized-data services are covered.

**FIN 473 Financial Institutions**

(Prerequisite: ECO 362) The study of financial markets and financial institutions, including depository and nondepository institutions. Topics include regulation, operation, and management of financial institutions, financial instruments, interest-rate principles, risk-management strategies, loan analysis, and asset/liability management. Insurance and pension principles and investment banking are covered.

**FIN/IB 475 International Finance**

(Prerequisites: ECO 351, FIN 351) This course deals with the environment of international financial management, foreign-exchange risk-management, multinational working-capital management, international financial markets and instruments, foreign-investment analysis, and management of ongoing operations. It also exposes students to a wide range of issues, concepts, and techniques pertaining to international finance.

### INTERNATIONAL BUSINESS

Susan Trussler, Ph.D., Program Director

**Overview**

The major in International Business is an interdisciplinary program designed for those Business students who seek an understanding of the complex world within which multinational corporations, national and international agencies, and individuals interact. In the twenty-first century all business activities are becoming more and more international in nature; it is imperative that those who wish to succeed in this international setting have a clear understanding not only of the theory and practice of the core business disciplines, but also of their interaction with the geographic, cultural, and political environments within which multinational corporations operate, and international trade and investment occur. This major is designed to prepare students who wish to work in the international arena—either overseas or in the United States.

**Course Descriptions**

**ECO/IB 351 (D) Environment of International Business**

(Prerequisites: ECO 153-154, junior standing) This course introduces the student to the field of international business, including the economic, social, and political environments of international trade and multinational corporations. International institutions and agencies that impact on international business are discussed and practical aspects of these topics are emphasized.

**ECO/IB 375 International Economics**

(Prerequisites: ECO 153-154 or ECO 351 or permission of the instructor) This course explains the rationale for international trade and gains from trade and discusses various trade policies. Topics covered in the course include: comparative advantage, free trade and trade restrictions (tariffs, quotas, etc.), the trade policy of the...

TOTAL: 133-135 CREDITS

**Minor in Finance**

18 credits consisting of ECO 153, 154, 351, FIN 351 and two upper level Finance courses (from FIN 361, 362, 470, 471, 472, 475.)

**Course Descriptions**

FIN 351 3 cr.
Introduction to Finance
(Prerequisites: junior standing, ECO 153-154 or 101, ACC 252 or 253, or permission of the instructor) This course introduces students to the field of finance. Topics include time value of money, risk analysis, basic operations of the capital markets, current asset and liability analysis, and introduction to the topics of capital budgeting and cost of capital calculation.

FIN 361 3 cr.
Working Capital Management
(Prerequisite: FIN 351) This course is designed to provide advanced study in the financial-management area through detailed analysis of financial statements, liquidity crises, cash optimization, credit analysis, banking arrangements, loan contracts, commercial paper and the use of money market. (Also listed as EMT 461.)

FIN 362 3 cr.
Investments
(Prerequisite: FIN 351) An introduction to the theory and process of managing investments. Topics include practical operation of the equity markets, debt options and futures markets. Stock-valuation models using fundamental technical and random-walk approaches.

FIN 470 3 cr.
Capital Investment and Structure
(Prerequisite: FIN 351) Advanced study in the "permanent" financial aspects of the firm, including capital-budgeting models, optimal-replacement processes, abandonment, leasing, cost of capital, structure, mergers and acquisitions, and bankruptcy.

FIN 471 3 cr.
Derivative Securities
(Prerequisite: FIN 351) This course looks at the nature of derivative securities, focusing on options. It develops pricing models for options, emphasizing the Black-Scholes model. The use of options in various investment strategies is discussed in terms of risk and return. Students use real-time data to implement these strategies.

FIN 472 3 cr.
Portfolio Management
(Prerequisite: FIN 351) Advanced study of professional management of various portfolios including those of banks, insurance companies, pension funds, and non-profit institutions. Markowitz and Sharpe models, data availability, and computerized-data services are covered.

FIN 473 3 cr.
Financial Institutions
(Prerequisite: ECO 362) The study of financial markets and financial institutions, including depository and nondepository institutions. Topics include regulation, operation, and management of financial institutions, financial instruments, interest-rate principles, risk-management strategies, loan analysis, and asset/liability management. Insurance and pension principles and investment banking are covered.

FIN/IB 475 3 cr.
International Finance
(Prerequisites: ECO 351, FIN 351) This course deals with the environment of international financial management, foreign-exchange risk-management, multinational working-capital management, international financial markets and instruments, foreign-investment analysis, and management of ongoing operations. It also exposes students to a wide range of issues, concepts, and techniques pertaining to international finance.

**INTERNATIONAL BUSINESS**

Susan Trussler, Ph.D., Program Director

**Overview**

The major in International Business is an interdisciplinary program designed for those Business students who seek an understanding of the complex world within which multinational corporations, national and international agencies, and individuals interact. In the twenty-first century all business activities are becoming more and more international in nature; it is imperative that those who wish to succeed in this international setting have a clear understanding not only of the theory and practice of the core business disciplines, but also of their interaction with the geographic, cultural, and political environments within which multinational corporations operate, and international trade and investment occur. This major is designed to prepare students who wish to work in the international arena – either overseas or in the United States.

**Course Descriptions**

ECO/IB 351 3 cr.
(D) Environment of International Business
(Prerequisites: ECO 153-154, junior standing) This course introduces the student to the field of international business, including the economic, social, and political environments of international trade and multinational corporations. International institutions and agencies that impact on international business are discussed and practical aspects of these topics are emphasized.

ECO/IB 375 3 cr.
International Economics
(Prerequisites: ECO 153-154 or ECO 351 or permission of the instructor) This course explains the rationale for international trade and gains from trade and discusses various trade policies. Topics covered in the course include: comparative advantage, free trade and trade restrictions (tariffs, quotas, etc.), the trade policy of the

1 See note on Math Options on page 213.
2 If EDUC 113 is required, it is taken in place of PHIL 120. C/IL 104 is then moved to the spring of the first year. PHIL 120 will be taken in the second year.
3 If a third math course is required, GE electives are moved from the fourth to the second year. The NSCI sequence is moved to the fourth year.
4 Four of the five functional international business courses and two electives from IB 476, 477, 490, ECO 366, 465 or the fifth functional IB course.
5 For students requiring EDUC 113 and a third math course, 6 additional credits are needed to complete the foreign-language requirement.
6 Global Studies electives include GEOG 134 (recommended), PS 212, PS 213, T/R 314. Regional Studies electives are courses that focus on specific countries or regions of the world (not U.S.), including culture courses taught in a foreign language.

FIN/IB 475 International Finance Management
(Prerequisites: ECO 351, FIN 351) This course deals with the environment of international financial management, the foreign-exchange-risk management, the multinational working-capital management, the international financial markets and instruments, foreign investment analysis, and the management of ongoing operations. It also exposes students to a wide range of issues, concepts, and techniques pertaining to international finance.

MG T/IB 475 International Management
(Prerequisites: ECO 351, MG T 351) Focuses on functional strategies of multinational corporations (MNCs), structure and control systems of MNCs, and comparative management. Specific MNC strategies to be covered include entry, sourcing, marketing, finance, human resources and public affairs. Study of structure and control systems includes corporate structure and headquarters-subsidiary relationships. Study of comparative management systems focuses on nature of management systems and practices in different cultures.

MKT/IB 475 International Marketing
(Prerequisites: MKT 351, ECO 351) Analysis of the marketing strategies of multinational corporations with emphasis on the internal environment of country markets. Discussions will include comparisons of different regional markets along socioeconomic, political and cultural lines. Different types of international market barriers and the corresponding market-entry strategies will be analyzed. Additional readings from international publications will be required.

IB 476 U.S.–East Asia Trade and Investment
(Prerequisite: ECO 351) This course describes and analyzes trade and investment flows between the U.S. and Japan, China, Korea and Taiwan. Topics covered in the course include: economic trends in these countries, U.S. trade and investment with them, U.S. trade deficit, trade policies of the U.S. and these countries, analysis of Japan’s KEIRETSU, Korea’s CHAEBOL, China’s MFO status and Taiwan’s environmental problems.

IB 477 European Business
(Prerequisite: ECO/IB 351) This course introduces the student to the European business environment, focusing on the implications for international business operations and competitiveness. This includes the study of rapidly changing business environments in Central and Eastern Europe (CEE) as well as the nations of the European Union (EU). The elimination of barriers to trade, and the response of companies inside and outside the EU to the threats and opportunities of the Single Market are examined.

IB 478 Business in China
(Prerequisite: ECO/IB 351) This course introduces the student to the dynamic business environment in the People’s Republic of China, focusing on the implications for international business operations and competitiveness.

IB 495 European Business Experience
(Prerequisites: MKT 351, MKT, ECO/IB 351) Students will have an opportunity to participate in lecture-discussion sessions with top-level executives from various multinational corporations, local business firms and government agencies in a number of different countries in Europe. Participants will gain a basic understanding of the issues prominent in international business today. Course involves travel to Europe. (Also listed as MGT 495 and MKT 495.)

Overview
Management involves getting things done through people. The Management major provides students with a broad-based, generalist background that is designed to provide graduates with the skills and tools needed to cope successfully with the challenging roles and expectations that are sweeping through organizations. “Getting things done” involves analyzing, designing and continuously improving accounting issues. The environmental influences on accounting development, the reporting standards for selected countries, financial statement analysis, and taxation and managerial accounting issues for multi-national business entities are examined.

United States, exchange rates and their determinants, balance-of-payments analysis, and the significance of multinational corporations.

ACC/IB 475 International Accounting
(Prerequisites: ACC 252 or 254, ECO 351) This course is designed for both accounting and non-accounting majors with an interest in global accounting issues. The environmental influences on accounting development, the reporting standards for selected countries, financial statement analysis, and taxation and managerial accounting issues for multi-national business entities are examined.

**Total Credits:** 130–132 (136–138)

1 See note on Math Options on page 213.
2 If EDUC 113 is required, it is taken in place of PHIL 120. C/IIL 104 is then moved to the spring of the first year. PHIL 120 will be taken in the second year.
3 If a third math course is required, GE electives are moved from the fourth to the second year. The NSCI sequence is moved to the fourth year.
4 Four of the five functional international business courses and two electives from IB 476, 477, 490, ECO 366, 465 or the fifth functional IB course.
5 For students requiring EDUC 113 and a third math course, 6 additional credits are needed to complete the foreign-language requirement.
6 See note on Math Options on page 213.
7 Global Studies electives include GEOG 134 (recommended), PS 212, PS 213, T/R S 314. Regional Studies electives are courses that focus on specific countries or regions of the world (not U.S.), including culture courses taught in a foreign language.

United States, exchange rates and their determinants, balance-of-payments analysis, and the significance of multinational corporations.

ACC/IB 475 3 cr.

International Accounting
(Prerequisites: ACC 252 or 254, ECO 351) This course is designed for both accounting and non-accounting majors with an interest in global accounting issues. The environmental influences on accounting development, the reporting standards for selected countries, financial statement analysis, and taxation and managerial accounting issues for multi-national business entities are examined.

FIN/IB 475 3 cr.

International Finance Management
(Prerequisites: ECO 351, FIN 351) This course deals with the environment of international financial management, the foreign-exchange-risk management, the multinational working-capital management, the international financial markets and instruments, foreign investment analysis, and the management of ongoing operations. It also exposes students to a wide range of issues, concepts, and techniques pertaining to international finance.

MGT/IB 475 3 cr.

International Management
(Prerequisites: ECO 351, MGT 351) Focuses on functional strategies of multinational corporations (MNCs), structure and control systems of MNCs, and comparative management. Specific MNC strategies to be covered include entry, sourcing, marketing, finance, human resources and public affairs. Study of structure and control systems includes corporate structure and head-quarters-subsidary relationships. Study of comparative management systems focuses on nature of management systems and practices in different cultures.

MKT/IB 475 3 cr.

International Marketing
(Prerequisites: MKT 351, ECO 351) This course focuses on the marketing strategies of multinational corporations and the marketing strategies of multinational corporations with emphasis on the internal environment of country markets. Discussion will include comparisons of different regional markets along socioeconomic, political and cultural lines. Different types of international market barriers and the corresponding market-entry strategies will be analyzed. Additional readings from international publications will be required.

IB 476 3 cr.

U.S.-East Asia Trade and Investment
(Prerequisite: ECO 351) This course describes and analyzes trade and investment flows between the U.S. and Japan, China, Korea and Taiwan. Topics covered in the course include: economic trends in these countries, U.S. trade and investment with them, U.S. trade deficit, trade policies of the U.S. and these countries, analysis of Japan’s KEIRETSU, Korea’s CHABOL, China’s MNF status and Taiwan’s environmental problems.

IB 477 3 cr.

European Business
(Prerequisite: ECO/IB 351) This course introduces the student to the European business environment, focusing on the implications for international business operations and competitiveness. This includes the study of rapidly changing business environments in Central and Eastern Europe (CEE) as well as the nations of the European Union (EU). The elimination of barriers to trade, and the response of companies inside and outside the EU to the threats and opportunities of the Single Market are examined.

IB 478 3 cr.

Business in China
(Prerequisite: ECO/IB 351) This course introduces the student to the dynamic business environment in the People’s Republic of China, focusing on the implications for international business operations and competitiveness.

IB 495 3 cr.

European Business Experience
(Prerequisites: MGT 351, MGT 351, ECO/IB 351) Students will have an opportunity to participate in lecture-discussion sessions with top-level executives from various multinational corporations, local business firms and government agencies in a number of different countries in Europe. Participants will gain a basic understanding of the issues prominent in international business today. Course involves travel to Europe. (Also listed as MGT 495 and MGT 495.)

**Overview**

Management involves getting things done through people. The Management major provides students with a broad-based, generalist background that is designed to provide graduates with the skills and tools needed to cope successfully with the challenging roles and expectations that are sweeping through organizations. "Getting things done" involves analyzing, designing and continuously improving
an organization’s structure and processes. “Through people” involves leading, motivating, and working effectively with other people in teams and other settings. Management courses use a variety of teaching techniques that involve a high degree of student/faculty interaction—including experiential exercises, student presentations, simulations and team activities—to develop self-analytic skill, team and communication skills. Students working with their faculty and advisors can choose from a variety of courses to design a program of study that will prepare them to enter a variety of positions in private industry and other organizations.

Minors in Management

Management of Structures and Systems: This minor focuses on the skills a successful manager needs to plan, organize, maintain, and improve an organization’s structures and systems. The student will take MGT 351, 352, 460, 461, 462 and any upper-level management elective except MGT 455.

Management of People and Teams: This minor focuses on the skills a successful manager needs to meet the management challenges of people and teams in today’s workplace. The student will take MGT 351, 352, 361, 362, 471 and any upper-level Management elective except MGT 455.

Course Descriptions

MGT 161 Introduction to Business
Nature, types and principles of business, Overview of business functions – finance, marketing, production, accounting, and management – in an analytical framework. Attention to business environment: legal, governmental, social and ethical. Enrollment is restricted to Associate Business Degree students. Non-Business students may take this course as a free elective with the permission of the dean of Dexter Hanley College.

MGT 210 Business and the Environment
Interdisciplinary course integrates management, marketing and operations management. The course emphasizes the centrality of environmental issues to corporate strategy, and approaches businesses are taking to respond to environmental issues. It is designed for students from various disciplines to learn from each other without having had business courses. Business majors may use this course only to fulfill a free elective.

MGT 251 Legal Environment of Business
The nature, sources, formation, and applications of law. Judicial function, court system, litigation, and other methods of resolving disputes. Legislation from judicial decisions, law by administrative agencies, regulation of business activity, antitrust law, consumer protection, environment, and pollution control. Tort, criminal and insurance law, property rights for both personal and real property. Business organization, principle of agency, partnership and corporation.

MGT 351 Principles of Management I
(Prerequisite: Junior standing) Survey course examines key aspects of organizations and their management – dynamic environments, organization design and structure, roles/functions of managers, managing technology and change, global management, and alternative types of organizations. This course examines the expanding role of the manager from planning, organizing, controlling and directing, to the knowledge and skills involved in managing and working with a diverse workforce.

MGT 352 Principles of Management II
(Prerequisite: MGT 351) Survey course examines the individual in the work setting, working with a variety of people inside and outside the organization. This course deals with such issues as motivation, leadership and communication diversity at the workplace, and with individual effectiveness, interpersonal relations, and group skills.

MGT 361 Human Resources Management
(Prerequisite: MGT 351) Course explains the functions of a human resources division or department – including job descriptions, labor demographics, recruitment and hiring, turnover and mobility, interviewing, aptitude and other employee testing, performance evaluation, disciplinary procedures, employee health and safety, wage and hour administration, government regulations; and the handling of absenteeism, alcoholism, and drug addiction. (Also listed as EMT 463.)

MGT 362 Employee-Management Relations
(Prerequisite: MGT 351) This examines employee-management practices in contemporary society, employee participation in unions, and their spill-over effect on nonunion settings. Course topics include unions, the collective-bargaining process, wages and benefits, seniority, grievance procedures, and arbitration. Discrimination in employment and equal-employment opportunity will be discussed, as well as future issues in union and nonunion settings and international employee-management relations.

Total: 130-132 Credits

Notes:
1. See note on Math Options on page 213.
2. If EDUC 113 is required in the first semester, it is taken in place of a humanities elective and is counted as a GE free elective. One GE free elective in the fourth year must then be taken as a humanities elective.
3. If a third math course is required, it replaces this GE elective.
4. This is in consultation with their advisors, management majors should choose two of the following four focus courses: MGT 361, 362, 460 or 461. MGT 361 and 362 focus more on people skills; MGT 460 and 461 focus more on organizational and administrative processes.

MGT 455 Business Policy and Strategy
(Prerequisites: Senior standing, FIN 351, OIM 352, MGT 351) and this is the capstone course for all Business majors. Concepts and skills developed in the prerequisite courses are integrated and applied to the overall management of an organization. Topics will include setting objectives, designing strategic plans, allocating resources, organizational structuring and controlling performance.
an organization’s structure and processes. “Through people” involves leading, motivating, and working effectively with other people in teams and other settings. Management courses use a variety of teaching techniques that involve a high degree of student/faculty interaction— including experiential exercises, student presentations, simulations and team activities—to develop self-analytic skills, team and communication skills. Students working with their faculty and advisors can choose from a variety of courses to design a program of study that will prepare them to enter a variety of positions in private industry and other organizations.

Minors in Management

Management of Structure and Systems: This minor focuses on the skills a successful managerial needs to plan, organize, maintain, and improve an organization’s structures and systems. The student will take MGT 351, 352, 460, 461, 462 and any upper-level management elective except MGT 455.

Management of People and Teams: This minor focuses on the skills a successful manager needs to manage the management challenges of people and teams in today’s workplace. The student will take MGT 351, 352, 361, 362, 471 and any upper-level management elective except MGT 455.

Course Descriptions

MGT 161 3 cr.
Introduction to Business
Nature, types and principles of business. Overview of business functions—finance, marketing, production, accounting, and management— in an analytical framework. Attention to business environment: legal, governmental, social and ethical. Enrollment is restricted to Associate Degree students. Non-Business students may take this course as a free elective with the permission of the dean of Dexter Hanley College.

MGT 210 3 cr.
Business and the Environment
Interdisciplinary course integrates management, marketing and operations management. The course emphasizes the centrality of environmental issues to corporate strategy, and approaches businesses are taking to respond to environmental issues. It is designed for students from various disciplines to learn from each other without having had business courses. Business majors may use this course only to fulfill a free elective.

MGT 251 3 cr.
Legal Environment of Business
The nature, sources, formation, and applications of law. Judicial function, court system, litigation, and other methods of resolving disputes. Legislation from judicial decisions, law by administrative agencies, regulation of business activity, antitrust law, consumer protection, environment, and pollution control. Tort, criminal and insurance law, property rights for both personal and real property. Business organization, principle of agency, partnership and corporation.

MGT 351 3 cr.
Principles of Management I
(Prerequisite: Junior standing) Survey course examines key aspects of organizations and their management—dynamic environments, organization design and structure, roles/functions of managers, managing technology and change, global management, and alternative types of organizations. This course examines the expanding role of the manager from planning, organizing, controlling and directing, to the knowledge and skills involved in managing and working with a diverse workforce.

MGT 352 3 cr.
Principles of Management II
(Prerequisite: MGT 351) Survey course examines the individual in the work setting, working with a variety of people inside and outside the organization. This course deals with issues as motivation, leadership and communication diversity at the workplace, and with individual effectiveness, interpersonal relations, and group skills.

MGT 361 3 cr.
Human Resources Management
(Prerequisite: MGT 351) Course explains the functions of a human resources division or department— including job descriptions, labor demographics, recruitment and hiring, turnover and mobility, interviewing, aptitude and other employee testing, performance evaluation, disciplinary procedures, employee health and safety, wage and hour administration, government regulations; and the handling of absenteeism, alcoholism, and drug addiction. (Also listed as EMT 463.)

MGT 362 3 cr.
Employee-Management Relations
(Prerequisite: MGT 351) This examines employee-management practices in contemporary society, employee participation in unions, and their spill-over effect on nonunion settings. Course topics include unions, the collective-bargaining process, wages and benefits, seniority, grievance procedures, and arbitration. Discrimination in employment and equal-employment opportunity will be discussed, as well as future issues in union and nonunion settings and international employee-management relations.
MGT 460  
Organization Theory  
(Prerequisite: MGT 351) Study of the forces both within and outside the organization that determine the structure and processes of an organization. Topics to be covered will include technology and size-influences, conflict, boundary roles, matrix structure, political factors, and sociotechnical systems.

MGT 461  
Managing Through Systems and Quality  
(Prerequisite: MGT 351) Systems theory provides a powerful way to understand work organizations as interacting, inter-dependent systems. Managing effectively through systems involves working with vision, with empowered, growing people with a customer orientation, with good measures and analysis, and with a continuous improvement culture. This course will focus on these quality management approaches that form the underpinning of tomorrow’s management practices.

MGT 462  
Project Management in Organizations  
(Prerequisite: MGT 351) This course will examine advanced project-management concepts from all phases of the project lifecycle (from requirements specification through post-project assessment). Special emphasis will be placed on understanding projects within the context of complex organizational settings by utilizing an open-systems perspective. Linkages with more permanent administration structures within the organization will be reviewed. (Also listed as OIM 462.)

MGT 471  
Group Dynamics  
(Prerequisite: MGT 351 or permission of instructor) Survey of constructs, research and applications of group phenomena in an organizational context. Examines theories, research measurements and observational methods used in studying groups. Students will be able to explore their own behavior in groups by participating in various groups and/or by observing others in group experiences. The course will prepare students to be effective in groups.

MGT 472  
Women and Men in Management  
(Prerequisite: MGT 351) This course explores the opportunities for women in management and the special skills and insights needed by women to take full advantage of such opportunities. It will focus on the effects of having men and women as colleagues in the workplace and the problems that may ensue. Topics to be covered include sexual harassment, the dual-career family and male/female socialization.

MGT 473  
Organizational Social Responsibility  
(Prerequisite: MGT 351 or permission of the instructor) This course introduces students to basic concepts underlying the social responsibility aspect of the management process. The role of pluralism is examined in the societal system to provide an understanding of the evolving relationship between organizations and society as a whole. The managerial approach is explored in the light of the increasing importance of societal impact on the organization.

MGT 474  
(D) Managing a Multicultural Workforce  
This course addresses the skills and knowledge managers must develop to deal with an increasingly culturally diverse workforce. Specific topics to be covered include diversity in ethnicity, nationality, religion, culture, gender, age, sexual orientation and disability. The course will help students interact and work with people different from themselves and to understand their own cultural values, biases and behaviors.

MKT 361  
Introduction to Marketing  
(Prerequisites: MGT 351, MKT 351) Study of the role of marketing information as the basis for decision-making. Topics include recruiting, selecting and training the sales force; forecasting, budgeting and sales quotas; assigning, motivating and compensating the sales force.

MKT 362  
Consumer Behavior  
(Prerequisite: MGT 351) Study of theories of consumer behavior. The buyer is analyzed at the individual level in terms of motivation, attitudes, etc. and at the social level in terms of influence on buying behavior from the socio-economic environment.

MKT 370  
Interactive Marketing  
(Prerequisite: MGT 351) This course examines the integration of evolving interactive technologies in the design and implementation of marketing programs. The use of information technology infrastructure to support the execution of conception, pricing, promotion and distribution of ideas, goods and services has the potential of making the marketing process more efficient and productive. (Also listed as EC 370.)

MKT 460  
Customer Support Systems  
(Prerequisite: MGT 351, MKT 351) An interdisciplinary approach to enterprise management that focuses on the customer is emphasized. The objective of the course is to orient enterprise-wide decision making to successful customer-relationship management on an ongoing basis. (Also listed as EMT 460.)

MKT 470  
Marketing Communications  
(Prerequisite: MGT 351) Personal and mass communication approaches generated by manufacturers and intermediates or institutions toward target markets. The design of advertising campaigns to shift consumer attitudes, to secure resellers’ support and to inform, persuade, and move them to action. Development of copy selection and media and measurement of promotion effectiveness including evaluation of sales force.

MKT 471  
Sales Force Management  
(Prerequisites: MGT 352, MKT 351) This course develops the concepts and techniques needed to identify and analyze the various decision areas faced by a sales-force manager. Topics include recruiting, selecting and training the sales force; forecasting, budgeting and sales quotas; assigning, motivating and compensating the sales force.

MKT 472  
Retailing Management  
(Prerequisites: MGT 352, FIN 351, OIM 351) This course focuses on the decision areas facing retail managers, including retailing, structure,
MKT 451 3 cr.
Introduction to Marketing
(Prerequisites: junior standing, ECO 153-154 or ECO 101) This course introduces the student to the field of marketing. An overview of the principles on which the discipline is founded. The marketing concept is presented as the framework under which the decisions related to marketing—mix variables (product, place, price and promotion) are made by organizations.

MKT 471 3 cr.
Sales Force Management
(Prerequisites: MGT 352, MKT 351) This course develops the concepts and techniques needed to identify and analyze the various decision areas faced by a sales-force manager. Topics include recruiting, selecting and training the sales force; forecasting, budgeting and sales quotas; assigning, motivating and compensating the sales force.

MKT 472 3 cr.
Retailing Management
(Prerequisites: MGT 352, FIN 351, OIM 351) This course focuses on the decision areas facing retail managers, including retailing, structure,
merchandising, locations, store layout, promotion, pricing, and personnel.

**MKT/IB 475**

**3 cr.**

**International Marketing**

(Prerequisites: MKT 351, ECO/IB 351) Analysis of marketing strategies of multinational corporations with emphasis on the internal environment of country markets. Discussions include comparisons of different regional markets along socio-economic, political and cultural lines; different types of international market barricades and corresponding market-entry strategies.

**MKT 476**

**3 cr.**

**Marketing Strategy**

(Prerequisite: MKT 351) The theme of this course is building effective marketing strategies through integrated decision-making. Emphasis is on different decision models within functional areas such as demand analysis, consumer research, product and promotion management, etc.

**Course Descriptions**

**STAT 251**

**3 cr.**

(Q Statistics for Business I

(Prerequisite: MATH 107 or 114) Detailed coverage of descriptive statistics. An introduction to the elements of probability theory and decision theory, and index numbers. The major discrete and continuous probability distributions are covered with an emphasis on business applications. Data analysis will be done using appropriate software.

**STAT 252**

**3 cr.**

(Q Statistics for Business II

(Prerequisite: STAT 251; corequisite: C/JL 104) A survey of inferential statistical methods covering sampling distributions, interval estimation, hypothesis testing, goodness-of-fit tests, analysis of variance, regression and correlation analysis, and non-parametric statistics. Data analysis will be done using appropriate software.

**STAT 253**

**3 cr.**

Statistics for Economics

(Prerequisite: MATH 107 or 114) Coverage of statistical tools to analyze economic data. Topics include measures of central tendency, dispersion, probability distributions, index numbers, time series analysis, regression and correlation, and analysis of variance. Data analysis will be done using appropriate software.

**OIM 351**

**3 cr.**

Introduction to Management Science

(Prerequisites: C/JL 104, STAT 251) A survey of quantitative techniques used to analyze and solve business problems. Topics include linear programming methods, waiting line models, probability distributions, index numbers, time series analysis, regression and correlation, and analysis of variance. Data analysis will be done using appropriate software.

**OIM 352**

**3 cr.**

Introduction to Operations Management

(Prerequisites: OIM 351, STAT 252) A functional view of how to manage the activities involved in the process of converting or transforming resources into products or services. Topics include an overview of strategic decisions, forecasting, product design, process planning, facility layout, basic inventory models, capacity planning, aggregate planning and scheduling.
MKT 495
European Business Experience
(Prerequisites: MKT 351, MKT 352, ECO/IB 351) Students will have an opportunity to participate in lecture-discussion sessions with top-level executives from various multinational corporations, local business firms, and government agencies in a number of different countries in Europe. Participants will gain a basic understanding of the issues prominent in international business today. Course involves travel to Europe. (Also listed as IB 495 and MGT 495.)

Course Descriptions

STAT 251
(Q) Statistics for Business I
(Prerequisite: MATH 107 or 114) Detailed coverage of descriptive statistics. An introduction to the elements of probability theory and decision theory, and index numbers. The major discrete and continuous probability distributions are covered with an emphasis on business applications. Data analysis will be done using appropriate software.

STAT 252
(Q) Statistics for Business II
(Prerequisite: STAT 251; corequisite: C/IL 104) A survey of inferential statistical methods covering sampling distributions, interval estimation, hypothesis testing, goodness-of-fit tests, analysis of variance, regression and correlation analysis, and non-parametric statistics. Data analysis will be done using appropriate software.

STAT 253
Statistics for Economics
(Prerequisite: MATH 107 or 114) Coverage of statistical tools to analyze economic data. Topics include measures of central tendency, dispersion, probability distributions, index numbers, time series analysis, regression and correlation, and analysis of variance. Data analysis will be done using appropriate software.

OIM 351
Introduction to Management Science
(Prerequisites: C/IL 104, STAT 251) A survey of quantitative techniques used to analyze and solve business problems. Topics include linear programming methods, waiting line models, project scheduling, and simulation. Emphasis is placed on model building and analysis using spreadsheet software.

OIM 352
Introduction to Operations Management
(Prerequisites: OIM 351, STAT 252) A functional view of how to manage the activities involved in the process of converting or transforming resources into products or services. Topics include an overview of strategic decisions, forecasting, product design, process planning, facility layout, basic inventory models, capacity planning, aggregate planning and scheduling.

OIM 353 3 cr.
Business Process Overview
This is the first course in the area of enterprise management. Students will learn to appreciate the integration of a company’s core business processes. Students will be exposed to the main business processes that drive an organization, the interactions within and between them, and the effect of integration on the decision-making environment. This course uses an enterprise-wide integrated information-systems software and simulated data for a model company. (Also listed as EMT 351.)

OIM 366 3 cr.
Supply Chain Management
(Prerequisite: OIM 471 or permission of instructor) Many companies view Supply Chain Management as the core of their business strategy. Students will learn how principles of Supply Chain Management integrate into the management of the enterprise and the business processes. Students will examine the use of information technologies in Supply Chain Management. Computer software will be used to gain hands-on experience. (Also listed as EC 470.)

OIM 367 3 cr.
Business Information Management
(Prerequisite: C/IL 104) Computers and how they can be applied to the operations and management of business firms. Topics include data-processing concepts, overview of computer hardware and software, modern data and information-processing systems, applications of computers in business, acquiring and managing of computer and information resources. Software packages will be used to gain hands-on experience.

OIM 462 3 cr.
Project Management in Organizations
(Prerequisite: MGT 351) This course will examine advanced project-management concepts from all phases of the project lifecycle (from requirements specification through post-project assessment). Special emphasis will be placed on understanding projects within the context of complex organizational settings by utilizing an open-systems perspective. Linkages with more permanent administration structures within the organization will be reviewed. (Also listed as MGT 462.)

OIM 470 3 cr.
Production Planning and Control
(Prerequisite: OIM 352) This course concerns the study of production planning and control activities in an enterprise resource planning context. Topics include forecasting, aggregate planning, capacity planning, master production scheduling, material requirements planning, production activity control, purchasing, inventory models, and Just-in-Time Systems. The interactions between operations and the other functional areas of the business will be emphasized.

OIM 471 3 cr.
Business Information Management
(Prerequisite: C/IL 104) Computers and how they can be applied to the operations and management of business firms. Topics include data-processing concepts, overview of computer hardware and software, modern data and information-processing systems, applications of computers in business, acquiring and managing of computer and information resources. Software packages will be used to gain hands-on experience.

OIM 472 3 cr.
Electronic Business and Entrepreneurship
(Prerequisite: Senior standing) The course examines the issues related to the starting of new technology-based businesses. It focuses on entrepreneurial traits, idea generation, entry strategies, marketing plans and development of business plans. Venture capital and other forms of financing will also be covered. In addition there will be a discussion on legal and intellectual properties issues. (Also listed as EC 472.)

OIM 473 3 cr.
Business Applications of Communication Networks
(Prerequisite: OIM 471) Students explore the use of computer and telecommunication networks to achieve organizational goals. Topics include data communications; planning and design of communication networks; data integrity, independence and security; client-server computing; global communication; the Internet; applications of telecommunication networks and current issues and future trends. (Also listed as AIS 483 and EC 473.)

*See note on Math Options on page 213.

**If EDUC 113 is required in the first semester, it is taken in place of a humanities elective and is counted as a GE free elective. One GE free elective in the fourth year must then be taken as a humanities elective.

If a third math course is required, it replaces this GE elective.

OIM 353 3 cr.

**Business Process Overview**
This is the first course in the area of enterprise management. Students will learn to appreciate the integration of a company’s core business processes. Students will be exposed to the main business processes that drive an organization, the interactions within and between them, and the effect of integration on the decision-making environment. This course uses an enterprise-wide integrated information-system software and simulated data for a model company. (Also listed as EMT 351.)

OIM 366 3 cr.

**Supply Chain Management**
(Prerequisite: OIM 471 or permission of instructor) Many companies view Supply Chain Management as the core of their business strategy. Students will learn how principles of Supply Chain Management integrate into the management of the enterprise and the business processes. Students will examine the use of information technologies in Supply Chain Management. Computer software will be used to gain hands-on experience. (Also listed as EC 470.)

OIM 462 3 cr.

**Project Management in Organizations**
(Prerequisite: MGT 351) This course will examine advanced project-management concepts from all phases of the project lifecycle (from requirements specification through post-project assessment). Special emphasis will be placed on understanding projects within the context of complex organizational settings by utilizing an open-systems perspective. Linkages with more permanent administration structures within the organization will be reviewed. (Also listed as MGT 462.)

OIM 470 3 cr.

**Production Planning and Control**
(Prerequisite: OIM 352) This course is concerned with the study of production planning and control activities in an enterprise resource-planning context. Topics include forecasting, aggregate planning, capacity planning, master production scheduling, material requirements planning, production activity control, purchasing, inventory models, and Just-in-Time Systems. The interactions between operations and the other functional areas of the business will be emphasized.

OIM 471 3 cr.

**Business Information Management**
(Prerequisite: C/IL 104) Computers and how they can be applied to the operations and management of business firms. Topics include data-processing concepts, overviews of computer hardware and software, modern data-and-information processing systems, applications of computers in business, acquiring and managing of computer and information resources. Software packages will be used to gain hands-on experience.

OIM 472 3 cr.

**Electronic Business and Entrepreneurship**
(Prerequisite: Senior standing) The course examines issues related to the starting of new-technology-based businesses. It focuses on entrepreneurial traits, idea generation, entry strategies, marketing plans and development of business plans. Venture capital and other forms of financing will also be covered. In addition there will be a discussion on legal and intellectual properties issues. (Also listed as EC 472.)

OIM 473 3 cr.

**Business Applications of Communication Networks**
(Prerequisite: OIM 471) Students explore the use of computer and telecommunication networks to achieve organizational goals. Topics include data communications; planning and design of communication networks; data integrity, independence and security; client-server computing; global communication; the Internet; applications of telecommunication networks and current issues and future trends. (Also listed as AIS 483 and EC 473.)
The Panuska College of Professional Studies prepares students in a wide range of professions, principally in allied health and education. The College has been designed with the conviction that all disciplines should be taught and understood through a balance of theory and practice. An exclusively theoretical understanding of a discipline is incomplete. Practice for which there is no understood context is of limited value. It is this belief that structures the College’s pedagogy and curriculum. Panuska College students receive exemplary preparation for the profession of their choice, and a solid education in the liberal arts and sciences. In addition, students perform community service annually as a requirement for graduation. In this way, the service aspects of their prospective careers can be understood in personal and comprehensible terms. Such an ethic has roots in antiquity, is Catholic and Jesuit in tradition and spirit, and responsive to contemporary needs. All of the College’s programs are accredited by the appropriate professional organizations.
COUNSELING AND HUMAN SERVICES

Faculty

Oliver J. Morgan, Ph.D., Chair
Lori Ann Bruch, Ed.D.
Thomas M. Collins, Ph.D.
Rebecca Spirito Dalgin, Ph.D.
Lee Ann M. Eschbach, Ph.D.
Elizabeth J. Jacob, Ph.D.
Ann Marie Toloczko, Ph.D., Program Director
Kevin Wilkerson, Ph.D.

Overview

The Counseling and Human Services curriculum is designed to develop in students the values, knowledge and skills necessary to work with people in a variety of settings and situations. The sequence of courses focuses on understanding normal and abnormal human development across the lifespan and on developing skill in interventions designed to maximize human adjustment and development. Core requirements in the major emphasize values, knowledge and skills common to all fields of human services, while electives allow students to develop competence in assisting specific populations. Students in all majors are required to complete 6 credits of internship experience totaling 300 hours. Students must maintain a minimum grade of C in all major courses and cognate courses, and full-time students must complete a minimum of 10 hours of community service during each fall and spring semester registered as a Counseling and Human Services major. Dexter Hanley College students will meet the service-learning requirement by completing major courses that have a service-learning component. They will not be required to complete additional service-learning hours. The curriculum is geared toward students who have high social-science interests as well as general scientific interest and aptitude in the social and behavioral sciences. The curriculum prepares students for entry-level positions in a variety of human-services positions in public or private settings, or for graduate study in counseling, social work, or related social or behavioral science professions. Recent graduates have pursued master’s degrees in social work; community, rehabilitation or school counseling; occupational therapy; human resources administration; audiology and law. They have attended the University of Pennsylvania, Fordham University, New York University, Rutgers, Hunter College, Adelphi University and the University of Maryland.

Concentration in Rehabilitation Services

The Counseling and Human Services curriculum has expanded to offer a concentration in rehabilitation services to enhance the knowledge and practice for work with persons with disabilities in response to an increasing need for baccalaureate-level professionals in rehabilitation services. Through a concentration in rehabilitation services, students will be prepared to work in state and local agencies that are responsible for the vocational, mental-health, job-development and coaching, and related needs of persons with disabilities. Included in this concentration can be an emphasis on persons with addiction and substance-abuse disabilities. This concentration is for Counseling and Human Services majors only.

Combined Baccalaureate/Master’s Degree Program

Outstanding Counseling and Human Services majors are eligible for consideration in this program (please refer to the catalog sections on Special Programs or The Graduate School and to the Graduate School Catalog for specifics of the program). Community Counseling, Rehabilitation Counseling and School Counseling are graduate programs available for students of high academic quality and clear professional goals. Each graduate program is nationally accredited, and the Department of Counseling and Human Services is recognized regionally and nationally in Counselor Education. Three faculty received the Outstanding Counselor Educator Award for the state of Pennsylvania.

Pastoral Studies Track

The Departments of Counseling and Human Services and Theology/Religious Studies offer the Pastoral Studies track. The program is incorporated into the 131-credit B.S. in Counseling and Human Services and the 130-credit B.A. in Theology/Religious Studies. Students in the interdisciplinary program pursue a formal curriculum that includes interdisciplinary team-taught courses, experiential learning via an internship in pastoral studies and a capstone seminar to integrate professional experiences. The program is an excellent opportunity for students interested in pursuing advanced training in pastoral services (e.g., hospital or prison chaplaincies, parish assistants, youth ministers, etc.). Completion of this program will be noted on the Counseling and Human Services major’s transcript. The student must either be pursuing a double major or a minor in Theology/Religious Studies. Students are required to complete the following courses specific to the program: CHS 439: Psychology and Spirituality; CHS 380: Internship in Pastoral Studies; and HADM 284: Pastoral Studies Capstone Seminar.

Minor in Counseling and Human Services

A minor in Counseling and Human Services requires CHS 111, 112, 241, 242, 341 and one CHS elective course.

Course Descriptions

CHS 242 Counseling Theories

The role of the human-services professional as an individual counselor or caseworker is examined. Theories and techniques as well as problems in individual counseling are explored.

CHS 284 Special Topics

Courses developed to provide in-depth coverage of specific topics in human services. Course title will be provided in advance of registration. May be used only twice to satisfy major or minor elective requirement.

CHS 293 (W) Research Methods in Human Services

An introduction to research methodology as applied to problems in human-services agencies and settings. Specific topics include descriptive, experimental, and quasi-experimental research methods. Emphasis is placed on development of the student’s ability to be a critical consumer of research in human services.

CHS 322 Cognitive Disabilities

Etiology, assessment, diagnosis, treatment and prevention of cognitive disabilities are presented. This course examines both student and societal beliefs concerning persons with cognitive disabilities. The implications of living with cognitive disabilities will be explored and the impact of disability culture as a means to facilitate the empowerment of children and adults with cognitive disabilities will be presented.

CHS 323 Psychiatric Rehabilitation

An examination of the problems associated with mental and emotional disturbances. Emphasis is placed on contemporary modalities of rehabilitation as they relate to community mental-health programs, and innovative non-medical treatment approaches. Critical issues in mental health will be discussed.

CHS 331 Health and Behavior

Focuses on stress which affects thoughts, emotions, and the body. Stress diseases of adaption include cancer, Type A Behavior, GI tract disorders along with stress-related thought disorders and emotional disturbances. Students learn to apply relaxation, cognitive restructuring and record-keeping in the treatment of their own as well as others’ health.

Minor in Counseling and Human Services
A minor in Counseling and Human Services requires CHS 111, 112, 241, 242, 341 and one CHS elective course.

Course Descriptions
CHS 111 3 cr.
(S) Introduction to Human Adjustment
Introduction to human adjustment throughout the lifespan. Focuses on discrimination of normal and abnormal behavioral and emotional responses to developmental life stages and to common developmental concerns.

CHS 112 3 cr.
Human-Services Systems
Examines the human-services systems and institutions which have evolved as a response to human need. Explores the effect of social problems on individuals and families and the service systems designed to alleviate such problems. Includes service-learning component.

CHS 241 3 cr.
(D) Case Management and Interviewing
The role of the human-service professional as a case manager or coordinator of services is examined. Initial interviewing skills and techniques are discussed with an emphasis on case conceptualization, problem identification, goal selection, evaluation, and follow-up. Includes service-learning component.

CHS 242 3 cr.
Counseling Theories
The role of the human-service professional as an individual counselor or caseworker is examined. Theories and techniques as well as problems in individual counseling are explored.

CHS 284 3 cr.
Special Topics
Courses developed to provide in-depth coverage of specific topics in human services. Course title will be provided in advance of registration. May be used only twice to satisfy major or minor elective requirement.

CHS 293 3 cr.
(W) Research Methods in Human Services
An introduction to research methodology as applied to problems in human-services agencies and settings. Specific topics include descriptive, experimental, and quasi-experimental research methods. Emphasis is placed on development of the student’s ability to be a critical consumer of research in human services.

CHS 322 3 cr.
Cognitive Disabilities
Etiology, assessment, diagnosis, treatment and prevention of cognitive disabilities are presented. This course examines both student and societal beliefs concerning persons with cognitive disabilities. The implications of living with cognitive disabilities will be explored and the impact of disability culture as a means to facilitate the empowerment of children and adults with cognitive disabilities will be presented.

CHS 323 3 cr.
Psychiatric Rehabilitation
An examination of the problems associated with mental and emotional disturbances. Emphasis is placed on contemporary modalities of rehabilitation as they relate to community mental-health programs, and innovative non-medical treatment approaches. Critical issues in mental health will be discussed.

CHS 331 3 cr.
Health and Behavior
Focuses on stress which affects thoughts, emotions, and the body. Stress diseases of adaptation include cancer, Type A Behavior, GI tract disorders along with stress-related thought disorders and emotional disturbances. Students learn to apply relaxation, cognitive restructuring and record-keeping in the treatment of their own as well as others’ health.

¹ Includes service-learning component.

² To avoid duplication of course content, Counseling and Human Services majors should not take PSYC 224: Personality. PSYC 330: Research Methods or PSYC 360: Clinical Psychology. Students who wish to declare a double major or a minor in Psychology should consult their advisors.

---

CHS 332 Career Development

3 cr.

Explores theories of career choice and adjustment. Emphasis will be placed upon methods and resources for facilitating career development throughout the life span. Career education, computerized information systems, and decision-making methods will be considered along with innovative approaches for placement of special-needs populations.

CHS 333 (D) Multiculturalism in Human Services

3 cr.

Focuses on current social and cultural issues in human services and related fields. Human development in a multicultural society will be examined and the basic objectives and dimensions of multicultural intervention will be defined. Student self-awareness of values, attitudes, and beliefs will be emphasized. Includes service-learning component.

CHS 334 Marital and Family Counseling

3 cr.

Theories of family counseling will be presented with specific attention to the structural and strategic approaches. A variety of family-counseling techniques and stages will be learned through the use of role play and videotaping. The utilization of family counseling will be discussed. (Also listed as HD 234.)

CHS 335 Administration in Human Services

3 cr.

Focuses on the development and application of principles of developing and organizing group programs related to program and organizational development, and community-wide planning in human services. Topics include organizational theory applied to human-service settings, consultation, supervision, planning, funding, and training.

CHS 336 Recreational Therapy

3 cr.

Designed to develop an understanding of purpose, organization, administration and delivery of recreational-therapy services for the handicapped.

CHS 337 (W, D) Counseling Girls and Women

3 cr.

This course is designed to explore the topic of counseling girls and women in a sociocultural, historical, and multicultural context. Through the examination of the history of women (e.g., social construction of gender, identity) from a self-in-relation foundation, and feminist counseling and its role in de-pathologizing the importance of relationships to girls and women will be explored.

CHS 338 Poverty, Homelessness and Social Justice

3 cr.

Focuses on developing an understanding of the social, historical and political dimensions of poverty and homelessness in the U.S. and explores the implications for distributive justice. Students assess the effectiveness of the social policies and programs created to combat poverty and homelessness, and participate in course-required service-learning and social action projects.

CHS 340 Career Seminar

1 cr.

(Majors only; prerequisite for CHS 380)

Designed to introduce the student in the Counseling and Human Services curriculum to counseling, human development and human-services occupations. Short- and long-term goals are examined in preparation for employment or further study.

CHS 341 Group Dynamics

3 cr.

A basic understanding of group dynamics and individual behavior in groups is presented. Methods of developing and organizing group programs are stressed. Students participate in a group experience. Includes service-learning component.

CHS 342 Foundations of Rehabilitation

3 cr.

Students will develop sensitivity, appreciation and understanding of what it means to have a disability. Topics covered will include federal, state and community mandates, independent-living concepts, and the basic principles of rehabilitation. A comprehensive review will occur of the variety of rehabilitation programs. Ethical decision-making will be integrated into the course and students will learn to practice with cultural sensitivity. Site visits to rehabilitation agencies and applied experiences will be provided.

CHS 343 Medical and Psychosocial Aspects of Disabilities

3 cr.

Students will acquire knowledge and understanding of the medical, functional and psychosocial aspects of a wide array of disabilities. The emphasis will be holistic and person-centered. Curriculum components include learning medical terminology, the use of medical information and discussion of psychosocial aspects of disability. Students will have the opportunity to interact with persons with disabilities.

**TOTAL:** 131 CREDITS

---

1. Includes service-learning component.

---

To avoid duplication of course content, Counseling and Human Services majors should not take PSYC 224: Personality, PSYC 350: Research Methods or PSYC 360: Clinical Psychology. Students who wish to declare a double major or a minor in Psychology should consult their advisor.

---

# CHS 332: Career Development
**3 cr.**

Career Development focuses on theories of career choice and adjustment. Emphasis will be placed upon methods and resources for facilitating career development throughout the life span. Career education, computerized information systems, and decision-making methods will be considered along with innovative approaches for placement of special-needs populations.

---

# CHS 333: (D) Multiculturalism in Human Services
**3 cr.**

(D) Multiculturalism in Human Services focuses on current social and cultural issues in human services and related fields. Human development in a multicultural society will be examined and the basic objectives and dimensions of multicultural intervention will be defined. Student self-awareness of values, attitudes, and beliefs will be emphasized. Includes service-learning component.

---

# CHS 334: Marital and Family Counseling
**3 cr.**

Marital and Family Counseling focuses on specific attention to the structural and strategic approaches. A variety of family-counseling techniques and stages will be learned through the use of role play and videotaping. The utilization of family counseling will be discussed. (Also listed as HD 234.)

---

# CHS 335: Administration in Human Services
**3 cr.**

Administration in Human Services focuses on the development of skills and knowledge related to program and organizational development and community-wide planning in human services. Topics include organizational theory applied to human-service settings, consultation, supervision, planning, funding, and training.

---

# CHS 336: Recreational Therapy
**3 cr.**

Recreational Therapy focuses on developing a professional understanding of purpose, organization, administration, and delivery of recreational-therapy services for the handicapped.

---

# CHS 337: (W, D) Counseling Girls and Women
**3 cr.**

(W, D) Counseling Girls and Women focuses on the topic of counseling girls and women in a sociocultural, historical, and multicultural context. Through the examination of the history of women (e.g., social construction of gender, identity) from a self-in-relations foundation, and feminist counseling and its role in de-pathologizing the importance of relationships to girls and women will be explored.

---

# CHS 338: Poverty, Homelessness and Social Justice
**3 cr.**

Poverty, Homelessness and Social Justice focuses on developing an understanding of the social, historical and political dimensions of poverty and homelessness in the U.S. and explores the implications for distributive justice. Students assess the effectiveness of the social policies and programs created to combat poverty and homelessness, and participate in course-required service-learning and social action projects.

---

# CHS 340: Career Seminar
**1 cr.**

Career Seminar (Majors only; prerequisite for CHS 380)Designed to introduce the student in the Counseling and Human Services curriculum to counseling, human development and human-services occupations. Short- and long-term goals are examined in preparation for employment or further study.

---

# CHS 341: Group Dynamics
**3 cr.**

Group Dynamics focuses on current social and cultural issues in human services and related fields. Human development in a multicultural society will be examined and the basic objectives and dimensions of multicultural intervention will be defined. Student self-awareness of values, attitudes, and beliefs will be emphasized. Includes service-learning component.

---

# CHS 342: Foundations of Rehabilitation
**3 cr.**

Foundations of Rehabilitation focuses on current social and cultural issues in human services and related fields. Human development in a multicultural society will be examined and the basic objectives and dimensions of multicultural intervention will be defined. Student self-awareness of values, attitudes, and beliefs will be emphasized. Includes service-learning component.

---

# CHS 343: Medical and Psychosocial Aspects of Disabilities
**3 cr.**

Medical and Psychosocial Aspects of Disabilities focuses on developing an understanding of the social, historical and political dimensions of poverty and homelessness in the U.S. and explores the implications for distributive justice. Students assess the effectiveness of the social policies and programs created to combat poverty and homelessness, and participate in course-required service-learning and social action projects.

---

To avoid duplication of course content, Counseling and Human Services majors should not take PSYC 224: Personality, PSYC 350: Research Methods or PSYC 360: Clinical Psychology. Students who wish to declare a double major or a minor in Psychology should consult their advisor.

TOTAL: 131 CREDITS

1. Includes service-learning component.

3 cr. Counseling and Human Services majors should not take PSYC 224. Personality, PSYC 330. Research Methods or PSYC 360. Clinical Psychology. Students who wish to declare a double major or a minor in Psychology should consult their advisors.

1. Includes service-learning component.

Vocational Evaluation
This course focuses on the theme of assessment and employment of individuals with disabilities. Students will discover the impact of the Rehabilitation Act Amendments of 1998 and the ADA on employment concerns of persons with disabilities. Students will compile and utilize assessment information such as prior records, test results, work samples and situational assessment.

Chs 380
Intervention in Human Services
(Prerequisite: CHS 340) The internship is a significant clinical and educational experience. It provides both a supervised practical experience in the student’s field and an opportunity to integrate knowledge and skills. Students will spend a minimum of 150 hours in the field placement. Offered only during the spring semester; prerequisite for Chs 481.

Chs 421
Addictions
An integrated biophysical model of addiction and recovery is described. Approaches to assessment, treatment and relapse prevention are covered.

Chs 422
Substance-Abuse Education
Design, implementation, and evaluation of substance-abuse education and prevention programs.

Chs 423
Legal and Health Aspects of Substance Abuse
Legal and health consequences of substance abuse are examined. Special attention is given to the role of family dynamics, recovery process, dual disorders and ethics in the counseling process.

Chs 439
Psychology and Spirituality
This course will assist students in understanding various models of spirituality and their potential integration into the counseling process. Critical reflection on a variety of diverse spiritual perspectives and their implications for human services practice is encouraged. Current research in the area of spirituality and counseling is examined.

Chs 440
Job Development
An awareness of the changing world of work will be the backdrop for job analysis, labor-market surveys; vocational adjustment, job development and job placement. Students will be exposed to both traditional and current models of employ-
The department’s programs are accredited by the Pennsylvania Department of Education. The University’s Professional Education Unit is also accredited with probation by the National Council for Accreditation of Teacher Education (NCATE). Accreditation and interstate agreements between Pennsylvania and selected states assure that courses taken will be considered for certification in most states. Praxis Series I & II tests are required for Pennsylvania Teacher Certification. Students are accepted to the University as Education Majors, but progress beyond 48 credits may occur only upon application for Teacher Candidate status. Materials necessary for the application process include doctor and advisor recommendations, completion of specific courses, and passing scores on the appropriate Praxis Series I tests as required by the Pennsylvania Department of Education. Completing the application process will admit the education major to Teacher Candidacy and permit the student to engage in junior-level course work. Materials necessary for the application are available from the Education Department and Panuska College Advising Center.

A student may enter the Secondary Education program either as a major in Education or as a major in an academic department with a second major in Education. However, in both cases the student must be approved by the department and follow the prescribed courses if the student desires certification. Registration into Education Department courses numbered 230 and above are limited to majors or second majors in the programs of the Education Department. Exceptions require the expressed permission of the Assistant Dean and Chair of the department. All aspects of the state-approved program must be completed to ensure recommendation for certification.

Double majors, including both a subject area and major courses, are approved by the department and follow the prescribed courses if the student desires certification. Completion of the state-approved program must be completed to ensure recommendation for certification. 

Education majors are required to submit a complete clearances record prior to being placed at any field experience site that would put them in direct contact with children, including the Reading Clinic in the Education Department. The Education Department requires this clearance on behalf of the school entity where the field experience will occur. Copies of completed clearances should be submitted with field-experience application forms required by the Director of Field Placement. In no case will a student be provided with placement information previous to the instructor’s acknowledgement of current clearances.

Students are encouraged to maintain artifacts of their professional experiences as they progress through their teacher training. Upon completion of the student teaching experience, students are required to submit an e-portfolio that documents these professional experiences.

Due to Pennsylvania Department of Education mandates, changes in teacher education programs may require changes to curricular requirements for all of the education programs. The following outline presents the criteria for admission into candidacy for certification after the student has completed at least 48 semester hours.

**Education Certification Candidacy**

**Track – Admission to Teacher Education Programs**

1. Verification of at least 48 semester hours that include the required 6 semester hours of mathematics and the required 6 semester hours of English.
2. Verification of a 3.0 GPA or higher.
3. Official ACT 34/151 clearances.
4. Completion of the following courses, with a minimum grade of C in teaching area and major courses:
   - **EDUC 121 Foundations of Education**
   - **EDUC 180 Field Experience I**
   - **EDUC 280 Field Experience II**
   - **ENLT 103 Children’s Literature**
     (Secondary Education majors may substitute any ENLT course)
   - **WRTG 107 Composition**
   - Three semester credit hours of mathematics that must include one of the following:
     - **MATH 204 Special Topics in Statistics**
     - **PSYC 210 Statistics in the Behavioral Sciences**
     - **EDUC 120 Applied Statistics**
     - **PS 240 Political Science Statistics**
     - **SJC 215 Statistics for the Social Sciences**
   - Three semester credit hours of mathematics that must include one of the following:
     - **MATH 106 Quantitative Methods**
     - **MATH 201 Algebra and Environmental Issues**
5. Passing scores on the Praxis Series I examinations.
6. Completed recommendations from faculty in the following courses:
   - **EDUC 121 Foundations of Education**
   - **EDUC 180 Field Experience I**
   - **EDUC 280 Field Experience II**

*Requirements may differ for students pursuing certification in mathematics or the sciences.*
Overview
The Education Department endeavors to contribute to the improvement of education by preparing informed, inquiring, and skilled professionals who, as scholars and decision makers, are prepared for positions in the educational community. More specifically, the department aims to provide persons with a breadth and depth of knowledge and understanding in their specialized areas of professional practice and to provide training to ensure competence in the specific area of functioning. To this end, individual program competencies have been developed. Additionally, the department endeavors to offer opportunities for continued professional growth to practicing educators, to assist in the educational growth and development of the community served by the University, and to foster the advancement of knowledge through research in education.

The Education Department offers degrees in Early Childhood, Elementary, Secondary and Special Education, each leading to state certification. Secondary Education concentrations include: Biology, Chemistry, Citizenship, Communication, English, French, and Elementary Education leads to state certification (K-6), and Early Childhood Education leads to state certification (pre-K-3).

The department’s programs are accredited by the Pennsylvania Department of Education. The University’s Professional Education Unit is also accredited with probation by the National Council for Accreditation of Teacher Education (NCATE). Accreditation and interstate agreements between Pennsylvania and selected states assure that courses taken will be considered for certification in most states. Praxis Series I & II tests are required for Pennsylvania Teacher Certification. Students are accepted to the University as Education Majors, but progress beyond 48 credits may occur only upon application for Teacher Candidate status. Materials necessary for the application process include official transcripts, recommendations, completion of specific courses, and passing scores on the appropriate Praxis Series I tests as required by the Pennsylvania Department of Education. Completing the application process will admit the education major to Teacher Candidacy and permit the student to work in junior-level course work. Materials necessary for the application are available from the Education Department and Panuska College Advising Center.

A student may enter the Secondary Education program either as a major in Education or as a major in an academic department with a secondary Education concentration. However, in both cases the student must be approved by the department and follow the prescribed courses if the student desires certification. Registration into Education Department courses numbered 230 and above are limited to majors or second majors in the programs. The following outline presents the criteria for admission into candidacy for certification mandates, changes in teacher education programs. The following outline presents the criteria for admission into candidacy for certification mandates, changes in teacher education programs.

1. Verification of at least 48 semester hours that include the required 6 semester hours of mathematics and the required 6 semester hours of English.
2. Verification of a 3.0 GPA or higher.
3. Official ACT 34/151 clearances.
4. Completion of the following courses, with a minimum grade of C in teaching area and major courses:
   - EDUC 121 Foundations of Education
   - EDUC 180 Field Experience I
   - EDUC 280 Field Experience II
   - ENLT 103 Children’s Literature
   - WRTG 107 Composition
   - Three semester credit hours of mathematics that must include one of the following:*  
     - MATH 204 Special Topics of Statistics
     - PSYC 210 Statistics in the Behavioral Sciences
     - EDUC 120 Applied Statistics
     - PS 240 Political Science Statistics
     - SJC 215 Statistics for the Social Sciences

Three semester credit hours of mathematics that must include one of the following:*

5. Passing scores on the Praxis Series I examinations.
6. Completed recommendations from faculty in the following courses:
   - EDUC 121 Foundations of Education
   - EDUC 180 Field Experience I
   - EDUC 280 Field Experience II

* Requirements may differ for students pursuing certification in mathematics or the sciences.
Freshman and sophomore students will confer with their academic advisors in order to plan the sequence of courses that will be taken for each term. Entering freshmen will be given the new program requirements prior to orientation. All the courses mentioned above will be a part of the new programs.

Federal regulations in the Higher Education Act of 1998 require that departments of teacher education report their students' performance on the Praxis Series examinations. An analysis of the results from the most recent academic year is available from the Chair of the Education Department.

Course Descriptions

The Education Department ordinarily does not permit students to take courses concurrently with the student-teaching sequence. Students seeking deviations from this policy must complete a form requiring the approvals of the advisor, the appropriate program director, the department chairperson, and the dean. Student teaching requires application, which must be submitted to the appropriate advisor and approved by the program director, prior to registration for the student teaching semester. Completed Act 34 and Child Abuse History Clearance forms are required previous to receiving a field assignment.

EDUC 110 3 cr.
Values Development
A course designed to acquaint the student with theories relating to value development: what values are, and how they are formed. The affective process, value systems, activities for value development suitable for use by parents, teachers and others involved in human relations will be covered. Open to all majors.

EDUC 113 3 cr.
Reading-Research
A course designed to increase a student’s proficiency in reading and research. The following skill areas will be covered: comprehension, vocabulary, expression, critical analysis, library and study skills. Students will be required to develop minimum computer competencies. Lecture and laboratory approaches are utilized with the emphasis on individualized instruction.

EDUC 120 3 cr.
(Q,W) Applied Statistics
(Prerequisite: WRTG 107) This course is designed to enable students to use statistics to solve problems and to communicate clearly the procedures employed and the results obtained. Students will be required to perform statistical computations and to write as a means of learning the course material. Topics covered include hypothesis testing, correlation, t-test and Chi-square test.

EDUC 121 3 cr.
The Foundations of Education
This course is designed to examine the characteristics of the public school system in the United States, the role of education in contemporary society, and current issues related to education.

EDUC 131 3 cr.
(D) Experiencing Cultural Diversity through Children's Literature
A course designed to introduce students to the diversity of cultures represented in children’s literature as a way to identify and differentiate the variety of cultures that they may encounter as teachers.

EDUC 180 1 cr.
Field Experience I
(Pre- or co-requisite: EDUC 121) This course prepares for field-experience requirements in EDUC 280 and 380. It focuses on the development of observation and reflective skills through case studies, vignettes and video situations.

EDUC 222 3 cr.
(W) Educational Psychology
This course examines the psychological basis of teaching strategies, classroom environment, learning, motivation, reinforcement, and evaluation.

EDUC 226 3 cr.
Secondary, Transitional and Vocational Services
The role of the special-education teacher in implementing and assessing strategies and services for the disabled student. Emphasis is placed upon the role of the special-education professional as an advocate for the disabled student in accessing school, community, state, and federal resources.

EDUC 241 3 cr.
Foundations of Reading Instruction
This basic course in reading provides an introduction to reading instruction, reading programs, and the reading process as it relates to language acquisition and learning to read. The readiness, reading skills, techniques and methods essential for effective reading will be examined. Completed Act 34 and Child Abuse clearance required. Includes service-learning component.

EDUC 244 3 cr.
Planning Effective Elementary Instruction
(Prerequisite: EDUC 222) This course prepares the elementary major with the research-based tools and strategies required to prepare lesson and long-term planning, consistent with best practice, for exemplary instruction in the classroom. Particular attention will be paid to alignment of objectives and assessment consistent with the Pennsylvania Academic Standards.

EDUC 251 3 cr.
Development of the Early Learner
This course focuses on the development of the early learner, birth through age eight. Psycho-motor, affective and cognitive development, as well as special-needs children, will be studied. Theory to practice linkages will be stressed. An observation component is part of the course expectation.

EDUC 252 3 cr.
Assessment in Early Childhood Education
(Prerequisite: EDUC 251) This course focuses on strategies, methods, and instruments for assessing the early learner’s development in the cognitive, psycho-motor, and affective domains. Theory-to-practice linkages will be stressed. An observation component is part of the course expectation.

EDUC 256 3 cr.
Family and Community Relations
This course prepares the early childhood teacher with the strategies and communication skills necessary to build positive relationships with colleagues within the school and agencies in the larger communities that can contribute to the well-being of each student in order to realize the full developmental potential of each child. An observation component is part of the course expectation.

EDUC 280 1 cr.
Field Experience II
(Prerequisites: EDUC 121 and 180; pre- or co-requisite: EDUC 222) The course is closely associated with EDUC 222. Projects will be assigned to be carried out in basic education schools and other agencies through observation, assisted instruction and oral/written reports. Application to field director and completed Act 34 and Child Abuse clearance required.

ED/P 306 3 cr.
(P) Philosophy of Education
An examination of representative modern systems, philosophical foundations of education with a critical analysis of the answers that each system of philosophy provides to the important questions concerning the nature of knowledge, value, man and society.

EDUC 310 1-3 cr.
Special Topics in Education
A series of courses dealing with specific educational issues, theories, ideologies, skills, methods, or other designated topics for individual or group study. Course is offered in accord with student need.

EDUC 312 3 cr.
The Secondary School Mathematics Curriculum
(Pre-requisite: EDUC 313) This course examines the strategies and content of mathematics curricula in the secondary school and attempts to compare them to major contemporary reform efforts. The course includes a review of secondary-school (junior and senior high school) mathematics.

EDUC 313 3 cr.
General Methods and Planning
(Prerequisite: EDUC 222; pre- or co-requisite: EDUC 380) Methodology for setting direction in the classroom, creating a learning situation, developing the content, reinforcing and evaluating will be covered. Students will be involved with developing plans for teaching.
Freshman and sophomore students will confer with their academic advisors in order to plan the sequence of courses that will be taken for each term. Entering freshmen will be given the new program requirements prior to orientation. All the courses mentioned above will be a part of the new programs.

Federal regulations in the Higher Education Act of 1998 require that departments of teacher education report their students' performance on the Praxis Series examinations. An analysis of the results from the most recent academic year is available from the chair of the Education Department.

Course Descriptions

The Education Department ordinarily does not permit students to take courses concurrently with the student-teaching sequence. Students seeking deviations from this policy must complete a form requiring the approvals of the advisor, the appropriate program director, the department chairperson, and the dean. Student teaching requires application, which must be submitted to the appropriate advisor and approved by the program director, prior to registration for the student teaching semester. Completed Act 34 and Child Abuse History Clearance forms are required previous to receiving a field assignment.

EDUC 110 3 cr.
Values Development
A course designed to acquaint the student with theories relating to value development: what values are, and how they are formed. The affective process, value systems, activities for value development suitable for use by parents, teachers and others involved in human relations will be covered. Open to all majors.

EDUC 113 3 cr.
Reading-Research
A course designed to increase a student’s proficiency in reading and research. The following skill areas will be covered: comprehension, vocabulary, expression, critical analysis, library and study skills. Students will be required to develop minimum computer competencies. Lecture and laboratory approaches are utilized with the emphasis on individualized instruction.

EDUC 120 3 cr.
(Q,W) Applied Statistics
(Prerequisite: WRTG 107) This course is designed to enable students to use statistics to solve problems and to communicate clearly the procedures employed and the results obtained. Students will be required to perform statistical computations and to write as a means of learning the course material. Topics covered include hypothesis testing, correlation, t-test and Chi-square test.

EDUC 121 3 cr.
The Foundations of Education
This course is designed to examine the characteristics of the public school system in the United States, the role of education in contemporary society, and current issues related to education.

EDUC 131 3 cr.
(D) Experiencing Cultural Diversity through Children’s Literature
A course designed to introduce students to the diversity of cultures represented in children’s literature as a way to identify and differentiate the variety of cultures that they may encounter as teachers.

EDUC 180 1 cr.
Field Experience I
(Pre- or co-requisite: EDUC 121) This course prepares for field-experience requirements in EDUC 280 and 380. It focuses on the development of observation and reflective skills through case studies, vignettes and video situations.

EDUC 222 3 cr.
(W) Educational Psychology
This course examines the psychological basis of teaching strategies, classroom environment, learning, motivation, reinforcement, and evaluation.

EDUC 226 3 cr.
Secondary, Transitional and Vocational Services
The role of the special-education teacher in designing and implementing transitional and vocational services for the disabled student. Emphasis is placed upon the role of the special-education professional as an advocate for the disabled student in accessing school, community, state, and federal resources.

EDUC 241 3 cr.
Foundations of Reading Instruction
This basic course in reading provides an introduction to reading instruction, reading programs, and the reading process as it relates to language acquisition and learning to read. The readiness, reading skills, techniques and methods essential for effective reading will be examined. Completed Act 34 and Child Abuse clearance required. Includes service-learning component.

EDUC 244 3 cr.
Planning Effective Elementary Instruction
(Prerequisite: EDUC 222) This course prepares the elementary major with the research-based tools and strategies required to prepare lesson and long-term planning, consistent with best practice, for exemplary instruction in the classroom. Particular attention will be paid to alignment of objectives and assessment consistent with the Pennsylvania Academic Standards.

EDUC 251 3 cr.
Development of the Early Learner
This course focuses on the development of the early learner, birth through age eight. Psychomotor, affective and cognitive development, as well as special-needs children, will be studied. Theory to practice linkages will be stressed. An observation component is part of the course expectation.

EDUC 252 3 cr.
Assessment in Early Childhood Education
(Prerequisite: EDUC 251) This course focuses on strategies, methods, and instruments for assessing the early learner’s development in the cognitive, psychomotor, and affective domains. Theory-to-practice linkages will be stressed. An observation component is part of the course expectation.

EDUC 254 3 cr.
Family and Community Relations
This course prepares the early childhood teacher with the strategies and communication skills necessary to build positive relationships with colleagues within the school and agencies in the larger communities that can contribute to the well-being of each student in order to realize the full developmental potential of each child. An observation component is part of the course expectation.

EDUC 256 3 cr.
Assessment Practicum
(Prerequisite: EDUC 265) Students obtain hands-on experience in the assessment of special-needs students and adults.

EDUC 265 3 cr.
Special Education Educational Assessment
This course focuses on the strategies, methods, and instruments for assessing the disabled student’s development in the cognitive, psychomotor, and affective domains. Theory-to-practice linkages will be stressed. An observation component is part of the course expectation.

EDUC 267 3 cr.
Learning Disabilities
This course provides an introduction to learning disabilities. Definitions, current theories, etiological bases, and educational management of students with learning disabilities and/or hyperactivity and attention deficit will be emphasized.

EDUC 280 1 cr.
Field Experience II
(Prerequisites: EDUC 121 and 180; pre- or co-requisite: EDUC 222) The course is closely associated with EDUC 222. Projects will be assigned to be carried out in basic education schools and other agencies through observation, assisted instruction and oral/written reports. Application to field director and completed Act 34 and Child Abuse clearance required.

ED/P 306 3 cr.
(P) Philosophy of Education
An examination of representative modern systems of philosophy of education with a critical analysis of the answers that each system of philosophy provides to the important questions concerning the nature of knowledge, value, man and society.

EDUC 310 1-3 cr.
Special Topics in Education
A series of courses dealing with specific educational issues, theories, ideologies, skills, methods, or other designated topics for individual or group study. Course is offered in accord with student need.

EDUC 312 3 cr.
The Secondary School Mathematics Curriculum
(Prerequisite: EDUC 313) This course examines the strategies and content of mathematics curricula in the secondary school and attempts to compare them to major contemporary reform efforts. The course includes a review of secondary-school (junior and senior high school) mathematics.

EDUC 313 3 cr.
General Methods and Planning
(Prerequisite: EDUC 222; pre- or co-requisite for EDUC 380) Methodology for setting direction in the classroom, creating a learning situation, developing the content, reinforcing and evaluating will be covered. Students will be involved with developing plans for teaching.
EDUC 314 3 cr.
Specific Subject Methods
(Prerequisite: EDUC 313) Utilizing knowledge of planning and teaching, students are guided in the analysis of specific content and techniques for teaching that content. They will demonstrate their ability to carry out plans in “micro” teaching experiences. Includes service-learning component.

EDUC 340 3 cr.
Reading in the Secondary School
This course is the study of the reading process with emphasis placed on understanding and skills needed by secondary school students in their subject fields.

EDUC 341 3 cr.
The Education of the Exceptional Child
A general view of the field; historical background – both philosophical and legislative. A survey of physical, mental, and emotional handicaps and of giftedness, along with remedial and preventive practices with a look at the future.

EDUC 342 3 cr.
Educational Media and Technology
A course in which students are expected to produce media appropriate for classroom use. The student is also expected to exhibit competency in the use of common education media equipment and the uses of computers. Students will also be introduced to modern and future forms of media technology appropriate for the classroom teacher.

EDUC 343 3 cr.
Evaluation and Measurement
This course acquaints prospective teachers with the various facets of test interpretation and test construction. Standardized achievement, diagnostic, and aptitude tests will be covered, along with teacher-made objective and essay tests. Emphasis will be placed on constructing valid and reliable tests by the teacher. The use and misuse of standardized tests and teacher-made tests will be discussed.

EDUC 348 4 cr.
Integrated Methods: Elementary Math/Science
(Prerequisite: EDUC 244) This course is designed to provide the elementary education major with planning and instructional strategies necessary for exemplary language and mathematics instruction in both distinct and integrated methods of delivery. An analysis of similarities and differences in content and standards within these disciplines will guide the study. Includes service-learning component.

EDUC 349 4 cr.
Integrated Methods: Elementary Language Arts/Social Studies
(Prerequisite: EDUC 244) This course is designed to provide the elementary education major with planning and instructional strategies necessary for exemplary language arts and social studies instruction in the classroom. Attention will be paid to those strategies that might be used for integrated instruction as well as instruction of each area as separate and distinct disciplines.

EDUC 354 4 cr.
Integrated Methods: Early Childhood
Math/Science/Health
(Prerequisite: EDUC 251; pre- or co-requisites: EDUC 252 and 256) This course provides instruction strategies necessary for instructional sequences which integrate science, health and mathematics content and experiences for young learners.

EDUC 356 4 cr.
Integrated Methods: Early Childhood Education Social Studies/Language/Expressive Arts
(Prerequisite: EDUC 251; pre- or co-requisites: EDUC 252 and 256) This course provides instructional strategies necessary for instructional sequences which integrate language arts, expressive arts and social studies content and experiences for young learners. Includes service-learning component.

EDUC 357 3 cr.
Integrated Early Childhood Education Methods (0-5 y.o.)
(Prerequisite: EDUC 251, 348, 349; pre- or co-requisites: EDUC 252 and 256) This course is designed to explore methods for creating a pre-school environment that invites young children to discover learning through a differentiated, creative and integrated curriculum. An observation component is part of the course expectation.

EDUC 362 3 cr.
Psycholinguistics
This course is designed to examine the language development in children as well as correlation between language and cognition. Particular attention will be given to designing educational environments and interactions that facilitate language development in children.

EDUC 364 3 cr.
(D) Inclusionary Classroom Practices
Emphasis is placed on the special-education teacher as one member of an educational team. Students will receive guidance in supporting the

disabled student in a general-education classroom, supporting the general-education teacher in providing instruction for the disabled child, and generally facilitating the acceptance and optimal learning of the disabled student in a general-education environment. Includes service-learning component.

EDUC 365 3 cr.
Professional Seminar
Focuses on the special educator as one team member in a larger professional group which may include administrators, ancillary staff, parents, and other professionals. Students will learn to write IEPs, transitional plans, and school-based grant proposals. Students will receive guidance in constructing a portfolio and in case management.

EDUC 366 3 cr.
Emotional/Behavioral Disabilities
A study of the problems associated with emotional and behavioral disabilities in the classroom. Emphasis is placed on behavior management and appropriate learning strategies for inclusive general-education classes, self-contained special-education classes, and residential placements.

EDUC 367 3 cr.
Designing Curriculum for Low Incidence Disabilities
Emphasis is on the effective design and use of curriculum and materials to educate elementary students with special needs.

EDUC 368 3 cr.
Designing Curriculum for High Incidence Disabilities
Emphasis is on the effective design and use of curriculum and materials to educate secondary students with special needs.

EDUC 369 3 cr.
Early Assessment and Intervention
This course focuses on the development of the early learner, birth through age eight, along with appropriate assessment and intervention techniques for children falling under the IDEA.

EDUC 380 1 cr.
Field Experience III
(Prerequisites: EDUC 244 and 280; pre- or co-requisite: EDUC 313) This course is closely associated with the methods courses. An emphasis is placed on studying teaching techniques and involvement in teacher activities in basic-education schools. Application to field director and completed Act 34 and Child Abuse clearance required.

EDUC 440 3 cr.
Professional Practice Seminar
In-depth study of the rationales, theories, and techniques for creating a situation where learning can take place and for handling specific individual and group behavior problems in productive ways.

EDUC 441* 2 cr.
Planning in Elementary Student Teaching
Preparation of actual teaching plans during elementary student teaching. Application to field director required.

EDUC 442 3 cr.
Instruction in Elementary Student Teaching
Involvement in implementing methods and techniques. Elementary-school student teaching on a full-time basis under the supervision of classroom teachers and University supervisors.

EDUC 443 2 cr.
Managing Elementary Classrooms in Student Teaching
Involvement in the management of learning situations during elementary student teaching.

EDUC 444 3 cr.
Professional Growth in Elementary Student Teaching
The demonstration of professional growth during student teaching as evidenced by professional behavior and skills, a commitment to improvement, and ability to relate to others. This will include attendance at and participation in a weekly seminar to analyze and discuss professional considerations and student-teaching problems. Includes service-learning component.

EDUC 451* 5 cr.
Early Childhood Education Student Teaching
This course is a high-intensity practicum in a pre-K classroom. Assignment by the Education Department requires completion of an application process. Attendance at weekly seminars is required. This course must be preceded or followed by Elementary Student Teaching if state certification is being pursued. A grade of C or higher is required for endorsement of certification applications.

*Student teaching requires an application due March 1 or October 1 for fall and spring placements, respectively. Completed Act 34 and Child Abuse clearance required.
EDUC 314  3 cr.
Specific Subject Methods
(Prerequisite: EDUC 313) Utilizing knowledge of planning and teaching, students are guided in the analysis of specific content and techniques for teaching that content. They will demonstrate their ability to carry out plans in "micro" teaching experiences. Includes service-learning component.

EDUC 340  3 cr.
Reading in the Secondary School
This course is designed to study the reading process with emphasis placed on understanding and skills needed by secondary school students in their subject fields.

EDUC 341  3 cr.
The Education of the Exceptional Child
A general view of the field; historical background - both philosophical and legislative. A survey of physical, mental, and emotional handicaps and of giftedness, along with remedial and preventive practices with a look at the future.

EDUC 342  3 cr.
Educational Media and Technology
A course in which students are expected to produce media appropriate for classroom use. The student is also expected to exhibit competency in the use of common education media equipment and the uses of computers. Students will also be introduced to modern and future forms of media technology appropriate for the classroom teacher.

EDUC 343  3 cr.
Evaluation and Measurement
This course acquaints prospective teachers with the various facets of test interpretation and test construction. Standardized achievement, diagnostic, and aptitude tests will be covered, along with teacher-made objective and essay tests. Emphasis will be placed on constructing valid and reliable tests by the teacher. The use and misuse of standardized tests and teacher-made tests will be discussed.

EDUC 348  4 cr.
Integrated Methods: Elementary Math/Science
(Prerequisite: EDUC 244) This course is designed to provide the elementary education major with planning and instructional strategies necessary for exemplary language arts and social studies instruction in the classroom. Attention will be paid to those strategies that might be used for integrated instruction as well as instruction of each area as separate and distinct disciplines.

EDUC 349  4 cr.
Integrated Methods: Elementary Language Arts/Social Studies
(Prerequisite: EDUC 244) This course is designed to provide the elementary education major with planning and instructional strategies necessary for exemplary language arts and social studies instruction in the classroom. Attention will be paid to those strategies that might be used for integrated instruction as well as instruction of each area as separate and distinct disciplines.

EDUC 354  4 cr.
Integrated Methods: Early Childhood Education Math/Science/Health
(Prerequisite: EDUC 251; pre- or co-requisites: EDUC 252 and 256) This course provides instructional strategies necessary for instructional sequences which integrate science, health and mathematics content and experiences for young learners.

EDUC 355  4 cr.
Integrated Methods: Early Childhood Education Social Studies/Language/Expressive Arts
(Prerequisite: EDUC 251; pre- or co-requisites: EDUC 252 and 256) This course provides instructional strategies necessary for instructional sequences which integrate language arts, expressive arts and social studies content and experiences for young learners. Includes service-learning component.

EDUC 357  3 cr.
Integrated Early Childhood Education Methods (0-5 y.o.)
(Prerequisite: EDUC 251, 348, 349; pre- or co-requisites: EDUC 252 and 256) This course is designed to explore methods for creating a pre-school environment that invites young children to discover learning through a differentiated, creative and integrated curriculum. An observation component is part of the course expectation.

EDUC 362  3 cr.
Psycholinguistics
This course is designed to examine the language development in children as well as correlation between language and cognition. Particular attention will be given to designing educational environments and interactions that facilitate language development in children.

EDUC 364  3 cr.
(D) Inclusionary Classroom Practices
Emphasis is placed on the special-education teacher as one member of an educational team. Students will receive guidance in supporting the disabled student in a general-education classroom, supporting the general-education teacher in providing instruction for the disabled child, and generally facilitating the acceptance and optimal learning of the disabled student in a general-education environment. Includes service-learning component.

EDUC 365  3 cr.
Professional Seminar
Focuses on the special educator as one team member in a larger professional group which may include administrators, ancillary staff, parents, and other professionals. Students will learn to write IEPs, transitional plans, and school-based grant proposals. Students will receive guidance in constructing a portfolio and in case management.

EDUC 366  3 cr.
Emotional/Behavioral Disabilities
A study of the problems associated with emotional and behavioral disabilities in the classroom. Emphasis is placed on behavior management and appropriate learning strategies for inclusionary general-education classes, self-contained special-education classes, and residential placements.

EDUC 367  3 cr.
Designing Curriculum for Low Incidence Disabilities
Focus on the design and use of curriculum and materials to educate elementary students with special needs.

EDUC 368  3 cr.
Designing Curriculum for High Incidence Disabilities
Focus on the design and use of curriculum and materials to educate secondary students with special needs.

EDUC 369  3 cr.
Early Assessment and Intervention
This course focuses on the development of the early learner, birth through age eight, along with appropriate assessment and intervention techniques for children falling under the IDEA.

EDUC 380  1 cr.
Field Experience III
(Prerequisites: EDUC 244 and 280; pre- or co-requisite: EDUC 313) This course is closely associated with the methods courses. An emphasis is placed on studying teaching techniques and involvement in teacher activities in basic-education schools. Application to field director and completed Act 34 and Child Abuse clearance required.

EDUC 440, 441, 442, 443 and 444 must be scheduled during the same semester. Collectively, they comprise a semester of student teaching.

EDUC 440  3 cr.
Professional Practice Seminar
In-depth study of the rationale, theories, and techniques for creating a situation where learning can take place and for handling specific individual and group behavior problems in productive ways.

EDUC 441*  2 cr.
Planning in Elementary Student Teaching
Preparation of actual teaching plans during elementary student teaching. Application to field director required.

EDUC 442  3 cr.
Instruction in Elementary Student Teaching
Involvement in implementing methods and techniques. Elementary-school student teaching on a full-time basis under the supervision of classroom teachers and University supervisors.

EDUC 443  2 cr.
Managing Elementary Classrooms in Student Teaching
Involvement in the management of learning situations during elementary student teaching.

EDUC 444  3 cr.
Professional Growth in Elementary Student Teaching
The demonstration of professional growth during student teaching as evidenced by professional behavior and skills, a commitment to improvement, and ability to relate to others. This will include attendance at and participation in a weekly seminar to analyze and discuss professional considerations and student-teaching problems. Includes service-learning component.

EDUC 451*  5 cr.
Early Childhood Education Student Teaching
This course is a high-intensity practicum in a pre-K classroom. Assignment by the Education Department requires completion of an application process. Attendance at weekly seminars is required. This course must be preceded or followed by Elementary Student Teaching if state certification is being pursued. A grade of C or higher is required for endorsement of certification applications.

*Student teaching requires an application due March 1 or October 1 for fall and spring placements, respectively. Completed Act 34 and Child Abuse clearance required.
EDUC 463 2 cr.  Managing Special Education Student Teaching Instruction  
Involvement in the management of learning situations during special-education student teaching.

EDUC 464 3 cr.  Professional Growth in Special Education Student Teaching  
The demonstration of professional growth during student teaching as evidenced by professional behavior and skills, a commitment to improvement, and ability to relate to others. This will include attendance at and participation in a weekly seminar to analyze and discuss professional considerations and student-teaching problems. Includes service-learning component.

EDUC 465 3 cr.  Instruction in Special Education Student Teaching  
Involvement in implementing methods and techniques. Special-education student teaching on a full-time basis under the supervision of classroom teachers and University supervisors.

EDUC 466 3 cr.  Planning in Special Education Student Teaching  
Preparation of actual teaching plans during special-education student teaching. Application to field director required.

EDUC 467 3 cr.  Instruction in Secondary Student Teaching  
Involvement in implementing methods and techniques. Secondary student teaching on a full-time basis under the supervision of classroom teachers and University supervisors.

EDUC 468 2 cr.  Managing Classrooms in Secondary Student Teaching  
Involvement in the management of learning situations during secondary student teaching.

EDUC 469 3 cr.  Professional Growth in Secondary Student Teaching  
The demonstration of professional growth during student teaching as evidenced by professional behavior and skills, a commitment to improvement, and ability to relate to others. This will include attendance and participation in a weekly seminar to analyze and discuss professional considerations and student-teaching problems. Includes service-learning component.

EDUC 470* 2 cr.  Planning in Early Childhood Student Teaching  
Preparation of actual teaching plans during early childhood student teaching. Application to field director required. Includes service-learning component.

EDUC 471* 2 cr.  Early Childhood Education  
Preparation of actual teaching plans during early-childhood student teaching. Application to field director required.

EDUC 472* 3 cr.  Professional Growth in Early Childhood Student Teaching  
The demonstration of professional growth during student teaching as evidenced by professional behavior and skills, a commitment to improvement, and ability to relate to others. This will include attendance and participation in a weekly seminar to analyze and discuss professional considerations and student-teaching problems. Includes service-learning component.

EDUC 473 2 cr.  Managing Special Education Student Teaching Instruction  
Involvement in the management of learning situations during special-education student teaching.

EDUC 474 3 cr.  Professional Growth in Special Education Student Teaching  
The demonstration of professional growth during student teaching as evidenced by professional behavior and skills, a commitment to improvement, and ability to relate to others. This will include attendance and participation in a weekly seminar to analyze and discuss professional considerations and student-teaching problems. Includes service-learning component.

EDUC 475 3 cr.  Secondary Classroom Management and Discipline  
In-depth study of the rationale, theories, and techniques for creating a situation where learning can take place and for handling specific individual and group behavior problems in productive ways.

EDUC 476* 2 cr.  Professional Practice Seminar  
Application to field director required.

EDUC 477 3 cr.  Instruction in Secondary Student Teaching  
Involvement in implementing methods and techniques. Secondary student teaching on a full-time basis under the supervision of classroom teachers and University supervisors.

EDUC 478 2 cr.  Managing Classrooms in Secondary Student Teaching  
Involvement in the management of learning situations during secondary student teaching.

EDUC 479 3 cr.  Professional Growth in Secondary Student Teaching  
The demonstration of professional growth during student teaching as evidenced by professional behavior and skills, a commitment to improvement, and ability to relate to others. This will include attendance and participation in a weekly seminar to analyze and discuss professional considerations and student-teaching problems. Includes service-learning component.

\*Student teaching requires an application due March 1 or October 1 for fall and spring placements, respectively. Completed Act 34 and Child Abuse clearance required.

TOTAL: 134-135 CREDITS

1 Includes service-learning component. Freshman Seminar service commitment is 20 hours, with no service requirement in sophomore year.
2 Second Year/English majors may complete a second major in English. English majors at The University of Scranton are required to take at least four courses in British literature and at least two in American literature. These appear above as “Area Requirements”; for further details, students should see page 136 and/or consult their English Department advisors.
3 Students who have not already done so must complete the English Department’s Theory Intensive Requirement.
4 Semesters may be reversed at the discretion of the department.

Majors in Exercise Science, a minor in Coaching and physical education activity classes.

Exercise Science Major

Exercise Science is the study of human movement as related to exercise, sport, and physical activity. It is dedicated to promoting and integrating scientific research and education on the effects and benefits of exercise, and to the delivery of physical-activity programs that prevent disease, facilitate rehabilitation, promote health, and enhance human performance. Exercise Science is part of the field of Sports Medicine which also includes clinical areas of study. The scientific aspects of Sports Medicine include exercise physiology, biochemistry of exercise, and biomechanics. Testing of maximal oxygen consumption and lactic acid metabolism, analysis of muscle fatigue, research on muscle hypertrophy and bone density, measurement of body composition, and benefits of exercise in cardiovascular disease, diabetes and weight control are a few of the many contributions made by exercise scientists to Sports Medicine.

Few academic program majors offer such diverse opportunities after graduation as Exercise Science. The academically rigorous curriculum prepares graduates with knowledge and experience for employment opportunities in a variety of settings. In the applied health area, careers in corporate and community/hospital-based wellness programs, cardiopulmonary rehabilitation, and research centers investigating the benefits of exercise in spinal-cord injury are possibilities. Sports physiologists and strength and conditioning specialists for sports teams are also career options.

Exercise Science is an excellent option for students interested in applying to graduate health-profession programs such as osteopathic medicine, physical therapy, physician assistant, and clinical exercise physiology. Additional required course work to meet entry requirements can be chosen as electives. In this regard, students should make their career intentions known early in their program of study. Opportunities for graduate study are available in academic units of medicine, biology, psychology, and exercise science. Although not required, completion of the program provides students with the ability to take different certification exams offered by several professional organizations including the American College of Sports Medicine.

In order to graduate, Exercise Science majors must maintain an overall 2.5 GPA in major courses. A minimum grade of C (2.0) must be earned in each major and cognate course. Students not receiving a C or better in BIOL 111/111L and EXSC 210 will not be allowed to advance in Exercise Science course work. For each Exercise Science course thereafter, the student must have earned a C in any required prerequisite course.

Coaching Minor

The 15-credit Coaching minor is based on the American Sport Education Program (ASEP) and will help meet the needs of those who wish to coach and work more effectively with young athletes from youth through interscholastic sports.

The course Introduction to PHED 160: Coaching (1 cr.) is a suggested prerequisite for the 3-credit courses.

Physical Education

The Physical Education program seeks to improve the physical-fitness levels of each student, introduce new activities, or improve and integrate existing activities, especially those with carry-over value for post-college years. Every regularly enrolled student must satisfy the 3-credit Physical Education requirement

Overview

The Department of Exercise Science and Sport consists of three areas: a major in Exercise Science, a minor in Coaching and physical education activity classes.

Exercise Science Major

Exercise Science is the study of human movement as related to exercise, sport, and physical activity. It is dedicated to promoting and integrating scientific research and education on the effects and benefits of exercise, and to the delivery of physical-activity programs that prevent disease, facilitate rehabilitation, promote health, and enhance human performance. Exercise Science is part of the field of Sports Medicine which also includes clinical areas of study. The scientific aspects of Sports Medicine include exercise physiology, biochemistry of exercise, and biomechanics. Testing of maximal oxygen consumption and lactic acid metabolism, analysis of muscle fatigue, research on muscle hypertrophy and bone density, measurement of body composition, and benefits of exercise in cardiovascular disease, diabetes and weight control are a few of the many contributions made by exercise scientists to Sports Medicine.

Few academic program majors offer such diverse opportunities after graduation as Exercise Science. The academically rigorous curriculum prepares graduates with knowledge and experience for employment opportunities in a variety of settings. In the applied health area, careers in corporate and community/hospital-based wellness programs, cardiopulmonary rehabilitation, and research centers investigating the benefits of exercise in spinal-cord injury are possibilities. Sports physiologists and strength and conditioning specialists for sports teams are also career options.

Exercise Science is an excellent option for students interested in applying to graduate health-profession programs such as osteopathic medicine, physical therapy, physician assistant, and clinical exercise physiology. Additional required course work to meet entry requirements can be chosen as electives. In this regard, students should make their career intentions known early in their program of study. Opportunities for graduate study are available in academic units of medicine, biology, psychology, and exercise science. Although not required, completion of the program provides students with the ability to take different certification exams offered by several professional organizations including the American College of Sports Medicine.

In order to graduate, Exercise Science majors must maintain an overall 2.5 GPA in major courses. A minimum grade of C (2.0) must be earned in each major and cognate course. Students not receiving a C or better in BIOL 111/111L and EXSC 210 will not be allowed to advance in Exercise Science course work. For each Exercise Science course thereafter, the student must have earned a C in any required prerequisite course.

Coaching Minor

The 15-credit Coaching minor is based on the American Sport Education Program (ASEP) and will help meet the needs of those who wish to coach and work more effectively with young athletes from youth through interscholastic sports.

The course Introduction to PHED 160: Coaching (1 cr.) is a suggested prerequisite for the 3-credit courses.

Physical Education

The Physical Education program seeks to improve the physical-fitness levels of each student, introduce new activities, or improve and increase students’ recreational skills through our offerings of over 30 different courses. Emphasis is placed on instruction in a variety of popular sports and recreational activities, especially those with carry-over value for post-college years.

**EXERCISE SCIENCE AND SPORT**

**Faculty**
Gary N. Woodder, Ph.D., Chair  
Robert M. Bessoir, M.Ed.  
Ronald W. Deitrick, Ph.D., Program Director

**Overview**

The Department of Exercise Science and Sport consists of three areas: a major in Exercise Science, a minor in Coaching and physical education activity classes.

**Exercise Science Major**

Exercise Science is the study of human movement as related to exercise, sport, and physical activity. It is dedicated to promoting and integrating scientific research and education on the effects and benefits of exercise, and to the delivery of physical-activity programs that prevent disease, facilitate rehabilitation, promote health, and enhance human performance. Exercise Science is part of the field of Sports Medicine which also includes clinical areas of study. The scientific aspects of Sports Medicine include exercise physiology, biochemistry of exercise, and biomechanics. Testing of maximal oxygen consumption and lactic acid metabolism, analysis of muscle fatigue, research on muscle hypertrophy and bone density, measurement of body composition, and benefits of exercise in cardiovascular disease, diabetes and weight control are a few of the many contributions made by exercise scientists to Sports Medicine.

Few academic program majors offer such diverse opportunities after graduation as Exercise Science. The academically rigorous curriculum prepares graduates with knowledge and experience for employment opportunities in a variety of settings. In the applied health area, careers in corporate and community/hospital-based wellness programs, cardiopulmonary rehabilitation, and research centers investigating the benefits of exercise in spinal-cord injury are possibilities. Sports physiologist and strength and conditioning specialists for sports teams are also career options.

Exercise Science is an excellent option for students interested in applying to graduate health-profession programs such as osteopathic medicine, physical therapy, physician assistant, and clinical exercise physiology. Additional required course work to meet entry requirements can be chosen as electives. In this regard, students should make their career intentions known early in their program of study. Opportunities for graduate study are available in academic units of medicine, biology, psychology, and exercise science. Although not required, completion of the program provides students with the ability to take different certification exams offered by several professional organizations including the American College of Sports Medicine.

In order to graduate, Exercise Science majors must maintain an overall 2.5 GPA in major courses. A minimum grade of C (2.0) must be earned in each major and cognate course. Students not receiving a C or better in BIOL 111/111L and EXSC 210 will not be allowed to advance in Exercise Science course work. For each Exercise Science course thereafter, the student must have earned a C in any required prerequisite course.

**Coaching Minor**

The 15-credit Coaching minor is based on the American Sport Education Program (ASEP) and will help meet the needs of those who wish to coach and work more effectively with young athletes from youth through interscholastic sports.

The course Introduction to PHED 160: Coaching (1 cr.), is a suggested prerequisite for the 3-credit courses.

**Physical Education**

The Physical Education program seeks to improve the physical-fitness levels of each student, introduce new activities, or improve and increase student recreational skills through our offerings of over 30 different courses. Emphasis is placed on instruction in a variety of popular sports and recreational activities, especially those with carry-over value for post-college years.

Every regularly enrolled student must satisfy the 3-credit Physical Education requirement.
unless excused by the department. It is possible to be excused from Physical Education classes by application to the department if (a) a physician certifies that a student, for medical reasons, should not engage in vigorous physical activity; (b) the department deems it advisable; (c) the student is a veteran. Grading is (S) Satisfactory or (U) Unsatisfactory.

There are a variety of formats for the Physical Education classes; one-half semester for .5 credit, three times per week for 1 credit, two times per week for 1 credit, and one time per week for 1 credit. Students may select from among the following: tennis, yoga, skiing, soccer, racquetball, weight training, aerobics, hapkido, volleyball, running, karate, self-defense for women, advanced life-saving, water-safety instructor, dance, golf, tai chi, badminton, wellness, Latin and swing dance, cardio fitness, beginning/intermediate swimming, fitness swimming, first aid/CPR/AED, karate, wellness, white water rafting and judo.

**Course Descriptions**

**Exercise Science**

(E) NUTR 101 3 cr.

Introduction to Nutrition

An introduction to the interrelationship among nutrition, food and the environment as they impact health. Emphasis is placed on the multiple factors that influence food intake. The role and function of nutrients in health promotion and wellness throughout the life cycle will be discussed.

PHED 203 3 cr.

Prevention and Care of Sports Injuries

(Prerequisite: Exercise Science major) Will cover sports first aid, prevention of and dealing with sports injuries. Helps students become competent first responders in sports emergencies. Students will learn how to recognize and prevent common sports injuries and administer appropriate first aid. Also covers procedures for evaluating and caring for injuries, guidelines for rehabilitation and therapeutic taping.

EXSC 210 3 cr.

Sports Physiology

(Prerequisite: BIOL 110) This course explores the physiological principles and systems underlying sport performance – aerobic and anaerobic energy, oxygen transport, and muscular and cardiovascular systems. Students will learn how to apply the principles to improve human performance. Includes service-learning component.

EXSC 212 3 cr.

Nutrition in Exercise and Sport

(Prerequisites: EXSC 210 or BIOL 347, CHEM 112-113 or permission of instructor) Role of nutrients in optimizing human performance. Consideration of caloric and nutrient exercise requirements, gender-specific needs, weight loss/eating disorders, and nutritional ergogenic aids. Includes service-learning component.

NUTR 220 3 cr.

Nutrition for the Health Professions

(Prerequisites: BIOL 110-111, CHEM 110 or 112; pre- or co-requisite: CHEM 111 or 113) Focus on concepts of nutrition, including chemistry, digestion absorption and metabolism of nutrients. Exploration of the role of diet in chronic illness. Basic nutrition concepts applied to the needs of individuals across the life span, families, and communities.

EXSC 229 3 cr.

Applied Anatomy and Kinesiology

(Prerequisites: BIOL 110-111 and EXSC 210) This course is designed to provide the student with basic scientific information and an understanding of human motion within the areas of anatomy and neuromuscular physiology.

EXSC 313 3 cr.

Biomechanics of Sport and Exercise

(Prerequisites: BIO 110-111, PHYS 120-121 and EXSC 219) This course introduces the student to the concepts and principles of biomechanics as they relate to sport and exercise. Includes service-learning component.

EXSC 360 3 cr.

Essentials of Strength Training and Conditioning

This course examines the advanced methods and techniques associated with the design of strength and conditioning programs to enhance human performance in sport and fitness. The course is designed to enhance students’ current level of knowledge in preparation for the National Strength and Conditioning Association (NSCA) Certified Strength and Conditioning Specialist (CSCS) certification.

EXSC 375 3 cr.

Exercise Testing/Programming for Health and Performance

(Prerequisites: EXSC 210, major in EXSC or permission of instructor) Provides knowledge related to Graded Exercise Testing and counseling, including purposes, basic exercise ECG, principles to improve human performance.
unless excused by the department. It is possible to be excused from Physical Education classes by application to the department if (a) a physician certifies that a student, for medical reasons, should not engage in vigorous physical activity; (b) the department deems it advisable; (c) the student is a veteran. Grading is (S) Satisfactory or (U) Unsatisfactory.

There are a variety of formats for the Physical Education classes; one-half semester for .5 credit, three times per week for 1 credit, two times per week for 1 credit, and one time per week for 1 credit. Students may select from among the following: tennis, yoga, skiing, soccer, racquetball, weight training, aerobics, hapkido, volleyball, running, karate, self-defense for women, advanced life-saving, water safety instructor, dance, golf, tai chi, badminton, wellness, Latin and swing dance, cardio fitness, beginning/intermediate swimming, fitness swimming, first aid/CPR/AED, karate, wellness, white water rafting and judo.

---

PHED 205
Teaching Sports Skills
Students will master the essentials of teaching sports skills and improve their teaching effectiveness. They will learn how to prepare for teaching sports skills, how to introduce, explain, and demonstrate sports skills and use cognitive processes to improve performance.

PHED 208
Conditioning and Training for Sports
(Formerly PHED 210) Students will learn how to design effective, individualized training programs by incorporating training basics such as overload, specificity, adaptation and progression. Will include individual differences among athletes, muscular fitness, energy fitness and performance factors.

PSYC 284
Sports Psychology
(Prerequisite: PSYC 110) This course covers a variety of topics in sports psychology including the learning of athletic skills, principles of motivation, goal-setting and reinforcement. The emotional aspects of sports competition and various strategies for mental preparation for competition such as relaxation, concentration, and attentional skills will be discussed.

William G. Wallick, Ph.D.

Overview
The Health Administration major integrates courses from the field of health and business administration, and is designed to develop in students the values, knowledge and skills needed for management positions in a variety of fields. The curriculum is interdisciplinary, emphasizes knowledge of global health care issues, and includes a minor in business administration. Students are given a broad base of knowledge for securing entry-level positions with public and private agencies, organizations such as hospitals, insurance and managed care companies, pharmaceutical firms, community health and rehabilitation facilities. The curriculum also provides a theoretical foundation for future graduate-level education in various disciplines such as public health, health administration, health policy and planning, gerontology, law school and business administration. The major emphasizes applications to real-world experience by requiring a three credit, 120 hour internship, with a second three-credit elective internship, as well as 10 hours of community service each semester. Opportunities exist for students to identify with and actively participate in the Health Administration profession through an active student association affiliated with the American College of Healthcare Executives (ACHE). The program also offers a five-year, combined BS/MHA for qualified students. Requirements for graduation include a minimum 2.5 GPA in all major courses, as well as a minimum grade of C or better in all cognate courses. A service learning component is integrated into one health administration course each semester. Dexter Hanley College students meet the service-learning requirement by completing major courses that have a service-learning component. The Health Administration program is a full undergraduate member of the Association of University Programs in Health Administration (AUPHA) in Washington, DC.

TOTAL: 15 CREDITS

energy costs of exercise, principles of exercise prescription, special populations, and case study.

EXSC 380 3 cr.
Internship in Exercise Science
(Prerequisites: EXSC 375; majors only) The application of Exercise Science principles, knowledge and skills in a supervised setting. Depending on career interests, students can select from a variety of interest including sites located outside of the Northeast region.

EXSC 412 3 cr.
(W) Current Topics in Exercise Science and Sports Medicine
(Prerequisite: EXSC 210 or BIOL 347 or permission of instructor) Current topics in the field affecting health and human performance including ergogenics, exercise benefits in chronic, disease states, clinical exercise physiology, and gender issues. Includes service-learning component.

EXSC 435 3 cr.
(D) Women in Sport
This course is designed to concentrate on the applied psychological and selected sports medicine concerns of the female athlete, including nutrition, body composition, osteoporosis, specific exercise training, female injuries and training, and psychosocial issues.

EXSC 440 3 cr.
Advanced Physiology of Sport and Exercise
(Prerequisite: Fourth-year standing in Exercise Science) Advanced concepts of human performance as related to sport and exercise including physiological limits, Bioenergetics, fiber type/myoflability of skeletal muscle, cardiovascular dynamics and the athletic heart, and pulmonary ventilation and aerobic performance.

EXSC 442 3 cr.
Clinical Exercise Physiology
(Prerequisite: EXSC 210 or BIOL 347 or permission of instructor) This course covers exercise response and adaptation in a variety of chronic lifestyle diseases and the use of exercise tolerance assessment to improve and optimize quality of life.

EXSC 448 3 cr.
Research Methods in Exercise Science
(Prerequisites: Fourth-year standing in Exercise Science, EXSC 375) Designed for the student to study and gain experience in research related to the field of Exercise Science. The nature of research, methods for acquiring, analyzing, and publishing/presenting research relevant to Exercise Science.

Coaching

PHED 112 1 cr.
First Aid/CPR/AED
This course leads to American Red Cross certification in CPR, First Aid, and Automated External Defibrillation (AED). Prepares students to recognize and respond to respiratory, cardiac, and other emergency situations.

PHED 160 1 cr.
Introduction to Coaching
Prerequisite course which will assist prospective coaches as they develop a positive coaching philosophy, apply coaching principles and use sport management skills.

PHED 202 3 cr.
Sports Administration
Examines the business of coaching, offering practical approaches to the administrative functions of organizing, planning, leading and controlling. Integrates philosophy and principles into practice.

PHED 203 1 cr.
Sport First Aid
Course is designed to help coaches train athletes properly, prevent injuries whenever possible, and respond quickly and correctly to athletes’ injuries.

PHED 205 3 cr.
Teaching Sports Skills
Students will master the essentials of teaching sports skills and improve their teaching effectiveness. They will learn how to prepare for teaching sports skills, how to introduce, explain, and demonstrate sports skills and use cognitive processes to improve performance.

PHED 208 3 cr.
Conditioning and Training for Sports
(Formerly PHED 210) Students will learn how to design effective, individualized training programs by incorporating training basics such as overload, specificity, adaptation and progression. Will include individual differences among athletes, muscular fitness, energy fitness and performance factors.

PSYC 284 3 cr.
Sports Psychology
(Prerequisite: PSYC 110) This course covers a variety of topics in sports psychology including the learning of athletic skills, principles of motivation, goal-setting and reinforcement. The emotional aspects of sports competition and various strategies for mental preparation for competition such as relaxation, concentration, and attentional skills will be discussed.

Overview
The Health Administration major integrates courses from the field of health and business administration, and is designed to develop in students the values, knowledge and skills needed for management positions in a variety of fields. The curriculum is interdisciplinary, emphasizes knowledge of global health care issues, and includes a minor in business administration. Students are given a broad base of knowledge for securing entry-level positions with public and private agencies, organizations such as hospitals, insurance and managed care companies, pharmaceutical firms, community health and rehabilitation facilities. The curriculum also provides a theoretical foundation for future graduate-level education in various disciplines such as public health, health administration, health policy and planning, gerontology, law school and business administration. The major emphasizes applications to real-world experience by requiring a three credit, 120 hour internship, with a second three-credit elective internship, as well as 10 hours of community service each semester. Opportunities exist for students to identify with and actively participate in the Health Administration profession through an active student association affiliated with the American College of Healthcare Executives (ACHE). The program also offers a five-year, combined BS/MHA for qualified students.

Requirements for graduation include a minimum 2.5 GPA in all major courses, as well as a minimum grade of C or better in all cognate courses. A service learning component is integrated into one health administration course each semester. Drexel Hanley College students meet the service-learning requirement by completing major courses that have a service-learning component. The Health Administration program is a full undergraduate member of the Association of University Programs in Health Administration (AUPHA) in Washington, DC.

Health Administration Concentration in Long-Term Care Administration
The HADM Concentration in Long-Term Care Administration prepares students for job opportunities in nursing homes, assisted living facilities, adult day care and work with chronically ill populations. Students complete a sequence of 40 credits of Health Administration, 21 credits of Business and 12 credits of Gerontology courses, as well as a 1000 hour HADM internship. Upon successful completion of the curriculum, students will have met the educational requirements of the Pennsylvania State Board of Licensure for Nursing Home Administrators and be eligible to take the state licensure examination for long-term care administrators. The HADM/ILTC track increases credits for the Health Administration degree to 134 credits. A 10-hour-per-semester
service learning requirement is integrated into the HADM/LTCA course work.

Students may also earn a second minor in Gerontology by taking SOC 110 and GER 230. The HADM/LTCA program is accredited by the National Association of Boards of Examiners of Long-Term Care Administrators (NAB) in Washington, D.C.

Minor in Health Administration

The student must take a minimum of 18 HADM credits. Four courses are required: HADM 111, 112, 211, 312.

Course Descriptions

HADM 111 3 cr.
Introduction to Health Administration
An introduction to health and public health in the United States. Guest speakers and two site visits to local health care organizations are included. Includes service-learning component.

HADM 112 3 cr.
Health Systems
The nature and organization of health systems in the United States and select countries. Knowledge of health services for diverse populations is emphasized. Guest speakers and two site visits to local health care organizations are included. Includes service-learning component.

HADM 211 3 cr.
(W) Health Administration
(Prerequisite: HADM 111 or 112) An introduction to management principles for health care organizations, including activities of boards of directors in health agencies and systems. A case study approach and team presentations are emphasized. Includes service-learning component.

HADM 212 3 cr.
Health Administration Law
The legal and regulatory environment of health care and the administration of health care services.

HADM 213 3 cr.
Supervising Health Personnel
Principles and practices of direct supervision of health care personnel including motivation, leadership and human resources functions.

HADM 284 3 cr.
Special Topics
Selected topics of current interest in health administration offered on a variable basis such as health information technology, managerial epidemiology, international health systems, etc.

HADM 293 3 cr.
(W) Research in Health Administration
(Prerequisites: HADM major; PSYC 210) An introduction to research methodology as applied to health administration issues and problems with an emphasis on experimental and quasi-experimental designs.

HADM 312 3 cr.
Health Finance
(Prerequisite: ACC 253 or 254 or permission of the instructor) An introduction to financial and accounting concepts for health care providers. Emphasis is placed on knowledge of third-party reimbursement and budgeting concepts. Includes service-learning component.

HADM 314 3 cr.
Health Policy
Public policy in the health care sector is studied, including the process of policymaking. Implications of governmental policies for health care organizations and administrators are discussed.

HADM 315 3 cr.
(D) Cultural Diversity and Health Administration
(Prerequisites: HADM major or minor; HADM 211 or permission of instructor) The principles of management of culturally diverse society as applied to the health care field. Emphasis is placed on the importance of assessing and addressing the health care needs of various cultural groups within a given health care service area. Includes service-learning component.

HADM 316 3 cr.
Health Care Marketing
Marketing theories, concepts, and strategies as applied to the health care field.

HADM 318 3 cr.
Long-Term Care Administration
An introduction to the management of long-term care facilities. Emphasis is placed on the differences between acute and long-term care, institutional and community-based long-term care services, and special concerns of the long-term care resident. Site visits to long-term care facilities are included. Includes service-learning component.

HADM 330 3 cr.
Managed Care
The course provides an overview of managed care, current market trends and market performance issues. Closed and open panels, managed care contracting, disease management, behavioral health services and managed Medicare/Medicaid

TOTAL: 131 CREDITS

1 Includes service-learning component
service learning requirement is integrated into the HADM/LTCA course work.

Students may also earn a second minor in Gerontology by taking SOC 110 and GER 230. The HADM/LTCA program is accredited by the National Association of Boards of Examiners of Long-Term Care Administrators (NAB) in Washington, D.C.

Minor in Health Administration

The student must take a minimum of 18 HADM credits. Four courses are required: HADM 111, 112, 211, 312.

Course Descriptions

HADM 111 3 cr.
Introduction to Health Administration
An introduction to health care and public health in the United States. Guest speakers and two site visits to local health care organizations are included. Includes service-learning component.

HADM 112 3 cr.
Health Systems
The nature and organization of health systems in the United States and select countries. Knowledge of health services for diverse populations is emphasized. Guest speakers and two site visits to local health care organizations are included. Includes service-learning component.

HADM 211 3 cr.
(W) Health Administration
(Preq: HADM 111 or 112) An introduction to management principles for health care organizations, including activities of boards of directors in health agencies and systems. A case study approach and team presentations are emphasized. Includes service-learning component.

HADM 212 3 cr.
Health Administration Law
The legal and regulatory environment of health care and the administration of health care services.

HADM 213 3 cr.
Supervising Health Personnel
Principles and practices of direct supervision of health care personnel including motivation, leadership and human resources functions.

HADM 284 3 cr.
Special Topics
Selected topics of current interest in health administration offered on a variable basis such as health information technology, managerial epidemiology, international health systems, etc.

HADM 293 3 cr.
(W) Research in Health Administration
(Preq: HADM major; PSYC 210) An introduction to research methodology as applied to health administration issues and problems with an emphasis on experimental and quasi-experimental designs.

HADM 312 3 cr.
Health Finance
(Preq: ACC 253 or 254 or permission of the instructor) An introduction to financial and accounting concepts for health care providers. Emphasis is placed on knowledge of third-party reimbursement and budgeting concepts. Includes service-learning component.

HADM 314 3 cr.
Health Policy
Public policy in the health care sector is studied, including the process of policymaking. Implications of governmental policies for health care organizations and administrators are discussed.

HADM 315 3 cr.
(D) Cultural Diversity and Health Administration
(Preq: HADM major or minor; HADM 211 or permission of instructor) The principles of management of culturally diverse society as applied to the health care field. Emphasis is placed on the importance of assessing and addressing the health care needs of various cultural groups within a given health care service area. Includes service-learning component.

HADM 316 3 cr.
Health Care Marketing
Marketing theories, concepts, and strategies as applied to the health care field.

HADM 318 3 cr.
Long-Term Care Administration
An introduction to the management of long-term care facilities. Emphasis is placed on the differences between acute and long-term care, institutional and community-based long-term care services, and special concerns of the long-term care resident. Site visits to long-term care facilities are included. Includes service-learning component.

HADM 330 3 cr.
Managed Care
The course provides an overview of managed care, current market trends and market performance issues. Closed and open panels, managed care contracting, disease management, behavioral health services and managed Medicare/Medicaid.

TOTAL: 134 CREDITS

¹ Includes service-learning component

programs are also covered. Case studies of successful managed care programs are included throughout the course.

HADM 340 1 cr.
**Career Seminar**
A survey of current trends and occupations in Health Administration with an emphasis on advanced planning and preparation for the required internship experience.

HADM 380 3 cr.
**Internship in Health Administration**
(Prerequisites: HADM 340, 18 HADM credits or approval of program director) A supervised Health Administration work experience within an approved organizational setting. Requires 120 hours in the field and a minimum of 18 hours of on-campus, faculty-led seminar. Graded Satisfactory or Unsatisfactory. Students must provide their own transportation.

HADM 441 3 cr.
**Issues in Health Care Administration**
(Prerequisite: HADM senior) A capstone course in which students demonstrate knowledge attained throughout the HADM curriculum as well as the ability to apply that knowledge in a practical manner through completion of a “mega case study” utilizing a small administrative group/team approach. Includes service-learning component.

HADM 480 3 cr.
**Internship in Long-Term Care Administration**
(Prerequisite: approval of HADM director) A practical internship in a licensed long-term care facility under the supervision of a licensed nursing home administrator. Students spend 520 hours per semester in the field placement and 15 hours in on-campus seminars. Students must accumulate 1,000 hours of internship experience by taking HADM 480 in both the fall and spring semesters of their Senior year. Students must provide their own transportation.

HADM 481 3 cr.
**Internship in Health Administration**
(Prerequisite: HADM 380) A supervised Health Administration work experience of 150 hours within an approved organizational setting. Graded satisfactory or unsatisfactory. Students must provide their own transportation.

**HUMAN RESOURCES STUDIES**

**Faculty**
Daniel J. West, Ph.D., Chair
Peter C. Olden, Ph.D.
Terri Freeman Smith, M.S.
Robert J. Spinelli, D.B.A.
John K. Stout, D.Ed.
Steven J. Szylowskksi, M.B.A., M.H.A.
William G. Wallick, Ph.D., Program Director

**Overview**
The Human Resources Studies major integrates knowledge from the human resources field, and the liberal arts. Human Resource professionals work within all industries and are concerned with recruiting, developing, and retaining a productive workplace. The changing nature of work, as influenced by social, economic, technological, and educational forces is explored both nationally and globally. The study of human resource theories and their practical applications in the workplace is an essential part of the program. The faculty is committed to providing the highest quality learning environment to prepare students academically and practically for employment in the human resources field.
In addition, students in the HRS major are encouraged to develop their own knowledge, skills, attitudes, and competencies to prepare themselves for a career in human resources. To that end, students are encouraged to demonstrate academic excellence in all coursework, make meaningful service commitments to their communities, and develop an attitude toward life-long learning. Opportunities for students to identify with and actively participate in the HR profession, such as membership in the student Chapter of the Society for Human Resource Management, are hallmarks of the program. Program highlights include:

**Bachelor of Science Degree**
- 131 credits with 37 credits from HRS major courses
- Required Business minor
- Required portfolio documenting specific student outcomes

**Overview**

The Human Resources Studies major integrates knowledge from the human resources field, social and behavioral sciences, business, and the liberal arts. Human Resource professionals work within all industries and are concerned with recruiting, developing, and retaining a productive workplace. The changing nature of work, as influenced by social, economic, technological, and educational forces is explored both nationally and globally. The study of human resource theories and their practical applications in the workplace is an essential part of the program. The faculty is committed to providing the highest quality learning environment to prepare students academically and practically for employment in the human resources field. In addition, students in the HRS major are expected to actively develop their own knowledge, skills, attitudes, and competencies to prepare themselves for a career in human resources. To that end, students are encouraged to demonstrate academic excellence in all coursework, make meaningful service commitments to their communities, and develop an attitude toward life-long learning. Opportunities for students to identify with and actively participate in the HR profession, such as membership in the student Chapter of the Society for Human Resource Management, are hallmarks of the program. Program highlights include:

**Bachelor of Science Degree**

- 131 credits with 37 credits from HRS major courses
- Required Business minor
- Required portfolio documenting specific student outcomes
Minor in Human Resources Studies

The student must take a minimum of 18 credits. Five courses are required: HRS 111, 112, 251, 252, and 340 plus one HRS elective.

Course Descriptions

HRS 111 3 cr.
(S) Macro Human Resources
An introduction to the changing nature of work including trends, concepts, and practices for maintaining an effective workforce.

HRS 112 3 cr.
Micro Human Resources
An introduction to the major functional areas of the human resources field. Includes service-learning component.

HRS 251 3 cr.
(W) Performance Appraisal
A review of the performance management process including the design and implementation of job descriptions and accompanying performance appraisal system. Includes service-learning component.

HRS 252 3 cr.
(W) Workforce Education and Training
A study of the various organizational approaches to developing the skills and competencies of employees including the assessment of need, design, development, implementation, and evaluation of training. Includes service-learning component.

HRS 284 3 cr.
Special Topics
Selected topics in human resources are offered on a variable basis.

HRS 293 3 cr.
Research Applications in Human Resources
An introduction to research methodology as applied to human resources issues and problems with an emphasis on experimental and quasi-experimental design.

HRS 340 3 cr.
Compensation and Benefits
A study of both direct and indirect forms of compensation including legal requirements with a focus on internal and external equity.

HRS 351 3 cr.
(D) Recruitment, Selection, and Staffing
A study of the techniques, methods, and requirements for identifying, screening, evaluating, and selecting prospective job candidates. Includes service-learning component.

HRS 353 3 cr.
Human Resources Information Systems
An introduction to various computer software applications related to the human resources field.

HRS 382 3 cr.
Directed Study
An independent study experience on a specific human resources-related topic or a research project.

HRS 390 1 cr.
Human Resources Career Seminar
(Prerequisite: HRS major or minor) A survey of current trends and occupations in Human Resources with an emphasis on advanced planning and preparation for the required internship experience and post-graduation career planning. Includes service-learning component.

HRS 480 3 cr.
Human Resources Internship
(Prerequisites: HRS major or minor; HRS 390) A supervised human resources work experience within an approved organizational setting. Requires at least 120 hours of human resources employment with an additional 18 hours of on-campus, faculty-led seminars and individual meetings. Includes service-learning component.

HRS 490 3 cr.
Human Resources Leadership Seminar
(Prerequisites: HRS major or minor; HRS 390 and 480) Students will assess and develop their leadership skills and participate in an in-depth case study that integrates previous learning. Includes service-learning component.

- **Overall minimum 2.5 GPA is required in major courses.**
- **Overall minimum 2.0 GPA is required in cognate courses.**
- **Required internship to gain practical work experience.**
- **National and global focus – study abroad is encouraged.**
- **Required 80-hour service learning component.**
- **Combined B.S./M.S. can be earned in a five-year period.**

### Minor in Human Resources Studies

The student must take a minimum of 18 credits. Five courses are required: HRS 111, 112, 251, 252, and 340 plus one HRS elective.

### Course Descriptions

#### HRS 293

**Research Applications in Human Resources**

An introduction to research methodology as applied to human resources issues and problems with an emphasis on experimental and quasi-experimental designs.

**3 cr.**

#### HRS 340

**Compensation and Benefits**

A study of both direct and indirect forms of compensation including legal requirements with a focus on internal and external equity.

**3 cr.**

#### HRS 351

**(D) Recruitment, Selection, and Staffing**

A study of the techniques, methods, and requirements for identifying, screening, evaluating, and selecting prospective job candidates. Includes service-learning component.

**3 cr.**

#### HRS 353

**Human Resources Information Systems**

An introduction to the various computer software applications related to the human resources field.

**3 cr.**

#### HRS 382

**Directed Study**

An independent study experience on a specific human resources-related topic or a research project.

**3 cr.**

#### HRS 390

**Human Resources Career Seminar**

(Prerequisite: HRS major or minor) A survey of current trends and opportunities in Human Resources with an emphasis on advanced planning and preparation for the required internship experience and post-graduation career planning. Includes service-learning component.

**1 cr.**

#### HRS 480

**Human Resources Internship**

(Prerequisites: HRS major or minor; HRS 390) A supervised human resources work experience within an approved organizational setting. Requires at least 120 hours of human resources employment with an additional 18 hours of on-campus, faculty-led seminars and individual meetings. Includes service-learning component.

**3 cr.**

#### HRS 490

**Human Resources Leadership Seminar**

(Prerequisites: HRS major or minor; HRS 390 and 480) Students will assess and develop their leadership skills and participate in an in-depth case study that integrates previous learning. Includes service-learning component.

**3 cr.**

Overview

The purpose of the baccalaureate nursing program is to prepare qualified persons for entry-level practice of professional nursing in hospitals and community health settings. The program also provides the academic foundations for advanced study in nursing.

High school graduates are admitted as freshmen into the program, which leads to a Bachelor of Science degree with a major in Nursing. Total class enrollment is limited in consideration of educational and clinical resources. The curriculum can be completed in eight regular semesters of full-time study or four academic years.

The Nursing program has the full approval of the Pennsylvania State Board of Nursing. The curriculum is based on a planned progression of courses so as to develop and build upon knowledge and skills at levels of increasing competency. Therefore, all required courses must be taken in sequence. For progression through the Nursing program, a minimum average grade of C must be attained in the prerequisite Natural Science courses (BIOL 110-111, BIOL 210, CHEM 110-111, NUTR 220). A minimum grade of C must be attained in the clinical laboratory, the final grade in the course, which is entered on the permanent transcript, shall be the grade assigned for the lecture portion of the course.

Prior to the second semester of the sophomore year, students enrolled in the Nursing program must present a certificate as evidence of having completed the Cardiopulmonary Resuscitation and AED Basic Life Support course for health-care providers by the American Heart Association or CPR for the Professional Rescuer by the American Red Cross. In order to graduate, Nursing majors are required to complete a minimum of 20 hours of community service during each academic year. Dexter Hanley College students will meet the service-learning requirement by completing major courses that have a service-learning component.

In addition to the general University tuition and fees, students majoring in Nursing assume responsibility for the following: uniforms and other required clinical accessories, yearly physical examinations, entrance eye examinations, immunizations, comprehensive achievement tests, liability insurance, health insurance, and any travel expenses incurred. Students must also provide their own transportation to and from agencies utilized for clinical laboratories and visits. Senior status in the program is defined as completion of at least 100 credits, including cognate and prerequisite courses for NURS 450 and NURS 472.

Applicants and students should be aware that Pennsylvania law prohibits licensure of individuals convicted of felonies related to controlled substance and may prohibit licensure if there is a conviction for any felons listed. Additional information about the requirements for NURS 450 and NURS 472 can be found in the course descriptions.

Final grade the basis of S, Satisfactory (Pass), or U, Unsatisfactory (Fail). If the student obtains an S in the clinical laboratory, the final grade in the course, which is entered on the permanent transcript, shall be the grade assigned for the lecture portion of the course.

Students whose primary residence is out of state must also submit an FBI background check. These clearances are maintained on file in the Department of Nursing. Copies will be provided to clinical sites upon request.

Upon graduation the students will be eligible for admission to the examination for the registered-nurse licensure. The University of Scranton’s Nursing program is accredited by the Commission on Collegiate Nursing Education.

The Department of Nursing also offers a flexible program for registered nurses and licensed practical nurses interested in returning to school to complete a bachelor’s degree in nursing. An accelerated track is offered for students interested in pursuing graduate education and who meet the admission criteria for this option. For B.S. requirements, please see the Dexter Hanley College section.

Forensic Health Concentration

This concentration is open to all undergraduate students but is of particular interest to those in health-related majors such as Nursing, Counseling and Human Services, and Occupational Therapy. Requirements for the concentration include four 3-credit courses and one 3-credit elective course for a total of 15 credits. See page 83 for further details about the Forensic Health Concentration.

Course Descriptions

The following option is available for ROTC Nurse cadets: Subject to annual review, 3 credits may be awarded for successful completion of the ROTC Nurse Summer Training Program (NSTP) in place of NURS 473 Lab (2 cr.) and NURS 475 Lab (1 cr.).

NURS 100 Family Health

Family Health (For non-Nursing majors; not a Natural Science course) Concepts and principles related to the promotion and maintenance of optimal family health. Consider factors pertinent to health needs and health practices throughout the life cycle.

NURS 111 (D) Women's Health

Women's Health (Open to all students; not a Natural Science course) Course focuses on historic, physiological, social, cultural, emotional and economic issues affecting women’s health. The course explores strategies to empower women’s use of health-care services. Class members will be expected to participate actively in all discussions.

NURS 140 (W) Introduction to Nursing Concepts

An exploration of the core concepts of the client, health, nursing and health patterns. Historical, philosophical, and social development of nursing and the role of the professional nurse are presented. Understanding of health and health continuums in the broader perspective of the human person. Service learning: 20 hours. Three hours lecture.

NURS 213 (W) Child and Adolescent Health Promotion

(Recommended Prerequisite: PSYC 221, but open to all students) Focus on the professional’s role as advocate, care-giver and/or teacher in the promotion of health for children and adolescents, directly through health maintenance and indirectly through health care policy.

NURS 241 (W) Perspectives in Professional Nursing

(Prerequisites: Sophomore standing in the Nursing Program, R.N., and L.P.N. students only) Perspectives in professional nursing explores concepts incorporated in the philosophy, organizing framework and curriculum structures of the Nursing program. Integration of the health patterns and nursing process in the delivery of professional nursing care is introduced. Pertinent issues impacting on the nursing profession are addressed.

NURS 242 (W) Nursing Related to the Assessment of Health Patterns

(Prerequisites: Sophomore standing, NURS 241, RN and L.P.N. students only) Focus on the professional nurse’s role as caregiver in assessing, diagnosing and planning interventions of adaptive health patterns in individuals. Application of the nursing process to well persons and to individuals and families with alterations in health patterns. Exploration of concepts for planning holistic health care. Two hours lecture and three hours laboratory.

NURS 250 Physical Assessment Related to Health Patterns

(Prerequisites: BIOL 110-111, sophomore standing in Nursing program) Development of beginning skill in the basic physical-assessment techniques necessary for the promotion of optimal
MATH 106 or an equivalent course. Orientation will be required to complete the Math Placement exam during Freshman course. Students who score less than a 13 on the test must complete eight regular semesters of full-time study or a Pennsylvania State Board of Nursing. The curriculum is based on a planned progression of courses so as to develop and build upon knowledge and skills at levels of increasing competency. Therefore, all required courses must be taken in sequence. For progression through the Nursing program, a minimum average grade of C must be attained in the prerequisite Natural Science courses (BIOL 110-111, CHEM 110-111, NUTR 220). A minimum grade of C must be attained in the prerequisite Quantitative course, PSYC 210, and in each Nursing course. Students who score less than a 13 on the Math Placement exam during Freshman Orientation will be required to complete MATH 106 or an equivalent course.

Final grade for Nursing courses with concurrent clinical laboratory: The clinical laboratory component of a Nursing course shall be on the basis of S, Satisfactory (Pass), or U, Unsatisfactory (Fail). If the student obtains an S in the clinical laboratory, the final grade in the course, which is entered on the permanent transcript, shall be the grade assigned for the lecture portion of the course. If the student does not obtain an S in the clinical laboratory, the final grade in the course, which is entered on the permanent transcript, shall be an F, no matter what grade was assigned for the lecture portion of the course. Both lecture and clinical components must be repeated if a grade of C-, D+, D or F is obtained in a Nursing course.

Prior to the second semester of the sophomore year, students enrolled in the Nursing program must present a certificate as evidence of having completed the Cardiopulmonary Resuscitation and AED Basic Life Support course for health-care providers by the American Heart Association or CPR for the Professional Rescuer by the American Red Cross. In order to graduate, Nursing majors are required to complete a minimum of 20 hours of community service during each academic year. Dexter Hanley College students will meet the service-learning requirement by completing major courses that have a service-learning component.

In addition to the general University tuition and fees, students majoring in Nursing assume responsibility for the following: uniforms and other required clinical accessories, yearly physical examinations, enrollment eye examination and health insurance, comprehensive achievement tests, liability insurance, health insurance and any travel expenses incurred. Students must also provide their own transportation to and from agencies utilized for clinical laboratories and visits. Senior status in the program is defined as completion of at least 100 credits, including cognate and prerequisite courses for NURS 450 and NURS 452.

Applicants and students should be aware that Pennsylvania law prohibits licensure of individuals convicted of felonies related to controlled substance and may prohibit licensure if there is a conviction for any felonious act. For details, see the admissions materials and the Student Handbook of the Department of Nursing. Prior to clinical courses during the second semester of sophomore year, all Nursing majors are required to submit a Pennsylvania Child Abuse History Clearance and a Pennsylvania State Police Criminal Record Check to the Nursing Department. Students whose primary residence is out of state must also submit an FBI background check. These clearances are maintained on file in the Department of Nursing. Copies will be provided to clinical sites upon request.

Upon graduation the students will be eligible for admission to the examination for the registered-nurse licensure. The University of Scranton's Nursing program is accredited by the Pennsylvania State Board of Nursing.

The Department of Nursing also offers a flexible program for registered nurses and licensed practical nurses interested in returning to school to complete a bachelor's degree in nursing. An accelerated track is offered for students interested in pursuing graduate education and who meet the admission criteria for this option. For B.S. requirements, please see the Dexter Hanley College section.

**Forensic Health Concentration**

This concentration is open to all undergraduate students but is of particular interest to those in health-related majors such as Nursing, Counseling and Human Services, and Occupational Therapy. Requirements for the concentration include four 3-credit courses and one 3-credit elective course for a total of 15 credits. See page 83 for further details about the Forensic Health Concentration.

**Course Descriptions**

The following option is available for ROTC Nurse cadets: Subject to annual review, 3 credits may be awarded for successful completion of the ROTC Nurse Summer Training Program (NSTP) in place of NURS 473 Lab (2 cr.) and NURS 475 Lab (1 cr.).

**NURS 100**

**Family Health**

(For non-Nursing majors; not a Natural Science course) Concepts and principles related to the promotion and maintenance of optimal family health. Consider factors pertinent to health needs and health practices throughout the life cycle.

**NURS 111**

**D) Women's Health**

(Open to all students; not a Natural Science course) Course focuses on historic, physiological, social, cultural, emotional and economic issues affecting women’s health. The course explores strategies to empower women’s use of health-care services. Class members will be expected to participate actively in all discussions.

**NURS 140**

(W) Introduction to Nursing Concepts

An exploration of the core concepts of the client, health, nursing and health patterns. Historical, philosophical, and social development of nursing and the role of the professional nurse are presented. Understanding of health and health continuum in the broader perspective of the human person. Service learning: 20 hours. Three hours lecture.

**NURS 213**

(W) Child and Adolescent Health Promotion

(Recommended Prerequisite: PSYC 221, but open to all students) Focus on the professional’s role as advocate, caregiver and/or teacher in the promotion of health for children and adolescents, directly through health maintenance and prevention and indirectly through health care policy.

**NURS 241**

(W) Perspectives in Professional Nursing

(Prerequisites: Sophomore standing in the Nursing Program, R.N. and L.P.N. students only) Perspectives in professional nursing explores concepts incorporated in the philosophy, organizing framework and curriculum structures of the Nursing program. Integration of the health pattern and nursing process in the delivery of professional nursing care is introduced. Pertinent issues impacting on the nursing profession are addressed.

**NURS 242**

Nursing Related to the Assessment of Health Patterns

(Prerequisites: Sophomore standing, NURS 241, R.N. and L.P.N. students only) Focus on the professional nurse’s role as caregiver in assessing, diagnosing and planning interventions of adaptive health patterns in individuals. Application of the nursing process to well persons and to individuals and families with alterations in health patterns. Exploration of concepts for planning holistic health care. Two hours lecture and three hours laboratory.

**NURS 250**

Physical Assessment Related to Health Patterns

(Prerequisites: BIOL 110-111, sophomore standing in Nursing program) Development of beginning skill in the basic physical-assessment techniques necessary for the promotion of optimal

**TOTAL: 135 CREDITS**

---

1 Fall or spring semester
2 ROTC option available
3 Recommended by the department

---

**NURS 251**
Nursing Related to Health Patterns  
(Prerequisites: NURS 140, NURS 250; co-requisite: NURS 262) Focus on the professional nurse’s role in increasing the individual’s health status, utilizing the developmental, physiological, psychological and sociocultural dimensions of functional health patterns. Development of beginning skills in therapeutic nursing interventions. Service learning: 10 hours. Two hours lecture, six hours campus/clinical laboratory.

**NURS 262**
Pharmacology I  
(Prerequisites: Chem 110, BIOL 110-111, BIOL 210) Principles of pharmacology and specific drug groups. Emphasis is placed on drug actions, side effects, dosages and nursing responsibilities.

**NURS 310**
(D) Understanding Transcultural Health Care  
This course will focus on exploring values, beliefs and lifestyles of diverse cultural groups in order to broaden the student’s perception and understanding of health and illness and the variety of meanings these terms carry for members of differing groups.

**NURS 312**
(D) Nursing the Older Adult  
(Prerequisite: Junior standing in Nursing, OT, or PT program) Focus on the professional nurse’s role of care-giver, advocate and teacher in promoting and maintaining adaptive responses of the older adult experiencing alterations in health patterns. Emphasis placed on multidimensional assessment factors and interventions in meeting bio-psycho-social needs.

**NURS 314**
Principles of Nursing Ethics  
(Prerequisites: Philosophy 210, Junior standing in Nursing Program, LPN or RN track) Addresses ethical issues in the clinical nursing practice of the professional nurse as care-giver, advocate, teacher, leader/manager. The focus is on the decisions made regarding patient care. Three hours lecture.

---

**NURS 344**
Forensic Health Care of Victims  
(Prerequisite: PSYC 110) An overview of forensic health issues as they relate to perpetrators of violent crimes, including intrafamilial violence, sexual violence, stalking, workplace violence, homicide and terrorism. Content includes forensic roles, evidence collection and preservation, victim needs and rights, responses to trauma, victim’s resources, and death investigation.

**NURS 345**
Forensic Health Care of Offenders  
(Prerequisite: PSYC 110) An overview of forensic health issues as they relate to perpetrators of violent crimes, including intrafamilial violence, sexual violence, stalking, workplace violence, homicide and terrorism. Content includes forensic roles, crime classifications, relationship between animal cruelty and human violence, offender needs and rights, and juvenile offenders.

**NURS 350**
Nursing Care of the Adults I  
(Prerequisites: BIOL 210, CHEM 110-111, NURS 251; co-requisites: NURS 360 and NURS 352) The first of three courses that focuses on physiological and psychological adaptation to dysfunctional health patterns. Emphasis is placed on the nursing process and functional health patterns as a framework for practice. Pathophysiology and nursing care related to alterations in oxygenation, perfusion and metabolism, and the perioperative experience are included. Service learning: 10 hours. Three hours lecture, 15 hours clinical lab/week (for seven weeks) alternate with NURS 352.

**NURS 352**
Mental Health Nursing  
(Prerequisites: CHEM 110-111, BIOL 110-111, BIOL 210, NURS 251; co-requisites: NURS 360, NURS 350) The focus is on psychological adaptation to dysfunctional health patterns. Emphasis is placed on the nursing process and functional health patterns as a framework for practice. Psychopathology and nursing care of individuals and families experiencing alterations in mental health are explored. Three hours lecture, 15 hours clinical lab/week (for seven weeks) alternate with NURS 350.

**NURS 360**
Pharmacology II  
(Prerequisite: NURS 262) Principles of pharmacology and specific drug groups related to alterations in the sleep-rest, activity-exercise, self-
perception/self-concept health patterns. Emphasis is placed on drug actions, side effects, dosages, and nursing responsibilities. One hour lecture.

NURS 361 1 cr. Pharmacology III
(Prerequisite: NURS 360) Principles of pharmacology and specific drug groups related to alterations in the nutrition-metabolic, sexuality-reproduction, role-relationship, cognitive-perceptual, and elimination health patterns. Emphasis is placed on drug actions, side effects, dosages, and nursing responsibilities. One hour lecture.

NURS 371 5.5 cr. Nursing Care of the Adult II
(Prerequisites: NURS 350, NURS 352; co-require: NURS 361, NURS 373) The second of three courses that focus on physiological and psychological adaptation to dysfunctional health patterns. Emphasis is placed on the nursing process and functional health patterns as a framework for practice. Pathophysiology and nursing care related to alterations in metabolism, nutrition and immunity are included. Service learning: 10 hours. Three lecture hours, 15 hours clinical lab/week (for seven weeks) alternate with NURS 373.

NURS 373 5 cr. Nursing Care of the Childbearing Family
(Prerequisites: NURS 350, NURS 352; co-require: NURS 361, NURS 371) Focus is on the physiological and psychological adaptation to functional and dysfunctional health patterns in the child-bearing family. Emphasis is placed on the nursing process and functional health patterns as a framework for practice. Pathophysiology and nursing care related to childbirth, childbirth and their complications are addressed. Pathophysiological processes related to alterations in sexual health are also included. Clinical experiences are designed to develop the professional nursing role of care giver, advocate and teacher in promoting and restoring health. Three lecture hours, 12 hours clinical lab/week (for seven weeks) alternate with NURS 371.

NURS 384 3 cr. Perioperative Nursing
(Prerequisite: NURS 350) This course presents concepts and information essential for perioperative nursing practice. Content includes essentials of perioperative procedures in relation to nurses’ planning and management of the patient’s surgical experience. Perceptual clinical experiences are provided in various phases of the perioperative nursing: preoperative, operative and post-anesthesia care. Emphasis is placed on the development of beginning skills in the operative setting. One hour lecture and six hours laboratory.

NURS 405 3 cr. Health Writing for Publication
(Cross-listed with NURS 505; open to all junior and senior students) This course enables students to enhance their writing skills by utilizing principles of effective writing as they relate to health issues. Students select projects to develop from idea to polished manuscript for both a professional journal and a consumer newspaper/magazine. Online, Web-based course.

NURS 410 3 cr. Nursing Management
Study of the management process in nursing settings with a focus on the planning, implementation and delivery of nursing care in complex organizations. Focus is on the collaborative role of nursing within the organization and the analysis and resolution of problems. Three lecture hours.

NURS 450 5.5 cr. Nursing Care of the Adult III
(Prerequisites: NURS 371, NURS 373, NURS 361; co-require: NURS 452) This is the final course in a three-course sequence that focuses on physiological and psychological adaptation to dysfunctional health patterns. Emphasis is placed on the nursing process and functional health patterns as a framework for practice. Pathophysiology and nursing care related to alterations in mobility, elimination, cognition, and perception are included. Service learning: 10 hours. Three lecture hours, 15 hours clinical lab/week for seven weeks, alternate with NURS 452.

NURS 452 4.5 cr. Nursing Care of Children and Adolescents
(Prerequisites: NURS 371, NURS 373, NURS 361; co-require: NURS 450) The focus is on the physiological adaptation to functional and dysfunctional health patterns in children and adolescents. Emphasis is placed on the nursing process and functional health patterns as a framework for nursing practice. Health promotion and the pathophysiology and nursing care related to the disorders of childhood are included. Three lecture hours, 15 hours clinical lab/week for seven weeks, alternate with NURS 450.

NURS 471 3.5 cr. (D) Community Health Nursing
(Prerequisites: NURS 450, NURS 452; co-require: NURS 473, NURS 475) The focus is on the professional nursing roles of care giver, advocate, teacher and leader/manager in promoting adaptive responses to functional and dysfunctional health patterns in individuals, families, communities and groups. The student synthesizes prior knowledge of functional health patterns and all phases of the nursing process in meeting the health-care needs of community-based clients in diverse population settings. Service learning: 10 hours. One hour lecture; 18 hours clinical lab/week for 4.5 weeks (alternate with NURS 473 and 475).

NURS 473 3 cr. Synthesis of Leadership Concepts in Nursing
(Prerequisites: NURS 450, NURS 452; co-require: NURS 471, NURS 475) The focus is on the professional nurse’s role as care giver, advocate, teacher and leader/manager in promoting, restoring, and maintaining adaptive responses in individuals experiencing complex alterations in functional health patterns. Continued use of the nursing process and the development of case-management skills in implementing and evaluating nursing care in collaboration with the nursing and interdisciplinary health teams are emphasized. One hour/week lecture; 18 hours clinical lab/week for 4.5 weeks, alternate with NURS 471 and 475.

NURS 475 3 cr. Critical Care Nursing
(Prerequisites: NURS 450, NURS 452; co-require: NURS 471, NURS 473) The focus is on physiological and psychological adaptation to complex dysfunctional health patterns. Emphasis is placed on the nursing process and functional health patterns as a framework for practice. Pathophysiology and nursing care related to complex alterations in health patterns are included. One hour lecture/week; 18 hours clinical lab/week for 4.5 weeks, alternate with NURS 471 and 473.

NURS 483 3 cr. Independent Study in Nursing
(RN students only; Prerequisites: Senior standing in the Nursing program, NURS 493) An individualized, non-credit course in an area specific to professional nursing. Students develop and complete a specific project and work on a one-to-one basis with a faculty member in the Department of Nursing.

NURS 493 3 cr. (W) Research in Nursing
(Prerequisites: Senior standing in the Nursing program, PSYC 210) Introduction to and application of the principles and process of research in professional nursing practice. Study of research design, data-collection techniques, interpretation and critique of nursing research, literature, and reports and the development of the ability to become a discriminating consumer of nursing research. Three hours lecture.

OCCUPATIONAL THERAPY

Faculty
Carol L. Reinson, Ph.D., Chair and Program Director
Karen L. Brady, M.O.T.
Elizabeth Ann Ciavarino, Ph.D.
Rita P. Cottrell, M.A.
Marlene J. Morgan, Ed.D.
Barry Allen Wolf, M.Ed.

Overview
The University offers a five-year, entry-level Master of Science degree program in Occupational Therapy (OT). Students usually enter this program as freshmen, proceed through four years of undergraduate study, receive a Bachelor of Science degree in Health Sciences, and are awarded the M.S. in OT degree upon completion of graduate requirements. The course work is sequenced in a planned progression in order to build upon and develop knowledge and skills at increasing levels of complexity, competence, and integration. Therefore, all required courses are to be completed in sequence. A minimum grade of C (2.00) must be attained in every undergraduate cognate and OT course.

A minimum, overall, undergraduate GPA of 2.75 is required in order to advance into graduate study; a minimum, overall GPA of 3.00 must be achieved and maintained for all graduate courses. Required OT Level II Internships are graded on a Credit/No Credit basis. The normal length of time for completion of the program is five and one-quarter years. All OT students must complete Level II Fieldwork within 24 months following completion of the academic portion of the pro-
perception/self-concept health patterns. Emphasis is placed on drug actions, side effects, dosages, and nursing responsibilities. One hour lecture.

**NURS 361** 1 cr. Pharmacology III (Prerequisite: NURS 360) Principles of pharmacology and specific drug groups related to alterations in the nutrition-metabolic, sexuality-reproduction, role-relationships, cognitive-perceptual, and elimination health patterns. Emphasis is placed on drug actions, side effects, dosages, and nursing responsibilities. One hour lecture.

**NURS 371** 5.5 cr. Nursing Care of the Adult II (Prerequisites: NURS 350, NURS 352; co-requirements: NURS 361, NURS 373) The second of three courses that focus on physiological and psychological adaptation to dysfunctional health patterns. Emphasis is placed on the nursing process and functional health patterns as a framework for practice. Pathophysiology and nursing care related to alterations in metabolism, nutrition, and immunity are included. Service learning: 10 hours. Three lecture hours, 15 hours clinical lab/week (for seven weeks) alternate with NURS 373.

**NURS 373** 5 cr. Nursing Care of the Childbearing Family (Prerequisites: NURS 350, NURS 352; co-requirements: NURS 361, NURS 371) Focus is on the physiological and psychological adaptation to functional and dysfunctional health patterns in the child-bearing family. Emphasis is placed on the nursing process and functional health patterns as a framework for practice. Pathophysiology and nursing care related to childbearing, childbirth and their complications are addressed. Pathophysiological processes related to alterations in sexual health are also included. Clinical experiences are designed to develop the professional nursing role of care giver, advocate and teacher in promoting and restoring health. Three lecture hours, 12 hours clinical lab/week (for seven weeks) alternate with NURS 371.

**NURS 384** 3 cr. Perioperative Nursing (Prerequisite: NURS 350) This course presents concepts and information essential for perioperative nursing practice. Content includes essentials of perioperative procedures in relation to nurses’ planning and management of the patient’s surgical experience. Precepted clinical experiences are provided in various phases of the perioperative nursing: preoperative, operative and post-anesthesia care. Emphasis is placed on the development of beginning skills in the operative setting. One hour lecture and six hours laboratory.

**NURS 405** 3 cr. Health Writing for Publication (Cross-listed with NURS 505; open to all junior and senior students) This course enables students to enhance their writing skills by utilizing principles of effective writing as they relate to health issues. Students select projects to develop from ideas polished from manuscripts for both a professional journal and a consumer newspaper/magazine. Online, Web-based course.

**NURS 410** 3 cr. Nursing Management Study of the management process in nursing settings with a focus on the planning, implementation and delivery of nursing care in complex organizations. Focus is on the collaborative role of nursing within the organization and the analysis and resolution of problems. Three lecture hours.

**NURS 450** 5.5 cr. Nursing Care of the Adult III (Prerequisites: NURS 371, NURS 373, NURS 361; co-require: NURS 452) This is the final course in a three-course sequence that focuses on physiological and psychological adaptation to dysfunctional health patterns. Emphasis is placed on the nursing process and functional health patterns as a framework for practice. Pathophysiology and nursing care related to alterations in mobility, elimination, cognition, and perception are included. Service learning: 10 hours. Three lecture hours, 15 hours clinical lab/week for seven weeks, alternate with NURS 452.

**NURS 452** 4.5 cr. Nursing Care of Children and Adolescents (Prerequisites: NURS 371, NURS 373, NURS 361; co-require: NURS 450) The focus is on the physiological adaptation to functional and dysfunctional health patterns in children and adolescents. Emphasis is placed on the nursing process and functional health patterns as a framework for nursing practice. Health promotion and the pathophysiology and nursing care related to the disorders of childhood are included. Three lecture hours, five hours clinical lab/week for seven weeks, alternate with NURS 450.

**NURS 471 and 475.**

**NURS 471** 3.5 cr. (D) Community Health Nursing (Prerequisites: NURS 450, NURS 452; co-requirements: NURS 473, NURS 475) The focus is on the professional nursing roles of care giver, advocate, teacher and leader/manager in promoting adaptive responses to functional and dysfunctional health patterns in individuals, families, communities, and groups. The student synthesizes prior knowledge of functional health patterns and all phases of the nursing process in meeting the health-care needs of community-based clients in diverse population settings. Service learning: 10 hours. One lecture/lab/week: 15 hours clinical lab/week for 4.5 weeks (alternate with NURS 473 and 475).

**NURS 473** 3 cr. Synthesis of Leadership Concepts in Nursing (Prerequisites: NURS 450, NURS 452; co-requirements: NURS 471, NURS 475) The focus is on the professional nurse’s role as care giver, advocate, teacher and leader/manager in promoting, restoring, and maintaining adaptive responses in individuals experiencing complex alterations in functional health patterns. Continued use of the nursing process and the development of case-management skills in implementing and evaluating nursing care in collaboration with the nursing and interdisciplinary health teams are emphasized. One lecture/lab/week: 18 hours clinical lab/week for 4.5 weeks, alternate with NURS 471 and 475.

**NURS 475** 3 cr. Critical Care Nursing (Prerequisites: NURS 450, NURS 452; co-requirements: NURS 471, NURS 473) The focus is on physiological and psychological adaptation to complex dysfunctional health patterns. Emphasis is placed on the nursing process and functional health patterns as a framework for practice. Pathophysiology and nursing care related to complex alterations in health patterns are included. One lecture/lab/week: 18 hours clinical lab/week for 4.5 weeks, alternate with NURS 471 and 473.

**NURS 483** 3 cr. Independent Study in Nursing (RN students only; Prerequisites: Senior standing in the Nursing program, NURS 493) An independent study of academic or professional nature in an area specific to professional nursing. Students develop and complete a specific project and work on a one-to-one basis with a faculty member in the Department of Nursing.

**NURS 493** 3 cr. (W) Research in Nursing (Prerequisites: Senior standing in the Nursing program, PSYC 210) Introduction to and application of the principles and process of research in professional nursing practice. Study of research design, data-collection techniques, interpretation and critique of nursing research, literature, and reports and the development of the ability to become a discriminating consumer of nursing research. Three hours lecture.

**OCCUPATIONAL THERAPY**

Faculty
Carol L. Reinson, Ph.D., Chair and Program Director
Karen L. Brady, M.O.T.
Elizabeth Ann Ciavarino, Ph.D.
Rita P. Cottrell, M.A.
Marlene J. Morgan, Ed.D.

Overview
The University offers a five-year, entry-level Master of Science degree program in Occupational Therapy (OT). Students usually enter this program as freshmen, proceed through four years of undergraduate study, receive a Bachelor of Science degree in Health Sciences, and are awarded the M.S. in OT degree upon completion of graduate requirements. The course work is sequenced in a planned progression in order to build upon and develop knowledge and skills at increasing levels of complexity, competence, and integration. Therefore, all required courses are to be completed in sequence. A minimum grade of C (2.00) must be attained in every undergraduate cognate and OT course.

A minimum, overall, undergraduate GPA of 2.75 is required in order to advance into graduate study; a minimum, overall GPA of 3.00 must be achieved and maintained for all graduate courses. Required OT Level II Internships are graded on a Credit/No Credit basis. The normal length of time for completion of the program is five and one-quarter years. All OT students must complete Level II Fieldwork within 24 months following completion of the academic portion of the program.
program. Students will receive the M.S. in OT degree following completion of all academic and clinical requirements.

Admission to the program is normally open to first-time incoming freshmen; transfer students are considered for admission on an individual basis. Applicants are selected on a competitive basis, with emphasis placed on high school record, standardized test scores, extracurricular activities, and letters of recommendation. It is suggested that prospective students observe and/or volunteer in an occupational therapy setting. The Admissions Office will request this information prior to registration. Since the majority of coursework is at the undergraduate level, the OT program is described in detail in the University’s undergraduate catalog rather than in the graduate catalog. Inquiries about admission to the B.S. to M.S. in OT program should be directed to the Graduate Office at (570) 941-7600.

Capstone Experience

Each student is required to propose and execute a graduate master’s-level research project that culminates in a thesis. This process begins in the first semester of senior year with OT 493: Research Methods. The second semester of senior year is when students will make application to either the Department of Rehabilitation Sciences (DRS) and/or the Institutional Review Board (IRB). The thesis is written and publicly defended during the graduate year. Six credits are awarded for the thesis in a two-semester course sequence, OT 593 and OT 594.

Accreditation

The Occupational Therapy Program is accredited by the Accreditation Council for Occupational Therapy Education (ACOTE) of the American Occupational Therapy Association (AOTA), located at 4720 Montgomery Lane, P.O. Box 31220, Bethesda, MD 20824-1220. AOTA’s phone number is (301) 652-AOTA. Graduates of the program who have completed all academic and fieldwork requirements are able to sit for the national certification examination for the occupational therapist administered by the National Board for Certification in Occupational Therapy (NBOT). After successful completion of this examination, the individual is an Occupational Therapist, Registered (OTR). Candidates who have completed all academic and fieldwork requirements are eligible for certification/licensure. A felony conviction may affect a graduate’s ability to sit for the certification examination or attain state licensure. Most states require licensure in order to practice; however, state licenses are usually based on the results of the NBOT Certification Examination.

Course Descriptions

OT 140  1 cr.
Introduction to Occupational Therapy
An introduction to the profession of occupational therapy; its history, philosophical base, core values, professional standards, ethics, tools of practice, and frames of reference are presented. Employment settings, practitioner roles and professional development are explored, with particular emphasis placed on the student’s future role as an entry-level occupational therapist. Majors only. One two-hour seminar/week.

OT 141  3 cr.
Occupational Therapy Theoretical Concepts
An introduction to occupational therapy theories and models of practice, with emphasis on an analysis of their history, philosophical foundations, and applications to practice. The focus is on human occupation and adaptation, and its multicultural aspects. Three hours lecture/week, and ten hours of service learning.

OT 240  3 cr.
Activity Analysis I
Analysis, theory, and application of activities and media used in occupational therapy treatment with children and adolescents. Introduction to standardized and non-standardized tests to assist in selecting activities. Principles of leading groups, adaptation, and grading activities addressed through active learning. One hour lecture, four hours lab/week, and ten hours of service learning.

OT 241  3 cr.
Activity Analysis II
(Preq: OT 240) Analysis, theory, and application of activities and media used in occupational therapy treatment with adults. Introduction to standardized and non-standardized tests to assist in selecting activities. Proper documentation of treatment intervention addressed through case studies and problem-based learning. One hour lecture, four hours lab/week, and ten hours of service learning.

TOTAL: 172 (176 CREDITS)

* Includes service-learning component
* Extra science credits
* OT Level I Clinical I, II, III are each a minimum of two weeks, full time.
* OT Level II Internship I, II are required and each a minimum of 12 weeks, full time, in Psychosocial Rehabilitation and Physical Rehabilitation. Time periods scheduled for individual students may vary as determined by the department, and with consideration of student needs and circumstances.
Admission to the program is normally open to first-time incoming freshmen; transfer students are considered for admission on an individual basis. Applicants are selected on a competitive basis, with emphasis placed on high school record, standardized test scores, extracurricular activities, and letters of recommendation. It is suggested that prospective students observe and/or volunteer in an occupational therapy setting. The Admissions Office will request this information prior to registration. Since the majority of course work is at the undergraduate level, the OT program is described in detail in the University’s undergraduate catalog rather than in the graduate catalog. Inquiries about admission to the B.S. in Occupational Therapy should be directed to the Graduate Office at (570) 941-7600.

**Capstone Experience**

Each student is required to propose and execute a graduate master's-level research project that culminates in a thesis. This process begins in the first semester of the senior year with OT 493: Research Methods. The second semester of senior year is when students will make application to either the Department Review Board (DRB) and/or the Institutional Review Board (IRB). The thesis is written and publicly defended during the graduate year. Six credits are awarded for the thesis in a two-semester course sequence, OT 593 and OT 594.

**Accreditation**

The Occupational Therapy Program is accredited by the Accreditation Council for Occupational Therapy Education (ACOTE) of the American Occupational Therapy Association (AOTA), located at 4720 Montgomery Lane, P.O. Box 31220, Bethesda, MD 20824-1220. AOTA's phone number is (301) 652-AOTA. Graduates of the program who have completed all academic and fieldwork requirements are able to sit for the national certification examination for the occupational therapist administered by the National Board for Certification in Occupational Therapy (NBCOT). After successful completion of this examination, the individual is an Occupational Therapist, Registered (OTR). Candidates will need to provide documentation of all graduation and credentialing requirements, including certification/licensure. A felony conviction may affect a graduate's ability to sit for the certification examination or attain state licensure. Most states require licensure in order to practice; however, state licenses are usually based on the results of the NBCOT Certification Examination.

**Course Descriptions**

**OT 140  1 cr.**

Introduction to Occupational Therapy

An introduction to the profession of occupational therapy; its history, philosophical base, core values, professional standards, ethics, tools of practice, and frames of reference are presented. Employment settings, practitioner roles, and professional development are explored, with particular emphasis placed on the student’s future role as an entry-level occupational therapist. Majors only. One two-hour seminar/week.

**OT 141  3 cr.**

Occupational Therapy Theoretical Concepts

An introduction to occupational therapy theories and models of practice, with emphasis on an analysis of their history, philosophical foundations, and applications to practice. The focus is on human occupation and adaptation, and its multicultural aspects. Three hours lecture/week, and ten hours of service learning.

**OT 240  3 cr.**

Activity Analysis I

Analysis, theory, and application of activities and media used in occupational therapy treatment with children and adolescents. Introduction to standardized and non-standardized tests to assist in selecting activities. Principles of leading groups, adaptation, and grading activities addressed through active learning. One hour lecture, four hours lab/week, and ten hours of service learning.

**OT 241  3 cr.**

Activity Analysis II

(Precourse: OT 240) Analysis, theory, and application of activities and media used in occupational therapy treatment with adults. Introduction to standardized and non-standardized tests to assist in selecting activities. Proper documentation of treatment intervention addressed through case studies and problem-based learning. One hour lecture, four hours lab/week, and ten hours of service learning.

OT 256 4 cr.
Human Anatomy for OT
A regional in-depth study of human anatomy with major emphasis on functional anatomy. This will be accomplished through the study of prosected human specimens and surface anatomy. Three hours lecture, two hours lab/week.

OT 275 3 cr.
Clinical Kinesiology
(Prerequisites: BIOL 110-111, OT 256) Application of the principles of functional anatomy with emphasis on normal and abnormal movement. Measurement techniques for range of motion and muscle testing are presented, with emphasis on the movement and strength requirements found in self-care, work, and leisure activities. Concepts are integrated in lab experiences. Two hours lecture, two hours lab/week.

OT 346 3 cr.
Pathological Conditions I
A review of pathological conditions seen in occupational therapy practice, including: diagnosis, etiology, progression, performance deficits, treatment, prognosis, and functional outcomes. Emphasis is placed on examining developmental and pediatric disabilities. The promotion of health, prevention, and implications for the individual, family, and society are discussed. Three hours lecture/week.

OT 347 3 cr.
Pathological Conditions II
(Prerequisite: OT 346) A review of pathological conditions seen in occupational therapy practice, including: diagnosis, etiology, progression, performance deficits, treatment, prognosis, and functional outcomes. Emphasis is placed on examining adult and geriatric difficulties. The promotion of health, prevention, and implications for the individual, family, and society are discussed. Three hours lecture/week.

OT 356 3 cr.
Functional Neuroanatomy
(Prerequisite: OT 256, OT 275) An overview of applied neuroanatomy and function, with emphasis on sensory, perceptual, and motor performance. Normal structure and function are discussed, together with nervous system dysfunction, as applied to self-care, work, and leisure activities related to OT practice. Two hours lecture, two hours lab/week.

OT 360 3 cr.
Occupational Therapy Practice I: Pediatrics
(Prerequisites: OT 241, OT 275) An overview of theoretical frames of reference, evaluation, and treatment intervention techniques used to enhance the function of infants, children, and other individuals with developmental disabilities. Emphasis is placed on current recommended practices, evidence-based research, and clinical/educational experiential learning opportunities. Two hours lecture, two hours lab/week, and ten hours of service learning.

OT 361 3 cr.
Occupational Therapy Practice II: Psychosocial Rehabilitation
(Requisite: CHS 341) An overview of theoretical frames of reference, evaluation, and treatment intervention strategies used to enhance the function of individuals with psychosocial dysfunction. Methods of clinical observation, assessment, and treatment approaches are introduced and practiced in lab simulations and field trips to area facilities. Two hours lecture, two hours lab/week and ten hours of service learning.

OT 380 1 cr.
Occupational Therapy Level I Clinical – I: Pediatrics
Directed observation and supervised participation in the occupational therapy process in a pediatric/developmental disabilities setting. Emphasis is placed on the integration of theory and practice. Prerequisites: OT 346, OT 356, OT 360. Internship, two weeks, full time.

OT 381 1 cr.
Occupational Therapy Level I Clinical – II: Psychosocial Rehabilitation
(Prerequisites: OT 347, OT 361, OT 380) Directed observation and supervised participation in the therapeutic process in a psychosocial rehabilitation setting. Emphasis is placed on the integration of theory and practice. Summer, two weeks, full time.

OT 440 3 cr.
Management and Supervision of Occupational Therapy Services
An application of major management principles to the provision of occupational therapy services with an emphasis on the administrative and supervisory requirements in managing an occupational therapy department. Information provided concerning program planning, recruitment, marketing, budgeting, supervision, documentation, evaluation, reimbursement, and quality assurance. Three hours lecture/week.

OT 451 2 cr.
Hand Rehabilitation
(Prerequisites: OT 256, OT 275) An in-depth review of the functional anatomy of the hand and arm, with emphasis on rehabilitation principles and basic splinting techniques. Theoretical concepts, evaluation, and fabrication procedures are integrated in lab experiences. One hour lecture, two hours lab/week.

OT 460 3 cr.
Occupational Therapy Practice III: Physical Rehabilitation
(Prerequisites: OT 256, OT 275, OT 360, OT 380, OT 381) A study of the occupational therapist’s complex role in providing services to individuals with physical dysfunction. Theoretical frames of reference and various intervention approaches are integrated as techniques and strategies to enhance functional performance are introduced, observed and practiced. Emphasis on safe clinical practice and development of sound clinical reasoning skills. Two hours lecture, two hours lab/week and ten hours of service learning.

OT 461 3 cr.
Occupational Therapy Practice IV: Geriatrics
An overview of frames of reference, evaluations, and interventions used to enhance elder’s well-being. Emphasis is placed on understanding the biopsychosocial changes and environmental contexts of elders. The ability to provide holistic and humanistic elder care is facilitated through lab simulations, completion of a program needs assessment, and via service learning. Two hours lecture/two hours lab per week and ten hours of service learning.

OT 475 3 cr.
Advanced Therapeutic Techniques
(Prerequisites: OT 451, OT 460, OT 480) An in-depth examination of selected concepts and approaches in physical rehabilitation, with an introduction to certain specialized areas of occupational therapy practice. Topics will include standardized assessments, industrial rehabilitation, pain and soft tissue management, neurodevelopmental treatment, adaptive positioning and seating, cognitive-perceptual rehabilitation, and reimbursement issues. Two hours lecture, two hours lab/week.

OT 480 1 cr.
Occupational Therapy Level I Clinical – III: Physical Rehabilitation
(Prerequisites: OT 381, OT 451, OT 460) Directed observation and supervised participation in the therapeutic process in a physical rehabilitation setting. Emphasis is placed on the integration of theory and practice. Intersession, two weeks, full time.

OT 493 3 cr.
Research Methods in Occupational Therapy
(Prerequisite: PSYC 210) An introduction to research design, data collection, analysis, and interpretation of findings. Emphasis placed on critical review of occupational therapy research studies, application to clinical practice, quantitative, and qualitative methods. Concepts are integrated through the preparation of a research proposal. Three hours lecture/week.

OT 501 3 cr.
Leadership in Occupational Therapy
(Prerequisite: OT 581 or OT 582) Extensive analysis of the profession’s historical influences, current, and emerging trends in occupational therapy leadership, and possibilities for personal leadership evolution. Emphasis is placed upon examining the link between professional ethics, personal values, and leadership. Systemic challenges to ethical leadership and professional supports for sustaining ethical practice are presented. Three hours lecture/week.

OT 502 3 cr.
Advanced Occupational Therapy Theory
(Prerequisite: OT 581 or OT 582) A review of how occupational therapy paradigms have been established and changed over time, and how these changes have influenced occupational therapy practice. Emphasis will be placed on the development and integration of theory and practice. Intersession, two weeks, full time.

OT 560 3 cr.
Advanced Interpersonal Dynamics
A review of the concepts and aspects of interpersonal, intrapersonal, and group dynamics provides a foundation for the student to understand the meaning of illness and how that impacts the human condition. An in-depth analysis of disability from the perspective of the disabled is explored. Two hours lecture, two hours lab per week or equivalent.

OT 575 3 cr.
Community-based Practice
(Prerequisite: OT 581 or OT 582) In-depth exposure to selected areas that represent the current focus of advanced practice in occupational therapy. The areas of practice examined in the course will include community-based programs,
OT 256  4 cr.
Human Anatomy for OT
A regional in-depth study of human anatomy with major emphasis on functional anatomy. This will be accomplished through the study of preserved human specimens and surface anatomy. Three hours lecture, two hours lab/week.

OT 275  3 cr.
Clinical Kinesiology
(Prerequisites: BIOL 110-111, OT 256) Application of the principles of functional anatomy with emphasis on normal and abnormal movement. Measurement techniques for range of motion and muscle testing are presented, with emphasis on the movement and strength requirements found in self-care, work, and leisure activities. Concepts are integrated in lab experiences. Two hours lecture, two hours lab/week.

OT 346  3 cr.
Pathological Conditions I
A review of pathological conditions seen in occupational therapy practice, including: diagnosis, etiology, progression, performance deficits, treatment, prognosis, and functional outcomes. Emphasis is placed on examining developmental and pediatric disabilities. The promotion of health, prevention, and implications for the individual, family, and society are discussed. Three hours lecture/week.

OT 347  3 cr.
Pathological Conditions II
(Prerequisite: OT 346) A review of pathological conditions seen in occupational therapy practice, including: diagnosis, etiology, progression, performance deficits, treatment, prognosis, and functional outcomes. Emphasis is placed on examining adult and geriatric difficulties. The promotion of health, prevention, and implications for the individual, family, and society are discussed. Three hours lecture/week.

OT 356  3 cr.
Functional Neuroanatomy
(Prerequisite: OT 256, OT 275) An overview of applied neuroanatomy and function, with emphasis on sensory, perceptual, and motor performance. Normal structure and function are discussed, together with nervous system dysfunction, as applied to self-care, work, and leisure activities related to OT practice. Two hours lecture, two hours lab/week.

OT 360  3 cr.
Occupational Therapy Practice I: Pediatrics
(Prerequisites: OT 241, OT 275) An overview of theoretical frames of reference, evaluation, and treatment intervention techniques used to enhance the function of infants, children, and other individuals with developmental disabilities. Emphasis is placed on current recommended practices, evidence-based research, and clinical/educational experiential learning opportunities. Two hours lecture, two hours lab/week, and ten hours of service learning.

OT 361  3 cr.
Occupational Therapy Practice II: Psychosocial Rehabilitation
(Pre-requisite: CHS 341) An overview of theoretical frames of reference, evaluation, and treatment approaches used to enhance the function of individuals with psychosocial dysfunction. Methods of clinical observation, assessment, and treatment approaches are introduced and practiced in lab simulations and field trips to area facilities. Two hours lecture, two hours lab/week and ten hours of service learning.

OT 380  1 cr.
Occupational Therapy Level I Clinical – I: Pediatrics
Directed observation and supervised participation in the occupational therapy process in a pediatric/developmental disabilities setting. Emphasis on the integration of theory and practice. Prerequisites: OT 346, OT 356, OT 360. Internship, two weeks, full time.

OT 381  1 cr.
Occupational Therapy Level I Clinical – II: Psychosocial Rehabilitation
(Prerequisites: OT 347, OT 361, OT 380) Directed observation and supervised participation in the therapeutic process in a psychosocial rehabilitation setting. Emphasis is placed on the integration of theory and practice. Summer, two weeks, full time.

OT 440  3 cr.
Management and Supervision of Occupational Therapy Services
An application of major management principles to the provision of occupational therapy services with an emphasis on the administrative and supervisory requirements in managing an occupational therapy department. Information provided concerning program planning, recruitment, marketing, budgeting, supervision, documentation, evaluation, reimbursement, and quality assurance. Three hours lecture/week.

OT 451  2 cr.
Hand Rehabilitation
(Prerequisites: OT 256, OT 275) An in-depth review of the functional anatomy of the hand and arm, with emphasis on rehabilitation principles and basic splinting techniques. Theoretical concepts, evaluation, and fabrication procedures are integrated in lab experiences. One hour lecture, two hours lab/week.

OT 460  3 cr.
Occupational Therapy Practice III: Physical Rehabilitation
(Prerequisites: OT 256, OT 275, OT 360, OT 380, OT 381) A study of the occupational therapist’s complex role in providing services to individuals with physical dysfunction. Theoretical frames of reference and various intervention approaches are integrated as techniques and strategies to enhance functional performance are introduced, observed and practiced. Emphasis on safe clinical practice and development of sound clinical reasoning skills. Two hours lecture, two hours lab/week and ten hours of service learning.

OT 461  3 cr.
Occupational Therapy Practice IV: Geriatrics
An overview of frames of reference, evaluations, and interventions used to enhance elder’s well-being. Emphasis is placed on understanding the biopsychosocial changes and environmental contexts of elders. The ability to provide holistic and humanistic elder care is facilitated through lab simulations, completion of a program needs assessment, and via service learning. Two hours lecture/two hours lab per week and ten hours of service learning.

OT 475  3 cr.
Advanced Therapeutic Techniques
(Prerequisites: OT 451, OT 460) An in-depth examination of selected concepts and approaches in physical rehabilitation, with an introduction to certain specialized areas of occupational therapy practice. Topics will include standardized assessments, industrial rehabilitation, pain and soft tissue management, neurodevelopmental treatment, adaptive positioning and seating, cognitive-perceptual rehabilitation, and reimbursement issues. Two hours lecture, two hours lab/week.

OT 480  1 cr.
Occupational Therapy Level I Clinical – III: Physical Rehabilitation
(Prerequisites: OT 381, OT 451, OT 460) Directed observation and supervised participation in the therapeutic process in a physical rehabilitation setting. Emphasis is placed on the integration of theory and practice. Intersession, two weeks, full time.

OT 493  3 cr.
Research Methods in Occupational Therapy
(Prerequisite: PSYC 210) An introduction to research design, data collection, analysis, and interpretation of findings. Emphasis placed on critical review of occupational therapy research studies, application to clinical practice, quantitative, and qualitative methods. Concepts are integrated through the preparation of a research proposal. Three hours lecture/week.

OT 501  3 cr.
Leadership in Occupational Therapy
(Prerequisite: OT 581 or OT 582) Extensive analysis of the profession’s historical influences, current, and emerging trends in occupational therapy leadership, and possibilities for personal leadership evolution. Emphasis is placed upon examining the link between professional ethics, personal values, and leadership. Systemic challenges to ethical leadership and professional supports for sustaining ethical practice are presented. Three hours lecture/week.

OT 502  3 cr.
Advanced Occupational Therapy Theory
(Prerequisite: OT 581 or OT 582) A review of how occupational therapy paradigms have been established and changed over time, and how these changes have influenced occupational therapy practice will be presented. Particular attention will be paid to the cultural, economic, and demographic motivations of theory development and application. Three hours lecture/week.

OT 560  3 cr.
Advanced Interpersonal Dynamics
A review of the concepts and aspects of interpersonal, intrapersonal, and group dynamics provides a foundation for the student to understand the meaning of illness and how that impacts the human condition. An in-depth analysis of disability from the perspective of the disabled is explored. Two hours lecture, two hours lab per week or equivalent.

OT 575  3 cr.
Community-based Practice
(Prerequisite: OT 581 or OT 582) In-depth exposure to selected areas that represent the current focus of advanced practice in occupational therapy. The areas of practice examined in the course will include community-based programs,
non-medical settings, alternative care, and natural environments. Two hours lecture, two hours lab per week or equivalent.

**OT 581** 6 cr.
**OT Level II Internship – I:** Psychosocial Rehabilitation
(Prerequisite: completion of all undergraduate coursework or academic graduate course work) Level II fieldwork is designed to provide opportunities to integrate academically acquired knowledge with Occupational Therapy clinical practice in psychosocial rehabilitation. OT certification exam eligibility requires 24 weeks total Level II Internship (minimum). Summer, following the fourth or fifth year of the program, twelve weeks, full time.

**OT 582** 6 cr.
**OT Level II Internship – II:** Physical Rehabilitation
(Prerequisite: completion of all undergraduate coursework or academic graduate course work) Level II fieldwork is designed to provide opportunities to integrate academically acquired knowledge with Occupational Therapy clinical practice in physical rehabilitation. OT certification exam eligibility requires 24 weeks total Level II Internship (minimum). Summer, following fourth or fifth year of program, twelve weeks, full time.

**OT 583** 4-6 cr.
**OT Level II Internship – III:** Specialty (optional)
(Prerequisites: OT 581, OT 582) Level II fieldwork designed to provide opportunities for clinical experience in a specialty area of practice. Arranged on an availability basis. Fall, following the fifth year of the program, eight to twelve weeks, full-time.

**OT 593** 3 cr.
**OT Applied Clinical Research I**
(Prerequisites: OT 493, OT 581 or OT 582)
This course is designed to promote entry-level research competencies in health care, education, and community settings by engagement in actual research activities that are drawn upon and amplified in the research process under the direction of a research advisor. Three hours seminar, advising session or equivalent/week.

**OT 594** 3 cr.
**OT Applied Clinical Research II**
(Prerequisite: OT 593) This course is the third and last course in the capstone experience. It involves the completion of a systematic research study that is based on a body of knowledge or theoretical approach, and designed to contribute to the field of occupational therapy. Three hours seminar, advising session or equivalent/week.

Director of Clinical Education

**Overview**
The Department of Physical Therapy at The University of Scranton was established in 1980, offering a Bachelor of Science in Physical Therapy degree. In 1996, the University phased out the bachelor’s degree in favor of a Master of Physical Therapy (M.P.T.) degree program in response to changing educational requirements and accreditation standards. In 2000, the Board of Directors of the American Physical Therapy Association adopted Vision 2020. Vision 2020 is a shared vision of where physical therapists see their profession in the year 2020. The physical therapist seen in Vision 2020 will be an autonomous professional and practitioner of choice for the assessment, evaluation, treatment and prevention of musculoskeletal conditions. The physical therapist of 2020 will use research and evidence in all aspects of their practice. The physical therapist of 2020 will be a clinical doctor – a Doctor of Physical Therapy (D.P.T.).

The Department of Physical Therapy at the University of Scranton has received authorization from the Pennsylvania Department of Education to begin offering the Doctor of Physical Therapy degree. The current M.P.T. program is being phased out and replaced by a three-year, post-Baccalaureate D.P.T. program.

Students who have earned a baccalaureate degree and meet specific prerequisites and other entry requirements will be able to apply for admission to the D.P.T. program at The University of Scranton. Applicants must have completed the following prerequisite courses with a grade of C or better, have attained a GPA of 3.0 or better and completed at least 60 hours of observation under the supervision of a licensed physical therapist.

**Admission into the Doctor of Physical Therapy Program**
Admission into the Doctor of Physical Therapy Program is limited to 45 qualified applicants each year. Students can enter in the following ways:

**Guaranteed Admission**
A select group of incoming freshmen who indicate an interest in the Doctor of Physical Therapy program will be offered “guaranteed admission” as they enter the University based on the strength of their overall application. Students who receive a guaranteed admission must complete all prerequisite courses with a grade of C or better, carry an overall GPA of 3.0 or higher and undertake a required clinical experience as outlined by the Physical Therapy Department. They will be expected to confirm their intention annually and should apply to the Graduate School formally in the fall semester of their senior year by completing a Graduate School application.

**Early Admission**
University of Scranton students who are interested in the D.P.T. program can apply for early admission into the program by completing a Graduate School application in the first semester of their senior year. Students must have completed all the necessary prerequisite courses with a grade of C or better, carried an overall GPA of 3.0 or higher and undertaken a required clinical experience as outlined by the Physical Therapy Department.

**Regular Admission**
Students not enrolled at The University of Scranton may seek regular admission into the D.P.T. program by completing and submitting a Graduate School application to the D.P.T. program. Applicants should contact the Physical Therapy Department Chair or Director of Clinical Education for the appropriate form and guidelines as to the type of facilities that are appropriate to meet this requirement.

**The D.P.T. curriculum can be found in the University of Scranton Graduate School Catalog.**

---

**Prerequisites**

**A. Courses (must be completed with a grade of C or better)**

- General Biology with labs: two courses, 8 credits minimum
- General Chemistry with labs: two courses, 8 credits minimum
- General Physics with labs: two courses, 8 credits minimum
- Anatomy and Physiology I, II: one course, 3 credits minimum
- General Chemistry with labs: one course, 3 credits minimum
- General Physics with labs: one course, 3 credits minimum
- Statistics: one course, 3 credits minimum

Incoming freshmen can choose any University major so long as the above prerequisite courses are taken. The following majors, however, offer the best fit for completing requirements for admission into the D.P.T. program:

**B. Valid CPR Certification**

Students with baccalaureate degrees from either The University of Scranton or other institutions applying to the D.P.T. program at The University of Scranton should submit documented evidence of at least 60 hours of observation time in at least two distinctly different clinical settings at the time of their application to the D.P.T. program. Applicants should contact the Physical Therapy Department Chair or Director of Clinical Education for the appropriate form and guidelines as to the type of facilities that are appropriate to meet this requirement.
non-medical settings, alternative care, and natural environments. Two hours lecture, two hours lab per week or equivalent.

OT 581 6 cr.
OT Level II Internship – I: Psychosocial Rehabilitation
(Prerequisite: completion of all undergraduate coursework or academic graduate course work) Level II fieldwork is designed to provide opportunities to integrate academically acquired knowledge with Occupational Therapy clinical practice in psychosocial rehabilitation. Overview
The Department of Physical Therapy at The University of Scranton was established in 1980, offering a Bachelor of Science in Physical Therapy degree. In 1996, the University phased out the bachelor’s degree in favor of a Master of Physical Therapy (M.P.T.) degree program in response to changing educational requirements and accreditation standards. In 2000, the Board of Directors of the American Physical Therapy Association adopted Vision 2020. Vision 2020 is a shared vision of where physical therapists see their profession in the year 2020. The physical therapist seen in Vision 2020 will be an autonomous professional and practitioner of choice for the assessment, evaluation, treatment and prevention of musculoskeletal conditions. The physical therapist of 2020 will use research and evidence in all aspects of their practice. The physical therapist of 2020 will be a clinical doctor – a Doctor of Physical Therapy (D.P.T.).

The Department of Physical Therapy at The University of Scranton has received authorization from the Pennsylvania Department of Education to begin offering the Doctor of Physical Therapy degree. The current M.P.T. program is being phased out and replaced by a three-year, post-Baccalaureate D.P.T. program.

Students who have earned a baccalaureate degree and meet specific prerequisites and other entry requirements will be able to apply for admission to the D.P.T. program at The University of Scranton. Applicants must have completed the following prerequisite courses with a grade of C or better, have attained a GPA of 3.0 or better and completed at least 60 hours of observation under the supervision of a licensed physical therapist.

Admission into the Doctor of Physical Therapy Program
Admission into the Doctor of Physical Therapy Program is limited to 45 qualified applicants each year. Students can enter in the following ways:

Guaranteed Admission
A select group of incoming freshmen who indicate an interest in the Doctor of Physical Therapy program will be offered “guaranteed admission” as they enter the University based on the strength of their overall application. Students who receive a guaranteed admission must complete all prerequisite courses with a grade of C or better, carry an overall GPA of 3.0 or higher and undertake a required clinical experience as outlined by the Physical Therapy Department. They will be expected to confirm their intention annually and should apply to the Graduate School formally in the fall semester of their senior year by completing a Graduate School application.

Early Admission
University of Scranton students who are interested in the D.P.T. program can apply for early admission into the program by completing a Graduate School application in the first semester of their senior year. Students must have completed all the necessary prerequisite courses with a grade of C or better and have attained an overall GPA of 3.0 or higher and undertaken a required clinical experience as outlined by the Physical Therapy Department.

Regular Admission
Students not enrolled at The University of Scranton may seek regular admission into the D.P.T. program during their senior year by completing and submitting a Graduate School application. Physical therapists interested in pursuing the D.P.T. should apply in the fall semester of any given year for admission into the program in the following fall semester.

Prerequisites
A. Courses (must be completed with a grade of C or better)
General Biology with lab: two courses, 8 credits minimum
General Chemistry with lab: two courses, 8 credits minimum
General Physics with lab: two courses, 8 credits minimum
Mammalian/Human Physiology: one course, 3 credits minimum
Mathematics (at the level of Trigonometry or higher): one course, 3 credits minimum
General Psychology: one course, 3 credits minimum
Advanced Psychology (Childhood, Adolescence, Aging or Abnormal Psychology): one course, 3 credits minimum
Medical or Biomedical Ethics: one course, 3 credits minimum
Computer Competency: one course, 3 credits minimum

Incoming freshmen can choose any University major so long as the above prerequisite courses are taken. The following majors, however, offer the best fit for completing requirements for admission into the D.P.T. program: Biology, Biochemistry, Biophysics and Exercise Science.

B. Valid CPR Certification
C. Observation Hours
Students with baccalaureate degrees from either The University of Scranton or other institutions applying to the D.P.T. program at The University of Scranton should submit documented evidence of at least 60 hours of observation time in at least two distinctly different clinical settings at the time of their application to the D.P.T. program. Applicants should contact the Physical Therapy Department Chair or Director of Clinical Education for the appropriate form and guidelines as to the type of facilities that are appropriate to meet this requirement.

The D.P.T. curriculum can be found in The University of Scranton Graduate School Catalog.
Dexter Hanley College has been providing quality education for adult students since 1923. Dexter Hanley College continues this tradition of student-centered administration that supports adults in achieving their academic goals.

Dexter Hanley College provides services for visiting students, students in grades six through twelve, as well as continuing full-time and part-time students.
Mission Statement
Dexter Hanley College, the undergraduate college for adult and non-traditional students, is committed to carrying on the Jesuit tradition by offering quality programs, quality services and the opportunity for students to reach their educational goals. Dexter Hanley College is dedicated to serving the local community and continually updates its programs and services in response to the community's ever-changing needs. The baccalaureate degrees earned by DHC students and the faculty who teach for DHC are the same as for the other University of Scranton undergraduate colleges. In addition, DHC offers credit certificate programs and associate's degrees that apply towards the baccalaureate degrees. Dexter Hanley College serves primarily the following five groups:
1. Adults who wish to pursue an undergraduate degree
2. Students who want to obtain an associate's degree or certificate
3. Students who want to improve their professional competence and/or to prepare themselves for new careers
4. Adults who want to take advantage of educational programs for enrichment
5. Visiting students from other colleges and universities

Dexter Hanley College is dedicated to helping students succeed by offering scholarship opportunities, life-experience credits, academic and career counseling, and academic support services.

Degree Programs
Dexter Hanley College students may attend courses offered in the day or at night. Students who can attend courses scheduled for mornings and afternoons may choose from the following degree programs in Group 1 or Group 2. Students who plan to attend only in the evening may select from Group 2.

The Dexter Hanley College baccalaureate programs have the same general-education requirements as the corresponding programs in The College of Arts and Sciences, The Kania School of Management, and The Panuska College of Professional Studies. It should be noted, however, that the physical education requirement is waived for Dexter Hanley College students.

Curricular requirements for each degree program will be found on pages indicated in the index at the back of this catalog. Math placement testing may determine additional math prerequisites in addition to those specified by a degree program.

Group 1: Degrees During the Day
In general, courses that comprise the major for these degree programs are offered during the daytime only.

Admission Information
Application for Admission
Admission to Dexter Hanley College at The University of Scranton is based on the applicant's academic record, life experiences and motivation to continue education. Application forms may be obtained from the Admissions Office, Dexter Hanley College (DHC) or may be requested by phone at (570) 941-5813 or by fax at (570) 941-5928. Additional information is available on the Web at www.scranton.edu/dhc.

The Admissions Office operates on a rolling admissions plan which processes applications on a continual basis as received. All candidates are informed of the admission decision within three weeks after the completion of their files of supporting credentials.

To complete the application file, the candidate must have the following sent to the Office of Admissions:
1. A completed application form accompanied by the $20.00 application fee;
2. An official high school transcript (or Graduate Equivalency Diploma [GED], including scores, when applicable);
3. A personal statement detailing how enrolling at the University will contribute to the individual's goals;
4. Official transcripts, mailed directly from every college or university attended (if applicable) no later than three weeks before the beginning of classes in the semester the student wishes to enroll.

Applicants with a minimum of 15 earned credits from an accredited college or university do not need to submit high school transcripts or GED scores.

Applicants are encouraged to meet with an admissions counselor prior to registration and can make an appointment by contacting the Office of Admissions at (570) 941-5813.

In general, advanced standing will be granted for previously completed courses from regionally accredited institutions when they are equivalent or comparable to courses at the University, the student received grades of C or higher, and the courses meet requirements for the degree program. If the student changes major at a later date, another review of transfer credits will be made at that time, and the student will be given a written evaluation clearly indicating the transfer credits that apply to the new major. In all cases, for a bachelor's degree, transfer students must earn a minimum of 63 credits at the University of Scranton. Once a transfer student matriculates, the University policy on course transfers applies.

Conditional Admission
A student may be admitted conditionally if official transcripts have not been received in the Admission Office before classes begin. The student whose official records have not been received within five weeks after classes have begun will not be permitted to register for a subsequent term.

The Admissions Office operates on a rolling admissions plan which processes applications on a continual basis as received. All candidates are informed of the admission decision within three weeks after the completion of their files of supporting credentials.

To complete the application file, the candidate must have the following sent to the Office of Admissions:
1. A completed application form accompanied by the $20.00 application fee;
2. An official high school transcript (or Graduate Equivalency Diploma [GED], including scores, when applicable);
3. A personal statement detailing how enrolling at the University will contribute to the individual’s goals;
4. Official transcripts, mailed directly from every college or university attended (if applicable) no later than three weeks before the beginning of classes in the semester the student wishes to enroll.

Applicants with a minimum of 15 earned credits from an accredited college or university do not need to submit high school transcripts or GED scores.

Applicants are encouraged to meet with an admissions counselor prior to registration and can make an appointment by contacting the Office of Admissions at (570) 941-5813.

In general, advanced standing will be granted for previously completed courses from regionally accredited institutions when they are equivalent or comparable to courses at the University, the student received grades of C or higher, and the courses meet requirements for the degree program. If the student changes major at a later date, another review of transfer credits will be made at that time, and the student will be given a written evaluation clearly indicating the transfer credits that apply to the new major. In all cases, for a bachelor’s degree, transfer students must earn a minimum of 63 credits at the University of Scranton. Once a transfer student matriculates, the University policy on course transfers applies.

Conditional Admission
A student may be admitted conditionally if official transcripts have not been received in the Admission Office before classes begin. The student whose official records have not been received within five weeks after classes have begun will not be permitted to register for a subsequent term.

* Some courses in this major are available evenings.
Upon receipt and evaluation of the official academic transcripts, the Admissions Office will notify the student regarding acceptance or rejection. The student who is rejected will be permitted to finish the semester if he/she wishes to do so, but will not be allowed to register for subsequent terms. The student who is accepted will be subject to all rules, regulations and policies of the University. Because official academic transcripts are necessary for effective academic advising, the student who enters under the conditional admission policy takes full responsibility for any errors in course selection and for all extra costs involved in making changes in class registrations.

Second Baccalaureate Degree

University of Scranton graduates and persons with good scholastic records and a baccalaureate degree from a regionally accredited institution, who wish to earn a second baccalaureate degree at The University of Scranton, must apply to Dexter Hanley College. Candidates for a second baccalaureate degree are expected to complete a minimum of 30 credits at The University of Scranton beyond the completion of the studies for the first degree, of which at least 15 credits must be in the second degree’s major. Students must complete all requirements for the second degree not covered by the first degree program for the major and cognate. All prerequisites for major and cognate courses must also be completed.

No semester hours from the first baccalaureate degree can be used toward this 30-credit requirement. Grades for courses taken by University of Scranton graduates after completion of the requirements for the first baccalaureate degree will have no effect on the final grade-point average of the first degree.

Certificate Programs

Students wishing to complete a certificate program in Dexter Hanley College must meet the requirements specified by the appropriate department.

Self-Improvement

Students who do not plan to work toward a degree or a certificate must also file an application for admission and must arrange for official transcripts to be sent to the Dexter Hanley College Admissions Office.

Visiting Students

Students matriculated in other colleges or universities who wish to take courses for credit at The University of Scranton should present the written approval of their dean or other authorized administrator for all courses taken at The University of Scranton. The University of Scranton does not guarantee transferability of its courses. Readmit courses are not available for visiting students. Visiting students must complete an application form but are not required to submit transcripts. Visiting students taking more than one course in any semester are required to attend orientation.

Telecourses

Telecourses provide students with an opportunity to study with a more flexible schedule. Courses are normally shown one hour per week on the regional PBS affiliate, WVIA-TV. Meetings with instructors are reduced from the typical three hours per week to no more than six meetings per semester. These courses are geared to highly motivated students capable of doing independent work. (Courses offered vary each semester.)

Online Courses

Many courses at the University require that students have access to a computer and the Internet for assignments, research, discussion groups, etc. The University provides each student with an account number and there are computer labs on campus for student use. In addition, a number of faculty are using Blackboard to support or to teach the entire course. Blackboard is the standard university Web-courseware tool that enables an instructor to supplement a course with online materials and activities, or to deliver a course solely online. Blackboard contains modules for announcements, course documents, online tests/quizzes, discussion board, chat and assignments.

At The University of Scranton, Blackboard is also used to deliver courses solely online. The class documents are posted on the web and the students are responsible for submitting the assignments using the provided tools in Blackboard. There are virtual office hours via the chat room when the instructor can communicate with one or several students simultaneously.

To find out more about Blackboard, the computer equipment you need, and what you need to know before taking an online course, visit The University’s Blackboard page located at www.scranton.edu/bb.

Dexter Hanley College Advising Center

In Dexter Hanley College, academic advising begins with admission interviews, registration and new-student orientations. Ongoing advising services that support students through their years of study to graduation provide all students, including transfer and evening students, with stability and continuity in their academic planning. Dexter Hanley College students are assigned faculty advisors by their choice of major. They are also assisted by staff advisors who are available twelve months a year during day and evening office hours.

The staff in Dexter Hanley College, Career Services and the Counseling Center are also available for consultation regarding academic, career and personal issues.

Campus Life

Students should consult the Dexter Hanley College Student Handbook for information about such practical matters as I.D. cards, parking permits and opportunities for participation in various aspects of University life. Dexter Hanley College participation in campus government is provided through the Dexter Hanley College Student Government and through Dexter Hanley College student representation on the University Council.

Academic Regulations

Dexter Hanley College students should consult this catalog for academic regulations common to all four undergraduate colleges of the University. They should be aware of the following policies that relate specifically to those enrolled in Dexter Hanley College.

Auditors

Dexter Hanley College students may register as auditors with the approval of the dean. Entry of the audit grade on the transcript assumes satisfactory attendance at class meetings. The student should consult with the instructor as to what constitutes satisfactory attendance. Auditors are not responsible for assigned work, quizzes, or examinations, and they receive no credit for the course. Students not enrolled as auditors who wish to change their status to that of auditor must do so by deadlines specified in the academic calendar on the inside front cover of this catalog. Auditing students pay the regular tuition and fees.

Credit for Academically Relevant Learning

Many students have acquired “experiential learning” outside a formal college or university classroom in jobs, military service or non-accredited institutions.

Dexter Hanley College provides opportunities for students to earn credit for such experiences. A maximum of 30 credits will be awarded for extra-institutional learning, excluding military credit. This includes CLEP, Excelsior College Examination, ACE-approved credit, portfolio credit, and PONSI credit. (Advanced-placement credit is considered separately.)

Students wishing to have this learning assessed for possible credit will enroll in a one- or two-semester course, EDUC 101, to document relevant experiences and the knowledge gained from them for departmental review. Faculty evaluators from the appropriate department(s) will evaluate the portfolio and may recommend a credit award for students’ learning. For further information, contact a Dexter Hanley College advisor at (570) 941-7580.

EDUC 101 3 cr.

Fundamentals of Adult Development and Experiential Learning

The course provides learners with a basic knowledge of adult learning and development theories as a framework for understanding themselves as learners. Through self-assessment of their learning styles, motivation, and values, learners will gain an understanding of the factors which facilitate and/or inhibit their pursuit of higher
Upon receipt and evaluation of the official academic transcripts, the Admissions Office will notify the student regarding acceptance or rejection. The student who is rejected will be permitted to finish the semester if he/she wishes to do so, but will not be allowed to register for subsequent terms. The student who is accepted will be subject to all rules, regulations and policies of the University. Because official academic transcripts are necessary for effective academic advising, the student who enters under the conditional admission policy takes full responsibility for any errors in course selection and for all extra costs involved in making changes in class registrations.

Second Baccalaureate Degree

University of Scranton graduates and persons with good scholastic records and a baccalaureate degree from a regionally accredited institution, who wish to earn a second baccalaureate degree at The University of Scranton, must apply to Dexter Hanley College. Candidates for a second baccalaureate degree are expected to complete a minimum of 30 credits at The University of Scranton beyond the completion of the studies for the first degree, of which at least 15 credits must be in the second degree’s major. Students must complete all requirements for the second degree not covered by the first degree program for the major and cognate. All prerequisites for major and cognate courses must also be completed. No semester hours from the first baccalaureate degree can be used toward this 30-credit requirement. Grades for courses taken by University of Scranton graduates after completion of the requirements for the first baccalaureate degree will have no effect on the final grade-point average of the first degree.

Certificate Programs

Students wishing to complete a certificate program in Dexter Hanley College must meet the requirements specified by the appropriate department.

Self-Improvement

Students who do not plan to work toward a degree or a certificate must also file an application for admission and must arrange for official transcripts to be sent to the Dexter Hanley College Admissions Office.

Visiting Students

Students matriculated in other colleges or universities who wish to take courses for credit at The University of Scranton should present the written approval of their dean or other authorized administrator for all courses taken at The University of Scranton. The University of Scranton does not guarantee transferability of its courses. Readmits courses are not available for visiting students.

Visiting students must complete an application form but are not required to submit transcripts. Visiting students taking more than one course in any semester are required to attend orientation.

Telecourses

Telecourses provide students with an opportunity to study with a more flexible schedule. Courses are normally shown one hour per week on the regional PBS affiliate, WVIA-TV. Meetings with instructors are reduced from the typical three hours per week to no more than six meetings per semester. These courses are geared to highly motivated students capable of doing independent work. (Courses offered vary each semester.)

Online Courses

Many courses at the University require that students have access to a computer and the Internet for assignments, research, discussion groups, etc. The University provides each student with an account number and there are computer labs on campus for student use. In addition, a number of faculty are using Blackboard to support or to teach the entire course. Blackboard is the standard university Web-courseware tool that enables an instructor to supplement a course with online materials and activities, or to deliver a course solely online. Blackboard contains modules for announcements, course documents, online tests/quizzes, discussion board, chat and assignments.

At The University of Scranton, Blackboard is also used to deliver courses solely online. The class documents are posted on the web and the students are responsible for submitting the assignments using the provided tools in Blackboard. There are virtual office hours via the chat room when the instructor can communicate with one or several students simultaneously.

To find out more about Blackboard, the computer equipment you need, and what you need to know before taking an online course, visit The University’s Blackboard page located at www.scranton.edu/bb.

Dexter Hanley College Advising Center

In Dexter Hanley College, academic advising begins with admission interviews, registration and new-student orientations. Ongoing advising services that support students through their years of study to graduation provide all students, including transfer and evening students, with stability and continuity in their academic planning. Dexter Hanley College students are assigned faculty advisors by their choice of major. They are also assisted by staff advisors who are available twelve months a year during day and evening office hours.

The staff in Dexter Hanley College, Career Services, and the Counseling Center are also available for consultation regarding academic, career and personal issues.

Campus Life

Students should consult the Dexter Hanley College Student Handbook for information about such practical matters as I.D. cards, parking permits and opportunities for participation in various aspects of University life.

Dexter Hanley College participates in campus government provided the Dexter Hanley College Student Government and through Dexter Hanley College student representation on the University Council.

Academic Regulations

Dexter Hanley College students should consult this catalog for academic regulations common to all four undergraduate colleges of the University. They should be aware of the following policies that relate specifically to those enrolled in Dexter Hanley College.

Auditors

Dexter Hanley College students may register as auditors with the approval of the dean. Entry of the audit grade on the transcript assumes satisfactory attendance at class meetings. The student should consult with the instructor as to what constitutes satisfactory attendance. Auditors are not responsible for assigned work, quizzes, or examinations, and they receive no credit for the course. Students not enrolled as auditors who wish to change their status to that of auditor must do so by deadlines specified in the academic calendar on the inside front cover of this catalog. Auditing students pay the regular tuition and fees.

Credit for Academically Relevant Learning

Many students have acquired “experiential learning” outside a formal college or university classroom in jobs, military service or non-accredited institutions.

Dexter Hanley College provides opportunities for students to earn credit for such experiences. A maximum of 30 credits will be awarded for extra-institutional learning, excluding military credit. This includes CLEP, Excelsior College Examination, ACE-approved credit, portfolio credit, and PONSI credit. (Advanced-placement credit is considered separately.)

Students wishing to have this learning assessed for possible credit will enroll in a one-semester course, EDUC 101, to document relevant experiences and the knowledge gained from them for departmental review. Faculty evaluators from the appropriate department(s) will evaluate the portfolio and may recommend a credit award for students’ learning. For further information, contact a Dexter Hanley College advisor at (570) 941-7580.

EDUC 101

3 cr.

Fundamentals of Adult Development and Experiential Learning

The course provides learners with a basic knowledge of adult learning and development theories as a framework for understanding themselves as learners. Through self-assessment of their learning styles, personality factors, value systems, interests, and previously acquired learning, they will gain an understanding of the factors which facilitate and/or inhibit their pursuit of higher
learning. This course also assists learners in developing a portfolio of their learning experiences to be reviewed for college. Dexter Hanley students only; permission of instructor required.

**College-Level Examination Program (CLEP)**

The College-Level Examination Program has been established to enable students of all ages to earn college credit by examination. Through the CLEP tests, applicants may gain credit in many academic subjects applicable to their degree programs. Individuals who wish to receive information about these examinations should consult the Dexter Hanley College Director of Advising or write directly to the Program Director, College-Level Examination Program, College Entrance Examination Board, Box 1824, Princeton, N.J. 08540.

**Dean’s List**

Since many students in Dexter Hanley College are enrolled on a part-time basis, the Dean’s List criterion for this school differ somewhat from those of the other University of Scranton colleges. Students in DHC may earn Dean’s List distinction provided they carry at least two courses (at least 6 credits) during the semester and earn at least a 3.50 grade-point average with no grade code of NG, I, C-, D+, D, F or U. The Dean’s List is published at the end of the fall and spring terms each year.

**Sequences of Study/Prerequisites**

Students enrolled in degree programs in Dexter Hanley College are strongly advised to follow the sequence of studies listed for their chosen major as closely as possible. In order that students may be assured of having the adequate background for the successful completion of certain courses, prerequisite courses are sometimes listed. The course descriptions in the earlier pages of this bulletin contain the necessary information on prerequisites. In some cases practical experience may compensate for the lack of prerequisite courses, but such requests for exceptions require written approval, in advance, from the departmental advisor. Students should also check with their departments for specific scheduling information on course sequences in their major. Since not all required courses are offered each semester, careful planning should be done in advance to assure smooth progress through the degree program.

**Readmission**

Once accepted into Dexter Hanley College, a student is expected to maintain continuous enrollment. The dean may approve requests for one, and, on occasion, two consecutive semester leaves of absence. Students who do not attend the University for a semester or more, without an approved leave of absence, may be required to complete a full application for readmission. This may also result in a student’s needing to fulfill new curricular requirements. To apply for re-admission, contact Dexter Hanley College, not the Admissions Office, at (570) 941-7580.

**Readmission of Dismissed Students**

If a Dexter Hanley College student who has been dismissed from The University of Scranton wishes to apply for readmission to the University, the student may do so no sooner than one full semester after the semester in which the dismissal took place. Readmission is not automatic; the student will need to demonstrate that the conditions which led to dismissal will not present a continuing problem. If a student is dismissed a second time from the University, readmission is not permitted. Students who want to be readmitted after dismissal need to apply to Dexter Hanley College directly, not to the Admissions Office.

**The University of Scranton/ Marywood University Cross-Registration Program**

After completing 30 credits at The University of Scranton, full-time Dexter Hanley College students in good academic standing may take two courses (equivalent to 6 credits) at Marywood during the calendar year (January to December). Part-time students can take one Marywood course for every five University of Scranton courses, for a maximum of six Marywood courses. Interested students should contact the Dexter Hanley College Advising Center.

**Alumni Discount**

Individuals who have previously earned a baccalaureate degree from The University of Scranton and are taking undergraduate, credit-bearing courses are eligible for 50% tuition reduction.

**Family Tuition Reduction**

Whenever at least one dependent child from a family or a spouse is in attendance at the University as a full-time undergraduate student, a special family tuition-reduction policy will apply to a parent/spouse enrolled as a full-time student in Dexter Hanley College. The amount of tuition credit that will be awarded each semester will be calculated after other financial aid has been applied by the Bursar’s Office personnel. Forms and additional information may be obtained from the Bursar’s Office or from Dexter Hanley College.

**Tuition Policy for Senior Citizens**

Persons 60 years of age or older may audit undergraduate courses at the University through Dexter Hanley College at no tuition charge on a “space-available” basis. Fees and other costs of courses (e.g., textbooks) are assessed at the normal rate. The student must complete the senior-citizen-tuition waiver form and the registration process, including returning the remittance form.

Persons 60 years of age or older may take undergraduate courses for credit through Dexter Hanley College at 50 percent tuition. These reductions are applicable only after the person has applied for and received any form of financial assistance normally available (e.g., state and federal assistance, employer reimbursement). The student must complete the senior-citizen-tuition waiver form and the registration process, including returning the remittance form.

Senior-citizen students must complete the full application process, including submission of all official transcripts.
learning. This course also assists learners in developing a portfolio of their learning experiences to be reviewed for college. Dexter Hanley students only; permission of instructor required.

**College-Level Examination Program (CLEP)**

The College-Level Examination Program has been established to enable students of all ages to earn college credit by examination. Through the CLEP tests, applicants may gain credit in many academic subjects applicable to their degree programs. Individuals who wish to receive information about these examinations should consult the Dexter Hanley College Director of Advising or write directly to the Program Director, College-Level Examination Program, College Entrance Examination Board, Box 1824, Princeton, N.J. 08540.

If a student is dismissed a second time from the University, readmission is not permitted. Students who want to be readmitted after dismissal need to apply to Dexter Hanley College directly, not to the Admissions Office.

**The University of Scranton/ Marywood University Cross-Registration Program**

After completing 30 credits at The University of Scranton, full-time Dexter Hanley College students in good academic standing may take two courses (equivalent to 6 credits) at Marywood during the calendar year (January to December). Part-time students can take one Marywood course for every five University of Scranton courses, for a maximum of six Marywood courses. Interested students should contact the Dexter Hanley College Advising Center.
Financial Aid for Dexter Hanley College Students

Dexter Hanley College students are eligible to apply for several forms of federal and state financial aid. Eligibility for all grants, loans, and institutional aid requires the student to submit the Free Application for Federal Student Aid (FAFSA). The student must also submit signed copies of the tax information for the student and spouse/parent (if required). Priority deadline for incoming students is May 1. Returning students must file by April 15.

University Aid for Dexter Hanley College Students

Accounting Scholarship

The Northeast Chapter of the Pennsylvania Society of Public Accountants has endowed a scholarship fund awarding one limited tuition scholarship each year to an Accounting major in Dexter Hanley College.

The Eugene J. Donahue Scholarship (see p. 28)

The Rev. John J. Fitzpatrick, S.J., Scholarship (see p. 29)

Full-Time and Part-Time Grants

Full-time and part-time grants are awarded to Dexter Hanley College students who demonstrate need, academic progress, and enrollment status of at least 6 credits. Awards range from $500 to $5,000 per year.

The Robert L. McDevitt, K.S.G., Scholarship (see p. 33)

Newcombe Scholarship for Mature Women

The Charlotte W. Newcombe Foundation provides limited-tuition scholarships for mature women students completing their education in preparation for a second career. These scholarships are available to women who are 25 years of age or older, who have completed at least 60 credits, and who are enrolled in Dexter Hanley College.

New Transfer-Student Scholarship

Transfer students who have completed at least 30 credits at their previous institution and intend to pursue full-time studies at The University of Scranton are eligible to be considered for this award. This is an academic as well as need-based scholarship. The award may be renewed until graduation upon maintenance of required grade-point average.

The Oppenheim Family Scholarship

(see p. 34)

Student Government Scholarship

This limited-tuition scholarship is available to DHC students with demonstrated financial need who have completed 6 or more credits (including transfer credits). Both full- and part-time students are eligible, as are DHC Student Government members. Those who are not eligible for this scholarship include students working toward a second degree and University employees with full tuition remission. Grade point average is not a consideration when considering financial need.

The Thomas P. White Scholarship

(see p. 37)

State and Federal Aid

Pennsylvania Higher Education Assistance Agency (PHEAA)

Dexter Hanley College students are eligible to apply for PHEAA grants if they are taking at least 6 credits per semester.

Pell Grants

Dexter Hanley College students taking at least 3 credits a semester are eligible to apply for federal grants administered under the Pell Grant program.

Federal Stafford Loan

Hanley College students are eligible to apply for Stafford Loans if they are taking at least 6 credits per semester.

RN to B.S. in Nursing Curriculum

Donna Rinaldi Carpenter, Ed.D., Director, RN Track

Overview

The registered-nurse student is recognized as an adult learner who comes with a diversity of life experiences, education, and clinical expertise, as well as motivation and ability to learn independently and collaboratively. To facilitate advanced placement, opportunity is provided for students to validate previously acquired educational and clinical competencies.

The nursing program, accredited by the National League for Nursing Accrediting Commission, is open to all registered nurses who meet admission requirements. The registered-nurse student may enroll on either a full-time or part-time basis.

To apply for admission to the RN to B.S. program, students should submit the following with completed application forms and fees:

1. Official transcripts from high school, nursing school and other colleges attended.
2. A copy of current Pennsylvania Registered Nurse License.

Transcripts are individually reviewed and evaluated. Transfer courses, especially courses in the sciences, must be equivalent to courses in the nursing program at The University of Scranton (science courses taken at a non-degree program are accepted if they were taken at an affiliated college and received college credit); a grade of C or better must have been earned.

Student Policies: RN Track

1. Ordinarily, to continue in the nursing program, the RN student must enroll in a minimum of one course in each regular semester.
2. The RN student is expected to complete the degree requirements within seven years from the date of admission. 57 credits in Nursing are required for the degree, 38.5 of which may be earned by verifying current employment or graduation through an original RN program less than 10 years prior to acceptance. The 38.5 validation credits are posted on the student's official transcript.
3. Students must have completed at least 100 credits prior to enrollment in NURS 493. Completion of all course work toward the baccalaureate degree is suggested prior to enrollment in NURS 473.
4. Nursing students must achieve a grade of C or better in the major and cognate courses. Once the student is enrolled, all Nursing courses must be taken at The University of Scranton.
5. Before students begin clinical work, they may be taken in lieu of NURS 473, 483. Additional information is available by calling (570) 941-5813.
6. Register for ACE I through Dexter Hanley College Admissions Office or a member of the Nursing Department.
7. Submit two letters of recommendation from an employer within the last five years. If you are a recent LPN graduate, these references could be a faculty member from your institution.
8. Submit a copy of a current LPN license to the DHC Admissions Office.
9. Have official transcripts of your LPN program, high school and all previous college credits sent to the Dexter Hanley Admissions Office, The University of Scranton, Scranton, PA 18510.
10. Register for ACE I through Dexter Hanley College.
11. Note: Once accepted, LPNs are subject to all policies for nursing students as indicated in the University’s Nursing Student Handbook.

Advanced Placement Exams

Students are accepted into the LPN to B.S.in Nursing program after they successfully complete the ACE II exams, offered in January and June of each year. After acceptance, LPNs meet with a nursing advisor to plan their curriculum. If the student successfully completes the optional ACE II (Medical/Surgical and Obstetrics/Pediatrics), the following courses will be waived:

ACE II Exams available (January) – includes NURS 251:
- Nursing Related to Health Patterns (w/Lab) 2

ACE II Exams available (June) – Clinical Skills Challenge every summer 13

Pre-Nursing Summer Session 19
- WRTG 107 Composition 3
- CIL 102 Computing and Information Literacy 3
- Exam: ACE II Exam available (June) – Clinical Skills Challenge every summer (19)

Student Policies: RN Track

1. Ordinarily, to continue in the nursing program, the RN student must enroll in a minimum of one course in each regular semester.
2. The RN student is expected to complete the degree requirements within seven years from the date of admission. 57 credits in Nursing are required for the degree. 38.5 of which may be earned by verifying current employment or graduation through an original RN program less than 10 years prior to acceptance. The 38.5 validation credits are posted on the student’s official transcript.
3. Students must have completed at least 100 credits prior to enrollment in Nurs 493. Completion of all course work toward the baccalaureate degree is suggested prior to enrollment in NURS 473.
4. Nursing students must achieve a grade of C or better in the major and cognate courses. Once the student is enrolled, all Nursing courses must be taken at The University of Scranton.
5. Before students begin clinical work, they must submit copies of their professional malpractice-liability insurance policy, evidence of current licensure and CPR certification.
6. Students who have earned an overall GPA of 3.3 or higher may choose an accelerated track toward the M.S. in Nursing, NURS 510, 591, 593 and 595 may be taken in lieu of NURS 473, 483 and 493. Additional information is available from Dr. Carpenter, Director of the RN Track.
7. Dexter Hanley College students will meet the service-learning requirements by completing major courses that have a service-learning component.

LPN TO B.S. IN NURSING

Sharon Hudacek, Ed.D., Director, LPN to B.S. in Nursing Track

Admissions Requirements

3. A passing score on advanced placement credit exams.

Admissions Procedures

1. Submit a University of Scranton Application for Admission to Dexter Hanley College. Information is available by calling (570) 941-5813.
2. Schedule an interview with either the Dexter Hanley College Admissions Office or a member of the Nursing Department.
3. Submit two letters of recommendation from an employer within the last five years. If you are a recent LPN graduate, these references could be a faculty member from your institution.
4. Submit a copy of a current LPN license to the DHC Admissions Office.
5. Have official transcripts of your LPN program, high school and all previous college credits sent to the Dexter Hanley Admissions Office, The University of Scranton, Scranton, PA 18510.
6. Register for ACE I through Dexter Hanley College.

Note: Once accepted, LPNs are subject to all policies for nursing students as indicated in the University’s Nursing Student Handbook.

Advanced Placement Exams

Students are accepted into the LPN to B.S.in Nursing program after they successfully complete the ACE II exams, offered in January and June of each year. After acceptance, LPNs meet with a nursing advisor to plan their curriculum. If the student successfully completes the optional ACE II (Medical/Surgical and Obstetrics/Pediatrics), the following courses will be waived:

B.S. IN LIBERAL STUDIES  
The Liberal Studies major is a highly individualized program offered exclusively through Dexter Hanley College. Applicants who have attended other accredited colleges may transfer up to 60 credits for applicable courses in which a grade of “C” or better has been earned. Students who qualify for this interdisciplinary degree program are eligible to earn as many as 30 semester hours for academically relevant experience.

Notes  
• All Liberal Studies students must take two courses designated as writing intensive (W) and two courses designated as cultural-diversity (D).
• In compliance with terms set by AACSB accreditation, no more than 30 credits of the concentration may be courses in the Kania School of Management.
• The only Physical Education courses that are accepted as Liberal Studies concentration credits are those that are 3 or more credits. 
• No minors are granted with the Liberal Studies program.
• No transcripted interdisciplinary programs are accepted as Liberal Studies concentrations.

ASSOCIATE IN ARTS  
The Associate in Arts is often classified as the Liberal Arts “transfer degree” in that it provides the student with a broad exposure to the arts and sciences.

Degree Requirements for Associate in Arts  
Each candidate for the degree must complete 60 semester hours of credit. Of these, 54 credits must be earned in the liberal arts, according to a prescribed plan covering the humanities, social/behavioral sciences, philosophy, theology/religious studies, and natural sciences/mathematics. The remaining 6 semester hours are allotted to free electives.

Associate in Science: Political Science Curriculum

To earn the Associate of Science degree in Political Science the student must successfully complete 60 semester hours of credit. Of these, 48 credits must be earned in the liberal arts, according to a prescribed plan covering the humanities, philosophy, theology/religious studies, social/behavioral sciences, and natural sciences/mathematics. Twelve additional credits must be earned in the major field. The remaining 6 semester hours are allotted to free electives in either the area of specialization or any other field.

CERTIFICATES FOR ACADEMIC CREDIT

A Certificate Program is an educational opportunity to gain professional knowledge or training in a specific field before or after pursuing a degree. Students enroll in the undergraduate certificate programs with a variety of educational backgrounds ranging from having completed no college work to having earned a degree.

The courses a certificate student takes are part of the regular curriculum of the University. Certificate programs are comprised of eight academic credit courses that are recorded permanently on the student’s transcript. Some certificates also include guided learning experiences.

In order to earn a certificate, a student must maintain at least a C average in the certificate course and must successfully complete any other requirements as stipulated for a specific certificate program. Generally, no more than 6 credits may be transferred into a certificate program.

Application to a certificate program is made through the Dexter Hanley College Admissions Office. After a student’s application is approved, the student is accepted into the program and may then register. A student is responsible for conferring with an advisor before registering and as needed in the course of earning the certificate.

In certain certificate programs, the required courses may be waived on the basis of prior experience. Certificates available include Advertising/Public Relations, Chemical Abuse Counseling, Computer Information Systems, Gerontology, Health Administration, Human Resources Studies. The Business/Management certificates are Level I: Business; Level II: Accounting, Personnel Management, and Pre-M.B.A.

Students enrolled in a 24-credit certificate program, taking at least 3 credits per semester, may be eligible for financial aid. The Financial Aid Office should be contacted for further details.

Certificate in Advertising/Public Relations (24 credits)*

A program designed for adults who are seeking entry-level or advancement opportunities in advertising, promotion and public relations. Students with life-experience in advertising, promotion or public relations may wish to take the more advanced courses. An advisor should be consulted before doing so.

Required Courses

| COMM 120 | Mass Communication |
| COMM 224 | Newswriting (or COMM 324: Advanced Newswriting) |
| COMM 225 | Advertising (or COMM 325: Advanced Copywriting) |
| COMM 226 | Writing for Public Relations (or COMM 227: Public Relations) |

Elective Courses (select four)

| COMM 110 | Interpersonal Communication |
| COMM 222 | Television Production |
| COMM 227 | Political Relations |
| COMM 311 | Political Communication |
| COMM 312 | Organizational Communication |
| COMM 314 | Legal Communication and Research |
| COMM 316 | Communication Ethics |
| COMM 323 | TV Journalism |
| COMM 324 | Advanced Newswriting |
| COMM 325 | Advertising Copywriting |
| COMM 326 | Political Advertising |
| COMM 327 | Public-Relations Cases |
| COMM 328 | News Editing |
| COMM 329 | Graphics |
| COMM 331 | Mass-Media Management |
| COMM 334 | Broadcast Programming |
| COMM 380 | Advertising Practicum |
| COMM 410 | Communication Theory |
| COMM 411 | Persuasion and Propaganda |
| COMM 425 | Cable Television |
| COMM 481 | Internship |
| COMM 482 | Directed Independent Study |

* Some daytime courses will be required.

* Some daytime courses will be required.
Certificate in Business/Management (24 or 36 credits)

Level I: Business

The Level I Certificate Program in Business will comprise 24 credits, with no more than 6 credits allowed by way of transfer from another college. The Level I program is open to any qualified students (i.e., those who meet the DHC entrance requirements).

Courses

ACC 253, 254 Financial Accounting, Managerial Accounting
C/IL 104 Computing and Information Literacy
ECO 153, 154 Principles of Microeconomics, Macroeconomics
MGT 161 Introduction to Business
MGT 251 Legal Environment of Business

Free Elective (Advisor Approved)

Certificate in Chemical-Abuse Counseling (24 credits)

This is a program designed for individuals who hold a bachelor degree in human services or a related field, or are matriculating in a baccalaureate program in counseling and human services or a related field, and are interested in pursuing careers in substance abuse counseling.

Completion of course work alone is only one of several criteria for state certification. State certification requires a minimum of a baccalaureate degree, 1,500 hours of supervised clinical work experience in a drug and alcohol treatment facility or agency, and successful completion of a state-wide examination as specified for each level of certification.

Required Courses

CHS 241 Case Management and Interviewing
CHS 242 Counseling Theories
CHS 421 Addictions
CHS 422 Substance-Abuse Education
CHS 423 Health and Legal Aspects of Substance Abuse

Elective Courses (select three)

CHS 112 Human Service Systems
CHS 323 Psychiatric Rehabilitation
CHS 331 Health and Behavior
CHS 334 Marital and Family Counseling
CHS 341 Group Dynamics
CHS 441 Crisis Intervention

Certificate in Information Systems (24 credits)

This program is designed to introduce individuals to computers, and to expand the required math and programming skills needed for data analysis. The program targets:

1. Individuals presently in business who need to develop a greater familiarity with computer applications.
2. Individuals who are seeking to develop entry-level skills necessary for business computing.

Required Courses

MATH 142 Discrete Structures*
CMPS 134 Computer Science I
CMPS 144 Computer Science II
CMPS 330 Information-Systems Analysis
CMPS 340 File Processing

Elective Courses (select two)

CMPS 331 Systems Analysis and Design
CMPS 341 Database Systems
CMPS 240 Data Structures

Certificate in Forensic Health (12 credits)

This program is designed to advance interest in forensic issues as they relate to victims and offenders. Forensic Health is the application of the health-related sciences to public or legal proceedings, focusing on the forensic aspects of health care in the scientific investigation and treatment of victims and perpetrators of abuse, violence, criminal activity, and terrorism.

This certificate is open to all adults who meet the requirements for admission to Dexter Hanley College but is of particular interest to those in health-related professions such as nursing, counseling, psychology, social work, emergency response and occupational therapy, as well as those in legal and criminal justice professions. Those interested in this certificate must complete the required 3-credit courses and one elective 3-credit course for a total of 12 credits.

Required Courses

GERO 110 Introduction to Gerontology
GERO 230 Social Policy and Aging
GERO 232 Aging and Death

Elective Courses (select five)

GERO 112 Social Problems of Aging
GERO 212 Aging and the Life Cycle
GERO 214 Aging and Human Behavior
GERO 216 Aging and the Community
GERO 218 Health and Aging*
GERO 220 Crime and Aging

Certificate in Gerontology (24 credits)†

Basic Certificate Program

A program designed to meet the needs of persons currently employed in the field of aging by providing course work designed to increase and refine knowledge and practitioner skills.

Required Courses

GERO 110 Introduction to Gerontology
GERO 230 Social Policy and Aging
GERO 232 Aging and Death

Elective Courses (select five)

GERO 112 Social Problems of Aging
GERO 212 Aging and the Life Cycle
GERO 214 Aging and Human Behavior
GERO 216 Aging and the Community
GERO 218 Health and Aging*
GERO 220 Crime and Aging

Advanced Certificate Program

A program for persons with some previous college experience who are considering a career in the field of gerontology.

* Some prerequisite courses may be required, as determined by math-placement testing.
* Some daytime courses may be required.
† Recommended.

The Graduate School

The Graduate School offers advanced study in a variety of professional fields as well as in the humanities and sciences. Its students are drawn from throughout Northeastern Pennsylvania, several surrounding states and from over 20 foreign countries. The students are pursuing master’s degrees, various types of certification and personal enrichment.
The Graduate School offers advanced study in a variety of professional fields as well as in the humanities and sciences. Its students are drawn from throughout Northeastern Pennsylvania, several surrounding states and from over 20 foreign countries. The students are pursuing master’s degrees, various types of certification and personal enrichment.
The Graduate School

For more than half a century, The University of Scranton has provided advanced, post-baccalaureate education.

Doctoral Program

The University offers an online transitional Doctor of Physical Therapy (D.P.T.) program is open to all master’s-educated physical therapists (i.e., those who hold an M.P.T.). For general information about the D.P.T. degree, see page xxx. Further information about the transitional D.P.T. program is available in the Graduate School Catalog.

Master’s Degree Programs

The University offers master’s degrees in the 22 programs listed below. Programs for supervision, superintendent’s letter of eligibility, and teacher’s certification are also available.

- Biochemistry
- Business Administration (M.B.A.)
- Chemistry
- Clinical Chemistry
- Curriculum and Instruction
- Community Counseling
- Early Childhood Education
- Educational Administration
- Elementary Education
- English
- English as a Second Language
- Health Administration (M.H.A.)
- History
- Human Resources Administration
- Nursing
- Occupational Therapy
- Physical Therapy (M.P.T.)
- Reading Education
- Rehabilitation Counseling
- School Counseling
- Secondary Education
- Special Education
- Software Engineering
- Theology

Combined Baccalaureate/Master’s Degree Program

An undergraduate student who plans to go on to graduate study in the field of Accounting, Biochemistry, Chemistry, Computing Sciences, Health Administration/Human Resources, History, Human Services or Nursing may be eligible for admission to the Combined Baccalaureate/Master’s Degree Program. This program allows an undergraduate student already enrolled in one of these fields, and who has excellent academic records, to complete requirements for the baccalaureate, while also electing graduate courses.

Departments participating in this program may award some graduate work to satisfy undergraduate degree requirements (not to exceed 12 credit hours). In participating undergraduate departments, the student’s advisor will recommend the undergraduate course work for which graduate credits may be substituted.

The selection of the graduate course work, the particular credits to be applied toward an undergraduate degree, and a prospectus of study require the approval of the student’s undergraduate program advisor, the chair of the department housing the student’s undergraduate degree program, the graduate program director in the student’s academic discipline, the appropriate undergraduate-program dean, and the dean of The Graduate School.

T he Combined Baccalaureate/Master’s Degree student will be expected to complete his/her baccalaureate degree no later than the semester in which he/she completes the master’s degree. Often, the student entering the Combined Baccalaureate/Master’s Degree Program will complete both programs during a five-year time period.

For further information concerning possible participation in the Combined Baccalaureate/Master’s Degree Program, please refer to the Graduate School Catalog of The University of Scranton or contact the Graduate School at (570) 941-7600. You may also contact the following offices directly:

**Accounting**

- Dr. Michael O. Mensah (570) 941-7569
- Dr. Christopher Baumann (570) 941-6389
- Dr. David Marx (570) 941-7511

**Computing Sciences**

- Dr. Yaodong Bi (570) 941-6108
- Prof. Richard Plishka (570) 941-6111

**Counseling and Health Services**

- Dr. Oliver J. Morgan (570) 941-6171
- Dr. Ann Marie Toloczko (570) 941-6172

**Elementary or Special Education**

- Debra L. L. Lo (570) 941-7579
- Dr. Timothy J. Hobbs (570) 941-6244

**Health Administration/Human Resources**

- Dr. Peter C. Olden (570) 941-4350
- Dr. Raymond Champagne (570) 941-7428
- Dr. Michael DeMichele (570) 941-7443
- Dr. Mary Jane Hanson (570) 941-4060
- Dr. Patricia Harrington (570) 941-7673

**Graduate Assistantships**

Approximately 70 graduate assistantships are available each year. Students awarded assistantships receive stipends and are entitled to tuition scholarships.

Applicants for graduate assistantships must have a complete Application for Admission on file in the Graduate School Office. Applications for graduate assistantships must be submitted by March 1. Awards are made on the basis of the student’s academic record, experience and promise as a graduate student. Graduate students may also apply for Guaranteed Student Loans (GSL) and Federal Work-Study.

**Scheduling**

Most classes are offered from 4:30 to 7:10 p.m. and 7:20 to 10:00 p.m., Monday through Thursday, in the fall and spring terms. Almost all courses meet one night per week. Summer and intersession classes are also available.

**Housing**

The University maintains shared apartment facilities for graduate students wishing to live on campus. These are available on a first-come, first-served basis. For further information, please contact:

- Office of Residence Life
- The University of Scranton
- Scranton, Pennsylvania 18510-4631

**Center for Continuing Education**

The Center for Continuing Education (CCE) is a division of The Graduate School at The University of Scranton. CCE offers a wide range of programs to meet the professional development needs of area industries and adults. CCE programs include graduate education workshops for teachers; non-credit technology/computer certification, certificates and packages; and supervisory and fee, three letters of reference and official copies of their transcripts. In addition to these requirements, which apply to all programs, individual programs may have special requirements such as test scores, personal interviews or writing samples. Consult the Graduate School Catalog for these special requirements.

International students whose native language is not English must submit scores from the Test of English as a Foreign Language (TOEFL), Society for Testing English Proficiency (STEP) or International English Language Testing System (IELTS). Scores required on this test for admission vary by program. Consult the Graduate School Catalog for minimum scores applicable to each program.

All application documents should be on hand in the Graduate School Office at least one month before the intended starting term. Consult the Graduate School Catalog for more stringent deadlines for the Counseling, Health Administration and Nursing programs. International students should have their credentials in the Graduate School Office at least three months before the term in which they would like to begin their studies. Students may begin their studies in fall, spring, or summer. Software Engineering, Counseling, and Health Administration students may begin their studies only in the fall semester.
The Graduate School

For more than half a century, The University of Scranton has provided advanced, post-baccalaureate education.

Doctoral Program

The University offers an online transitional Doctor of Physical Therapy (D.P.T.). The program is open to all master’s-educated physical therapists (i.e., those who hold an M.P.T.). For general information about the D.P.T. degree, see page xxx. Further information about the transitional D.P.T. program is available in the Graduate School Catalog.

Master’s Degree Programs

The University offers master’s degrees in the 22 programs listed below. Programs for supervision, superintendent’s letter of eligibility, and teacher’s certification are also available.

- Biochemistry
- Business Administration (M.B.A.)
- Chemistry
- Clinical Chemistry
- Curriculum and Instruction
- Community Counseling
- Early Childhood Education
- Educational Administration
- Elementary Education
- English
- English as a Second Language
- Health Administration (M.H.A.)
- History
- Human Resources Administration
- Nursing
- Occupational Therapy
- Physical Therapy (M.P.T.)
- Reading Education
- Rehabilitation Counseling
- School Counseling
- Secondary Education
- Special Education
- Software Engineering
- Theology

Combined Baccalaureate/Master’s Degree Program

An undergraduate student who plans to go on to graduate study in the field of Accounting, Biochemistry, Chemistry, Computing Sciences, Health Administration/Human Resources, History, Human Services or Nursing may be eligible for admission to the Combined Baccalaureate/Master’s Degree Program. This program allows an undergraduate student already enrolled in one of these fields, and who has excellent academic records, to complete requirements for the baccalaureate, while also electing graduate courses.

Departments participating in this program may allow some graduate work to satisfy undergraduate degree requirements (not to exceed 12 credit hours). In participating undergraduate departments, the student’s advisor will recommend the undergraduate course work for which graduate credits may be substituted.

The selection of the graduate course work, the particular credits to be applied toward an undergraduate degree, and a prospectus of study require the approval of the student’s undergraduate program advisor, the chair of the department housing the student’s undergraduate degree program, the graduate program director in the student’s academic discipline, the appropriate undergraduate-program dean, and the dean of The Graduate School.

The Combined Baccalaureate/Master’s Degree student will be expected to complete his/her baccalaureate degree no later than the semester in which he/she completes the master’s degree. Often, the student entering the Combined Baccalaureate/Master’s Degree Program will complete both programs during a five-year time period.

For further information concerning possible participation in the Combined Baccalaureate/Master’s Degree Program, please refer to the Graduate School Catalog of the University of Scranton or contact the Graduate School at (570) 941-7600. You may also contact the following offices directly:

  B.B.A., The Pennsylvania State University
  M.B.A., Ph.D., Temple University
  Chair, Department of Psychology (2003)
  B.A., The Pennsylvania State University
  M.A., The Pennsylvania State University
  Professor, History (1981)
  B.A., The Pennsylvania State University
  M.A., Marshall University
  M.S., M.Div., St. Louis University
  Associate Professor, Theology/Religious Studies (1985)
  A.B., M.A., Boston College
  Ph.L., S.T.L., Weston College
  B.S., Gannon University
- **Michael C. Cann, D. et U.* (1975)**
  Professor, Chemistry (1988)
  B.A., Marist College
  M.A., Ph.D., State University of New York at Stony Brook
  Professor, Education (1997)
  B.S., The University of Scranton
  M.Ed., Doctoral Studies, The Pennsylvania State University
- **Joseph A. Buxton (1990)**
  Assistant Professor, Nursing (2005)
  B.S., Albright College
  M.S., Wilkes University
  Ph.D. cand., University of Wisconsin
Faculty Emeriti

Panos Apostolidis, Ph.D. (1977-89)  
Department of Management/Marketing

Department of Nursing

John J. Baldi, M.S.S.W., D.S.S., D. et U.* (1948-81)  
Department of Sociology

Department of Economics/Finance

Richard J. Bourcier, Ph.D., D. et U.* (1968-93)  
Department of Foreign Languages and Literature

Edward J. Capetany, Ph.D., D. et U.* (1968-96)  
Department of Philosophy

Department of Foreign Languages and Literatures

John J. Clarke, Ph.D. (1986-95)  
Department of Communication

Department of Counseling/Human Services

Department of Education

Department of Physicalelectrical Engineering

Joseph C. Dougherty, Ph.D., D. et U.* (1967-91)  
Department of History/Political Science

Joseph T. Evans, Ph.D., D. et U.* (1953-93)  
Department of Biology

Department of Nursing

Assistant Professor, Nursing (2005)

Eileen B Hewitt, M.S. (1982-99)  
Assistant Professor, Psychology (1992)

A. John Giunta, Ph.D., D. et U.* (1960-93)  
Assistant Professor, Accounting (2000)

John J. Baldi, M.S.S.W., D.S.S., D. et U.* (1948-81)  
Department of Sociology

Marianne McTighe, M.S., D. et U.* (1946-86)  
Library

Liberal A. Norton, M.S., D. et U.* (1946-88)  
Library

Department of Theology/Religious Studies

Angelina T. Scardamaglia, M.S., D. et U.* (1947-78)  
Assistant Professor, Psychology (1991)

Department of Chemistry

Library

Department of Mathematics

Department of Health Administration and Human Resources

Department of History/Political Science

Marianne McTighe, M.S., D. et U.* (1946-86)  
Library

John J. Murray, Ph.D., D. et U.* (1957-88)  
Department of Philosophy

John J. Baldi, M.S.S.W., D.S.S., D. et U.* (1948-81)  
Department of Sociology

Department of Education

John J. Baldi, M.S.S.W., D.S.S., D. et U.* (1948-81)  
Department of Sociology

Department of Management/Marketing

Assistant Professor, Psychology (1991)

Department of Education

Assistant Professor, Nursing (2005)

Edward J. Capestany, Ph.D., D. et U.* (1968-96)  
Department of Philosophy

Department of History/Political Science

John C. Williams, M.S., D. et U.* (1964-90)  
Department of Education

Department of Management/Marketing

Department of Accounting

Faculty of Instruction

Brad A. Alfred (1989)  
Professor, Psychology (1999)

B.A., Millikaps College

M.A., Ph.D., University of Mississippi

Assistant Professor, Communication (2003)

B.A., Augusta

M.A., Ph.D., University of Georgia

Scott C. Bader-Saye (1997)  
Associate Professor, Theology/Religious Studies (2003)

B.A., Davidson College

M.Div., Yale Divinity School

Assistant Professor, Sociology/Criminal Justice (2000)

B.S., M.S., Virginia Commonwealth University

M.Ed., M.S., East Stroudsburg University

Associate Professor, Psychology (1985)

B.A., University of Nevada

Ph.D., University of Maine

Assistant Professor, Education (2003)

B.S., Shippensburg University

M.Ed., Kutztown University

Ph.D., Temple University

Christopher A. Baumann (1984)  
Professor, Chemistry (1998)

B.S., Oregon State University

Ph.D., University of Florida

Professor, English (1995)

A.B., Westmont College

M.A., University of Chicago

Ph.D., University of Texas

Associate Professor, Theology/Religious Studies (1985)

A.B., M.A., Boston College

Ph.L., S.T.L., Weston College

C.S., S.T.D., Gregyn University

John A. Beidler, C.D.P., D. et U.* (1964)  
Professor, Computing Sciences (1976)

A.B., King's College

M.A., Lehigh University

Ph.D., Boston College

W. Andrew Berger (1989)  
Professor, Physical/Engineering (2001)

M.S., Technical University of Poznan, Poland

M.S., Ph.D., Drexel University

Robert M. Bessoir, D. et U.* (1968)  
Professor, Exercise Science and Sport (1994)

B.S., The University of Scranton

M.S., East Stroudsburg University

Yaodong Bi (1991)  
Assistant Professor, Computing Sciences (1997)

B.S., M.S., Northeastern University of Technology

Shenyang, People's Republic of China

Ph.D., University of Illinois

Professor, Management/Marketing (2001)

B.A., M.A., Ph.D., Temple University

Benjamin Bishop (2003)  
Assistant Professor, Computing Science (2003)

B.S., M.S., Ph.D., University of Scranton

David W. Black (1984)  
Professor, Philosophy (1994)

B.A., Northern Illinois University

M.A., A.D., The Pennsylvania State University

Instructor, Occupational Therapy (2003)

B.A., Manhattanville College

M.S., College Misericordia

Lori A. Bruch (1995)  
Associate Professor, Counseling and Human Services (2002)

B.S., M.Ed., The Pennsylvania State University

M.S., The University of Wisconsin-Stout

Ed.D., George Washington University

Alan L. Brumagim (1990)  
Associate Professor, Management/Marketing (1996)

B.B.A., The Pennsylvania State University

M.B.A., Ph.D., Temple University

James P. Buchanan, D. et U.* (1977)  
Chair, Department of Psychology (1993)

A.B., A.S., Holy Family University

Associate Professor, Psychology (1981)

B.A., The Johns Hopkins University

M.A., Ph.D., University of California, Los Angeles

Barbara K. Buxton (2005)  
Assistant Professor, Nursing (2005)

B.S., Albright College

M.S., Wilkes University

Ph.D., cand., University of Wisconsin

* The designation D. et U. is an indication of the Pro Deo et Universitate Award, given for 20 or more years of service to the University.
Barbara Cozza (1997)  
Associate Professor, Education (2002)  
B.F.A., M.S., Hunter College  
Ph.D., Fordham University

Rebecca Spirito Dalgin (2005)  
Assistant Professor, Counseling/Human Services (2005)  
B.A., Quinipiac University  
M.S., Ph.D. cand., Syracuse University

Harry R. Dunn (2002)  
Chair, Department of Sociology/Criminal Justice (2004)  
Associate Professor, Sociology/Criminal Justice (2002)  
B.S., M.S., University of Dayton  
Ph.D., Rutgers University School of Criminal Justice

John Deak (2002)  
Assistant Professor, Chemistry (2002)  
B.S., University of Buffalo  
Ph.D., University of Rochester

Professor, Exercise Science and Sport (1998)  
A.B., Villanova University  
M.S., University of Utah  
Ph.D., University of Maryland

Michael D. DeMichele and D. E. * (1967)  
Chair, Department of History (1998)  
Professor, History (1974)  
B.S., The University of Scranton  
M.A., Ph.D., The Pennsylvania State University

Professor, Biology (1977)  
B.A., The University of Scranton  
M.S., St. John’s University  
Ph.D., Hahnemann Medical College Graduate School

Jones DeRitter (1990)  
Chair, Department of English (1999)  
Professor, English (2002)  
A.B., Oberlin College  
M.A., Ph.D., University of Virginia

Linda H. Desmond, R.N. (1987)  
Assistant Professor, Nursing (1990)  
R.N., Beebe Hospital School of Nursing  
B.S.N., Cedar Crest College  
M.A.S.N., University of Delaware  
Ed.D., Columbia University

Trudy A. Dickneiter (1984)  
Professor, Chemistry (1997)  
B.A., M.A., St. Joseph’s College  
Ph.D., University of Miami

Mary Jane K. DiMattio (1993)  
Associate Professor, Nursing (2004)  
B.S., The University of Scranton  
M.S.N., Villanova University  
Ph.D., University of Pennsylvania

Roy Palmer Domenico (1997)  
Professor, History (2005)  
B.A., University of Wisconsin  
M.A., University of Connecticut  
Ph.D., Rutgers University

Steven T. Dogherty (1992)  
Professor, Mathematics (2003)  
B.S., The University of Scranton  
M.S., Ph.D., Lehigh University

Associate Librarian (1990)  
B.A., California Baptist College  
M.S.L.S., University of Oklahoma  
M.S., The University of Scranton

Josephine M. Dunn (1995)  
Associate Professor, History (1998)  
B.A., B.E.A. University of Houston  
M.A., Ph.D., University of Pennsylvania  
Professor, Psychology (1974)  
B.S., The Pennsylvania State University  
M.A., University of Massachusetts

Kathleen G. Dwyer (1994)  
Professor, Biology (2005)  
B.S., East Stroudsburg University  
M.A., Ph.D., Princeton University

Gary E. Eichelsdorfer, D. E. * (1965)  
Associate Professor, Mathematics (1979)  
A.B., Gannon College  
M.A., University of Detroit

Laura Helene Ellis, C.P.A. (1994)  
Associate Professor, Accounting (2001)  
B.A., Carroll College  
M.A., University of Montana  
Ph.D., University of Oregon

Lee Ann M. Eschbach (1986)  
Associate Professor, Counseling and Human Services (1995)  
B.S., M.S., Ph.D., Washington State University  
Paul Fahey, D. E. * (1968)  
Professor, Physics/Electrical Engineering (1978)  
B.S., The University of Scranton  
M.S., University of Virginia

Professor, Philosophy (1970)  
B.A., M.A., Loyola University, Chicago  
Ph.D., University of Notre Dame

Professor, Nursing (2002)  
B.S.N., M.S.N., College Misericordia  
M.S., Syracuse University  
Ph.D., Adelphi University

Anthony P. Ferrara (1999)  
Associate Professor, Mathematics (1990)  
B.A., Queens College  
M.A., Ph.D., New York University

Debra L. Fetherman (2000)  
Assistant Professor, Exercise Science and Sport (2005)  
B.S., Ohio University  
M.S., University of Central Arkansas  
Ph.D., Marywood University

Mary Anne Foley, C.N.D. (1991)  
Associate Professor, Theology/Religious Studies (1997)  
B.A., Sacred Heart University  
M.T.S., Weston School of Theology  
M.Phil., Ph.D., Yale University
