Fall Day School Headcounts by Residence

Note: The definition of “class” is based on the number of cumulative credits a student has earned (Freshman 0-29; Sophomore 30-59; Junior 60-90; Senior 90+). According to this definition, a student attending in his or her second year of school will still be considered a freshman if s/he has not yet accumulated 30 credits. Hence this table shows some freshmen and sophomores classified as off-campus students, even though all first- and second-year students must either reside in the dorms or with their families.
