

Meeting Student Learning Outcomes (SLOs) and Remediation

Once admitted to the graduate program, the student must maintain a minimum graduate GPA of 3.0 to remain in the program.

To meet the identified student learning outcomes for each course, all formative evaluations and student learning experiences must be completed and submitted prior to the end of the course. Students must meet an 84% (B) course grade pass standard for all M.S., SLP programmatic requirements. Students who do not meet the 84% (B) pass standard must complete course remediation. A written remediation plan, with a timeline for completion, will be developed by the course instructor no later than 14 days after the final grade is posted. The specific SLO(s), determined by the Instructor to be deficient will be identified in the plan with coinciding remediation learning experiences. The student must meet the remediation plan criterion to meet the courses SLOs. Remediated learning experiences must meet the 84% (B) grade level standard, at a minimum. Once the student has met the minimum level, the specific SLO(s) will be considered remediated. The course grade will not change. Should a student not successfully complete the remediation plan, the student will be required to retake the course. Students are only allowed to remediate two courses and retake one course during their tenure as a graduate student in the program. Failure to successfully pass the re-taken course with a grade of 84% (B) following an unsuccessful remediation will result in dismissal from the SLP program. Students are also required to maintain a minimum overall GPA of 3.0. Students who do not meet the minimum standard will be placed on academic probation. Students on academic probation must achieve a 3.0 GPA within the next 9 graduate credits. Failure to meet these terms will result in dismissal from the SLP program.

Summative assessments include students successfully passing the Praxis Exam 5331 and Comprehensive Evaluation as well as completing the Knowledge and Skills Assessment (KASA) outcomes measure.
