HAD 502 - Health Care Law

Mr. Costello Fall, 2010 McGurrin Hall, Room 402 3 Credits

Course Description:

Impact of legal factors affecting patient/client care and the operations and administration of healthcare facilities and systems. Examines principles and practices of law, legal relationships, sources of law and legal processes affecting the health service system. Conceptual foundations are drawn from the political sciences.

Prerequisites: None

Required Text:

<u>Health Law: Cases, Materials and Problems</u>, by B.R. Furrow, T.L. Greaney, S.H. Johnson, et.al. Sixth Edition. Thomson/West, 2008.

Recommended Text:

<u>Problems in Health Care Law</u>, by Robert D. Miller. Ninth Edition. Jones and Bartlett Publishers, Inc., 2006.

Course Objectives:

During this course, students will:

- A) evaluate specific factual knowledge about legal applications in health care administration.
- B) analyze fundamental principles, generalization and theories of law in health care management.
- C) apply course material to problem-solving and decision-making skills.

Major Course Activities:

A)	Class Lecture	F) (Case Briefings
B)	Class Discussion	G) I	Examinations
C)	Class Participation	H) (Out of Class Project Assignments
D)	Class Attendance	1)	Community Service

E) Reading Assignments

Grading Criteria:

Mid-Term Examination and Final Examination (30% each)
Class Participation to include Case Briefs (20%)
Out of Class Assignment (20%)

Instructor Information:

Michael M. Costello Vice President – Corporate Development Moses Taylor Hospital 700 Quincy Avenue Scranton, PA 18510 (O) 570 340-2021 (H) 570-344-2785

Appendix A

Case Briefs

A case brief is a written outline of a court decision. By outlining a judicial decision according to a predetermined format, the student summarizes the key elements of the case and resulting decision. The outline is an analytical tool to help the student understand the decision of the court.

In briefing the cases listed on the syllabus, use the following outline:

CITATION: Marbury v. Madison

1 Cranch 137, 2 L.Ed. 60 (1803)

NATURE OF CASE: Form of action, type of proceeding, and relief sought.

FACTS: What led to the judicial action.

ISSUE: The concise question to be answered.

HOLDING: What did the court decide?

RATIONALE: Why did the court rule as it did?

Appendix B

Community Service

Out-of-Class Assignment

Litigation Alternatives

Instructions

Many observers have suggested that the civil litigation process is not the best way to resolve medical injury claims because the process is too adversarial, too expensive, too lengthy and often does not result in fair and just outcomes. Several of these sources have recommended that medical injury claims be resolved through other means including:

- 1) Special medical courts
- 2) Mandatory arbitration
- 3) No-fault compensation

as well as others. Through literature reviews, find at least two journal articles on litigation alternatives to medical practice litigation and prepare a written analysis that addresses the following points at a minimum:

- 1) How does the procedure work as an alternative to standard civil litigation?
- 2) In what states, and under what circumstances has the procedure been adopted?
- 3) Has it been effective and how has this been determined?

Attached copies of your articles, and any other source material to your analysis and hand in to the Departmental Secretary by 3 pm on Friday, October 22, 2010.

The written analysis will count for 20% of the final course grade and will be evaluated as follows:

1)	Appropriateness of litigation alternative	25%
2)	Quality of research sources cited and articles attached	25%
3)	Adherence to each of the three points specified above	25%
4)	Quality of the written analysis	25%
